

Alto

Way of Life!

Choose a new
way of life.

It's the new choice in motoring. A compact car that offers unprecedented fuel economy, phenomenal value, outstanding safety, legendary reliability, dynamic handling and smart Euro styling. A car with all the benefits of alternative fuel cars without the expensive premium. The smart new Suzuki Alto. A small car packed with big features that will improve your way of life and the life of the planet.

Choose economy and efficiency.

*Alto manual figures

Suzuki, a world leader in building economical cars, now sets a new standard in fuel efficiency. The cleverly engineered Alto delivers fuel economy of just 4.5 litres per 100 kms, from a new generation one litre, 3-cylinder, twin-VVT engine, making it the one of the most fuel-efficient petrol five door cars in New Zealand. With compact dimensions and intelligent engineering, Alto manual emits just 107 grams of CO2 every kilometre, less than half the emission level of many cars on New Zealand's roads and in keeping with Suzuki's aim to have the lowest emissions in the world.

Easy manoeuvring

A minimum turning radius of just 4.5 metres provides excellent manoeuvrability and an ability to slip into tight parking spaces.

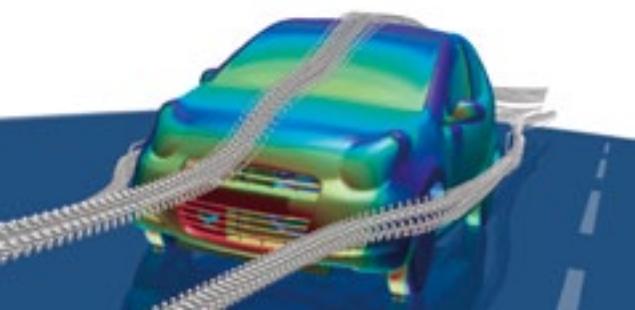

Lightweight optimisation

The Alto's compact dimensions have been complemented by the extensive use of high-tensile steel to create a highly rigid body with significant weight savings. The result is lightweight and maximum fuel efficiency without scrimping on safety.

Low resistance improves economy

Suzuki engineers have achieved a body design that not only looks stylish, but also 'slips' through the air with minimum resistance and is more efficient than many modern sports cars. Also keeping fuel consumption and emissions down are new tyres made from a special rubber compound that reduces resistance and smooths progress.

Choose safety and style.

You can rest assured that new Alto has loads of style and a totally modern look that's perfectly in tune with today. But true peace of mind comes with knowing your car is designed to protect your most precious possessions – you and your family. With six airbags including head protecting side curtain airbags, an Electronic Stability Programme (ESP®), and the safety of ABS braking with Electronic Brake Force Distribution (EBD), Alto has excellent safety levels and a high four star rating from the safety experts at ANCAP.

TECT for extra peace of mind

In the unlikely event of a collision, it's reassuring to know your car is designed to maximise safety. Alto's intelligently-designed TECT safety cell, built to retain its integrity even in severe accidents, helped earn its four star ANCAP safety rating.

Fits your lifestyle

Alto is designed to easily adapt to your active lifestyle, with 50/50 split fold rear seats and easy access through the wide opening rear doors. To carry both a rear passenger and bulky luggage, simply fold down one side of the seatback. The low lip tailgate allows easy loading and unloading of luggage.

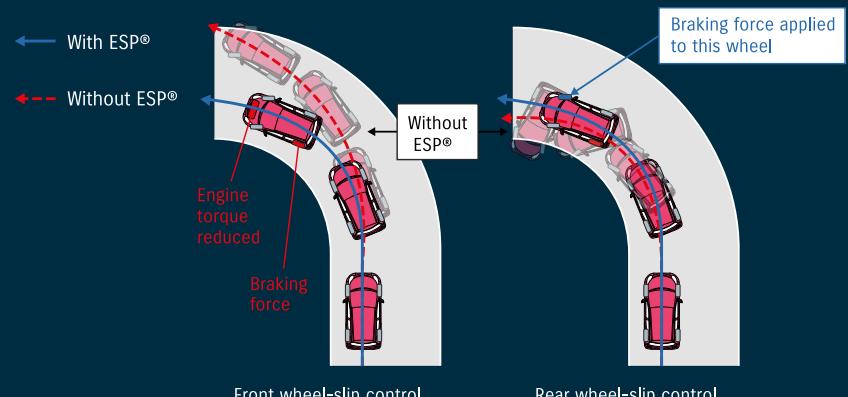

Comfort plus

This bright, airy interior features high creature comfort levels including power steering, air-conditioning with pollen filter and a six-speaker AM/FM/CD stereo system that easily connects to an iPod or other USB audio device. A dash mounted tachometer helps you keep an eye on the revs.

Electronic Stability Programme

ESP® supplements the Alto's inherent stability with three major functions: Anti-lock braking system (ABS) with electronic brake-force distribution (EBD), traction control and stability control. Various sensors determine and hold the intended cornering line, greatly increasing traction and stability control while reducing front and rear wheel-slip for enhanced safety.

ESP® is a registered trademark of Daimler AG.
