Play hard.

## Defy conventions.

The innovative 2006 Baja Sport is part sedan, part truck – and all fun. Perfect for active lifestyles, the Baja Sport combines the utility of a compact pick-up truck with the handling of a sedan. Whether you are using the patented Switchback® System – which extends the cargo bed into the rear of the cabin – to fit longer items like skis or fishing rods or are taking

advantage of the lined cargo bed to haul everything from firewood to gardening supplies, the Baja Sport provides ample versatility to meet your needs. Featuring a 165 hp SUBARU BOXER engine sending power to all four wheels through Subaru's legendary symmetrical full-time All-Wheel Drive system, the Baja Sport is always ready to play.

The Supplemental Restraint System (SRS airbags) affords the driver and passenger additional protection in some collisions. This system provides supplemental protection only, and seatbelts must be worn in order to avoid injuries to out-of-position occupants upon airbag deployment. The combination of SRS and seatbelts provides the best protection in a serious accident.
