

The new S-Class Saloon

Mercedes-Benz

The best or nothing.

The new S-Class

Cares for what matters

The new Mercedes-Benz S-Class Saloon stands for poised assurance and responsibility. A personality with a sense of awareness that is there for you at every level, working with you and thinking ahead, always with your wellbeing at heart. A partner that you can rely on and in which you can confidently put your trust. Get on board.

Modern aesthetics and generous luxury in ideal harmony

Reduced to the essentials. The exterior design, the design idiom of sensual purity in its most contemporary form. In profile with perfect proportions, flush door handles and new wheels. The distinctive front section with pioneering DIGITAL LIGHT (Optional Equipment) headlamps and the tail end with two-section lamps, emphasizing the car's width.

An interior to inspire

The new S-Class blends exquisite materials with fine surfaces and a progressive design. A showcasing of high-tech features and infotainment with intuitive operation.

With the 64 colours of the active ambient lighting, exciting colour schemes are created which can alternate dynamically to illuminate areas in different colours. (Optional Equipment for S 500 MATIC)

Always ready for you

Extended intelligent safety systems such as the Driving Assistance Package offer maximum comfort and convenience, while also engendering added trust.

The new headlamp technology DIGITAL LIGHT also points in this direction, while innovative airbags in the backrests of the front seats make travelling in the rear safer. (Optional Equipment)

Wellness at the touch of a button

The new S-Class can fulfill many wishes, making that you climb out more relaxed than when you climbed in. Look forward to discover the seat massages with multicontour seats. The top-quality sound to match always comes from the Burmester® high-end 4D surround sound system. (Optional Equipment)

The Mercedes-Benz S-Class remains beyond compare

The new Mercedes-Benz S-Class is on the road to the future with the ultimate in driving refinement. The expressive design, unique convenience and safety technologies, the pioneering digital cockpit with the infotainment system MBUX as well as luxurious materials enable a driving experience like which has never been seen before in a car.

Digital cockpit

The combination of 3D cockpit display, MBUX head-up display with augmented reality (Optional Equipment) in the front windscreen and the central OLED touch display represents an innovative and at the same time intuitive control concept. Thanks to the MBUX voice control the new S-Class can adapt to your requirements and support you.

Rear comfort highlights

Inspiration and first-class feel-good comfort for the second row. Move the Executive seat with the leg rest into a pleasant position for sleeping. Relieve tension in the neck and shoulders with the heated cushion. Or relax as you work with the MBUX rear tablet, while also controlling the various comfort and entertainment functions. (Optional Equipment)

Active ambient lighting

(Optional Equipment for S450 4MATIC)

You experience a technological leap here with the active ambient lighting. It combines aesthetics with innovative driver information and extended functions. Light strips and trim elements all the way round meld to form an additional level of lighting. This also supports driving assistance systems visually and thus emphasises the intelligence of your vehicle.

MBUX Augmented reality head-up display

(Optional Equipment)

The MBUX augmented reality head-up display turns the windscreen into an extension of the digital cockpit. Transparent projections onto the windscreen augment the driver's field of vision with relevant information about the current driving situation. In this way the new S-Class is able to provide the driver with all key information, without them having to take their eyes off the road.

Automatic door handles

Flush, automatically extending door handles in an elegant design are available upon request in conjunction with the electronic drive access authorisation system KEYLESS-GO. The doors can be locked and unlocked keylessly, by touching the door handles.

New rims

The wheel range for the new S-Class Saloon includes high-quality light-alloy wheels in sizes 48.3 cm (19 inches) to 53.3 cm (21 inches) (Optional Equipment), depending on the precise specification. The styling sportiness of the vehicle is given additional emphasis with the modern wheel design, wide track and flush wheels.

Standard equipment and appointments

Cutting-edge technology, a high level of comfort and exceptional luxury – this is what the Mercedes-Benz S-Class stands for. It already demonstrates this claim with its standard equipment. Examples include the Driving Assistance Package and MULTIBEAM LED. The interior is also fully in keeping with the vehicle's status, with leather seats, ambient lighting and MBUX infotainment.

AMG Line

(Optional Equipment)

With the AMG Line you are making a clear statement of dynamism, both inside and out. The AMG front apron in an A-wing design underscores the expressive character of your vehicle. In addition, the multifunction sports steering wheel in nappa leather with flattened bottom section, the AMG pedal assembly and AMG floor mats lend your interior sporty highlights.

The Night Package

(Optional Equipment)

With the Night Package your sporty exterior looks even more expressive. As part of this, numerous elements are retained in high-gloss black. Depending on the paint finish, this creates contrasts or flowing transitions. In each case your vehicle gains individuality.

Only in conjunction with AMG Line at extra cost.

The Exclusive Package

(Optional Equipment)

Enjoy a fantastic atmosphere with the Exclusive Package. Virtually all surfaces are finished in exquisite nappa leather, the roof liner in high-quality DINAMICA microfibre. This exceptional high-class appeal is perfectly complemented by additional trim elements.

AIRMATIC

AIRMATIC combines the advantages of several suspensions in one – choose between comfort and dynamism. The set-up range is particularly impressive. The air suspension provides outstanding ride comfort even on difficult surfaces or during powerfully sporty performance. Practical: the level control system based on the vehicle load.

Rear axle steering

(Optional Equipment)

You enjoy no fewer than three advantages with the rear axle steering: even more confident roadholding, considerably increased agility and, last but not least, better manoeuvrability – for example when parking. The rear wheels steer against or in the same direction as the front wheels depending on the driving speed. You can also enjoy two steering angle, 4.5 or 10 degrees, as an option equipment.

Smartphone integration

Smartphone Integration connects the mobile phone with the multimedia system wirelessly via Apple CarPlay™ or Android Auto™. This gives you convenient access to the most important apps on your smartphone. You can also use apps from third-party providers such as Spotify quickly and easily.

Wireless charging system for mobile devices in the front and rear

Driving time becomes charging time: avoid annoying cable clutter and simply place your smartphone in the integral mobile phone cradle in the centre console to charge it.

Charge compatible mobile phones conveniently and without cables, even in the rear: the stowage compartment between the seats is also an inductive charging area. All mobile devices which use the Qi standard are supported.

Ambient lighting with projection of brand logo

A function which also appeals to your emotions: the surround lighting projects the brand logo using LED technology in the entrance area in front of the driver and front passenger. The not only showcases an attractive eye-catching feature in the dark, but also enables you to get in and out more conveniently with the additional light.

Panoramic sliding sunroof

Whether open or closed, with the panoramic sliding sunroof you experience a wonderful feeling of freedom and enjoy a pleasantly bright ambience in the interior. When viewed from the outside, the large sliding sunroof likewise makes a unique visual impression, as it lends lightness and exclusivity to the interior.

810

Burmester® 3D surround sound system

(Optional Equipment for S 450 4MATIC)

Experience greater audio performance with exquisite Burmester® sound. The high-quality speakers achieve impressive surround sound. You can specifically optimise this for the front and rear seats to intensify the listening experience. The unmistakable Burmester® speaker covers also enhance the interior visually.

317

Digital light

(Optional Equipment)

Digital light is optimally adjusted to other road users and to the surrounding conditions at all times. What is more, the HD system harnesses the combined power of more than one million pixels per headlight to support you in facing any challenge. All with an unprecedented level of precision at all times.

Dimensions

¹ Rated output and torque figures in accordance with Directive 80/1269/EEC in the currently applicable version.

² The figures shown were obtained in accordance with the prescribed measuring process.

They are "NEDC CO₂ values" pursuant to Art. 2 No. 1 of Implementing Regulation (EU) 2017/1153. The fuel consumption figures have been calculated on the basis of these values. Electrical consumption has been determined on the basis of Directive 692/2008/EC.

All figures in millimetres. The pictured dimensions are mean values. They are valid for vehicles in basic specification and in unladen condition.
