

S-Class

Mercedes-Benz

We' ve invented the car. Again!

Roll up the garage doors on the grey light of dawn ready to work hard—step out onto the red carpet at night ready to play hard. View the rising sun from the driver's seat – and the setting sun from the reclining seat in the rear. The S-Class brings together the worlds of work and leisure at a hitherto undreamed-of level. It is simply in the S-Class DNA to shine with technical innovations hitherto unseen in a car. The ultra-intelligent chassis seems to flatten down the road ahead; the lighting, using new technologies and a 360° camera, illuminates the surrounds with a speed and precision never seen before. You will see it, sense it and experience it for yourself: the S-Class shows the way ahead—to the future of autonomous driving.

S-Class

The first star. Shining in the morning light too.

The sun lifts the veil of mist from the road, the contours of the S-Class stand out in sharp relief. The upright radiator grille topped by the unmistakeable star herald in the new dawn. A new day is breaking—and with it, a new era of mobility.

We have invented tranquility.

When can a moment not be surpassed? Or a car? Intense light showcases the immaculate trim. Richly contrasting materials blend to form harmonious surfaces. Exclusive design sparkles with optimum functionality and a predilection for detail. Your glance sweeps through the generous space and your hands rest for a few seconds on the timelessly classic leather of the seats. Before you alight, sure in the knowledge that the perfect day is simply a question of the right vehicle.

We have invented mobility.

The vision of autonomous driving has come true: Lay your hands on the steering wheel and all your senses will link up. The cutting-edge on-board and external sensor systems will see ahead for you, draw conclusions for you, react at lightning speed and thereby prevent accidents. Look ahead. Think ahead. With Mercedes-Benz Intelligent Drive, the S-Class redefines the idea of mobility.

We have invented power.

The time is ripe, the way ahead beckons. Truly there could be no more fitting an opportunity in which to meet up with the future. With its maximum output of 225 kW, the S 400 L HYBRID is able to offer such outstanding ride comfort with such low fuel consumption and emissions.
