The EQB.

	Recommended Retail Price	Electric range ¹ (km)	Power (kW)	Torque (Nm)	Electrical consumption, combined ² max. - min. (kWh/ 100 km)	HV battery - usable energy content (kWh)
EQB 350 4MATIC	R 1,381,250	395.0 - 423.0	215	520	19.4 - 18.1	66.5

The purchase price displayed includes the price of a 5 year/100 000km Service Plan and Maintenance Plan which you shall be entitled to exclude from the purchase of your Vehicle.

¹Optional extras, additional equipment and accessories can influence the weight, residual payload, rolling resistance, aerodynamics, etc. and therefore also affect the consumption/CO2 values. Stated figures represent determined "WLTP CO2 figures" pursuant to Article 2, No. 3, of Implementing Regulation (EU) 2017/1153. Fuel consumption figures have been calculated on this basis. The electrical consumption and range have been determined on the basis of Regulation (EU) 2017/1151. Under real-life driving conditions deviations may occur in comparison to the certified standard values. The actual values are influenced by a number of individual factors, such as personal driving style, environmental and route conditions.

²The certified electrical consumption is generally determined at maximum AC charging capacity using a Mode 3 cable. It is therefore recommended that vehicles with a HV battery preferably be charged at a wallbox or an AC charging station with a Mode 3 cable in order to achieve shorter charging times and improved charging efficiency

Disclaimer: The figures quoted were obtained in accordance with the prescribed measuring process. The electrical range can therefore vary depending on electrical load consumption, driving behaviors and other external factors including but not limited to, road topography, ambient temperatures and environmental conditions.

Recommended retail price includes 15 % VAT and are subject to change without any prior notice.
