A TRUE GRAN TURISMO

The Power to Surprise

STYLE. POWER. COMFORT.

These are the qualities that have always defined a true Gran Turismo, a car that delivers the enjoyment and excitement of open-road touring. And now, all of these desirable attributes can be found in this powerful 5-door car, the stunning All-New Kia Stinger.

This Gran Turismo is our homage to the traditional sports cars which were designed to travel long distances quickly while combining the ultimate in comfort with maximum panache. Stinger combines the design of a sports car with the style and space of a fastback.

Stinger has been awarded the prestigious EyesOn Design award for Production Car Design Excellence at the North American International Auto Show (NAIAS).

“ It’s a car that you would not expect from Kia, but at the same time only Kia can do.”

Peter Schreyer, President of Design.

“ Front engine, rear-wheel drive, a very sporty car that drives just as good as it looks.”

Gregory Guillaume, Chief Design Officer

SLEEK. SOPHISTICATED. CONFIDENT.

There’s nothing half-hearted about the Stinger. One glance is all it takes to appreciate its compelling design character. Finely tuned design refinements, like its muscular haunches, front air curtains and rear diffuser enhance the overall effect while contributing to its aerodynamic efficiency.

PURPOSEFUL. ENGAGING. ELEGANT.

The roomy cabin exudes appeal for the serious driver. Displays and controls are grouped according to function and are precisely positioned within a calming atmosphere. Directly in front of the driver is a height-adjustable Head-Up Display that relays speed, navigation, audio, cruise control and Blind Spot Detection information. The state-of-the-art connectivity and infotainment system includes 15 high-performance speakers, a 720 watt amplifier Harman-Kardon® surround-sound audio system and wireless smartphone charging. Kia Connected Services also feature Android Auto® and Apple CarPlay® which are designed for convenience with the aim of reducing driver distraction whilst driving. Luxurious and deeply contoured supportive Nappa leather seats ensure impressive comfort for all on board.

STIMULATING. AGILE. REWARDING.

It's all about the drive. The Stinger delivers high performance with a precision-tuned ride and handling that lives up to the clear promise of its design. This front engine, rear-wheel drive car drives as good as it looks. Benefitting from Dynamic Torque Vectoring Control and Dynamic Stability Damping Control (DSDC) an electronically adjustable suspension system (on certain models) that reacts predictably to driver inputs and can firm-up or soften front and rear dampers independently. There are five selectable drive modes: Eco, Comfort, Smart, Sport and Sport+.

POWERFUL. RESPONSIVE. EFFORTLESS.

That's the formula for a truly thrilling journey. Stinger is available with three different power plants in the UK:

Engine Type	Engine Size	Max. Power	Torque	0-60 mph	Transmission
Turbo Diesel	2.2 litre	197 bhp	440 Nm	8.2 sec.	8-speed AT
Turbo Petrol	2.0 litre	244 bhp	353 Nm	6.9 sec.	8-speed AT
Twin-Turbo V6 Petrol	3.3 litre	365 bhp	510 Nm	4.9 sec.	8-speed AT

Target performance figures. Subject to European homologation. Correct at time of print (July 2017)

INTUITIVE. INTELLIGENT. REASSURING.

An impressive range of advanced technologies ensure that the superb driving characteristics of the Stinger can be enjoyed to the full. The latest driver assistance systems are augmented by Driver Assistance Alert, which monitors multiple vehicle and driver inputs to warn the driver of any sign of a lapse in driver concentration. Advanced Smart Cruise Control maintains a set distance to the preceding vehicle, automatically reducing or increasing speed up to a pre-selected limit. Forward Collision Warning with Autonomous Emergency Braking detects the possibility of a collision and can intervene with partial or complete brake application, as required.
