

**ALL NEW**  
**Jimny**

Way of Life!

THE ONLY LIGHTWEIGHT 4X4  
THAT TAKES YOU  
PLACES OTHERS CAN'T

# NOBODY BUT JIMNY

It's the original, rugged 4x4. Beginning with the LJ10A in 1970, The Jimny has forged a legendary reputation for being tougher than the terrain it travels. Lightweight but seriously capable, the all-new Jimny is the next level in taking you places others can't.

## LOOKS BORN OF A LEGEND

All-new Jimny grabs attention with rugged retro looks capturing iconic cues from its past. Modern and boldly functional, it's been shaped by a strong desire to explore.

# READY TO CONQUER THE WILD

Built to tackle the harshest weather and terrain, the Jimny goes where other vehicles fear to tread. Take on nature's challenges. Unleash your spirit of adventure and get ready to explore.

## EXTERIOR

### Optimised bumpers

All's clear for adventure, including angled bumper edges that increase clearance at the wheels for assured climbing over obstacles. Their moulded black material safeguards the body from stone chips and scratches.

### LED headlamps with washers

Take pride in the Jimny's heritage, symbolised by iconic round headlamps. Washers are standard for LED headlamps, allowing confident driving in mud, dirt or snow.

### Practical drip rail

Let the Jimny take you on your all-weather adventures. The drip rail can keep your head dry and your spirits bright when entering and exiting by helping to prevent water from dripping off the roof.

### Bonnet corners

Stay on top of your surroundings, thanks to a flat and square bonnet that is carefully crafted to keep front corners in view for better situational awareness when navigating uneven terrain.

## INTERIOR

# STAY FOCUSED ON WHAT MATTERS MOST

In the Jimny, there's little to distract you from your adventure. Its stylish black interior is humble yet handsome, and controls are designed for quick, easy operation even when wearing gloves. Enjoyment matters too, so a 7-inch multimedia unit integrates satellite navigation, reversing camera, Apple CarPlay® and Android Auto.™

## Down-to-earth design

Relish the sheer pleasure of simple, straightforward and sensible design. Colours are minimal. Every detail is thoughtfully and attractively crafted to support serious off-roading.

## Infotainment system with smartphone connectivity

A 7-inch touchscreen display enables intuitive operation of multimedia features including audio, hands-free phone, navigation system and smartphone integration. Features can be selected from the four main operating modes—Listen, Call, Drive and Connect. The Smartphone Linkage Display Audio works with Apple CarPlay®, Android Auto™ and MirrorLink™. By connecting your compatible iPhone via USB, Apple CarPlay® allows you to make phone calls, access your music, send and receive messages, and get directions all by voice command or a tap on the audio display. Android Auto™ puts Google Maps®, Google™ Search and other Google services at the driver's fingertips in a non-distracting way. MirrorLink™ lets various applications on your smartphone appear on the vehicle's touchscreen display, allowing you to access your smartphone's features.

## NO LIMITS

It will take you absolutely anywhere, then bring you back again. The all-new Jimny opens up every opportunity for adventure with the incredible 4x4 traction and powerful low-range capability of ALLGRIP PRO.

# PACK YOUR GEAR FOR ADVENTURE

Whether navigating the urban jungle or exploring off the beaten track, the Jimny offers ample space and practical storage features to accommodate every need.

Note: Items are loosely placed in the rear storage area for illustrative purposes only and should be properly secured while driving.

## PROFESSIONAL TOOLS

### Practical rear storage

Be packed and ready for every possibility. The thoughtfully designed rear storage area can be expanded by folding the rear seats, and the floor and seatbacks are resin-coated\* for easy removal of dirt. Flat all the way across, the expanded rear storage area allows crosswise storage of wide items. Screw holes provide support for optional accessories like luggage bars and utility hooks to enhance versatility and practicality. A rear power socket\*\* also lets you power appliances and tools behind the vehicle.

### Handy front seat storage

Everything is within your easy reach. Convenient pockets and trays keep your smartphone, beverages and other personal items close at hand. Nearby USB and accessory sockets connect and power your mobile devices. A large, easy-to-grip handle provides solid support for the front passenger when entering or exiting the vehicle.

Note: personal items in the photos are shown for illustrative purposes only. Items should be properly secured while driving.

OFF-ROAD  
PERFORMANCE

Depend on robust authenticity

Four uncompromising features define the Jimny as a serious off-road machine – a robust ladder frame, three ample body angles, 3-link rigid axle suspensions with coil springs and 4WD with a low-range transfer gear.

Ample body angles and clearance

Push outdoor exploration to the limit with an ample departure angle, ramp breakover angle, approach angle and ground clearance that lets you handle steep slopes, sharp descents and obstacles without scraping the bumpers or underbody of the Jimny.

Rigid ladder frame

From the very first generation, the Jimny has always featured a ladder frame that offers a solid foundation for serious off-road performance.

3-link rigid axle suspension with coil spring

Settle for nothing less than full-width rigid axles in both the front and rear, which help the Jimny ensure superior grip on diverse surfaces. When an obstacle pushes one wheel up, the axle presses the other wheel down to increase tyre contact in rough road conditions.

4WD with low range transfer gear

At your command, the Jimny adapts to every situation. Shift the transfer lever to the 4L mode when the going gets tough for maximum torque and traction. On flat off-road trails and snow-covered roads, enter 4H to enjoy 4WD traction at higher speeds. Once you return to paved roads, shift to the 2H (2WD) mode for a smoother, quieter and more fuel efficient ride. Let ALLGRIP PRO satisfy your adventurous nature with its on and off-road mastery.

ALLGRIP  
PRO

# POWER YOUR OFF-ROAD AMBITIONS

Nothing stands in your way when driving the Jimny. It takes you wherever you want to go with unrivalled agility, precision control and powerful torque when you need it most.

## PERFORMANCE

### New 1.5L engine

Feel empowered by the Jimny. Its robust 1.5L engine generates strong torque throughout a wide rpm range for powerful off-road performance. Small and lightweight, it also delivers high fuel efficiency.

### Hill Hold Control

Move upward and onward when starting on steep slopes. Even on bumpy slopes that vary on the right and left sides, this feature helps prevent rearward rolling so you can focus on controlling acceleration.

### Hill Descent Control

On tricky descents, with a push of a button, the system is designed to automatically apply the brakes and maintain a fixed speed — so you can concentrate on steering without using the brake pedal or clutch.

### Brake LSD Traction Control

Cover slippery ground with confidence. If two wheels diagonal from each other lose grip while you're travelling over slippery surfaces, this feature will automatically brake the slipping wheels and redistribute torque to the other two wheels, allowing the Jimny to make its escape.

# SAFEGUARD YOURSELF AND OTHERS

Safety is a priority whether trekking through the wilderness or commuting in the city. The all-new Jimny offers the protection of 6 SRS airbags and the added confidence of ESC (Electronic Stability Control). The advances of Suzuki Safety Support<sup>\*</sup> give even greater peace of mind. These preventative safety features are designed to detect potential accidents and help avoid them.

## SAFETY

### Autonomous Emergency Braking (AEB)<sup>†</sup>

When moving, the all new Jimny uses two sensors – a monocular camera and a laser sensor – to determine if there is a risk of collision with a forward vehicle or pedestrian.

### High Beam Assist

Enjoy safer, more relaxing and courteous night driving with this feature designed to automatically switch the headlights between high and low beams depending on the lighting environment and presence of other vehicles<sup>\*</sup>.

<sup>\*</sup>When travelling 40km/h or faster with the headlamp switch in auto position.

Note: There is a limit to the ability of the monocular camera and laser sensor to detect obstacles and lanes, and control the vehicle. Please do not rely on the system; always drive safely.  
<sup>†</sup>AEB is designed to support the driver only in emergency situations. The driver remains responsible for the vehicle at all times.

### Weaving Alert

After a long day, it helps to have some support. If the vehicle is wandering due to your drowsiness or fatigue, this system is designed to issue audio and visual warnings to keep you alert.

### Lane Departure Warning

The Jimny helps you stay on track. Should you unintentionally stray from your lane while driving at high speed<sup>\*</sup>, this feature is designed to vibrate the steering wheel and issue a visual warning to encourage safer driving.

<sup>\*</sup>While travelling at approximately 60km/h or faster.

### ESC (Electronic Stability Control)

### 6 Airbags
