

595

ARE YOU READY
FOR
THE NEXT LEVEL?

The New Abarth 595 Range.

Two levels of enhanced performance. Engines delivering even more power: up to 180 HP (134 kW).

Cutting edge features. The revolution of performance by Abarth is here.

Are you ready for the next level?

A PERFECT, BEAUTIFUL MADNESS.

"Motors, machines, motor-races, love of cars, passion of velocity. It is the illness, the very beautiful and mad illness which has reached the whole humanity, which has made ourselves those ardent admirers of what is more and more swift, of what is more and more mechanically perfect. In this research of perfection, in these experiments which come out very often of the industrial branch for liberating in pure passion, for at last transforming themselves in greater safety for whoever travels and greater engine efficiency, we have found friends, patient collaborators, experienced technicians, who have helped us, who have believed in us."

- CARLO ABARTH

Addicted to performance. Since 1949.

Transforming small cars into performance cars, exploiting every aspect to deliver the ultimate driving experience.
This is the Abarth spirit since 1949.

1969

At Imola in 1969, the introduction of the Abarth 2000 SE Sport, of which 25 examples were made, let numerous private race drivers achieve victories in both circuit racing and time trials. In this car, debuting the climb of the Ampus, Peter Schetty was the winner.

1962-1967

Six consecutive victories in the World Manufacturers' Championship with sports cars and saloon cars between 1962-1967. A period of great success with competitive cars in all categories and in all countries, giving numerous drivers a chance to savour a first place victory.

1965-1969

The banked racing circuit at Monza: four wins in the European Touring Car Manufacturers' Championship with the Fiat Abarth 1000 TC: 1965 with Ed Swart, 1966 with Giancarlo Baghetti, 1967 with Willi Kauhsen and 1969 with Mario Pasci.

1953

Mille Miglia 1953: The Abarth-Ferrari 2000 with a modular body; a great technological innovation that made it possible to significantly reduce the weight of the car and also facilitate easy access to the engine and other key components for the mechanics.

1957

Abarth 750 Pininfarina cars were especially built to break records - Between 24th and 27th July 1957, 11 records at Monza were broken over 5000 km in 3 hours with Cabianca, Cattini, Guanieri, Manfredini and Poltronieri.

1975

The rallies and the Fiat Abarth 124 Rally which won the European Championship in 1975 with Maurizio Verini (in the photo at the rally on the Island of Elba), who also finished second the times in the World Championships 1973-1975.

**DESIGNED
TO PERFORM.**

Beyond style, performance.

Every single detail of the New Abarth 595 was designed to perform. Even more cooling efficiency with the new front bumper design. Even more visibility day and night with the poly-elliptical headlamps. Even more driving control with the new sporty ergonomic steering wheel. This is the New Abarth 595, designed to perform.

Overseas model shown, Australian specification may differ.

ENGINEERED TO BE AN ABARTH.

Born under the sign of Scorpion.

Behind every Abarth there's something more. There is the skillful touch of engineers, designers, mechanics and highly qualified technicians who count on exceeding themselves every day. There is passion of those who choose an Abarth, a community that shares the adrenaline of Scorpion and the passion for driving. This is how the uniqueness of the New Abarth 595 was born.
