

VITARA

Way of Life!

THE COMPACT SUV | RE-INVENTED

YOUR DRIVE | RE-INVENTED

Suzuki pioneered the compact SUV. Now we've re-invented it. Every aspect of the all-new design continues to reflect Vitara's legendary vitality, culminating in a vehicle that combines SUV lifestyle with city convenience like never before.

The muscular body styling immediately turns heads. To further express your individuality, you can now mix and match interior trims, features and choose exciting two-tone exterior colours.

Technology reaches a whole new level with Suzuki's intuitive multimedia satellite navigation system standard on every Vitara. This connects you to satellite navigation, Bluetooth® and your own multimedia world.

A spirited but highly fuel efficient engine, an all-new 6-speed automatic transmission with paddle shift and newly designed suspension enhance Vitara's agile driving dynamics. The result is an exhilarating driving experience unexpected in an SUV and more usually found in performance hatches.

Staying true to Suzuki's legendary 4x4 heritage, Vitara's ALLGRIP 4WD system and true 4x4 ground clearance mean the mud and the snow is no barrier to adventure.

'You are what you drive' takes on an all-new meaning in the Suzuki Vitara. The compact SUV re-invented.

INDIVIDUALITY | RE-INVENTED

Make your Vitara truly yours. With the ability to choose striking two-tone body colours, add bold interior trim colours and even more accessories, you can take your Vitara and personalise it.

Mix and match colours and designs to suit your taste, and make your Vitara as individual as you are.

The RT-S model comes standard with fabric seats with silver stitching, while the RT-X model comes with leather seats with suede inserts and suede door inserts.

Personalise your Vitara with a choice of optional interior trims and features.

STYLE | RE-INVENTED

Vehicle shown with optional accessories

INTERIOR | RE-DEFINED

The spacious interior of the Vitara redefines compact SUV comfort. Taking its inspiration from the sporty exterior the cabin envelops you in iconic style.

The focal point of the new Vitara is the dynamic dash design integrating the 7-inch multimedia touch screen with intelligent technology. From every angle the striking lines and features convey Vitara's sporty and muscular SUV style inside, as it does out.

The dash also features a digital climate control system, ensuring you and your passengers always travel in complete comfort. The high level of finish

throughout extends to suede door inserts and suede seat upholstery on the RT-X model. An extra touch on the RT-X model that adds to the feeling of sophistication are the electric folding door mirrors.

In the cabin is all the driving intelligence you need. Average fuel use, outside temperature and the ALLGRIP driving mode can be read at a glance. Audio controls, cruise control and Bluetooth® phone controls are all conveniently located on the steering wheel, so you can keep your eyes on the road ahead.

Sit back and enjoy the drive of your life.

Sporty paddle shift control

Choose the all-new 6-speed auto and you'll find paddle shifts on the steering wheel. These add to the sense of a sporty feel, as you manually shift up and down gears.

Keyless push start system*

Even when the key is in your pocket or bag, you can easily lock or unlock the Vitara by pressing the button on the door handle. The system also allows you to start and stop the engine by pushing a button on the instrument panel.

Audio controls

Practical and convenient, steering wheel-mounted controls allow you to concentrate on the road, making the vehicle safer.

Automatic wipers and lights*

Rain-sensing wipers automatically turn themselves on and off, so you can concentrate on any challenging driving conditions ahead. The auto-levelling headlights have sensors that turn the headlights and taillights on or off depending on the brightness on the day.

*RT-X model

TECHNOLOGY | RE-INVENTED

Life's out there waiting. All you want to do is instantly link up with your world and connect. Whether you want to listen to your music, call your friends or plan a journey, Vitara's multimedia satellite navigation system makes it easy.

The interface connects you to the latest communications in the most intuitive and uncomplicated way. Operated by voice recognition or with a 7-inch multi-touch display, the interface makes driving safer and more enjoyable.

7-inch multi-touch colour display

The WVGA display gives you intuitive control of audio and video, as well as hands-free phone and navigation systems. This includes Bluetooth® connectivity, full iPod® integration and AM/FM radio and audio playback options.

Satellite Navigation

Easy-to-follow art map style navigation makes it easier to get to wherever you want to go.

Bluetooth®

Bluetooth® audio streaming lets you stream music from your smart phone and enables you to use the phone hands free.

Rear view camera

The navigation system also features a rear view camera with guidelines that makes agile parking with safety a breeze.

Responsive voice control

Voice recognition lets you search for points of interest, your favourite music, or dial up your contacts, without taking your hands off the steering wheel.

The image shows the interior of a car from a low angle, looking towards the front. Two black leather seats with white stitching are visible. A large sunroof is open, showing a bright blue sky and green trees. The sun is shining brightly through the sunroof, creating a lens flare effect. The car's interior is light-colored, and the windows show a view of trees outside.

FREEDOM | RE-IMAGINED

SUV STYLE | SUV SPACE

The all-new Vitara is designed around your lifestyle. The interior has a massive 375 litres of luggage space. The 60:40 split folding rear seat and movable luggage board let you recompose the interior in an instant.

Even when the rear seats aren't folded down, heaps of gear and even a golf bag fit in comfortably. The tailgate is also lower for extra easy loading. You'll also find lots of clever compartments exactly where you want them.

TALLER WIDER STANCE

COMPACT CITY DRIVING

SUV LIFESTYLE | CITY CONVENIENCE

With its car-like handling, excellent fuel economy (5.8L/100km*) and spacious interior, the Vitara blends SUV lifestyle with city convenience like never before.

The new six speed automatic transmission improves performance, fuel efficiency and quietness, while its lightweight rigid body and MacPherson-strut suspension enhances overall driveability.

Perfectly suited to city driving thanks to its compact design and hatch-like cornering and stability, it feels just as comfortable navigating tight city streets as it does enjoying the freedom of the open road.

*ADR 81/02 results for 2WD manual transmission.

Aerodynamic performance

Through extensive research and testing, the Vitara achieves great aerodynamic performance while maintaining a rugged SUV look.

Lightweight rigid body

High-tensile steel has been used in many parts of the body, increasing the rigidity while reducing weight. The rigidity of the mountings for suspension frames and around the back of the body has also been enhanced to increase the overall body rigidity for excellent performance on all kinds of road surface conditions. Technologies to reduce weight have been applied to the vehicle body as well as mechanical parts including the doors, seats, suspension, and brakes. These combine to achieve outstanding fuel economy.

ALLGRIP

Four driver-selectable modes

Auto mode

Auto mode normally keeps the vehicle in 2WD. However, when tyre slippage is detected it automatically switches to 4WD. It prioritises fuel economy by switching to 4WD only when necessary. Auto mode provides reassurance in case of sudden changes in the weather like a sudden shower.

Sport mode

Sport mode actively uses 4WD to deliver supreme cornering performance on sharp bends and winding roads. It changes accelerator and torque characteristics for better engine response, and on vehicles with automatic transmission the engine speeds are kept high. All these features combine to offer a sporty drive. In addition, Sport mode delays ESC intervention, respecting your intentions for sporty driving.

Lock mode*

Lock mode constantly distributes high torque to the rear wheels to generate maximum traction. If the vehicle becomes stuck, ESC and other controls are optimised for extrication from deep snow and mud. Braking is applied to the slipping wheels and provides ample torque to the gripping wheels.

*Lock mode automatically switches to Snow mode at speeds over 60km/h.

Snow mode

Snow mode provides optimal configurations on slippery surfaces, such as snow, ice and mud. In accordance with accelerator pedal and steering inputs, Snow mode anticipates slippage before it occurs and allocates torque to the rear wheels to ensure outstanding grip. In addition, ESC kicks in earlier to assist vehicle stability on low friction surfaces. Reliable in slippery conditions with stability and outstanding control, Snow mode lets you relax and enjoy driving.

ADVENTURE | RE-DISCOVERED

The all-new Vitara RT-X comes with ALLGRIP, Suzuki's fully integrated 4WD system. ALLGRIP maximises road grip in varying conditions while decreasing running costs. The 4WD system lets you choose from four driving modes using a simple push-and-turn dial on the centre console. Coupled with Vitara's extra ground clearance and Suzuki's 4x4 heritage, Vitara is ready to escape the city for your next weekend adventure.

Hill Descent Control

Standard on models with ALLGRIP 4WD. If engine braking isn't enough to slow you down when negotiating a steep downhill slope, this automatically applies the brake to keep your Vitara at a low speed.

Hill Hold Control

Makes hill starts easy by preventing rolling back when moving your foot from the brake to the accelerator.

Impressive ground clearance and angles (Standard on both models)

With its large tyres and drive height, the Vitara provides an impressive ground clearance of 185mm. With more leeway in approach, ramp breakover, and departure angles, it runs smoothly over deeply-rutted or snowy roads.

EXCITEMENT | RE-IGNITED

Thirsty for excitement, yet incredibly fuel-efficient, the Vitara reignites the original passion we felt when we pioneered the compact SUV.

You'll quickly discover a spirited petrol engine brimming with personality. With impressive torque through all gears, the engine produces powerful driving on city roads as well as winding tracks. The reduced friction and weight in the engine both contribute to an extremely low fuel consumption of 5.8L/100km* on the combined cycle.

You'll also notice the evolved high performance suspension. This lighter, stiffer suspension provides superior handling while boosting ride comfort.

Coupled with the all-new 6-speed automatic transmission with paddle shifts or super smooth 5-speed manual, the Vitara is the perfect balance of responsive power and exceptional fuel economy.

*ADR 81/02 results for 2WD manual transmission.

All-new 6-speed automatic

This adds to response at low speeds and also lowers engine revs at higher speeds. Paddle shifts on the steering wheel let you experience manual mode by shifting up and down gears. The expanded lockup area also improves performance, fuel efficiency and quietness.

5-speed manual transmission

Smartly optimises gear ratios for better fuel economy and the light shift action heightens your driving pleasure.

MacPherson-strut suspension

The front wheels have a MacPherson-strut suspension. Extra driving stability is delivered by enhancing the rigidity of the lower arms, suspension frame layout, and struts. The rear wheels have an improved torsion-beam suspension. This also contributes to stability and ride comfort.

SAFETY | RE-ASSURED

Whether driving down the highway or a bush track, you are surrounded by some of the world's most advanced safety features. Seven airbags including dual front, side, curtain and a knee airbag for the driver immediately create a sense of confidence.

The best protection is avoiding an accident all together. This is where Vitara's dynamic safety systems such as Electronic Stability Control (ESC), Electronic Brakeforce Distribution (EBD) and Brake Assist System (BAS) come into their own.

ESC (Electronic Stability Control)

If the wheels lose traction, ESC adjusts the engine and brakes to help keep you in control.

Parking sensors

Front and rear sensors on the RT-X model monitor the space around you and give out a beeping sound when approaching an obstruction.

LED/DRL's and Fog Lamps

Daytime Running Lamps feature bright LED energy saving technology with cool blue projector covers. Fog lamps further enhance visibility and safety.

Rear view camera

The navigation system features a rear view camera with guidelines that makes agile parking with safety a breeze.

Impact safety and pedestrian protection

Maximising occupant safety and pedestrian protection, Suzuki's TECT (Total Effective Control Technology) utilises high tensile steel. Crumple zones absorb energy on impact, as the frame shifts it away from passengers inside.

PERSONALISATION | RE-INVENTED

We've re-invented the compact SUV. Now it's your turn to get inventive and really make your new Vitara your own. With a range of exterior accessory packs available, you can style your Vitara and make it unique.

The accessory packs include striking chrome accents that exude a bold style, plus daring black accessories including wheels and grilles that transform Vitara into the latest fashion statement.

Ask your Suzuki dealer to show you the complete range of exterior genuine accessories.

PERSONALISATION | RE-INVENTED

With the ability to add bold interior trim colours and a range of exterior and interior accessory packs, you can take your Vitara and make it personal.

Mix and match colours and designs to suit your taste, and make your Vitara as individual as you are.

For a full range of Suzuki Genuine Accessories and accessory packs to suit your Vitara, speak to your local Suzuki Dealer.
