# TECHNOLOGY

# MERCEDES-BENZ USER EXPERIENCE (MBUX)

Transforming the in-car user experience, thanks to MBUX: Controlled via voice or touch input, the innovative infotainment system can over time even predict personal habits thanks to artificial intelligence.

## Voice control

- Activated by the keywords “Hey Mercedes”, the new intelligent voice control LINGUATRONIC<sup>1</sup> lets you control many of the infotainment functions, including destination input, phone calls or music selection
- MBUX is able to understand different accents and will adjust to you over time
- MBUX even understands indirect commands. Feeling chilly? Just say “I feel cold” and MBUX will adjust the temperature for you

## Touch inputs

- Beside voice control you can operate MBUX via touchscreen, the touchpad on the centre console, as well as touch control buttons on the steering wheel
- The touchpad recognises your handwriting should you wish to enter addresses or phone numbers silently

## Personalisation

- Turn the Mercedes-AMG GT into your very own Mercedes-AMG by personalising driving modes, radio stations and much more
- Your personal settings can be saved in up to seven different profiles, making your driving experience the best one possible
- Thanks to artificial intelligence, MBUX is able to learn and adapt over time. It will be able to predict your personal habits, such as navigation for frequently-driven routes, or the radio station you like to listen to on your way home from work

## Maintenance and service

- Wondering when the next service is due? Or how much further you can drive until you need to stop at a petrol station? Just ask your MBUX – it will tell you the answer

<sup>1</sup>LINGUATRONIC off-board functions are currently only available for three years  
The connection of the communication module to the mobile phone network including the emergency call system depends on the respective network coverage and availability of network providers

Mercedes-AMG GT

# PLUG-IN HYBRID

PLUG-IN HYBRID ELECTRIC VEHICLE (PHEV)

The Mercedes-AMG GT 63 S E PERFORMANCE Carbon Edition.

Plug-in hybrid vehicles enjoy the same functionality of full Hybrid technology, with the added benefit that they can be charged from an external electricity source.

Mercedes-AMG GT 63 S E PERFORMANCE Carbon Edition  
Petrol – 3,982 cc, 8-cylinder, 639 hp/470 kW  
Electric motor – 204 hp/150 kW

OTR from **£179,410<sup>1</sup>**

Standard equipment

150 kW electric motor for all-electric driving for up to 7 miles
Battery with a capacity of 4.84 kWh and high-performance cooling that tolerates high charging and discharging currents
Charging cable – Mode 2 cable (5 metres, straight) for domestic socket
Charging cable – Mode 3 cable (8 metres, straight) for wallbox and public charging station
Charging socket
Charging system rated at 3.7 kW AC
Pre-entry climate control <sup>2</sup>
Radar-based recuperation
Remote and Charging Services Premium <sup>2</sup>

Technical details

Equivalent All-Electric Range (EAER) <sup>3</sup>	7 miles
Charging time	
Wallbox (3.7 kW AC, 3-phase) 25–100% <sup>4</sup>	1hr 30 mins
Electric range consumption, combined <sup>3,5</sup>	405 kWh/km
Battery type (usable)	lithium-ion (4.84 kWh)
Capacity on-board charger	3.7 kW AC

<sup>1</sup>The recommended on-the-road price includes the Road Fund Licence applicable to the standard model plus delivery charge (£730.00 incl. VAT), new vehicle registration fee (£55.00), fuel (£50.00 incl. VAT), and number plates (£25.00 incl. VAT). VAT is calculated at the standard rate of 20%. Some of the model features, optional extras and colours shown may not be available, or may only be available in a different specification, or at a different price

<sup>2</sup>The connection of the communication module to the mobile phone network including the emergency call system depends on the respective network coverage and availability of network providers

<sup>3</sup>The indicated values were determined according to the prescribed measurement method - Worldwide Harmonised Light Vehicle Test Procedure (WLTP). Figures shown may include options which are not available in the UK. For Plug-in Hybrid Electric Vehicle (PHEV) figures determined with the battery fully charged, using a combination of both battery power and fuel. These models require mains electricity for charging

<sup>4</sup>Specified voltage and current values refer to network infrastructure and can be limited by the vehicle.

Times are from 25–100% charge using a wallbox (three-phase) or standard socket (single-phase)

<sup>5</sup>The certified electrical consumption is generally determined at maximum AC charging capacity using a Mode 3 cable. It is therefore recommended that vehicles with a HV battery preferably be charged at a wallbox or an AC charging station with a Mode 3 cable in order to achieve shorter charging times and improved charging efficiency

# MB.CHARGE PUBLIC<sup>1</sup>

One registration, one contract, one billing.

MB.CHARGE Public<sup>1</sup> provides access to a multitude of public charging stations located in shopping centres, hotels or at motorway services. A smartphone app as well as the vehicle's navigation system show the precise location, current availability and price at the selected charging station.

**Tens of thousands charging stations in the UK**  
Growing network of charging providers includes bp pulse the largest charging network in the UK.

- Access to fast-charging stations**
- Enables customers to get access to charging stations of different providers with:
- Mercedes-Benz app
  - RFID card
  - Vehicle Head unit

**Green charging**

All charging using MB.CHARGE Public, will be retrospectively 'greened' by Mercedes-Benz. Please [click here](#) for more info.

**Transparent and easy billing**

One invoice charging processes for payment.

**Easy access**

Charging stations are displayed in Mercedes-Benz app and in MBUX multimedia system.

**No fees**

MB.CHARGE Public<sup>1</sup> is standard for one year with discounted IONITY rapid-charging for one year.

<sup>1</sup>The connection of the communication module to the mobile phone network including the emergency call system depends on the respective network coverage and availability of network providers

<sup>1</sup>Figures according to Directive 80/1269/EEC in the currently applicable version

<sup>2</sup>The indicated values were determined according to the prescribed measurement method - Worldwide Harmonised Light Vehicle Test Procedure (WLTP). Figures shown may include options which are not available in the UK. For Plug-in Hybrid Electric Vehicle (PHEV) figures determined with the battery fully charged, using a combination of both battery power and fuel. These models require mains electricity for charging

<sup>3</sup>The certified electrical consumption is generally determined at maximum AC charging capacity using a Mode 3 cable. It is therefore recommended that vehicles with a HV battery preferably be charged at a wallbox or an AC charging station with a Mode 3 cable in order to achieve shorter charging times and improved charging efficiency

<sup>4</sup>Specified voltage and current values refer to network infrastructure and can be limited by the vehicle. Times are from 25-100% charge using a wallbox (three-phase) or standard socket (single-phase)

# SERVICES AND INSURANCE

## Mercedes-Benz Service Plans

We believe that servicing and repair costs should be as flexible and affordable as possible for your Mercedes-AMG GT, which is why we offer a choice of Service Plans to make it easy to budget for all your servicing, MOT and repair costs. It spreads your bills into manageable monthly payments based on whether you have a new or used Mercedes-Benz.

- **ServiceCare** – guarantees the price of parts and labour for up to four services and safeguards against any inflationary influences. It also covers your annual MOT fees depending on the age of your vehicle when you take your plan out.
- **CompleteCare** – our most comprehensive plan covering all your servicing, MOT, wear & tear needs as well as Extended Warranty once your vehicle turns four years old.
- **Extended Warranty** – protect yourself against sudden or unexpected repair costs after your initial warranty period has ended after three years. There are three policy options to choose from: 12-month, 24-month or a monthly pay-as-you-go option.
