

IGNIS

Way of Life!

Ignite Your Senses

The Ignis is a crossover that combines a simple, stylish exterior with versatile functionality. The lines of its compact, easy to drive body characterises its personality to increase its presence. The Ignis stirs your senses, hinting the start of something special.

Ignite Your Spirit

For a refreshing start of your day, you head to your favourite café to enjoy their unique interior design and finely selected coffee. Compact and swift, the Ignis is easy to manoeuvre through narrow city streets and will take you to the doorstep of your destination. Every day spent with the Ignis will give continuous comfort and ease.

Ignite Your Style

Today you dress up in style for the opening of a friend's museum exhibition. The Ignis's refined design suits formal as well as casual settings. Heading out in the new Ignis will make you confident and bold for your special day out.

Ignite Your Simplicity

Alone on a quiet lakeshore, you await the arrival of a comet from afar. With the spacious luggage compartment, you can relax and enjoy preparing for the night. The Ignis lets you make the most of your precious and satisfying personal moments.

ALLGRIP AUTO

ALLGRIP AUTO gives you the freedom to keep driving, unaffected by sudden changes in road surfaces and weather conditions.

ALLGRIP AUTO

ALLGRIP AUTO is the optimal 4WD system, gives the driver peace of mind in everyday driving, especially when driving on slippery roads or snowy surfaces. With the viscous coupling four-wheel drive system, torque is automatically distributed to the rear wheels when it detects the front wheel losing its grip of the road.

ALLGRIP

ALLGRIP
SELECT

ALLGRIP
PRO

"A vehicle that can take on rough roads and go to places that cars couldn't go in the past" With this philosophy, our first four-wheel drive model was developed in 1970. This was the start of ALLGRIP, Suzuki's renowned four-wheel drive technology.

Nearly half a century since then, our 4WD technology has been refined to provide drivers with even more excitement, pleasure and reassurance. The new IGNIS and ALLGRIP combined, you can expand your range of activities and enhance your diverse lifestyles.

INTERIOR

With its simple and iconic design, and functions for a pleasant driving experience, the cockpit offers double the fun.

Smartphone Linkage Display Audio (SLDA) (GLX and GL+)

The audio incorporates a touch-panel display that is as intuitive as a smartphone. Connect your smartphone via Bluetooth® or USB cable to use smartphone applications through the display, which is also equipped with radio, rear-view camera, and navigation* function.

*GLX only

Apple CarPlay lets you use your iPhone to make calls, access your music, send and receive messages, and get directions all with your voice through Siri or by tapping on the audio display.

Apple CarPlay is available in the countries listed at the following link:

<http://www.apple.com/ios/feature-availability/#applecarplay-applecarplay>

*For more details including iPhone models compatible with Apple CarPlay see:

<http://www.apple.com/ios/carplay/>

*Apple, Apple CarPlay and iPhone are trademarks of Apple Inc., registered in the U.S. and other countries.

androidauto

Android Auto™ extends the Android platform into the car in a way that's purpose-built for driving. It is designed to minimise distraction so you can focus on driving with Google™ services like Google Maps™ and Google Search™. Get the Android Auto app on Google Play™.

*Android Auto is available in the countries listed at the following link:

<https://www.android.com/auto/whit-the-road>

*Most phones with Android 5.0+ works with Android Auto:

<https://support.google.com/androidauto/#6140477>

*Android, Android Auto, Google, Google Play and other marks are trademarks of Google Inc.

MirrorLink

MirrorLink lets various applications on your smartphone appear on the vehicle's touchscreen display, allowing you to access your smartphone's features.

*MirrorLink™ is compatible with the smartphones listed at the following link:

<https://cert.mirrorlink.com/ProductListing/>

*MirrorLink™ is a registered trademark of the Car Connectivity Consortium LLC.

Comfortability for road trips (GLX)

Use of the cruise control function enables the vehicle to automatically maintain a set speed without the need to operate the accelerator pedal. This reduces driver fatigue when driving at high speeds or over long distances and also improves fuel efficiency by eliminating unnecessary acceleration and braking.

The information you want, always visible

The meter panel displays basic information like exterior temperature, time of day, mileage, and cruising distance. The information displayed can be changed using switches adjacent to the meter panel or on the steering wheel.

A solid, linear steering feel

The sporty, high-quality steering wheel has a silver finish; a leather finish is also available for an even more luxurious interior.

Dynamic colouring

The bold contrast of black and white on the instrument panel and door trim is simple in composition but leaves a powerful impression. Orange and metallic titanium coloured accents on the centre console and door grips add an energetic feel to the interior atmosphere.

Driver and passenger seat heaters (GLX, GL+ and GL)

In addition to heating from the air conditioner, the seats are also quickly heated, contributing to a more comfortable drive.

UTILITY

Roominess and ease of driving expand your range of activities.

Spacious interior

The adoption of a new-generation platform minimises the size of the engine compartment space to achieve a roomy interior, leaving plenty of space for rear seat passengers.

Convenient, easy-to-use storage space

1. Glovebox
2. Centre console tray and cup holder
3. Front door pockets and bottle holders
4. Rear door bottle holders
5. Rear console cup holder

Sliding rear seats for an easier-to-use interior (GLX and GL+)

The left and right rear seats slide forward and backward separately from each other, making it possible to adjust for legroom, luggage, and all sorts of situations. The rear seats are easily slid by lifting the levers on the top of the seatbacks or below the seats.

Luggage space whose volume can easily be adjusted to fit your luggage

The Ignis boasts luggage space volume measuring 514L.* The 50:50 split rear seats can be folded down from the luggage side as well; folding down the seat backs makes it possible to arrange the space for various kinds of luggage.

*When sliding rear seat is folded down. Measured using the German Association of the Automotive Industry (VDA) method.

Rear seats raised Rear seat split folded Both rear seats folded

Outstanding manoeuvrability and high traveling performance

With a minimum turning radius of 4.7m, the Ignis is easy to manoeuvre and drive on narrow roads and car parks. Large-diameter tyres and high ground clearance also provide peace of mind when driving over uneven or bumpy roads.

Guide-me-home light / Lead-to-vehicle light (GLX, GL+ and GL)

The headlights continue to illuminate the road for 10 seconds after the driver leaves the car, providing you with illumination as you open the door to your house. The low beams and position lamps turn on and stay on for 10 seconds when you unlock your car doors using the remote control. This convenient function is useful for lighting your way as you approach your vehicle.

PERFORMANCE

Excellent driving performance that shines in every situation gives you an exciting ride to your destination.

1.2 DUALJET

1.2 DUALJET engine incorporates an unique injection system that greatly improves thermal efficiency by increasing the compression ratio. It provides a high-level balance between powerful driving and excellent fuel efficiency for a compact engine.

Type	K12C
Displacement (cc)	1,242
Compression ratio	12.5
Maximum output (kW/rpm)	66/6,000
Maximum torque (N·m/rpm)	120/4,400

Choose the transmission you want for the kind of driving you want

5-speed manual transmission

The 5-speed manual transmission sets the gear ratios for maximum engine efficiency for a moderate, comfortable shift feel.

5-speed AGS (Auto Gear Shift)

Suzuki's 5-speed AGS (Auto Gear Shift) system is based on a manual transmission but with automatic clutch and shift operation.

Newly-developed suspension

The suspension is newly designed to reduce its weight as well as increase its mounting rigidity. In addition to smoothly absorbing shocks from the road surface, it also contributes to a light, stable steering feel directly responsive to the driver's handling.

Hill hold control

Equipped with hill hold control that temporarily prevents (for up to approximately 2 seconds) the automobile from moving backward when shifting from the brake pedal to the accelerator pedal.

Hill descent control (ALLGRIP models)

On steep descents, when the car determines that the deceleration from the engine brake only is not enough, it automatically applies the brake to control its speed. This lets you control speed without stepping on the brake pedal, so you can focus on steering.

Grip control (ALLGRIP models)

This function ensures a smooth start on roads that are slippery with snow or mud. It quickly applies the brake to the slipping wheel while focusing drive power on the opposite wheel, and improves escape performance by using traction control to limit the loss of engine torque.

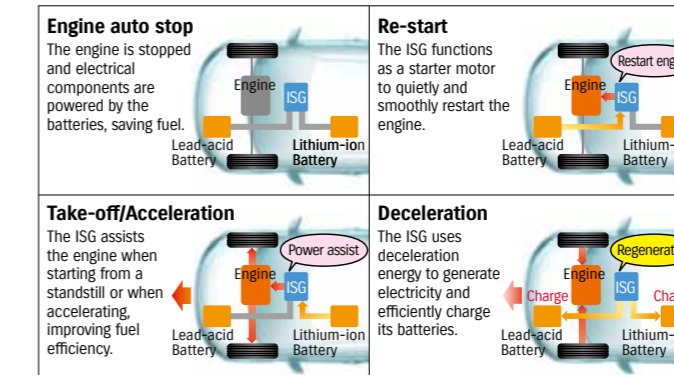

FUEL EFFICIENCY

Clever fuel-efficiency technology helps conserve gasoline for exceptionally economical driving

Mild hybrid system (SHVS) (Optional for GLX and GL)

Equipped with mild hybrid system—the SHVS (Smart Hybrid Vehicle by Suzuki)—which offers dramatically improved mileage and a more comfortable ride. The SHVS system is composed of an Integrated Starter Generator (ISG)—a generator with a motor function—that assists the engine and a highly efficient lithium-ion battery with excellent charging and power supply performance. Regenerative deceleration and use with the Engine Auto Stop and Start system improves fuel efficiency and is an optimal hybrid for a compact car seeking to achieve lightness, smallness, and space efficiency.

*Operation of the assist function depends on certain conditions, such as the battery status.

A new-generation platform that contributes to fuel efficiency and comfortability

The quality of the ride is determined by the automobile's framework. The smooth, continuous shape of the Ignis chassis secures high rigidity while dramatically reducing reinforcing members and weight. Adopting this new-generation platform contributes to outstanding fuel efficiency and a dramatically improved sense of stability and solidity that belies the vehicle's compact body. Minimising the size of the engine compartment space also secures room for a comfortable interior.

SAFETY

Making full use of advanced safety technology “just in case” brings peace of mind to your everyday driving.

Dual Camera Brake Support (DCBS) (Standard for GLX, Optional for GL+, GL and GA)

Two cameras recognise forward vehicles, pedestrians, and lane lines just like human eyes. Based on various information captured by these cameras, this system helps avoid collisions and mitigate collision damage through warnings and automatic braking.

1. Warning

When the system decides there is the potential for a collision, it provides a warning through a buzzer and a light on the meter panel.

2. Automatic light brake

If the risk of collision increases, the car automatically initiates soft braking in addition to warnings to encourage the driver to evade collision.

3. Brake assist

If the driver applies the brake while the warning brake function is engaged, the brake assist function engages for more powerful braking.

4. Automatic brake

When the system decides that a collision is inevitable if things continue unchecked, it initiates strong braking automatically in an effort to avoid collision or mitigate damage.

Warning	Depending on various factors the two cameras may be less able or not able to detect certain objects. Collision may be avoided in some cases where the system is activated at speeds between approximately 5km/h and 50km/h (for pedestrians, where the speed is under approximately 30km/h). Depending on the detection and movement of the object, the alarm may sound only, without accompanying automatic brake. The alarm may activate at the same time as automatic braking in other cases.
---------	--

Lane departure warning function (Standard for GLX, Optional for GL+, GL and GA)

When the vehicle is traveling at over approximately 60km/h and is departing the lane without use of the turn signal by the driver, the system produces a steering-wheel vibration and provides a warning through a light on the meter panel to draw attention to lane departures caused by factors such as inattention to the road.

Weaving alert function (Standard for GLX, Optional for GL+, GL and GA)

When the vehicle is traveling at over approximately 60km/h and is weaving from side to side within the lane, the system provides a warning using a buzzer and a light on the meter panel. This draws the driver's attention to weaving caused by drowsiness or other factors.

Emergency Stop Signal (ESS) (Standard for GLX, Optional for GL+, GL and GA)

When applying the brakes suddenly while driving above 55km/h, in addition to the brake lights the vehicle also automatically flashes the hazard lamps at high speed to alert following vehicles.

Total Effective Control Technology (TECT) body

The Ignis's body design centres on Suzuki's TECT concept, resulting in a structure that efficiently absorbs and disperses the energy in the event of a collision.

Six airbags

IGNIS comes standard with 6 airbags which include dual front, side, and curtain airbags.

Ignite Your Satisfaction

Load your tuned-up mountain bike and head off to a downhill course with a beautiful view. Customise your Ignis with your choice of accessories to open up a whole new world of hobbies. With its strong character, the Ignis enables you to live your own personal car life.

For a SUV look

Exterior accessories give your Ignis a more powerful, off-road appearance.

*Fitted with 16-inch polished alloy wheels, Front skid plate, Side body moulding (large), Roof edge spoiler and Rear skid plate.

Accent colour items

Coordinate exterior and interior colours to create a one and only, personal Ignis.

Fervent Red (ZNB)

Flame Orange Pearl Metallic (ZWD)

Summer Blue Metallic (ZUW)

Superior White (26U)

*Fitted with Front grille centre bar, Front fog lamp bezels, Outside door mirror covers and Side body decors.

Fervent Red (ZNB)

Dazzling Orange Metallic (QCW)

Summer Blue Metallic (ZUW)

Titanium Gray Metallic (QDN)

*Fitted with A/C centre louvres, side louvre rings, Centre console ornament and Inside door grips.

Ignite Your Story

At the end of a full and satisfying day, a gorgeous cityscape awaits. Driving the Ignis makes you feel as one with the car and invites you to just keep going on and on. Stirring the senses, the Ignis opens up dramatic new tomorrows.
