

**GRAND
VITARA**

It's you,
it's me, it's

 **SUZUKI**

Grand Vitara.

Let the adventure begin.

The Suzuki Grand Vitara was put on this earth for one simple reason; To go where others in its class simply cannot. In other words, its designers knew it had to be more than a Saturday morning poser. And they knew it had to be able to handle going rougher than over a speedhump. That's why the Suzuki Grand Vitara has V6 power. That's why the Grand Vitara has been built rock solid. To go to the sort of places 4WD's were meant to go. Where the tallest buildings are mountains and pure water doesn't come in a bottle. The sort of places that linger in every person's imagination, these are the places the Grand Vitara was made for.

ALLOY WHEELS ARE AN OPTIONAL EXTRA

Grand Vitara 3-door. Let the fun begin.

Serious fun and Suzuki 4WDs have always gone hand in hand. That's because ever since we've been making 4WDs we've come to know a thing or two about what makes the perfect mix. Superb comfort, cutting edge engineering, good looks and the latest safety features.

The Grand Vitara 3-door is no different. We like to think of it as the Grand Vitara 5-door, cut down to size. While it may be more compact, our designers ensured it inherited all the technology that makes the 5-door.

There's a stylish interior, dial-operated air-conditioning and a multi-function steering wheel that features easy-to-reach audio controls.

The end result is a 4WD that's nothing less than the most fun with three doors, all gift wrapped in a compact, go anywhere package.

Hop in and stretch out

Creating a compact 4WD is not rocket science. The trick is, making sure it's not too compact on the inside.

With this in mind, the Grand Vitara designers went all out to provide a high driving position, ample headroom, leg clearance, comfort and style.

There's the comfortable bucket seats that provide firm support when travelling off-road. The driver's seat features a convenient seat lifter for flexible adjustment of seat height. On top of all this, the rear seats can be folded fully flat to accommodate awkward items.

Of course all the comfort in the world amounts to nothing if the interior finish isn't up to scratch. Here the Grand Vitara is a touch of class with full trim and carpeting, topped off with a modern silver-alloy dash and instrument panel.

Features? They're laid on thick

With so much room, it would be downright neglectful if all this space wasn't filled with a stack of standard features.

For starters, there's power steering, electrically adjustable outside mirrors, central door locking, electric windows and remote keyless entry.

As well, there's the efficient and intelligent ventilation system that prevents fogging of the side windows to ensure a clear view of the door mirrors. The standard air-conditioning system maintains the optimum cabin temperature regardless of the weather. An AM/FM CD stereo audio system and stereo control on the steering wheel are among other standard features. Convenient storage areas include a glove box, handy trays and compartments up front, cup holders in the centre console, pockets on the doors and seatbacks, trays beneath the front seat, a tool box and much more.

Hop in and stretch out

Creating a compact 4WD is not rocket science. The trick is, making sure it's not too compact on the inside.

With this in mind, the Grand Vitara designers went all out to provide a high driving position, ample headroom, leg clearance, comfort and style.

There's the comfortable bucket seats that provide firm support when travelling off-road. The driver's seat features a convenient seat lifter for flexible adjustment of seat height. On top of all this, the rear seats can be folded fully flat to accommodate awkward items.

Of course all the comfort in the world amounts to nothing if the interior finish isn't up to scratch. Here the Grand Vitara is a touch of class with full trim and carpeting, topped off with a modern silver-alloy dash and instrument panel.

Features? They're laid on thick

With so much room, it would be downright neglectful if all this space wasn't filled with a stack of standard features.

For starters, there's power steering, electrically adjustable outside mirrors, central door locking, electric windows and remote keyless entry.

As well, there's the efficient and intelligent ventilation system that prevents fogging of the side windows to ensure a clear view of the door mirrors. The standard air-conditioning system maintains the optimum cabin temperature regardless of the weather. An AM/FM CD stereo audio system and stereo control on the steering wheel are among other standard features. Convenient storage areas include a glove box, handy trays and compartments up front, cup holders in the centre console, pockets on the doors and seatbacks, trays beneath the front seat, a tool box and much more.

Technology that touches every part

A 4WD without a decent engine, isn't much fun at all.

So we made sure the heart of the Grand Vitara was second to none.

With the 3-door you get an economical and lightweight, all-aluminum 2.0-litre DOHC 16-valve engine that incorporates electronic Multi Point Injection and a Direct Drive Valvetrain for quick and powerful response with excellent low to mid-range torque.

On the 5-door it's a 2.5 litre, 24 valve V6 engine that delivers effortless highway cruising and ample towing capacity.

Both the 3-door and 5-door models also feature Drive Select 4x4, allowing you to shift from 2WD to 4WD on the move to counter changes in surface conditions instantly and maintain continuous traction.

Safety, from every angle

A safe 4WD is always one where you, the driver, don't have to worry about safety.

It's commonly referred to as peace of mind, and it's in abundance in the Suzuki Grand Vitara.

Maximum braking efficiency is provided by front ventilated disks. Superb visibility is enhanced by a high seating position, windows designed for easy viewing of the

door mirrors, a low-mounted spare wheel, and intermittent windshield wipers. Other standard safety features include three-point seatbelts with pre-tensioners, an in-dash seatbelt warning and open-center head restraints on four seats. A dual SRS airbag system for the front seats is standard, while impact-absorbing material and side door impact beams help to reduce injuries in a collision.

Over the hills and far away? No problem

As usual it's the build of the Grand Vitara that separates this performer from the pretenders.

The sturdy ladder-type frame protects underbody components and offers outstanding strength, vibration damping and durability. Both the frame and the high-tensile sheet steel body underwent comprehensive computer analysis to determine the lightest possible structure while increasing overall strength. Body protection includes galvanised steel sheet for rust resistance, corrosion protection under the body and a stainless steel muffler. At ground level the strut front suspension features separated coil springs and shock absorbers for a longer stroke. Low-pressure gas shock absorbers and the 5-link coil, rigid axle rear suspension layout ensure on-road stability and enhanced tractability on the rough.
