

OUTBACK

SUBARU

Confidence in Motion

LIVE CONFIDENTLY. LIVE NOW.

They say life is a collection of moments. That's why the Outback is here to accompany you through every moment and make each one count. Start all your adventures and satisfy your wanderlust with confidence. The elegantly styled Outback represents rugged go-anywhere capability, versatility to enrich any active lifestyle, and safety you can count on—all to help you reach your destination with comfort and peace of mind.

THE CHALLENGE IS THE ADVENTURE.

Very little stands in your way in the capable Outback. Symmetrical All-Wheel Drive ensures outstanding grip in snow, rain or rough roads, and X-MODE with Hill Descent Control helps you conquer more difficult driving situations with increased confidence and poise.

X-MODE engaged.

X-MODE helps to give you reliable control with a push of a button. The technology of X-MODE takes command of the engine, transmission, Symmetrical AWD, brakes, and other components to safely navigate through challenging road conditions and varying terrain. When X-MODE is activated, Hill Descent Control automatically helps to maintain a constant speed when the Outback is travelling downhill.

RUGGED CAPABILITY. REFINED ELEGANCE.

The Outback's polished and refined design represents its fine-tuned drivability and comfort, whilst its muscular and rugged look exhibits its go-anywhere performance. The result is confidence that will help you overcome any weather and road conditions to reach any destination in comfort and in style, no matter what lies ahead.

RUGGEDLY EQUIPPED. FULLY PREPARED.

Make bold plans. The Outback can take you on almost any road you'd care to venture, and thanks to the reliable SUBARU BOXER engine with improved fuel consumption, it can take you farther than ever. Rugged in appearance and performance, it also has the looks and durability to traverse a trail or make a new one.

Paddle Shifters

For a more engaging experience, drivers can use the paddle shifters to enjoy the delight of sports driving.

SI-DRIVE

Based on your driving style, Subaru Intelligent Drive (SI-DRIVE) can adjust the throttle and shifting response to give you immediate power and agility when you crave it in nearly any scenario.

Sport Sharp Mode*

When you want powerful engine performance, select Sport Sharp Mode for quick acceleration and sharp response. Use the paddle shifters and take even more control. To enjoy sporty driving, this mode unleashes the engine's maximum potential.

Sport Mode

This highly responsive mode is well suited for all-round conditions with its immediate acceleration. It puts the enjoyment back into high-speed driving on motorways or on winding roads.

Intelligent Mode

Offering gentle power delivery, this mode is ideal for cruising around town on local streets, covering long distances, or achieving high fuel efficiency. It also provides flexible control in the rain or on snowy roads.

* Available only on 3.6-litre models.

FLEXIBLE SOLUTIONS.

As the demands of life are varied, it's good to know the Outback can easily rise to meet them. At the push of a button, the power rear gate*¹ gives you instant access to the cargo area, making it especially easy to load up and go.

Luggage and Seat Combinations

There's more room for more of your life. Cargo capacity has been increased to make room for up to four 80-litre suitcases, and the floor has been made even flatter to allow for greater luggage capacity. You can also change the seating configuration in an instant—thanks to the 60/40 folding rear seats—allowing you to haul large items and various passengers as needed.

1. Power Rear Gate Switch Under Dashboard*¹

2. Power Rear Gate Switch*¹

3. Cross Bar Roof Rails*²

4. Convenient Side Sill Step

*¹ Optional.
*² Requires purchase of an attachment to load cargo on the roof rails.

AN INTERIOR THAT ENHANCES THE JOURNEY.

Relax and enjoy. Rich materials and useful technology mean there's much to enjoy inside the Outback.

1. Large Sunroof*

Enjoy a more open feel with the large, panoramic sunroof. The inner sliding sunroof includes tilt-up and auto-reverse features to bring in plenty of light at your command.

2. Comfortable Rear Seats

The cabin of the Outback was designed to provide ample space for rear passengers, and the capability to recline their seats for enhanced comfort on longer drives.

3. Centre Console Box

The large centre console box can hold more CDs now and even has specially created holders for cards, pens and coins.

4. Lighting

A blue illuminated interior light* lends a cool, sophisticated feeling to the Outback. The cup holder and console box also have that welcoming blue glow, making them easier to find in the dark.

TECHNOLOGY THAT FUELS THE ADVENTURE.

Make your day-to-day brilliant. The ingenious design and technology of the Outback work exceptionally well and are especially useful. A centre touchscreen and LCD meter centre display give you access to it all. A premium audio system with 12 Harman/Kardon speakers or standard audio with six speakers is available for your enjoyment. Plus the entire infotainment system is compatible with smartphones, making it easy to stay connected.*1

1. Front and Side View Monitors*2

The front grille camera can project the vehicle's front view via the in-dash display, increasing front visibility at intersections and when parking facing a wall. The Side View Monitor displays blind spots diagonally in front of the passenger side to make navigating narrow roads easier and street parking more convenient.

2. LCD Meter Centre Display

The LCD meter centre display supplies the driver needed information at a glance without having to look to the side. It also features an efficiency display that allows you to track your fuel economy. It's the data you need to stay informed and confident that your drive stays as efficient as possible.

3. Harman/Kardon Audio System*2

Featuring Harman/Kardon's latest technology, GreenEdge, the premium audio system in the Outback includes 12 Harman/Kardon speakers and improved acoustics for a richer audio experience.

Apple CarPlay*3 and Android Auto™*4

Use today's most popular apps with Apple CarPlay*3 and Android Auto*4. Voice recognition capabilities allow hands-free use, keeping everybody safe whilst reducing distractions when you're on the road.

*1 Driver is always responsible for safe and attentive driving. Please refrain from operating the touchscreen whilst driving.

*2 Optional.

*3 Apple CarPlay is a trademark of Apple Inc., registered in the U.S. and other countries.

*4 Android™ and Android Auto™ are trademarks of Google Inc.

SUBARU BOXER ENGINE

Few other cars drive with the self-assured confidence of the Outback, so you won't be surprised by how uniquely it is accomplished. The horizontally opposed configuration of the SUBARU BOXER engine places the pistons 180 degrees apart, for a lower, flatter profile than other engine types. This gives the engine, and therefore the overall vehicle, a lower centre of gravity and better sense of balance. Further, the pistons' opposing movements inherently counteract each other, naturally helping to reduce vibration.

Increased Stability

Because the engine block has a flatter profile and sits lower in the chassis, the overall vehicle is more stably balanced and resistant to side-to-side motion than other designs.

Long-lasting Performance

The engine's flat design is inherently rigid and self-balancing to achieve durability and reliable performance, generating less vibration than V-type or 4-cylinder in-line engines in the same class.

SYMMETRICAL ALL-WHEEL DRIVE

Control leads to confidence, and stability creates an agility that excites in the Outback. Subaru vehicles are gifted at inspiring confidence behind the wheel, thanks to the inherently stable design of Symmetrical AWD paired with the uniquely balanced SUBARU BOXER engine. This system delivers power to all four wheels at all times for enhanced control on all roads and in poor conditions. It has excellent side-to-side balance and handling precision, thanks to its main components being aligned longitudinally, whilst its low centre of gravity creates an especially engaging and responsive drive. The unique advantages of Symmetrical AWD make for exceptionally rewarding handling and empower you to better avoid danger.

LINEARTRONIC

Designed to get the most out of your SUBARU BOXER engine and Symmetrical AWD, the efficient Lineartronic Continuously Variable Transmission keeps the engine in its ideal power range to give the Outback its improved fuel consumption. Shift controls keep the ride light, smooth and responsive on both the 2.5-litre and 3.6-litre engines, whilst the Lineartronic in 3.6R-S also handles the higher-torque output with less mechanical noise for a smoother, quieter drive. The shift controls have a stepped variable control that stays in tune with changes in vehicle speed and engine speed, allowing the driver to feel shift points when accelerating to form a strong and comfortable connection between car and driver.

SUBARU'S WORLD-LEADING DRIVER ASSIST TECHNOLOGY

At Subaru, we believe in ALL-AROUND SAFETY, and an important part of that is pre-collision safety, making sincere efforts to ensure an accident never happens. That's why we created EyeSight*¹, Subaru's cutting-edge driving support system. Like a second pair of eyes for the road ahead, EyeSight uses two stereo cameras to capture three-dimensional colour images with excellent image recognition, nearly as capable as the human eye. Using images from both

cameras to precisely determine the shape, speed and distance, it not only detects vehicles but also motorbikes, bicycles, and pedestrians.*² When spotting potential danger, it warns the driver and even applies the brakes if necessary to help avoid an accident. With improved safety performance like this, EyeSight reduces the burden on the driver and enhances your sense of security in the Outback.

Field of vision range from EyeSight (Not an actual measurement).

01. Adaptive Cruise Control

EyeSight*¹ doesn't only maintain the speed the driver sets as traditional cruise control does. When it senses a vehicle in front, Adaptive Cruise Control adjusts the speed to keep a set distance from the lead vehicle by monitoring the distance and the difference of the speed. It adjusts the engine, transmission, and brake to keep your speed in line with the traffic flow in a wide range approximately from 0 km/h to 180 km/h. Designed for use on freeways, highways, and similar roads, Adaptive Cruise Control actually detects a lead vehicle and its brake lamps and can help keep pace in stop-and-go highway traffic for you—a comfort and convenience on long drives.

02. Lane Sway and Departure Warning

When you are distracted by fatigue and are wandering or drifting in a lane, Lane Sway Warning helps you stay alert with a buzzer and a flashing indicator. However, Lane Sway Warning only activates at speeds of approximately 60 km/h or more. When travelling at speeds of approximately 50 km/h or more and you accidentally drift to the edge of your lane and begin to depart your lane without signaling, Lane Departure Warning warns you with a buzzer and a flashing indicator before you leave your lane.

03. Lead Vehicle Start Alert

When you're at a stop and EyeSight senses that traffic has started moving again, Lead Vehicle Start Alert prompts the driver to take action with a buzzer and a flashing indicator.

04. Pre-Collision Braking System*²

When it senses an impending collision with a vehicle or other obstacle in front, the Pre-Collision Braking System can warn the driver with a buzzer and a light on your dash. If the driver still does not take evasive action to avoid the collision, the system can automatically apply the brakes to reduce any impact or, if possible, prevent the collision. If the driver takes evasive action to avoid a collision, Pre-Collision Brake Assist can act to aid the driver in preventing the collision.

05. Pre-Collision Throttle Management

When EyeSight sees an obstacle in front of you and you put the vehicle in Drive instead of Reverse, Pre-Collision Throttle Management sounds several short beeps, turns on a flashing indicator and cuts the engine output to help you avoid a frontal collision.

*¹ EyeSight is a driving support system which may not operate optimally under all driving conditions. The driver is always responsible for safe and attentive driving and observance of traffic regulations. System effectiveness depends on many factors such as vehicle maintenance, weather and road conditions. See Owner's Manual for complete details on system operation and limitations for EyeSight including functions in this brochure.

*² Pre-Collision Braking System may not work in all situations. Depending on the speed difference from objects, the object's height and other conditions, every situation may not meet the necessary conditions for EyeSight to work optimally.

ACTIVE SAFETY

01 Advanced Safety Package: Subaru Rear Vehicle Detection (SRVD)*1*2

Subaru Rear Vehicle Detection (SRVD) uses sensors placed around the vehicle to alert you of vehicles in your rear blind spots for safer lane changes, and can also warn you of potential collision danger, whilst driving in reverse into a street with cross traffic.

03 Vehicle Dynamics Control System

Vehicle Dynamics Control System monitors and analyses if the vehicle is following the driver's intended course via an array of sensors. If a tyre slips or a high-speed turn moves the vehicle off its intended path, the AWD torque distribution, engine output and brakes at each wheel are adjusted to assist in keeping the vehicle on course.

05 Increased Visibility

We adjusted the frame to increase your visibility and decrease your blind spot area. We also installed front quarter windows with door-mounted side mirrors to reduce the front blind spot for increased forward visibility.

02 Advanced Safety Package: High Beam Assist (HBA)*1*2

High Beam Assist increases visibility and safety when driving at night by toggling the Outback's high beams on and off automatically, depending on driving conditions.

04 Active Torque Vectoring

When cornering, Active Torque Vectoring applies the brakes and distributes less torque to the inside wheels and more torque to the outside wheels. It helps make sharp turns and handling more precise. In combination with the Vehicle Dynamics Control System, it helps to keep you out of harm's way, granting you a comforting sense of security.

PASSIVE SAFETY

06 Cabin-protecting Layout

Every Subaru goes above and beyond common practice when it comes to your safety. In the event of a head-on collision, your Outback's SUBARU BOXER engine and gearbox are designed to avoid moving into the cabin for your protection.

08 Ring-shaped Reinforcement Frame

The Ring-shaped Reinforcement Frame strengthens the passenger cabin from the roof to the doors, pillars and floor. This design helps to divert and dissipate impact energy away from the occupants in a collision. It also contributes to strengthening and lightening the chassis, leading to greater, reinforced protection.

10 Front Seatbelts with Pretensioners and Load Limiters

Height-adjustable front seatbelts feature pretensioners to hold passengers firmly in place, and load limiters that ease peak forces to the chest.

07 Supplemental Restraint System (SRS)*3 Airbags

Front SRS*3 airbags, front side SRS*3 airbags, curtain SRS*3 airbags, and knee SRS*3 airbags come standard on the Outback to give all passengers a higher level of protection in the event of a collision.

09 Head Restraints on Front Seats

Adjustable for both height and angle, head restraints are designed to accommodate passengers of different sizes and comfort preferences.

*1 The driver is always responsible for safe and attentive driving and observance of traffic regulations. Please do not depend solely on the Advanced Safety Package features for safe driving. There are limitations to the recognition features of this system. See Owner's Manual for complete details on system operation and limitations. Please ask your retailer for more details.
*2 Optional.
*3 SRS: Supplemental Restraint System. Effective when used in conjunction with seatbelts.

1 **Steering Responsive Headlights (SRH)***

When rounding a curve at night, the illumination direction of the headlights moves left or right according to the steering wheel to ensure visibility.

3 **18-inch Aluminium-alloy Wheels***

Multi-spoke 18-inch aluminium-alloy wheels have an Outback-exclusive, rugged appearance and an aerodynamic design for improved fuel efficiency. Together with the 225/60R18 high-performance tyres, they make an attractive addition to the Outback.

5 **Keyless Access with Push-button Start System***

Your key fob grants you complete keyless access. To lock/unlock the front doors or tailgate, simply grip the door handles. To start the engine, push the button. Using a 5-digit PIN code allows you to enter your Subaru even without your key fob.

7 **8-way Power Adjustable Driver's Seat (with Lumbar Support)**

Find your ideal driving position with this 8-way power adjustable driver's seat.

2 **Front Fog Lamps**

These efficient lamps reflect less glare in fog for added safety.

4 **Roof Spoiler**

Sophisticated and aerodynamic, the roof spoiler of the Outback is integrated seamlessly into the rear gate. The back side of it is coloured in black without coating to give it an outdoor feel and to help hide any scratches made when you're loading cargo on the roof carrier.

6 **USB Power Outlet (Front and Rear)**

Keep all your electronic devices fully charged and ready to use with easily accessed USB power outlets for both front and rear passengers.

8 **Rear View Camera**

When the driver shifts into Reverse, the camera displays a live colour image on the in-dash display, along with guidelines to assist in parking manoeuvres.
