# SANTANA

SUZUKI

At Suzuki, we have over 30 years engineering experience behind us and have established an outstanding reputation as the world's largest manufacturer of purpose-built, lightweight 4-wheel drive vehicles.

This depth of experience in engine, chassis and 4-wheel drive technology has been incorporated into the development of the new Suzuki Santana as well as the other SJ models in the range.

# SANTANA

Based on the extremely popular SJ410, the new Suzuki Santana is available in two versions. Both feature the tried and tested 970cc engine, and of course, Suzuki's rugged 4-wheel drive practicality.

The distinctive black Suzuki Santana 'Sport' looks exceptionally stylish with colour co-ordinated wheel arch rims, bumpers and light guards. While the smart pin-stripe cloth upholstery has been designed to complement the grey and red side stripes.

The all-white Suzuki Santana comes with a matching soft top and receives the same colour-keyed treatment for the bodywork. Like the 'Sport', the eye-catching exterior graphics are complemented by the attractive interior cloth trim.

Accessorised Vehicle

Step inside either model and you'll find many features unique to the new Suzuki Santana range. The front seats provide even more support and have been designed to be as comfortable as possible with new cloth upholstery and built-in head restraints. The rear seats are now split 50/50 so that each half can be folded forward separately when required to give even greater versatility. There are matching cloth inserts on the door panels, and for that final touch of luxury, full interior carpeting has been fitted as standard to both versions.

On the subject of comfort, the new Suzuki Santana models have newly designed suspension to ensure a softer, more supple ride whether you're tackling the

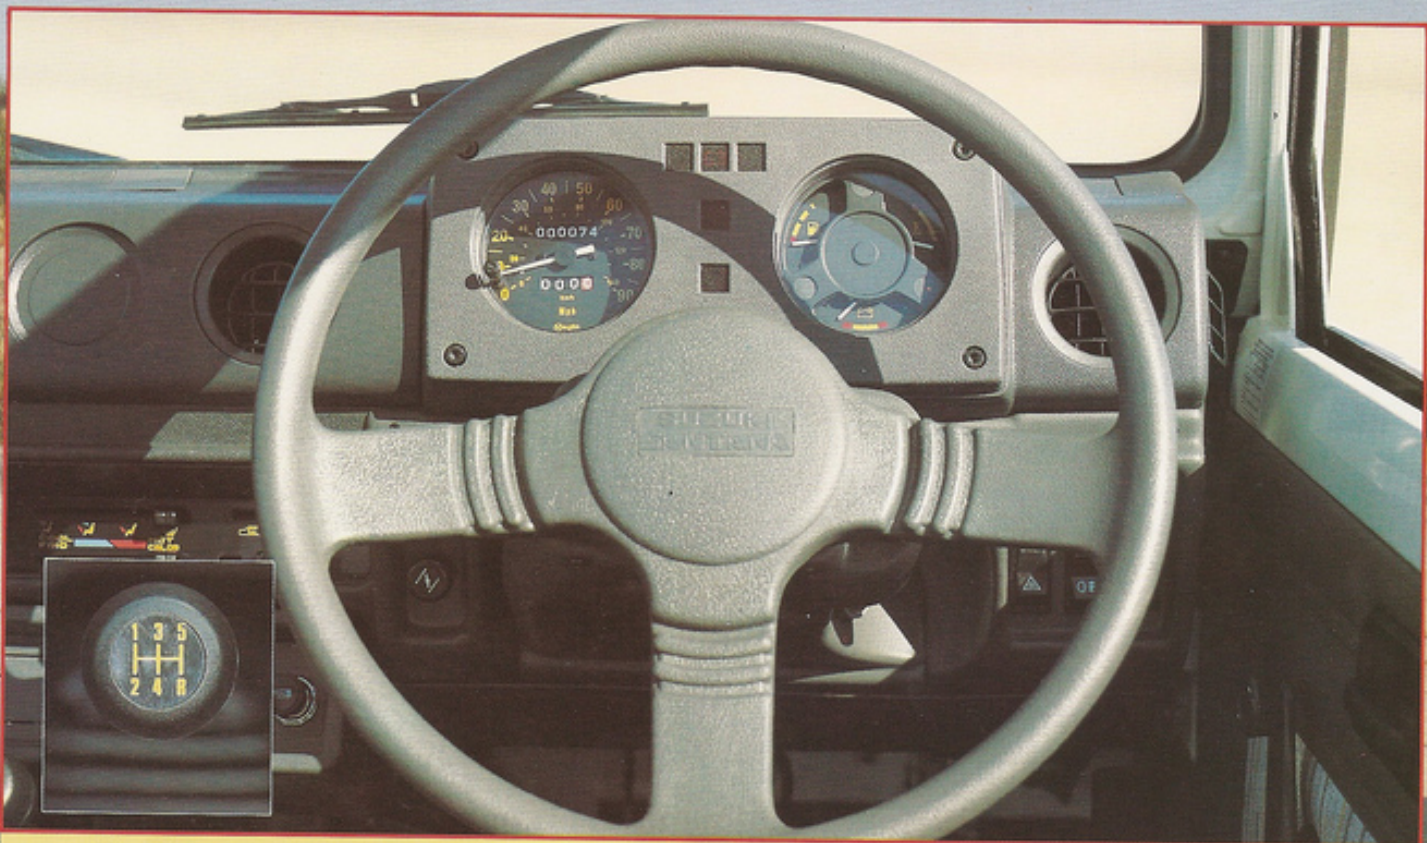

roughest off-road terrain or cruising down a three-lane motorway.

The standard 5-speed gearbox works in conjunction with a two-speed transfer box to ensure that the Suzuki Santana always has the right ratio to plough through snow, ice or mud. You can select two or four-wheel drive according to the conditions, and once in four-wheel

drive, the Suzuki Santana has a total of 10 forward gears to keep you on the move.

The new Suzuki Santana's high level of equipment is completed by the deluxe white soft top, spare wheel cover and wheel lock, passenger door mirror and a comprehensive dashboard.

The dashboard is fully equipped with an efficient heating and ventilation system, a display of warning lights which includes choke, low fuel level and 4-wheel

drive indicator, a passenger grab handle, a convenient glove box and there's even a cigar lighter.
