

## The Honda Price Promise

One sharp, fair price for everyone and better resale values. That's our promise to protect the value of your investment in a new Honda.

Special deals, demonstrator sales and fleet discounts all work to lower resale prices, undermining the value of your new car and speeding up its depreciation. So at Honda New Zealand, we've traded in the old sales model for a new one that is easier, fairer and offers our customers better value.

You don't have to negotiate to get a fair deal on a new Honda. Our Price Promise gives every buyer the same sharp price right from the start and we promise to keep our prices as reliable and consistent as we possibly can. And that means your new Honda will hold its value better than most other brands.

So when you choose a new Honda, you'll drive away with a great car and lasting value. We promise.

*ACCORD V6*

**HONDA**  
The Power of Dreams

**HONDA**  
The Power of Dreams

From powering Formula One racers  
to designing the engines of tomorrow,  
Honda's greatest achievements come  
to life through the power of dreams.  
Now that same power has helped us to  
create the biggest, most powerful and  
most refined Honda Accord ever.

Accord V6 and V6-L

**THE POWER OF DREAMS**

# POWER

It may seem calm on the surface, but beware.

A potent 3.0 litre, 240 horsepower, 177 kW V6 awaits.

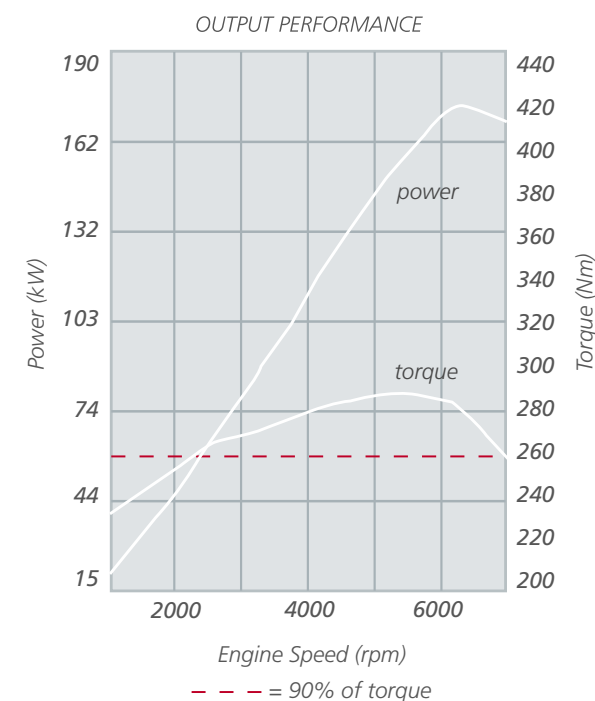

# THE POWER OF SIX

There's nothing quite like the effortless power of a big V6, especially when it's built by one of world's finest engine makers. The Accord V6's 3.0 litre, VTEC, 24-valve, alloy V6 generates 177 kW at 6,250 rpm through one of the world's most refined powertrains. The result is a class-leading power to weight ratio of 8.53 kg/kW and incredible driving performance.

Accord V6-L

## VTEC

Variable Valve Timing with Electronic Lift Control

VTEC responds to your driving style by adjusting the lift and opening duration of the valves to produce low-rpm torque and high-rpm power. At low revs, VTEC adjusts the timing and lift of the valves for optimum torque and fuel efficiency. The asymmetric lift and staggered timing of the intake valves creates a swirl effect inside the combustion chamber, increasing the burn speed and improving combustion stability.

At high engine rpm, VTEC shifts to a dual-valve, high-lift, long-duration cam profile for maximum performance.

## Absolute power. Total control.

Like a velvet glove over an iron fist, the Accord V6's 5-speed electronic automatic transmission is perfectly matched to the power of the engine.

Put your foot down and Honda's Drive-by-Wire system responds instantly, delivering a smooth surge of power and seamless, perfectly timed shifts with outstanding fuel economy.

Chiselled and muscular, with gleaming metal stretched tight over high tensile steel, the Accord V6 is a powerful expression of Honda design. Every surface is sculpted by advanced aerodynamics to slip cleanly through the air for an incredibly quiet, smooth ride and outstanding fuel efficiency.

The integrated remote control in your key controls the central locking and security alarm system whenever you leave or return to your car. The engine immobiliser prevents the Accord V6 from being started without the key as the system responds to a

digital code stored in the key itself. This code changes every time you use your car, making it virtually impossible to copy. When you leave or return to your car on a hot day, you can even use the key to remotely lower all four windows.

Accord V6 Mugen

# POWERFUL PRESENCE

**Accord V6 Mugen**  
From the low rumble of a high-performance exhaust, to huge alloy wheels and ground-hugging skirts and spoilers. Those who demand the ultimate in personalisation can step up to the Accord V6 Mugen adding up to 5% more power.

Each wing mirror features its own elegantly designed indicator. It's an intelligent detail that makes your turning signal even more visible to other drivers.

Like a finely tailored suit, the spacious interior of the Accord V6 feels as if it was made just for you. No detail has been overlooked to create the most welcoming and comfortable cabin where everything fits and functions with perfect precision.

In soft cloth or supple leather, the Accord V6's big comfortable seats were designed in partnership with Shukra, the leaders in seat ergonomics. With full power control in the Accord V6-L, the driver's seat adjusts in almost every direction, keeping you comfortable and alert on the longest journey.

Around the cabin, thoughtful details abound. The sliding centre arm rest is adjustable for extra comfort, while cleverly located storage compartments keep the interior uncluttered and valuable objects safely out of sight.

Open the door and brilliantly illuminated LED dials spring to life from the darkened instrument panel. On even the brightest day, the bold white numerals and red needles are clearly visible.

How do you prefer your steering? For your personal comfort, the wheel tilts and telescopes 40mm to your optimum driving position.

To keep your attention safely focused on the road, the audio system and cruise control can be easily operated by buttons on the steering wheel.

The centre console houses a powerful 6-disc CD sound system and dual zone, climate control air conditioning.

Automatic dual-zone climate control enables the driver and front seat passenger to set individual temperatures to suit their personal comfort level.

Cressa Craft 590 with a Honda B2000 150hp 2.0 litre engine

Accord V6 Mugen

# POWER TO PERFORM

Total confidence. That's the feeling you get when you drive the Accord V6. It's a big, powerful touring saloon in the true sense. A relaxing travelling companion for the longest journey.

## Drive-by-Wire Throttle Control

Step on the accelerator and the Accord V6 responds instantly. Electronic sensors continuously relay the movement of the accelerator pedal to the computer which adjusts the throttle for optimal performance. When you change gear, the system optimises the revs to create a super-smooth transition with seamless power.

## Speed Sensitive Power Steering

The Accord V6's hydraulic rack and pinion power steering gives you just the right amount of feel and control for precise and effortless driving. The system compares steering input and vehicle speed to deliver the perfect response and precision on every surface.

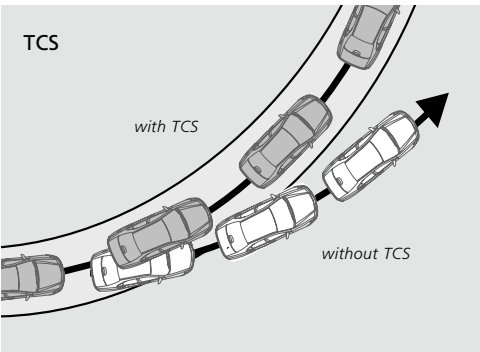

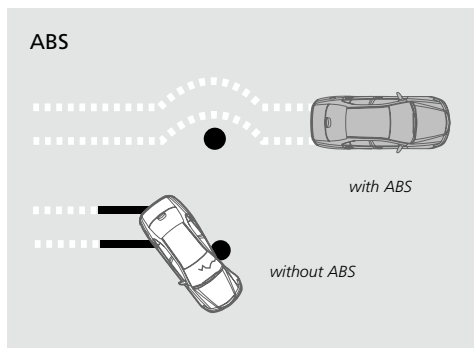

## Sophisticated Suspension

The Accord V6 is designed to cruise and handle effortlessly at speed thanks to its advanced four-wheel double wishbone system with five-link rear suspension. The rear floating subframe and rigid chassis virtually eliminates vibration and noise delivering a superb ride, handling and safety.

A big powerful car needs big powerful brakes. The Accord V6's four-wheel disc brakes with ABS and EBD are more than a match for the performance, providing instantaneous, controlled braking in all conditions.

## Anti-Lock Braking System (ABS)

Computer controlled ABS prevents the wheels from locking and allows you to retain steering control while braking hard or on slippery surfaces. With ABS you can steer away from a potential accident which may otherwise occur with locked wheels.

## Traction Control System (TCS)

For precise control and sporty handling in all driving conditions, the Accord V6 gives you the assurance of not one, but two traction control systems.

**Engine TCS** detects wheel spin during acceleration and cornering and reduces engine power to regain tyre grip.

**Brake TCS** uses intelligent active braking on the front drive wheels to slow a slipping drive wheel and transfer torque to the opposite wheel.

Together, these systems give you greater control in potentially slippery conditions such as towing a boat out of the water or passing on a wet road.

## Electronic Brake Distribution (EBD)

EBD spreads the optimum braking force between the front and rear wheels, depending on the passenger and cargo positioning. With EBD, stopping and braking distances are reduced, which may be the crucial element in preventing a collision.

## Emergency Brake Assist

If you ever have to brake hard in an emergency, the Accord V6 is ready to lend a helping hand.

Sensors detect sudden pedal action and automatically boost your braking power to reduce your stopping distance.

Dual-stage front i-SRS airbags are flanked by SRS side airbags for all-round protection. For extra safety, the Occupant Position Detection System monitors the front passenger's seating position to minimise the risk of airbag injury.

## POWER TO PROTECT

Swift, smooth and safe. These are the defining qualities of a large, luxury sedan. To protect you and your passengers, Honda has equipped the Accord V6 with an arsenal of passive and active safety technology, ready to shield you from harm should the unexpected happen.

With the cruise control and stereo buttons safely located on the steering wheel, you are free to focus solely and safely on the road ahead.

Designed with Honda's G-Force Control technology, the high tensile steel unibody of the Accord V6 surrounds you with side-intrusion beams and passenger safety zones. Hydro-formed steel forms the front subframe which directs the engine, transmission and steering systems away from the passenger compartment in the event of a severe frontal collision.

*Legend verses Accord V6 crash test*

Exhaustive crash testing is the key to the Accord V6's 5 star NHTSA frontal crash test rating.

At our world-class Tochigi crash test facility in Japan, the Accord V6 has been tested for exceptional crash safety in every possible direction. The collapsing of the front of the car shown in the picture is an intentional part of safety design.

Honda's G Force Control technology absorbs the energy of the collision and deflects impact forces away from the passenger cell.

To help us design some of the safest, strongest cars on the road, Honda has invested millions of dollars in the development of advanced crash test dummies. We even developed a special pedestrian dummy to create vehicle exterior designs that minimise the risk of injury to pedestrians.

Three-point ELR seatbelts are standard with pretensioners and load limiters for front seat passengers. For the safety of young passengers, there are three ISOFIX rear seatbelts with top and bottom tether mounting points in the back seats.

# A POWER OF GOOD

Today it's no longer enough for a car simply to be powerful. It also needs the power to create a cleaner, healthier world. So like every new Honda, the Accord V6 is a certified Low Emission Vehicle.

Accord V6 Mugen  **LEV**

LEV is a term applied to any vehicle which meets the tough Californian anti-pollution laws. As part of a programme to reduce vehicle exhaust emissions in California, the state has set emission lowering targets to be reached over the next few years.

The standard set for LEV status is a 70% reduction in hydrocarbon and a 50%

reduction in nitrous oxide emissions over that allowed in 1995. This targeted approach has now been adopted around the world to preserve the quality of our environment for future generations.

As powerful as it is, the Accord V6's 3.0 litre engine not only meets the LEV standard, but exceeds it by a further

80%, earning it a prestigious Euro 3 LEV II rating. The key to achieving this, without sacrificing performance, is Honda's challenging spirit.

By changing the way air and fuel are fed into the engine and designing a more efficient fuel injection system and catalytic converter, Honda

engineers have created a cleaner burning engine without sacrificing power and performance.

Well into the future, the Accord V6 will continue to care for the environment as most of the materials used in the car can be recycled.

# ACCESSORIES

Accord V6 Mugen

For those who desire absolute personalisation for their Accord V6, we offer the opportunity to enhance the sporting nature of your car with genuine Honda and Mugen accessories.

V6 Mugen	V6 S	Accessories		
Front, rear and side skirts	Front, rear and side skirts	17" alloy wheels	Front skirt	Sill garnish kit
Black grille	Exhaust finishers	Floor mats	Ducktail rear spoiler	Leather finished gear knob
Stainless steel sports exhaust	Ducktail rear spoiler	Tow bar	Silver interior accents (to replace wood paneling)	Door end guard
Rear spoiler	Fog lights	Roof rack	MP3 Multimedia player	Gold badging
17" alloy wheels		Fog lights	Cassette player	Wheel arch molding
Fog lights		Boot liner	Door visors	
		Non-skid boot mat

# SPECIFICATIONS

The Accord V6 offers almost every conceivable option as standard. But for those who desire even more luxury, the Accord V6-L adds a fully trimmed leather interior, 8-way power driver seat control and fog lights.

For extra sporting character, V6 S and V6-L S models are available.

For the ultimate in power and performance, V6 Mugen and V6-L Mugen models are available.
