## SUZUKI SIERRA 1.3

## NEW SIERRA LOOKS LIKE FUN.

Welcome to the new look Suzuki Sierra. You'll notice a few changes – especially when you drive one.

The new wide track – 100mm wider than before – gives you a whole new grip on things. Handling and roadholding are improved out of sight. And softer suspension smooths the way for a more comfortable ride.

Visually, the wider track gives Sierra a strong, aggressive look, accentuated by the colour matched flared guards.

Bigger and better rear vision mirrors, bigger bumpers front and back, new wheels and new grille complete the picture on the outside.

Inside it's a whole new story too, with completely new dash and trim.

It's a whole new look.

## TORQUE ABOUT POWER.

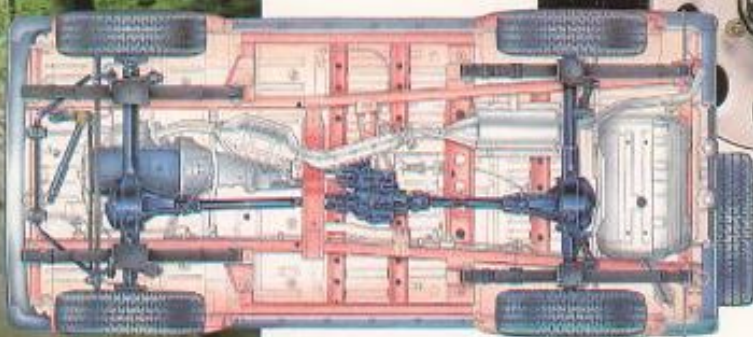

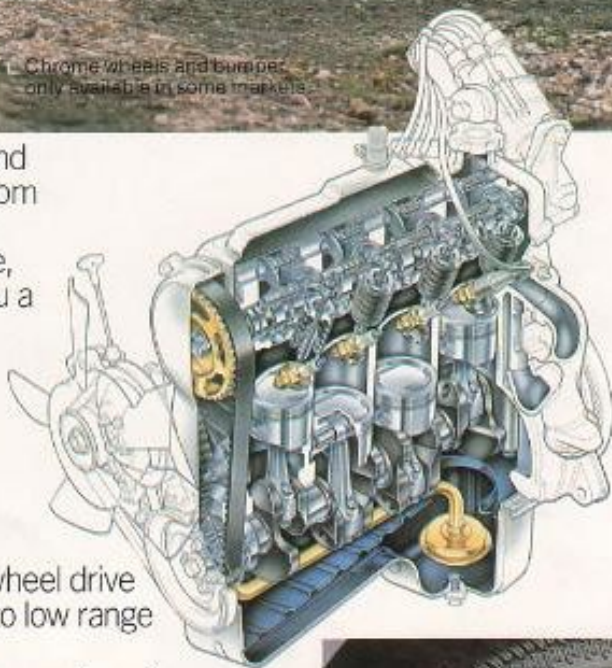

The secret of Sierra's remarkable power to weight ratio is a compact 1.3 litre engine with aluminium cylinder block and hollow crankshaft and camshaft. It delivers exciting power and torque from low to high speeds, and surprising fuel economy.

A five-speed transmission including overdrive, and the advantage of free-wheeling hubs, give you a quieter ride and even greater economy on the open road.

## ROUGHING IT.

Then when the going gets rough, slip into 4 wheel drive and away you go. Or for really rough terrain, shift to low range 4 wheel drive.

Abundant ground clearance and generous approach and departure angles ensure confident driving wherever you choose to go.

## THE INSIDE STORY.

A new dashboard layout gives you all the information you need at a glance.

Large bucket seats give the sort of comfort and support you really need for long trips or harsh off road adventures.

The JX models feature full reclining seats and new retractable seat belts.

And options like integrated air conditioning and more sophisticated sound systems can make driving more fun than ever.

conditioning.

The practical hard top also comes in a high roof model for extra head room.

Long wheelbase models come in soft or resin top versions.

And cab chassis models with steel or aluminium trays are also available.
