¹Figures according to Directive 80/1269/EEC in the currently applicable version

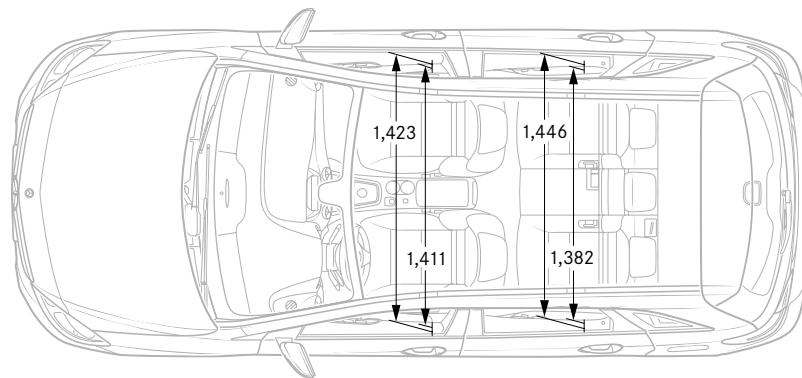

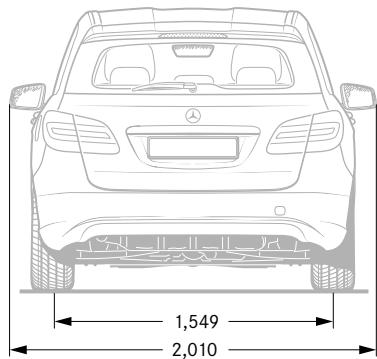

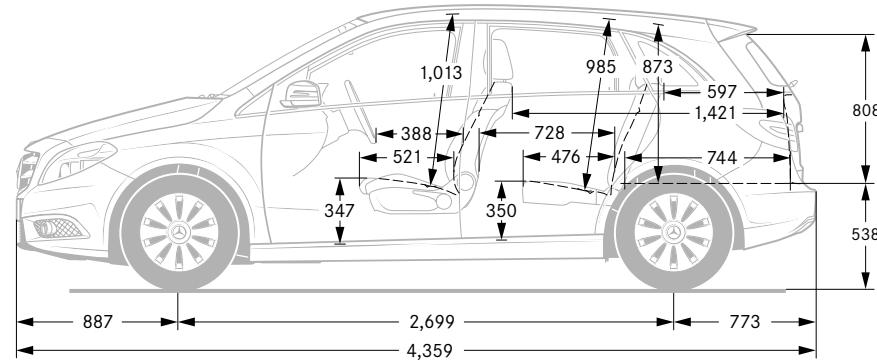

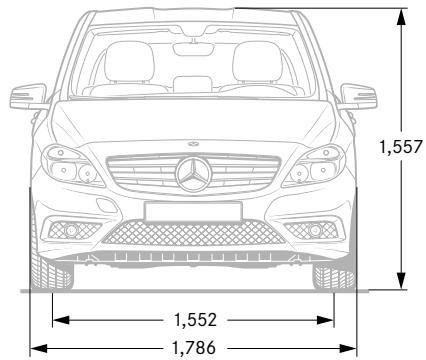

²All figures are based on a standard specification with the smallest tyre size

³The choice of wheels and transmission may affect CO₂ emissions and corresponding Road Fund Licence

⁴EUDC: extra-urban driving cycle. Testing procedures adhere to EU Directive 93/116

The figures on pages 30-33 are correct at time of going to print. Please refer to the government website for latest data - <http://www.dft.gov.uk/vca>

All measurements in millimetres. The dimensions shown are mean values and apply to standard-specification, unladen vehicles

Road Fund Licence

All road vehicle registrations are subject to Vehicle Excise Duty (Road Fund Licence), which varies in accordance with the vehicle's CO₂ emissions. A first year rate of Vehicle Excise Duty applies to new cars on their first year of registration. For the second and subsequent years a standard rate for each taxation band will apply.¹ The table below shows the bands (A-M) created by the DVLA and the corresponding Road Fund Licence. CO₂ emissions are listed in the technical specifications on page 32, and the relevant Excise Duty is reflected in the on-the-road prices on page 5.

Band	CO ₂ emissions	First year rate (£)	Standard rate (£)
A	up to 100 g/km	0.00	0.00
B	101 to 110 g/km	0.00	20.00
