ELECTRIC PARKING BRAKE

With a gentle pull, activate the parking brake. Deactivate with a push of a button.

This feature is automatically released when the accelerator pedal is depressed or when the driver's seatbelt is buckled in.

HOW THE AUTO BRAKE HOLD WORKS

Once Auto Brake Hold is turned on, the driver steps on the brake and the vehicle stops.

The driver releases his foot from the brake pedal and car automatically remains in braking position.

To move forward again, the driver only needs to step on the acceleration pedal.

The ASEAN New Car Assessment Program (ASEAN-NCAP) rated an impressive 5-star rating for Adult Occupant Protection, which also won the Best Overall Adult Occupant Protection in the Grand Prix Awards 2014. Due to the 5-star rule in AOP, only variants with ESC and SBR for both front occupants are rated 5-star; those without are rated Adult Occupant protection 4-star. Honda Cars Philippines, Inc. is honored to make available the HR-V model, which is equipped with the same safety features as the model tested by ASEAN-NCAP.
