

Way of Life!

ALL-NEW JIMNY

USB Socket

Accessory Socket

Designed for Professional Use

Everything surrounding the driver and front passenger is built for professional use. All details are designed for carefree dependability, including the grip and switches, which are easy to operate and can be handled in off-road conditions.

Storage spaces are also redesigned for better storage of smartphones and other items.

Transmission System
Automatic and Manual

4WD System

Lever-type shifting to switch between the 3 modes

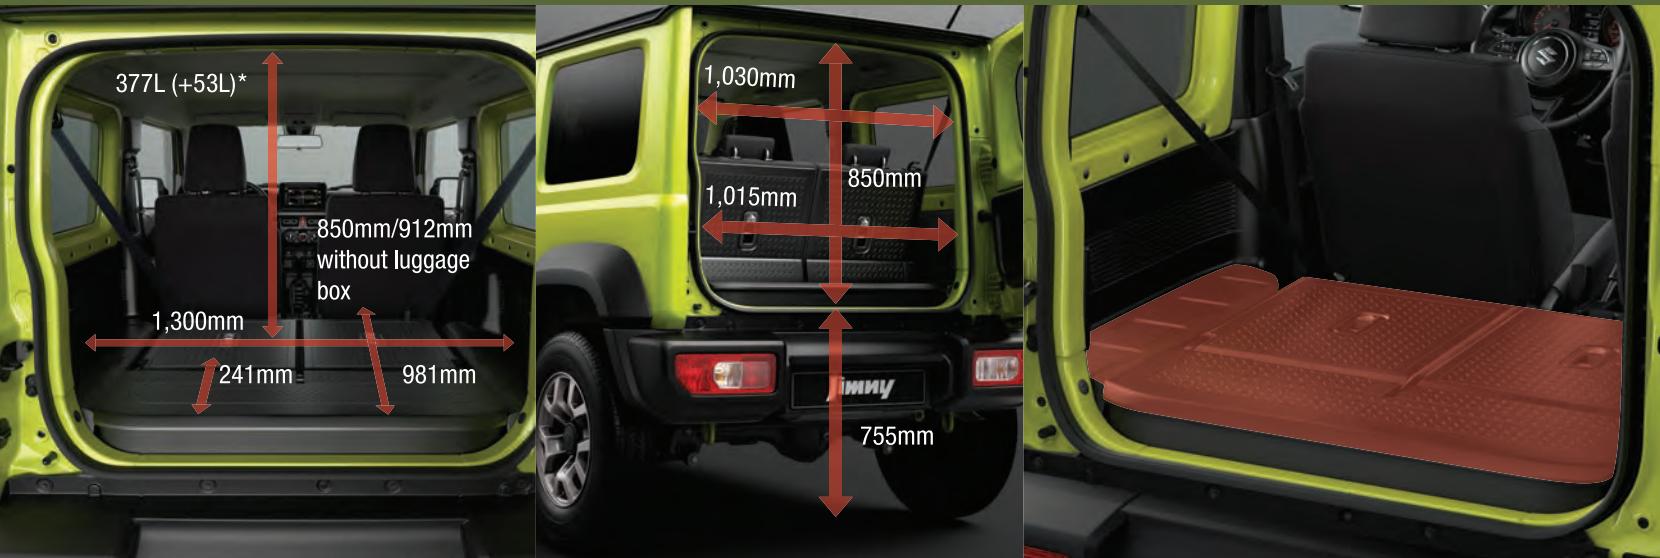

Fully flat seats

Each front seat can be fully reclined to create a flat surface for lying back and relaxing or loading long objects.

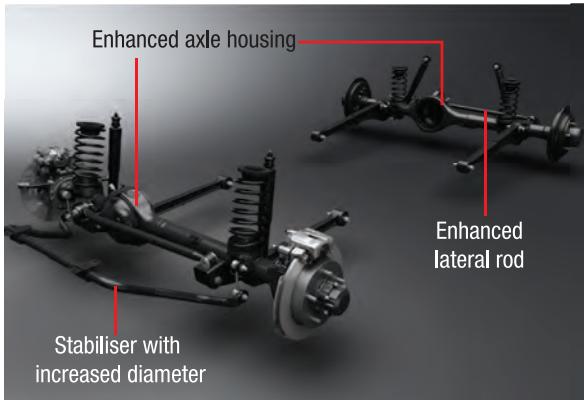

Practicality

LUGGAGE SPACE

Chassis Performance

3-link rigid axle suspension with coil spring

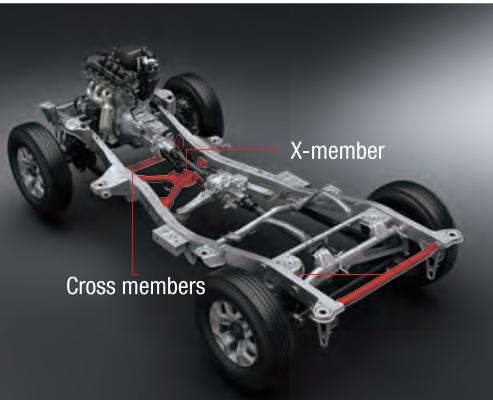

Rigid axle suspensions thrive in bumpy off-road driving. The robust structure and durability of rigid axle suspensions is especially demonstrated in the extreme road conditions.

Enhanced axle housing

The front axle housing material has been changed to stronger, more robust high-tensile steel.

Steering damper

A steering damper has been newly added on the front suspension to suppress kickback and vibration for greater steering comfort on rough terrain.

New "X-member" and two additional Cross members

Two cross members near the centre of the ladder frame form an X-shaped reinforcement that increases torsional rigidity. This helps provide a more solid base for underbody parts, suspension, performance, to make everyday driving and riding comfort on the road. Torsional rigidity has been further increased by adding one cross member beneath the engine compartment and another at the rear end of the ladder frame.

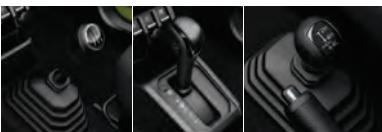

Powertrain

1.5L engine (K15B)

The new Jimny adopts a K15B engine that is lightweight, compact and fuel-efficient. It delivers stronger torque at all rpm.

SAFETY FEATURES

Safeguard yourself and others

Safety is a priority whether trekking through the wilderness or commuting in the city. You can always drive with peace of mind.

Hill Hold Control

Move upward and onward when starting on steep slopes. Even on bumpy slopes that vary on the right and left sides, this feature helps prevent rearward rolling so you can focus on controlling acceleration.

Hill Descent Control

On tricky descents, with a push of a button, the system is designed to automatically apply the brakes and maintain a fixed speed so you can concentrate on steering without using the brake pedal or clutch.

BRAKE WITH EBD SYSTEM

Front wheel slippage

Rear wheel slippage

AIRBAGS

Front Dual SRS Airbags and Side Curtain Airbag*

Side curtain airbags are only available for Auto Transmission only

Specifications

DIMENSIONS

Overall length	Front bumper to rear bumper	mm	3480
	Front bumper to spare wheel cover	mm	3650
Overall width		mm	1645
Overall height		mm	1725
Wheelbase		mm	2250
Tread	Front	mm	1395
	Rear	mm	1405
Min. turning radius		m	4.9
Min. ground clearance		mm	210
Approach angle		deg.	37
Ramp breakover angle		deg.	28
Departure angle		deg.	49

CAPACITIES

Seating capacity		persons	4
Luggage capacity	Max. volume	litres	830
	Rear seatback folded (VDA method)	litres	377*
	Rear seatback raised (VDA method)	litres	85*

Fuel tank capacity

Fuel tank capacity		litres	40
