All New C-Class L Sedan

Seduction of the mind.

The All New C-Class L Sedan is an exciting mix of elegant design and innovative Mercedes-Benz technology, a case in point being the adaptive high-performance LED headlamps that welcome you with blue light when you unlock the car and are transformed into a source of intelligent light technologies whilst driving. The All New C-Class L Sedan perfectly combines innovative technologies with design aesthetics, providing extraordinary driving enjoyment.

The right feel for every mood.

Car lights—previously this always meant the headlamps. In the All New C-Class L Sedan, the interior lights also play a key role. The optionally available indirect LED lighting gives off a pleasant light to create a unique mood, transforming the All New C-Class L Sedan into a feel-good space in an instant. In three different colours and with five dimming levels, depending on how you're feeling.

Driving comfort.

The future-oriented highlights of the All New C-Class L Sedan exhibit preeminence and responsibility in every way. Its exemplary NVH features not only lead to an effective reduction of vibration and noise but also bring more safety and comfort to the driver and the passengers. The Direct Select lever makes it possible for the driver to shift gears simply by operating the steering wheel, thus making it much easier to drive. Mercedes-Benz never hesitates to break the shackles of tradition. The All New C-Class L Sedan transforms every owner into a technology pioneer. Once driving in it, your knowledge of a car will be overthrown!
