

wagonR

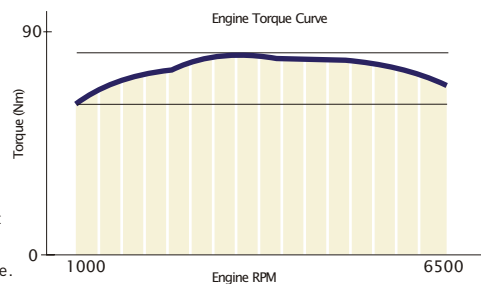

FOR THE SMARTER RACE

SMART PROTECTION
Crumple Zones absorb force of impact, not allowing it to transfer to passengers, ensuring a safer journey.

SMART DRIVING
Even as engine RPM increases, torque remains almost constant, resulting in Flat Torque Curve. Which means fewer gear changes, easy city driving and lesser fatigue.

SMART ENGINE
16-valve, 64 bhp, low-friction engine, for better pick-up and enhanced fuel efficiency

SMART SUSPENSION
Ride adaptive suspension, with an anti-roll control device, keeps the car stable at high speeds. It also gives you a smoother, more comfortable ride.

SMART MANOUVRES
Electronic Power Steering makes the car really easy to manoeuvre and park.

PERFORMANCE & SAFETY

A 16-valve, 64 bhp, low-friction engine that's surprisingly powerful. Electronic Power Steering for an almost effortless drive. Flat Torque Curve for fewer gear changes. Smart features that help you drive with practised ease. Test drive a wagonR today. And drive like you've never driven before.

Sit inside a wagonR and you'll see why it's unlike any other small car. Take a seat anywhere and you'll be surprised at the amount of leg space available. Not to mention the seats that recline completely for unmatched comfort. Even more amazing is how flexibly you can use the space inside. While other cars have room for either passengers or luggage, the WagonR has split rear seats which make room for both. Isn't that smart thinking?

COMFORT & FLEXIBILITY

Fully reclining front seats, together with reclining rear seats, form a comfortable bed.

Rear seats fold independently, making space for a passenger as well as luggage.

Rear seats fold flat, in line with the boot floor, greatly increasing boot space.

SEATING SO FLEXIBLE, IT ADJUST TO YOUR NEEDS.

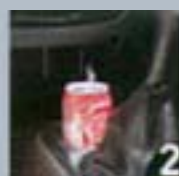

Apart from the innovative use of space, the wagonR thoughtfully
INNOVATIONS makes room for little things.

Take a closer look and you'll see how it smartly organises your life inside the car.

Shopping hook

*VXi only

INNOVATIONS

All it needs is a smart personality. Behind the wheel.

It is everything a car should be - powerful, safe, comfortable and flexible. Smartly designed keeping in mind the busy lives people lead nowadays. Not to mention the various roles they play. Now the only Smart thing left to do, is for you to drive it.
