

Civic Sedan

Our Price Promise

One sharp, fair price for everyone and better resale values. That's our promise to protect the value of your investment in a new Honda.

Special deals, demonstrator sales and fleet discounts all work to lower resale prices, undermining the value of your new car and speeding up its depreciation. So at Honda New Zealand, we've traded in the old sales model for a new one that is easier, fairer and offers our customers better value.

You don't have to negotiate to get a fair price on a new Honda. Our Price Promise gives every buyer the same sharp price right from the start and we promise to keep our prices as reliable and consistent as we possibly can. And that means your new Honda will hold its value better than most other brands.

So when you choose a new Honda, you'll drive away with a great car and lasting value. We promise.

HONDA
The Power of Dreams

seventh heaven

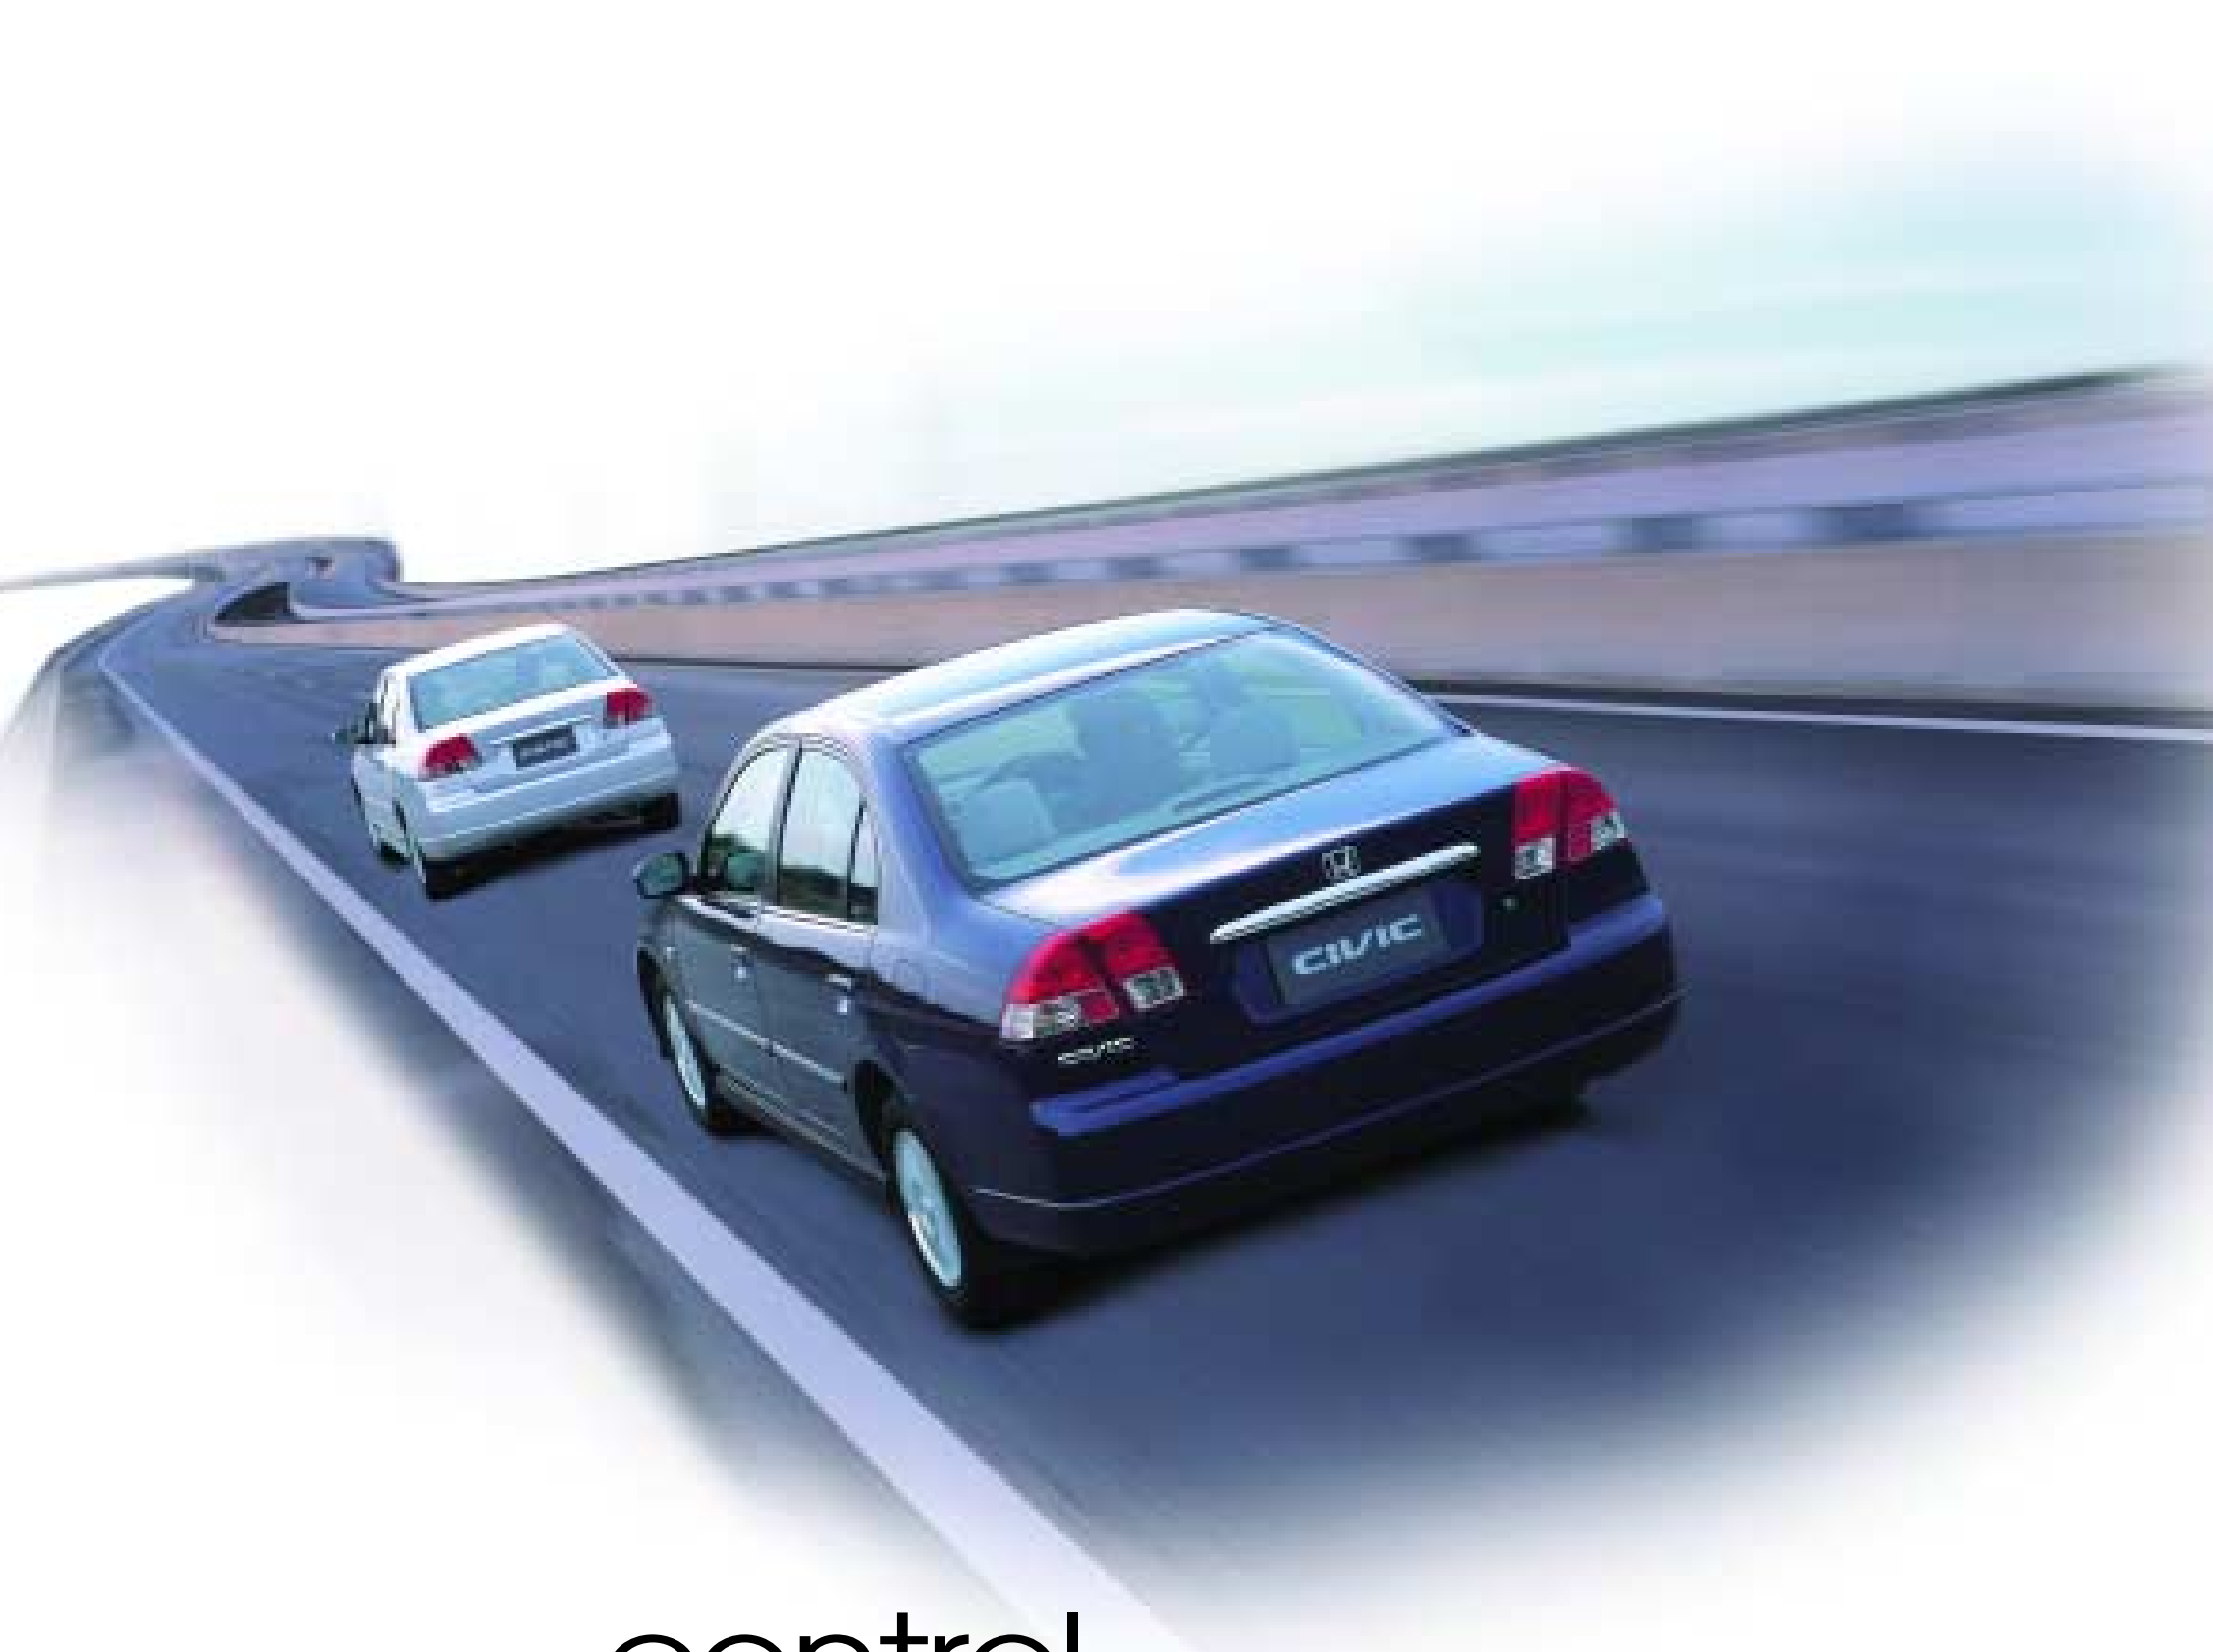

This is the most refined and sophisticated Civic of all. Which is little surprise, given that the Civic is an international success story that dates back over a quarter of a century. The styling of the all-new Sedan is elegant and understated, with body-coloured bumpers, side mouldings and door handles, and subtle hints of chrome on the grille and boot lid. Inside and out, the

fit and finish are in keeping with a car of three times the price. The well-appointed cabin is spacious, offering exceptional headroom and legroom. The boot has more useable space and a wider opening for easier loading and unloading. The seats, upholstered in a rich velour fabric, are raised a little higher for entry and exit. Each model is generously equipped

with dual airbags, auto air conditioning, a four-speaker CD sound system and a whole host of luxury features that are normally the preserve of executive cars. Under the bonnet are compact but more powerful 1.5 and 1.7 litre engines. Complete with the very latest VTEC-II technology they offer the silky power delivery of much larger engines, but with class-leading economy.

Entertaining to drive and supremely refined, the seventh generation Civic Sedan sets a new benchmark for compact sedans in New Zealand.

The instrumentation in the all-new Civic Sedan is a model of clarity and all major controls are within fingertip reach.

The Civic Sedan features Honda's Continuously Variable Transmission. This CVT is smaller, lighter and more efficient than any conventional automatic. It uses a dynamic pulley system to offer an infinite range of gear ratios, giving you remarkably seamless operation. You'll never feel it change gear and the engine can operate at maximum efficiency at all times.

quality with control

From the moment you settle behind the wheel, you're in control. The adjustable driver's seat comes with a fold-down armrest for extra comfort and the tilt steering wheel offers a personal fit. The easy-to-reach controls operate with big-car smoothness.

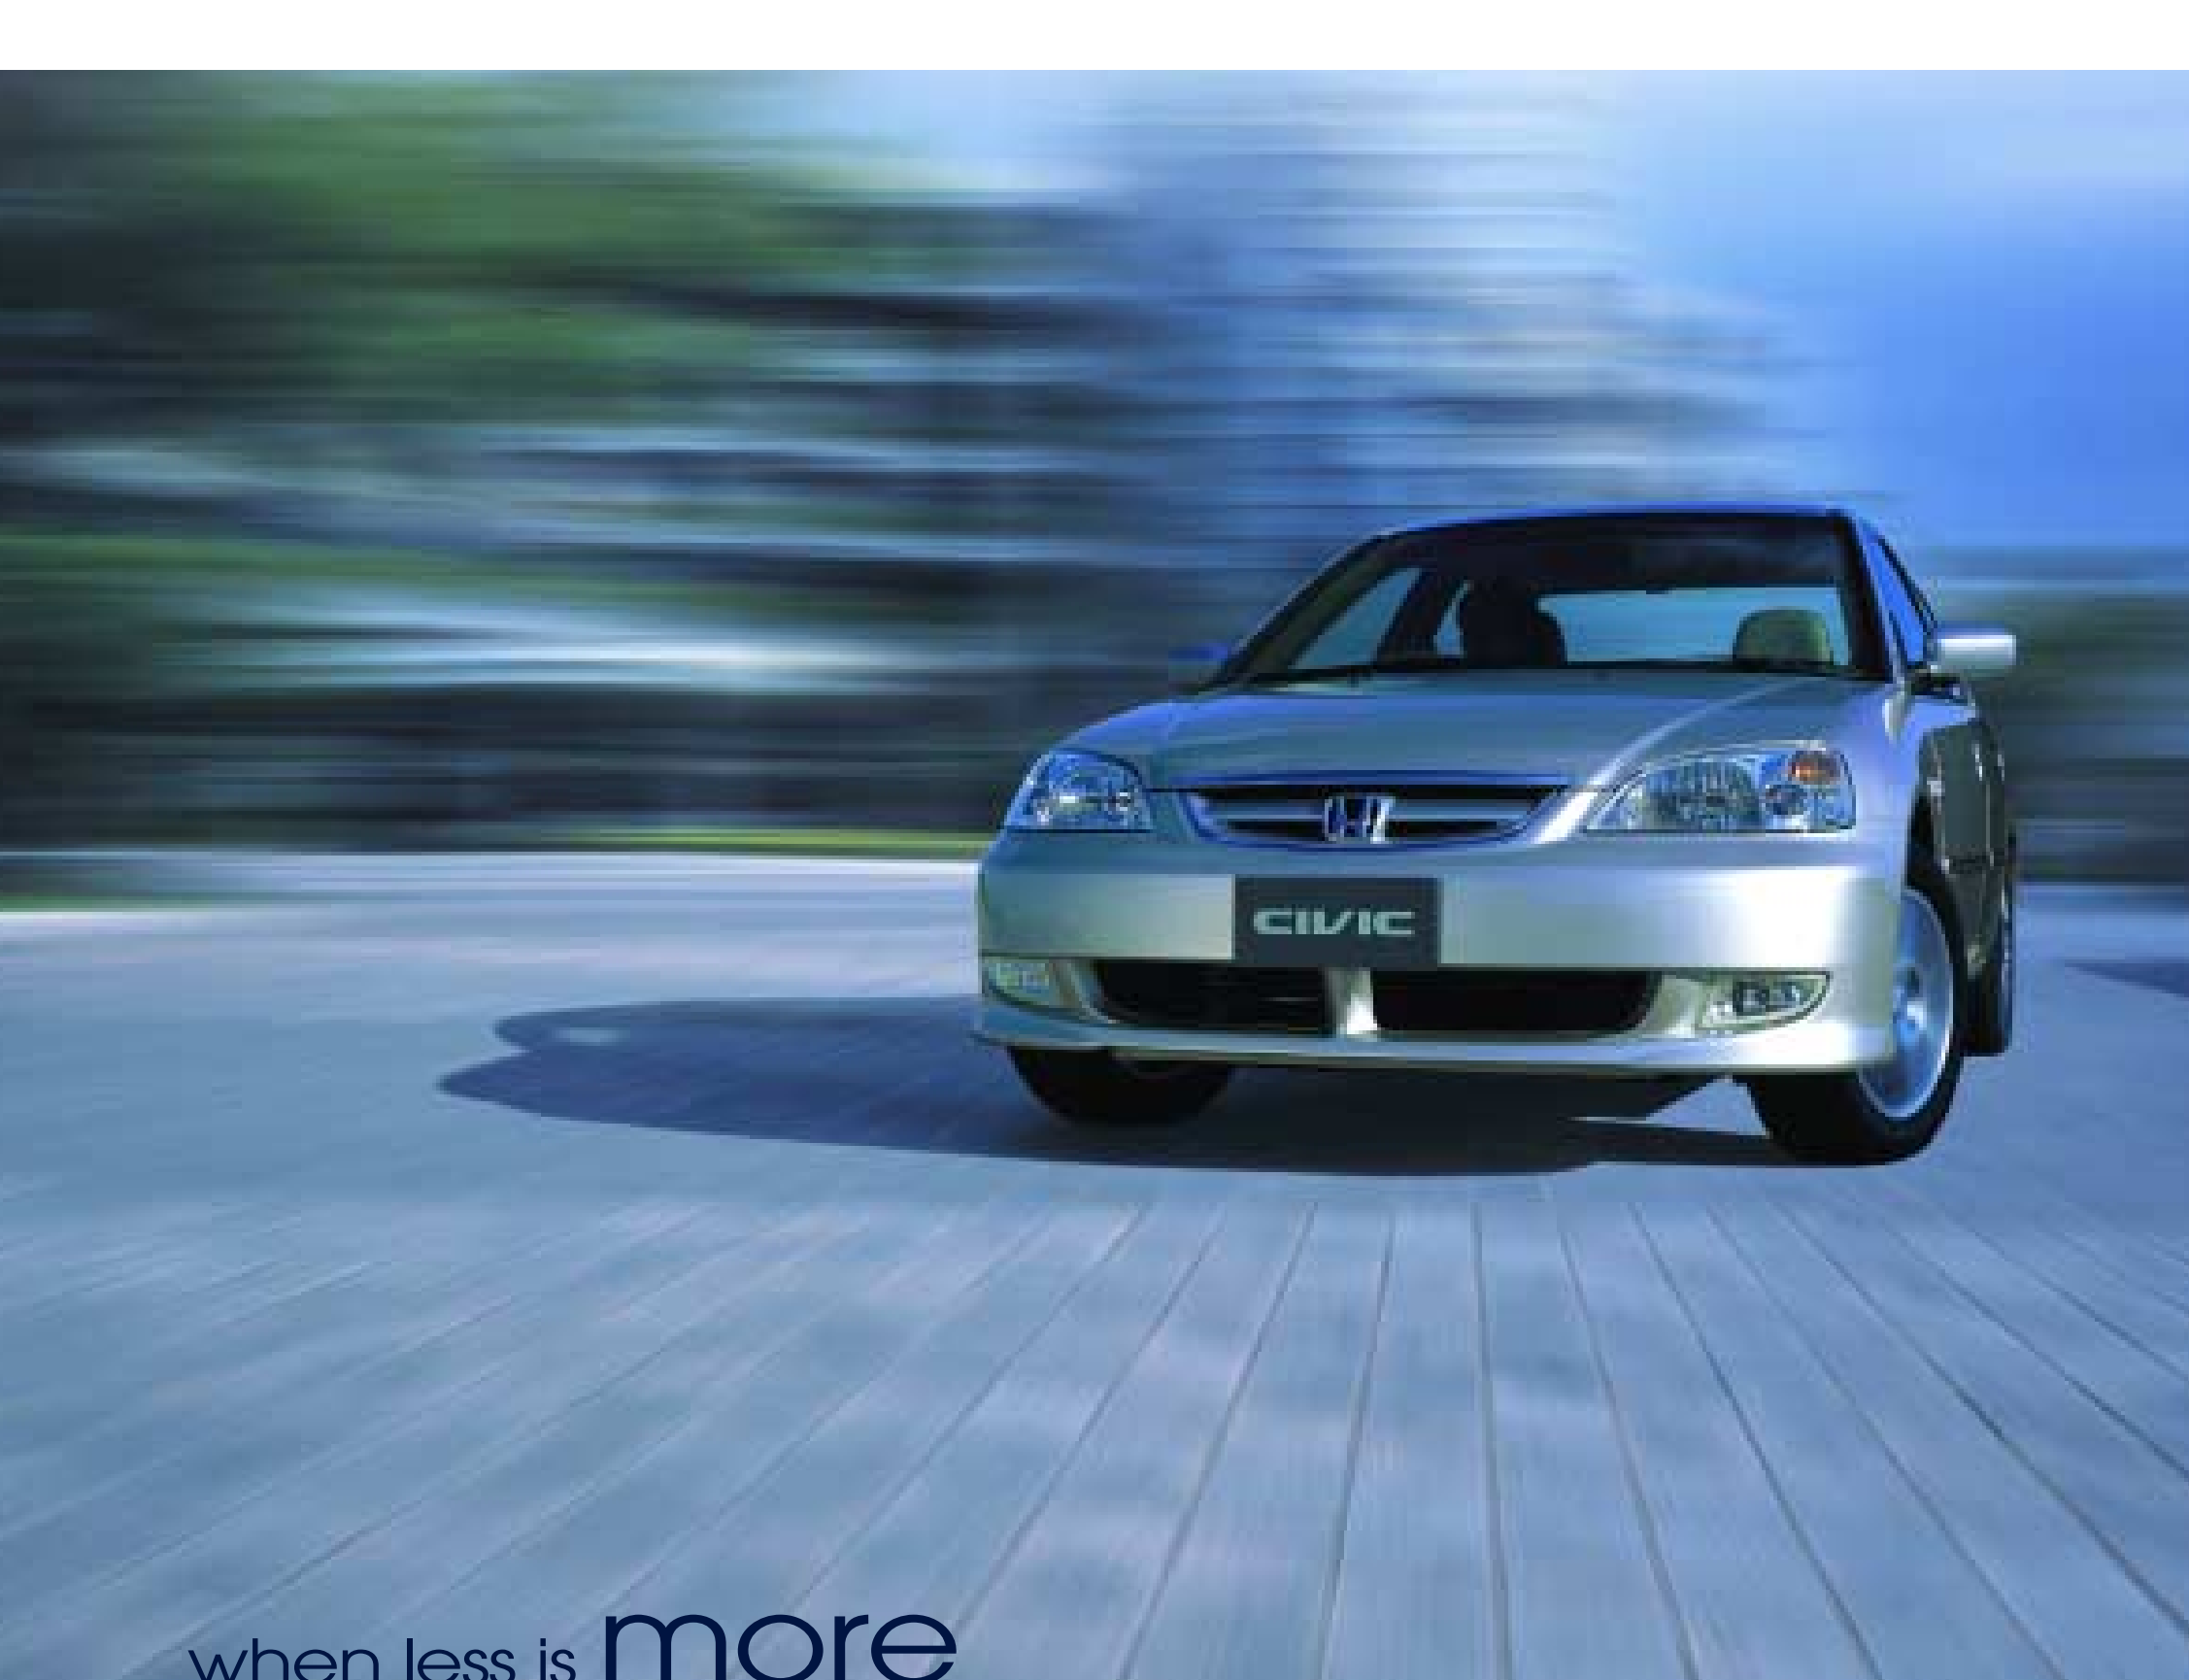

And power windows, mirrors and door locks are at your

beck and call. On the road, you'll be amazed at how taut and balanced the new Civic Sedan feels. The steering is precise and beautifully weighted, with speed-sensitive electric power assistance on all models. The body is highly rigid thanks to computer-aided design techniques and a high-tensile steel structure.

With less vibration and flex, you get high-performance handling and a smoother, quieter ride.

All-wheel, independent suspension gives you exceptional stability, on even the roughest roads and low profile 195/60 tyres on big 15" wheels enhance handling precision. Take a short test drive and you'll realise that the Civic

Sedan is a class above the competition. It's swift, safe and sophisticated. A car you'll be proud to call your own.

when less is **more**

VTEC
Variable Valve Timing with Electronic Lift Control

LOW EMISSION VEHICLE
LEV
Low Emission Vehicle

The Civic Sedan is more fuel-efficient than ever before, setting a new standard for cars of this class in New Zealand. All Civic Sedan engines have four valves per cylinder to increase efficiency and reduce fuel consumption. To boost economy still further, we've also fitted an electronic direct fire injection system.

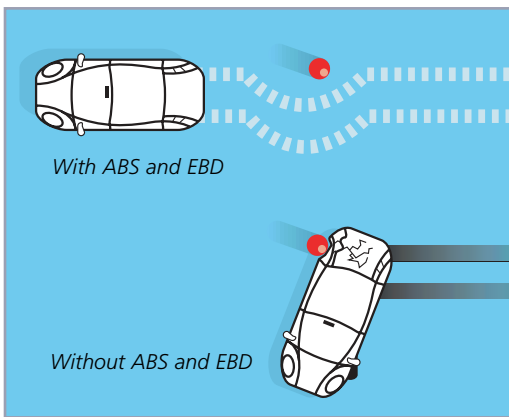

However, this is not at the expense of performance. Our unique VTEC-II technology gives you both low-rpm pulling power and high-rpm horsepower, so you can enjoy a little spirited driving without paying for it at the fuel pump. We've also shown the world how to reduce the impact of emissions on the environment. The first petrol-powered car

to meet California's stringent Low Emission Vehicle (LEV) standard was a Honda.

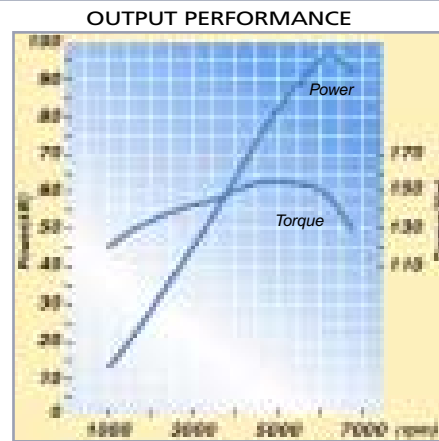

Today, every Civic Sedan sold in New Zealand meets international LEV standards and sets a precedent for other manufacturers to follow. Even better, 90% of the new Civic can be recycled, from the lead-free aluminium radiator to

the trichloroethane-free plastics. No wonder it was class winner in the Inaugural Energywise Rally 2002.

It means you can enjoy your driving to the full, knowing that you've chosen a car that respects not only your wallet, but also the environment.

Civic Sedan handles brilliantly on the move and stops safely in all conditions. Four-sensor, three-channel ABS braking is standard, together with Electronic Brake Distribution (EBD). Whether fully loaded or with just one occupant, EBD adjusts the amount of braking force required between the front and rear wheels to stop safely. In addition, Brake Assist applies further power assistance in moderate to heavy braking situations.

The all-new Civic Sedan comes with a choice of two advanced engines, including motors with second generation VTEC-II technology: an 85kW 1.5 litre, and a 96kW 1.7. These engines squeeze more power from every drop of fuel and adapt to your driving style, switching seamlessly from economy to performance mode.

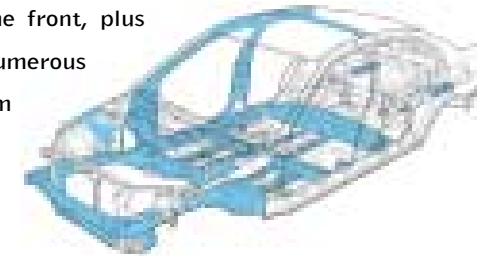

And because you don't have to drive with your foot to the floor to enjoy sporty performance, you'll get better fuel economy: the all-new Civic is an unusually thrifty car, even by Honda standards.

future perfect

The Civic Sedan is a brand new car from the wheels up. The 'cab forward' body gives you more room where it really matters – in the passenger compartment. Advanced soundproofing materials are used throughout the car, reducing road noise and vibration to levels you'd normally find in a large luxury sedan.

A completely flat floor gives the new Civic Sedan more interior space than ever before. You can sit in the middle of the rear bench seat without having to bend your legs around a hump in the floor. Thoughtful touches abound – such as a built-in timer for the rear window defroster. You'll find adjustable head restraints and seat belts in the front, plus ample storage space with numerous cup holders. To make maximum use of the large boot space, simply fold down the 60/40 split rear seats.

After a few days of ownership, you'll realise that the new Civic Sedan embodies all the values you'd expect from Honda: refinement, durability and intelligent engineering.

protect yourself

The latest Civic sets a new world standard for compact car safety – with the best-ever protection for not only you and your passengers, but also pedestrians. Honda's unique G-Force Control technology is built into the very core of the car. The strong passenger compartment is framed by slim but rigid pillars for

maximum outward visibility. You're protected by a ring of reinforced steel, side intrusion beams, passenger safety zones, and seat belt pretensioners with load limiters. All new Civic Sedans have two front SRS airbags while the VTi-S includes side SRS airbags for even greater protection. For the safest possible stopping, all models have power-

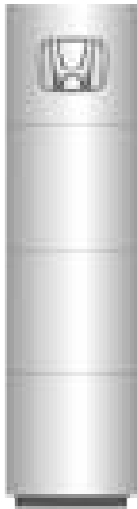

assisted dual circuit brakes. ABS (Anti-lock Braking System) gives you safer emergency stopping with maximum steering control, and Electronic Brake Distribution (EBD) balances the braking power delivered to each wheel. Security also means keeping your car safe when no-one's driving it. So we've given all Civic Sedans remote central

door locking and an engine immobiliser. Even the radio aerial is safely out of reach, built into the rear window. After all, your new Civic is an investment you'll want to protect.

With genuine Honda accessories you can customise your Civic Sedan exactly the way you like it. Your Honda Agent can help you with a wide range of Genuine Honda accessories and if you have them installed at the time of purchase, they're fully covered by the 36 month, 100,000 kilometre* new car warranty.

- A colour-matched body kit is the ultimate in visual enhancement. You can order the complete kit, or the individual components. These include a front spoiler, a rear spoiler with built-in high-level brake light, side skirt kit and a rear bumper sill.
- Adding foglights gives you extra illumination in bad conditions and a sportier look to the front end.
- Protect your investment with a Genuine Honda Alarm to complement your car's keyless entry system.
- Slimline door visors will keep the wind out of your hair when the windows are down – and help keep your car cleaner too.

Other available accessories include:

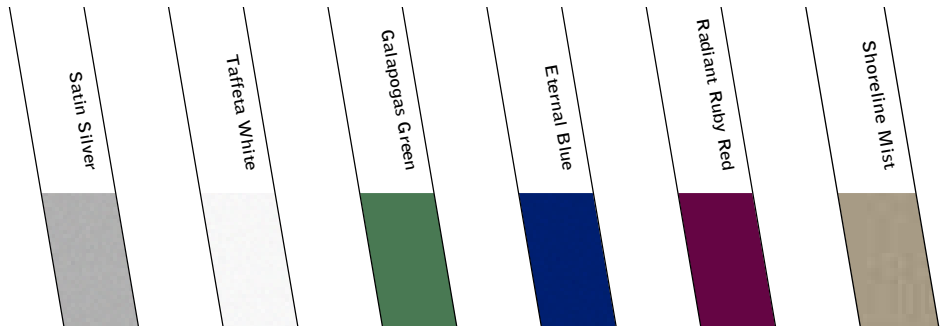

- contoured, custom-fit heavy duty floor mats with Civic logo
- reversing proximity sensor
- multi disc CD changer
- slimline door visors
- headlight protectors
- paint & fabric protection
- stainless steel sill protectors
- gold emblems
- bumper corner protectors
- towbar
- a selection of alloy wheels
- roof & bike racks
