¹Figures according to Directive 80/1269/EEC in the currently applicable version ²Electronically limited ³All figures are based on a standard specification with the smallest tyre size

⁴The choice of wheels and transmission may affect CO₂ emissions and corresponding Road Fund Licence ⁵EUDC: extra-urban driving cycle. Testing procedures adhere to EU Directive 93/116

The figures on pages 52–55 are correct at time of going to print. Please refer to the government website for latest data – <http://www.dft.gov.uk/vca>

All measurements in millimetres. The dimensions shown are mean values and apply to standard-specification, unladen vehicles

Road Fund Licence

All road vehicle registrations are subject to Vehicle Excise Duty (Road Fund Licence), which varies in accordance with the vehicle's CO₂ emissions. A first year rate of Vehicle Excise Duty applies to new cars on their first year of registration. For the second and subsequent years a standard rate for each taxation band will apply.¹ The table below shows the bands (A–M) created by the DVLA and the corresponding Road Fund Licence. CO₂ emissions are listed in the technical specifications on page 54, and the relevant Excise Duty is reflected in the on-the-road prices on pages 4–5.
