# Driving Assistance Package

DISTRONIC Plus

Active Blind Spot Assist

Active Lane-Keeping Assist

The ultimate aim at Mercedes-Benz is to achieve accident-free driving. Although this goal is still some way off, relentless testing and continuous innovation have resulted in tremendous improvements in safety features since the invention of the passenger safety cell and the crumple zone. For increased traffic safety the S-Class can be equipped with the Driving Assistance Package, combining three highly sophisticated safety features: Active Blind Spot Assist, DISTRONIC PLUS and Active Lane-Keeping Assist.

Active Blind Spot Assist provides a visible warning in the exterior mirrors as soon as a vehicle is detected in the driver's blind spot. If the driver initiates a change of lane, the Electronic Stability Programme (ESP®) will intervene to correct the vehicle's trajectory. An additional audible warning will also sound.

DISTRONIC PLUS is a proximity control system, ideal for motorway cruising or for stop-and-go situations. Sensors monitor traffic proximity within the speed range 0 to 124 mph; the brakes are gently applied should you get too close to the vehicle in front. If necessary, the vehicle is brought to a standstill.

Active Lane-Keeping Assist closes the gap between Active Blind Spot Assist and DISTRONIC PLUS: the steering wheel will vibrate to alert the driver should he or she unintentionally drift out of lane.
