DESIGNED FOR TOUGH CONDITIONS, BUT PERFECT FOR YOUR SUPERMARKET SHOPS, THE VITARA COMBINES PRACTICALITY, STYLE AND CAPABILITY FOR A SMOOTH RIDE.

There's plenty of room inside for shopping bags, suitcases, and all of life's don't-leave-home-without-its. But on the outside it's more compact than your average SUV and with a lighter body, it's easy to drive around town. All this makes it a powerful contender if you want a car for a glamping weekend or even for the school run. And you'll be turning heads with one of our stunning personalisation accessory packs.

The 1.4 Boosterjet turbocharged engine combined with our HYBRID system makes every journey more efficient[†] – and more enjoyable.

It works hard, and plays harder. Combined with our ALLGRIP 4-wheel Drive technology*, you've got yourself a car that's ready for any drive. And as you open the panoramic sunroof*, your passengers will be catching epic views as you cruise.

If balancing work and play is your superpower, this is the car for you.

It helps to reduce CO₂ emissions and improve fuel efficiency*, as well as increases engine responsiveness, without the fuss of needing to find somewhere to charge. So you get a few more miles in the tank, and a great driving experience.

TAKE IT ON WITH ALLGRIP

WE WANT YOUR
VITARA TO TAKE
YOU WHEREVER
YOU WANT TO GO.

That's why we've developed our unique ALLGRIP 4-wheel Drive system*. With ALLGRIP, you can truly take control of the road, with 2-wheel Drive (2WD) used during normal driving for maximum efficiency and the 4-wheel Drive (4WD) system used when it's needed to adapt to varied conditions such as rain, snow or rough terrain.

So the only limitation you have when you're driving the Vitara is your own imagination.

AUTO MODE
This prioritises front-wheel drive for optimum fuel efficiency in everyday conditions, switching to 4WD if wheelspin is detected.

SPORT MODE
Actively engages 4WD, based on accelerator inputs, to make driving more responsive along country lanes.

SNOW/ MODE
Your answer to snow, ice, rain and mud – giving crucial traction and stability when the conditions demand it.

LOCK MODE
This engages permanent 4WD to help you drive out of deep snow or mud.

*ALLGRIP 4-wheel Drive system is available as an option on SZ5 models only.

IN SAFE HANDS

**WE WANT YOU TO FEEL COMFORTABLE,
CONFIDENT AND, ABOVE ALL, SAFE BEHIND THE WHEEL.**

Which is why your Vitara comes equipped with a range of safety technology, including systems for collision mitigation (Dual Sensor Brake Support), Blind spot awareness (Blind Spot Monitor, Rear cross traffic alert) and driver assistance (Traffic Sign Recognition, Lane Departure Warning and Prevention). Our ALLGRIP 4-wheel Drive system*, coupled with a high ground clearance,

gives you the tools to tackle a variety of different conditions. Our intelligent safety features include ESP® (Electronic Stability Program) and Dual Sensor Brake Support. This technology uses two sensors to determine the risk of a collision and helps you avoid it or reduce possible damage. Because at Suzuki, safety is everything.

*ALLGRIP 4-wheel Drive system is available on SZ5 models only.
ESP® is a registered trademark of Daimler AG.

SUZUKI SAFETY SUPPORT*

The Vitara features Suzuki's advanced forward detection system which uses the combination of a monocular camera and a laser attached to the windscreen. Combining a monocular camera, which excels at mid-to-long distance detection and recognition of such traffic elements as pedestrians and lane markers, and a laser sensor, which excels at short-distance and night-time detection, can achieve superb safety.

DUAL SENSOR BRAKE SUPPORT*

When moving, the Vitara uses two sensors – a monocular camera and a laser sensor – to determine if there is a risk of collision with a forward vehicle or pedestrian. Upon detecting a potential collision, the vehicle acts in one of the following three ways, depending on the situation.

1. Warning

Alerts the driver with an audio warning and visual warning

2. Brake assist

Deploys brake assist to increase braking force if the risk of collision is high and the driver panic brakes

3. Automatic brake

Applies strong automatic braking if the risk of collision increases even more

BLIND SPOT MONITOR*

Lane changing at speeds above 10mph (UK) / 15km/h (ROI) is made safer by two rear-mounted side radar sensors capable of detecting vehicles located in or approaching the rear blind spots on either side of the vehicle. When a vehicle is approaching or detected in a rear blind spot, a warning LED icon is illuminated in the relevant exterior mirror. If the driver indicates to change lanes, a flashing LED icon is accompanied by a warning sound alert.

LANE DEPARTURE WARNING

At 37mph (UK) / 60km/h (ROI) or faster, the lane departure warning function is designed to predict the path of the vehicle and issue visual (display and indicator) and tactile (vibrating steering wheel) warnings to the driver.

REAR CROSS TRAFFIC ALERT*

At speeds of up to 5mph (UK) / 8km/h (ROI) in reverse, the Vitara uses two rear mounted radar sensors to alert the driver of vehicles approaching on either side. It's perfect for reversing out of car parking spaces, especially where vision may be obscured. If a vehicle is detected, you'll get a visual and audio warning. We're big on safety.

LANE DEPARTURE PREVENTION

At speeds between (where permitted) 37mph and 100mph (UK) / 60 and 160km/h (ROI), the lane is recognised via a monocular camera incorporated into the windshield design. When interpreting that lane departure is likely to occur, without the driver using a turn signal, the car automatically assists the driver in returning the vehicle back into its lane by controlling the steering via the electric power steering system.

WEAVING ALERT

At 37mph (UK) / 60km/h (ROI) or faster, the weaving alert is designed to calculate the driving pattern and issue audio and visual warnings if the vehicle is 'straying' due to driver drowsiness, etc.

TRAFFIC SIGN RECOGNITION

This system uses the monocular camera to monitor the road for traffic signs. When it detects road signs such as speed limits or no passing zones, it displays the sign on the centre display to help remind the driver which road signs the car has passed. When multiple signs are detected, a maximum of three signs can be displayed at once.

Detect before passing traffic signs

Display after passing traffic signs

*There is a limit to the ability of a monocular camera and laser sensor to detect obstacles, lanes and traffic signs. Please do not rely on this system alone to ensure safety. Always drive safely.
