

*4-door Sedan*  
**ACCORD**

**HONDA®**

**A sedan with the sense of elegance of our times.**

Front passenger's side mirror is optional.

# Making controls and command ideally easier

When Honda's design engineers set out to design the Accord's instrument panel, they knew that everything had to be rationally placed for effortless driving. Here you have the result: speedometer, tachometer, gauges, warning lights, and all indicators are right there readable at the first glance and with Honda precision. The safety indicator and the maintenance indicator were conceived to give the driver a permanent monitoring system to avoid risky situations. Lights, turning signals, dimmer switch and windshield wiper/washer action are easily controlled by levers positioned on the sides of the steering column. Simply extend one hand, while the other remains in contact with the steering wheel for utmost safety in driving with all the available advantages such as a wide, overall clear vision, and immediate response to your every command. In order to avoid unnecessary distraction, the position of the optional Hondamatic is clearly shown in the tachometer. There are long years of research bent on safety and trouble-free driving in every detail of the Accord's instrumentation and control design. A test drive will tell you the whole story.

On one side of the steering column you will find the control lever for the windshield wiper/washer, while on the other a touch of your fingers will change the lights at will.

**Safety indicators**  
Upon pushing the check button, the safety circuit can be confirmed. Proper warnings light up in the car-shaped diagram.

Maintenance indicators keep you informed of engine oil, oil filter, and tire rotation conditions, always.

Even at night, glare is eliminated by the use of non-reflective glass.

A collapsible steering column will retract in case of a collision.

Wide, spanning window areas give you perfect visibility in all directions.

# An ideal of comfort of functionality

The Accord's interior is more than simply attractive with its pleasant and relaxing color combinations. The entire body has been provided with carefully devised sound insulation to keep outside noise from disturbing your sense of well-being. The plush tricote seats are orthopedically designed to support your body firmly but comfortably. The trapezoid shape was decided upon by Honda's design engineers to make the most of space. The interior enjoys an air circulation system conceived to make you feel fresh always. Warm and cool air streams can be selectively directed, and a separate heating system is designed exclusively for the rear seat area. Side demisters provide clear vision in any weather, and the low-cut side windows afford excellent visibility in all directions. Even the shape of the front seats was made so as not to affect the visibility of passengers in the rear. A smooth ride in the back is further enhanced by headrests and a fold-out center armrest. The Accord is, indeed, a sedan to fulfill your every need in every detail. Since it has a low center of gravity, its stability and balance are assured under all sorts of driving conditions, while the body aerodynamics, suspension, wheel compliance, maneuverability, steering, ventilation and visibility achieve an ideal of driving comfort and safety.

ELR 3-point safety belts protect you in collisions.

Servo-assisted front disc brakes for sure braking power.

Large outside mirrors can absorb shocks and are easily adjustable.

Rear lights have been clustered in a new, unique Honda wraparound design.

The rear electric window defogger offers excellent visibility in any weather.

Child-proof locks are provided.

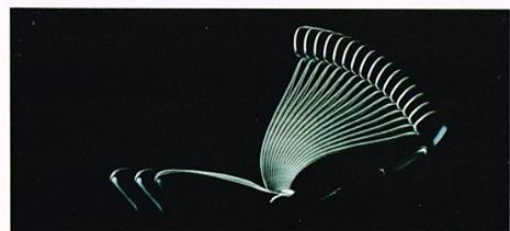

born

Lighting is provided in the trunk for convenience at night.

At the slightest pull, the trunk will open wide.

As befits a true family car, the spacious interior was achieved without sacrificing trunk space in the least. With a capacity of 452 liters, it can easily accommodate all of the family's luggage even on long trips or vacations. The trunk opener is by the driver's doorsill and will immediately open the trunk door at the gentlest pull. There are side pockets for those extras or things you remember to pack just before you set out to your destination. The trunk light switches on automatically when the trunk door is opened, so that you can always count on good illumination inside the garage or when you stop somewhere at night.

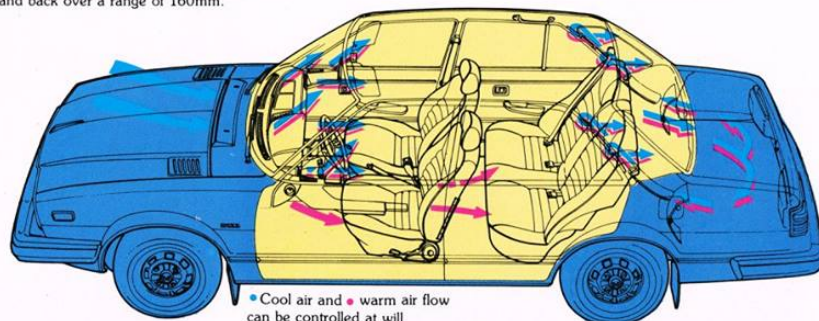

Fully reclining front seats slide forward and back over a range of 160mm.

Net pockets are useful for magazines or similar items.

An extremely accurate digital quartz clock is provided.

• Cool air and • warm air flow can be controlled at will

**Selective ventilation**  
Ventilation is provided throughout by means of four separate dashboard inlets. They can be adjusted to your comfort according to climatic conditions, and to make warm and cool air flow separately. Four dashboard vents provide adjustable air streams while side demisters assure good visibility always.

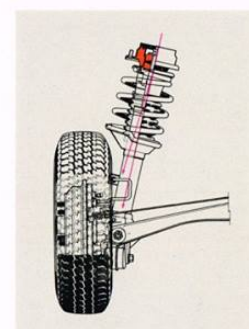

The ventilation panel is very easy to adjust. Side demister.

## Automotive engineering based on today's actual needs

Honda's long experience and accumulated know-how in engine design is evident in the Accord's 1,600cc, 4-cylinder, 80 ps engine. It was developed after careful consideration of motoring needs in different climates and road conditions, so that it can always deliver stable power over the entire speed range, with efficient acceleration whenever required. Its fully transistorized ignition system is a Honda innovation for immediate response at all times while it reduces maintenance costs by doing away with point gap adjustments. Transversally mounted in the front, this reliable engine combines with the front-wheel drive and independent suspension in all wheels to give you a superb, trouble-free ride. The struts and long-stroke coil springs greatly contribute to steering stability while the offset springs in the rear suspension help to take the rough out of any road. Its remarkable fuel economy is one of the widely recognized features of the Accord.

The offset springs reduce damper friction and road noise.

Mudguards are available in an attractive, efficient design.

## Hondamatic

To the widely acclaimed smooth drive which Hondamatic's Star range provides, a new feature has been added: an overdrive range for speeds over 45 km/hr, thus achieving similar quietness and low fuel consumption to a 5-speed manual transmission car. Furthermore, the Star range has been improved to cover from starting up to high speeds, with excellent acceleration between 70 and 120 km/hr. Driving downhill or uphill has become smoother thanks to a lower, more efficient gear ratio. The Hondamatic eliminates uncomfortable surging and reduces vibration.

## Power steering

Greater stability has been achieved by Honda's unique power steering (optional) which allows to move the steering wheel with a gentle touch when stationary or at low speed, while it gradually offers more resistance as speed increases. It becomes much easier to drive the car into the garage, or "when parking in tight places, and it provides adequate safety when speeding. A speed sensor adapts the mobility of the steering wheel to the car's actual speed for effortless, safe steering under any conditions: a reliable way of enjoying the advantages of power steering.

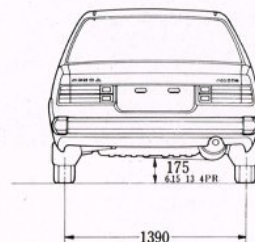

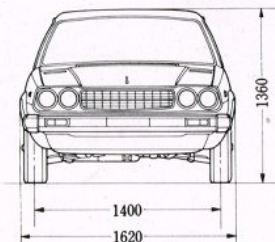

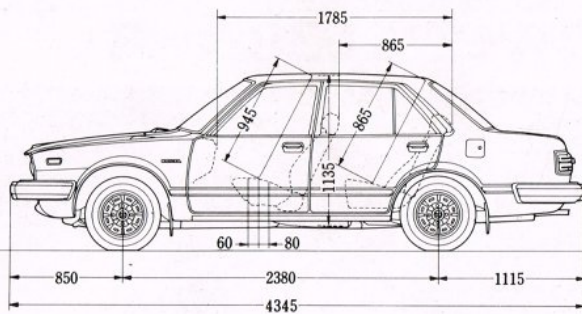

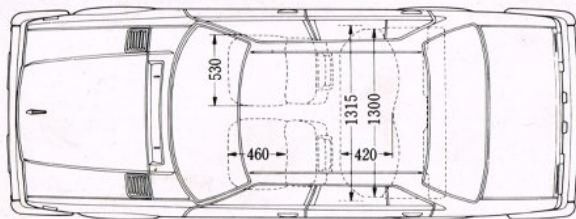

## Technical Specifications

<b>Horsepower (DIN)</b>	80ps/5,300 rpm 59 kW/5,300 min <sup>-1</sup>	
<b>Torque (DIN)</b>	12.9 kg-m/3,500 rpm 126.5 N.m./3,500 min <sup>-1</sup>	
<b>Engine</b>	Water-cooled 4-stroke OHC in-line 4-cylinder transversely mounted	
<b>Displacement</b>	1,602 cm <sup>3</sup>	
<b>Bore &amp; Stroke</b>	77×86 mm	
<b>Compression Ratio</b>	8.4 : 1	
<b>Transmission</b>	Manual	5-speed synchromesh
	Hondamatic	Torque converter with three manually selected forward speeds, 1 reverse
<b>Gear Ratios</b>	Manual	Hondamatic

<b>Curb Weight</b>	935 kg	

\* 155SR-13 steel belted radial: available in certain countries.

\*\* 165 mm: radial tires.

## Dimensions mm

## Standard Equipment

Full ventilation system	
Heater/Rear heater duct	
Defroster/Demister/Side window demisters	
Combination meters	Speedometer with odometer and trip meter
	Tachometer
	Fuel/Water temperature gauges
Safety indicator panel	
Maintenance indicator	
Radio (AM)	
Cigarette lighter	
Ashtrays (2 front/2 rear with illumination)	
Interior lamp	
Lane change switch	
Integrated light control lever	
Passing lights	
Dual horns	
Digital quartz clock	
Glove box with lamp	
Full tricort upholstered seats	
Fully reclining seats with adjustable headrests (front)	
Front seat forward/backward adjustment (roller type)	
Headrests (front and rear seats)	
3-point seat belts (ELR front)	
Center console	
Magazine racks	
"Child-proof" rear door locks	
Sun visors, vanity mirror on passenger's side	
Hand grips Front — passenger side, rear — both sides	
Side door armrests (front/rear)	
Rear center armrest	
Day/night rearview mirror	
Full floor carpeting (front/rear)	
Carpeted trunk	
Trunk latch (driver's side doorsill)	
Rubber corner pads for bumpers	
2-speed wipers with intermittent wipe	
Rear window electric defogger	
Mudguards (front/rear)
