cyclone

This is the Cyclone's command post with its elegant touches of black vinyl on the instrument panel and special 3-spoke steering wheel. Individually adjustable bucket seats, map console and tachometer are standard equipment. Bucket seats are offered in solid red, black and palomino; or in white with color-keyed appointments.

There's a look of elegant action, too, in the distinctive wheel covers which set the Cyclone smartly apart from all other Comets.

Whirlwind action begins with the Cyclone Super 289 V-8—the same basic engine design that powered each car in a team of specially equipped Comets for 100,000 miles at over 105 mph in the famous Daytona Durability Run. This engine, with special argent air cleaner, chrome rocker arm covers, chrome air cleaner cover, chrome oil filler cap, chrome oil dip stick and chrome radiator cap, is standard equipment in the Cyclone.

This is an admirable car—two-fisted sporting machinery with bite and brawn in every line.

An unusually roadable car with solid, road-hugging stance—in the full tradition of the specially prepared and equipped Comets that became the world's 100,000-mile Durability Champions at Daytona, each averaging better than 105 mph over the full distance including time for refueling and maintenance stops.

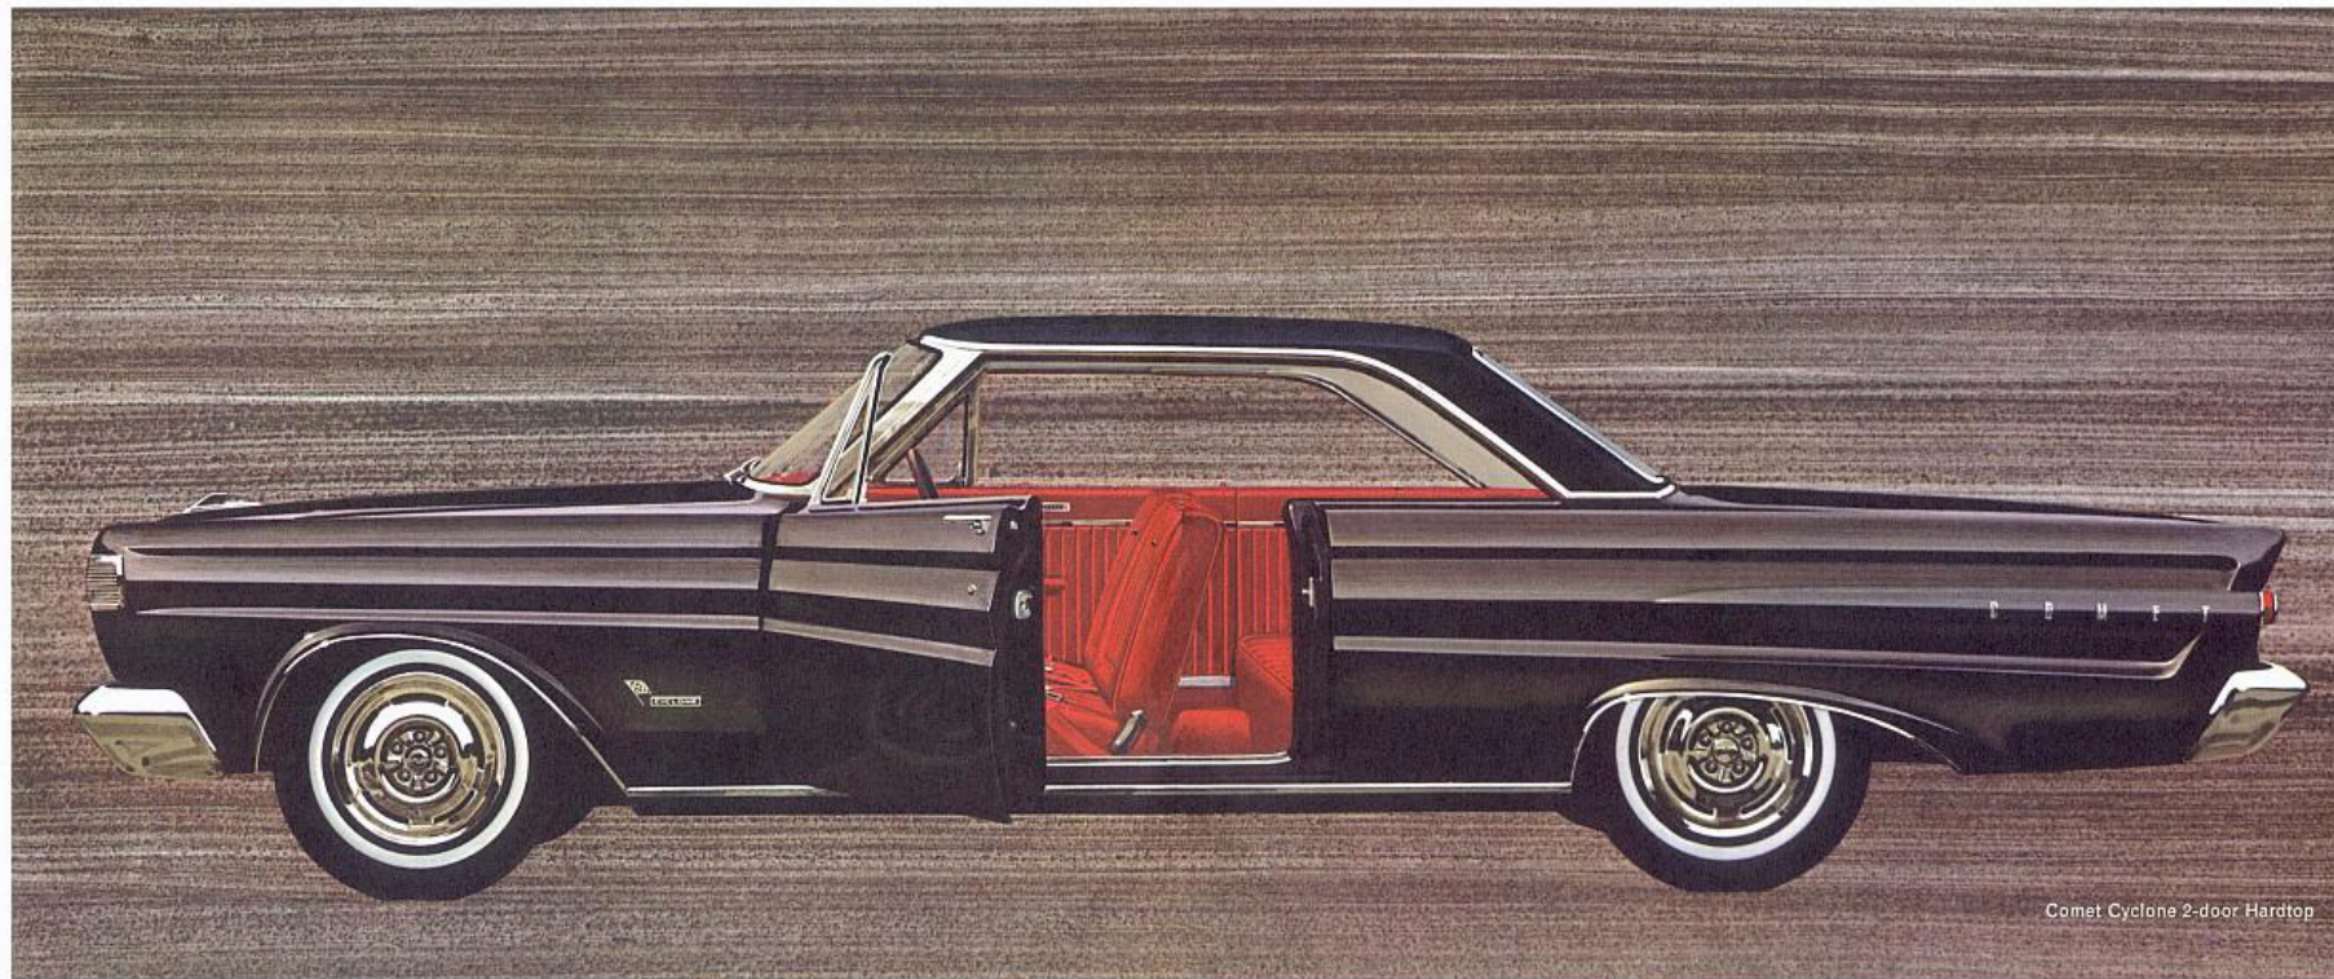

Under the hood a whiplash of surging power in its Cyclone Super 289 V-8. In the cockpit the sports-car flair of a rally-type steering wheel, the masculine feel of black vinyl in the instrument panel. Bucket seats are contoured to hold you more securely in the turns.

A fully synchronized 3-speed manual transmission is standard. You can have a choice of four-on-the-floor or Multi-Drive Merc-O-Matic transmission as an extra-cost option.

On the outside a look of high potency in the trim, taut sweep of bright metal molding, in the special racing-type wheel covers, in the optional black or white vinyl-covered roof.

This is Comet Cyclone—pure elegance in action!
