

1995 Suzuki Swift

# The 1995 Suzuki Swift Hatchback

"With dual front airbags, high-tech 4-cylinder engine and available ABS, the 1995 Suzuki Swift 3-door hatchback is an appealing mix of value, economy and driving fun." – *Carguide* magazine

This is the third generation Suzuki Swift and it's the first to be built specifically to meet the needs of the Canadian consumer. It's longer, wider and offers more interior space than the previous models. Suzuki's reputation for precision engineering is demonstrated by the superbly crafted 1.3-litre, SOHC engine which has the highest power-to-weight ratio in its class. With electronic fuel injection and a new, sophisticated valvetrain, it provides instant cold weather starting and smooth running... exactly what Canadians want in a small economy car that has to live in our climate. And speaking of climate, the new Suzuki is designed to withstand the worst that winter – and salt – can throw at it.

And safety hasn't taken a back seat to economy. The new Suzuki Swift comes with standard front driver and passenger airbags, plus side impact protection which is two years ahead of mandatory requirements and increased boost for the front disc rear drum brake system. (ABS is available as an option).

But there's much more than we can fit into this space. The 1995 Suzuki Swift. Coming to your local Suzuki dealer soon.
