

SUZUKI SIDEKICK 4x4

Meet a whole new side of Suzuki.

The first time you lay eyes on the new Suzuki Sidekick, you'll be struck by its sleek and elegant lines. But to judge the Sidekick on appearances alone, would be like judging the proverbial book by its cover.

Sure, the uptown glamour of Sidekick's style is designed to turn heads but after you've been carried away with its looks, there's plenty more to carry you away.

It starts with the ergonomically engineered interior and the pleasing comfort of

the reclining contoured seats and extends to the spirited engineering you'll find under its pugnacious hood: A feisty 1.6 litre engine ready to lead the parade on the highway, or switch on the fly to four-wheel drive and head across country when the road peters out.

Sidekick lets you follow your heart, whether you're heading for the hills with the 32 cubic feet rear compartment loaded with camping gear or just nipping and tucking your way through city traffic.

The Sidekick comes as a hardtop or as a convertible. You can push out the power through a dynamic 5-speed manual transmission that will hum you over the highway at a thrifty 7.6 litres per 100 kilometres (37 mpg)*, or opt for the laid-back convenience

Improve

of the silky-smooth automatic. Either way your power is coupled through a two-range four-wheel drive. In low range you can bull your way up off-road hills that would make a dirt-bike rider think twice. In high range you can go in the snow or smile as you drive by

your lot

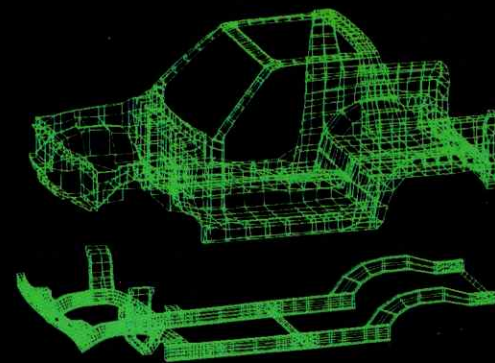

those "Unmade road" signs. And thanks to the Sidekick's state of the art suspension system, you ride in comfort, cushioned by a four-deep coil suspension that rolls out the road like a welcome mat.

In a world where "luxury" has become an excuse for conservative thinking, Sidekick is the shape that luxury takes when it's not afraid to let its hair down. If the Sidekick sounds like you, then the adventure is about to begin.

See the night in shining armour

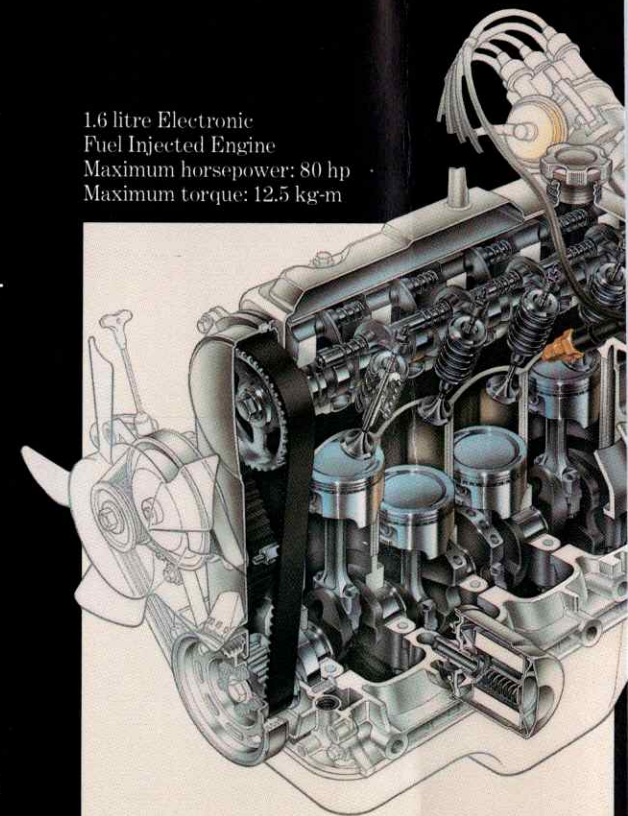

Over the Sidekick's rugged ladder-design steel frame, the galvanized sheet steel of that handsome skin is aerodynamically sculpted to let you slip almost silently through the wind. Door handles are recessed, corners are rounded. The strong lines of Sidekick catch nothing but your fancy.

And the engineering is total. The high-efficiency overhead camshaft engine churns out power to spare from an economical 1.6 litre displacement. The power pours to the wheels through the crisp precision of the standard five-speed manual transmission or the silken smoothness of Sidekick's optional automatic.

Don't forget Sidekick's split personality either. For the

roads where lesser vehicles travel, you use conventional 2-wheel drive. But when the going gets tough, Sidekick gets going with a two range four-wheel drive. For dashing through the snow, or mud, or roads where sissy sedans fear to tread, you slip into high range. For breaking trail, bulling your way out of the mud or towing some poor stuck soul in an ordinary vehicle, you shift down into low range and take the strain in stride.

1.6 litre Electronic
Fuel Injected Engine
Maximum horsepower: 80 hp
Maximum torque: 12.5 kg-m

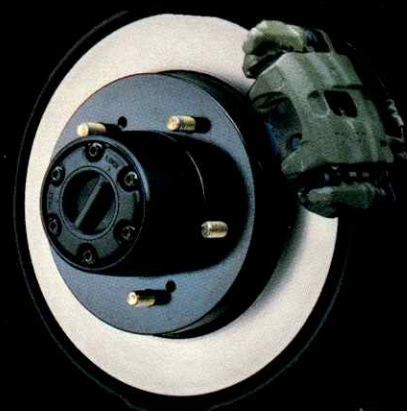

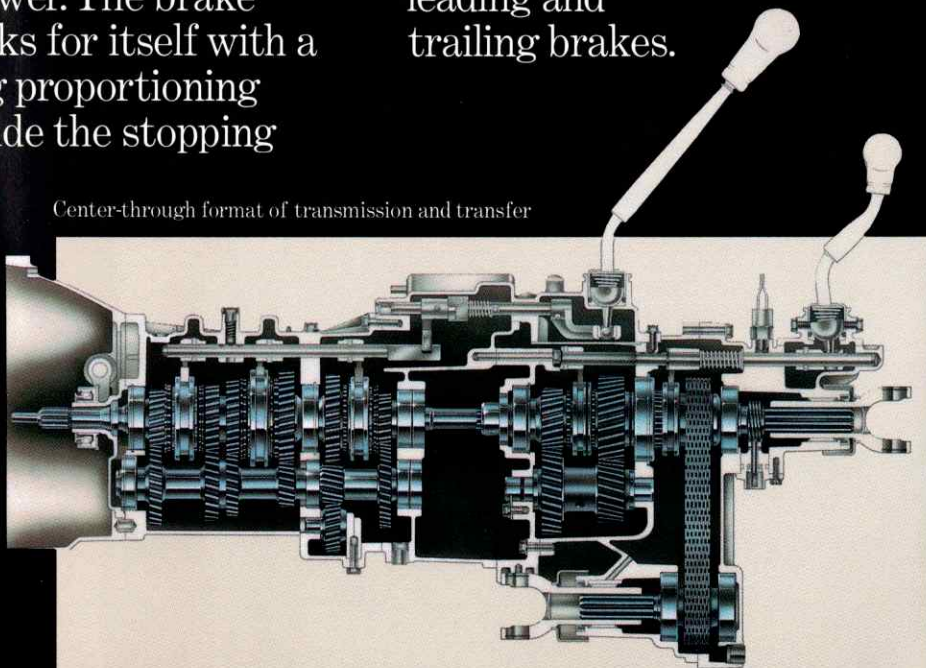

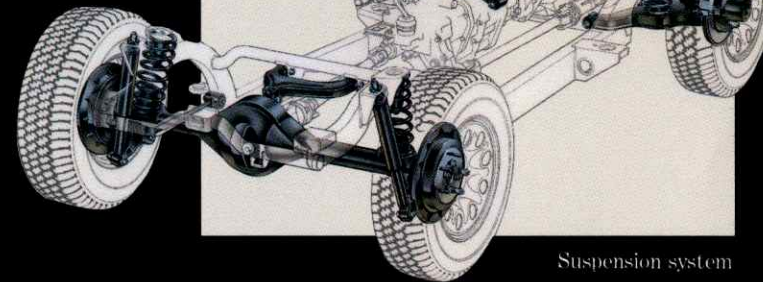

But there's more than go to Sidekick. There's also great stopping power. The brake system thinks for itself with a load-sensing proportioning valve to divide the stopping

emphasis properly between the front discs and the rear-leading and trailing brakes.

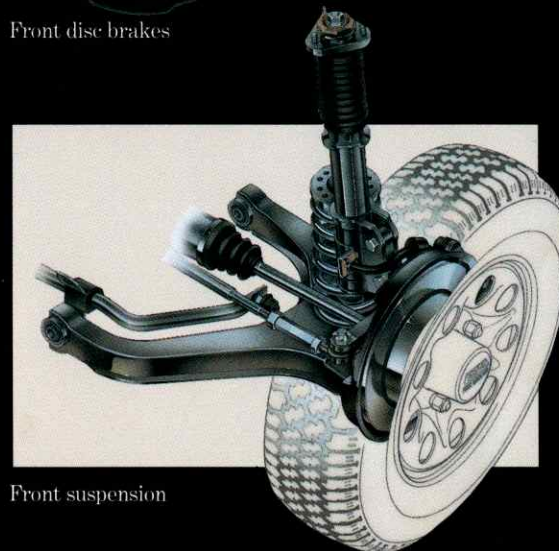

Center-through format of transmission and transfer

Front disc brakes

Suspension system

Front suspension

Home away from home.

As for the ride, welcome to the comfort zone. Sidekick sits on four coil springs, the rear suspension incorporating a trailing link between the centre wishbone and the front with a whopping 160mm suspension stroke. The result is armchair-ease on the road and a very forgiving tolerance for off-road adventuring.

Try Sidekick on for sighs – of contentment. Plush, bucket-seats are craftily contoured to support you even when you're blazing a bumpy off-road trail. There's loads of adjustment front to rear so the longest legs are catered for and the backs adjust in crisp 2 degree increments so you can tailor-make your comfort.

Headrests adjust to fit the long and the short and the tall. The front ones come off, so you can turn the front seats into beds in seconds. Rear seats flatten, either together or singly, for added cargo space. Yes, with Sidekick, you can take it with you, whatever it is. In fact, the only question you may have is whether Sidekick's a sports-wagon or a luxury sedan. You decide while you're having fun.

The LeMans feel.

Sidekick cuts a dash that wouldn't be out of place on a race car. The information-at-a-glance instrument panel is hooded against glare. It sports

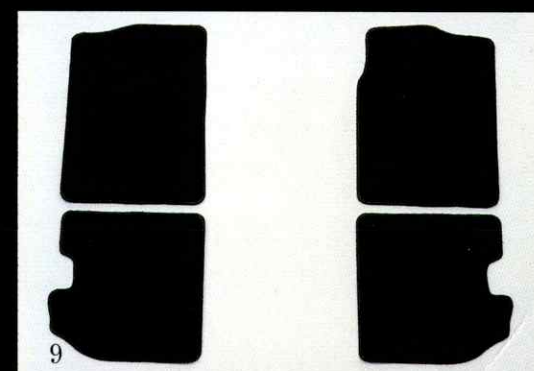

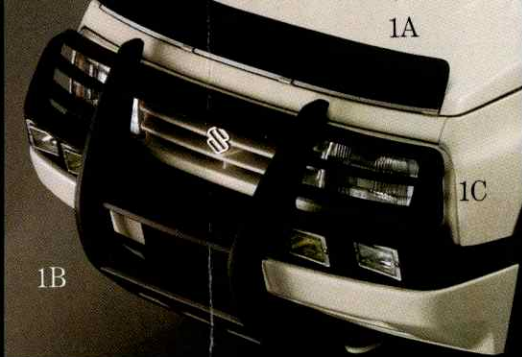

a tachometer, as well as the speedometer and Four-Wheel-Drive indicator so you're on top of performance all the way.

The neatly-curved dash presents the controls in natural position, so you won't have to fumble with them, even in the dark. The steering wheel is collapsible and, on the Custom Package, folds out of the way for easy entry.

Powerfully persuasive.

Sidekick's Custom Power Package lets you adjust windows, lock/unlock, adjust mirrors at the touch of a finger. You cruise surrounded by the music coming out of the quadrophonic speakers of your AM/FM cassette stereo. There's a digital clock, cruise control, even an accessory socket so you can plug in any extras you can dream up. If you're still debating spending an extra thirty thousand on a European sedan, the Sidekick Power Package is a powerful argument for thrift.

Now your Suzuki Sidekick can be as unique as you with these custom accessories.

Suzuki has a large selection of custom accessories that will make your new Sidekick truly unique. Here are just some of the dramatic and practical accessories you can add to your Sidekick.
