

ACURA VEHICLES

Acura's commitment to technological leadership in all its vehicles is unsurpassed. The result is class-leading innovations across the entire lineup of Acura models.

There's the available Collision Mitigation Braking System™ on RL and available Active Damper suspension system on MDX. There's the renowned Super Handling All-Wheel Drive™ on RDX, MDX and RL. Plus, there's Acura's bilingual Voice Recognition™ software available on most models and the premium Acura/ELS™ Surround digital audio available on TL. In short, Acura delivers technologies that focus on the driver and the future.

RL

RDX

MDX

Acura. Automotive technology, advanced.

MDX

Power is pointless
without precision

Introducing the all-new 2007 Acura MDX. Superior performance-inspired handling, advanced engineering and integrated driver technology combine to offer you a redesigned sport utility vehicle that rewrites the ground rules.

Say hello to the future for seven

2007 Kelley Blue Book, Best Resale Value: Sport Utility

ACTIVE DAMPER SYSTEM

Track-tested and tuned at Nürburgring, one of the world's most demanding F1™ circuits, the MDX's innovative Active Damper System is a true race-inspired suspension system. Available with the MDX Elite Package, the Active Damper System complements the vehicle's fully independent suspension, providing you with a superior feel for the road and an extra boost of driving confidence and exhilaration. Designed to improve overall response and stability, the system changes the suspension damper fluid viscosity in a fraction of a second, based on driving conditions. The result is an increased damping firmness in each wheel, a decrease in body roll and vehicle pitch, and an exceedingly responsive, sportier ride.

3.7-LITRE, 24-VALVE VTEC® V-6 ENGINE

In an MDX, driving performance comes to life in the form of a class-leading 3.7-litre, 24-valve VTEC V-6 engine – the most powerful production engine Acura has ever built. From the lightweight aluminum-alloy block and cylinder heads to the computer-controlled Programmed Fuel Injection (PGM-FI®), the VTEC V-6 is compact, exceptionally fuel-efficient and innovative to its spirited core.

ACURA DVD ENTERTAINMENT SYSTEM

Now playing in the MDX Elite Package is the available Acura DVD Rear Entertainment System. Featuring a 9-inch LCD colour display, integrated remote control, and wireless headsets with personal surround sound, passengers can pass the time watching movies or listening to their favourite CDs. Plus, an auxiliary second-row audio/video input jack offers plug-and-play video game capabilities.

RDX
TURBO

Power comes from
more than horses

Introducing the all-new 2007 Acura RDX. Your technologically advanced connection to a world of satellite-linked navigation, voice-activated intelligence and turbocharged urban versatility has arrived.

The power to rule your world

INSURANCE INSTITUTE
FOR HIGHWAY SAFETY

2007 IIHS: Top safety pick

HANDSFREELINK™ AND BLUETOOTH® ENABLED TECHNOLOGY*

Program and link your Bluetooth enabled wireless device to the HandsFreeLink telephone interface to make, receive and transfer calls from your phone without interruption, or having to remove your hands from the steering wheel. Just say the word and – providing your programmed mobile device is located inside the RDX cabin – calling numbers will be displayed, your phone will respond to voice activation and you will hear the caller's voice over the RDX's audio system. What's more, the system operates in English or French, and is capable of seamlessly integrating up to six different compatible devices, turning your RDX into a veritable hub of connectivity.

VOICE-ACTIVATED NAVIGATION*

Choose your own urban adventure. Utilizing satellite-linked GPS technology, the RDX can pinpoint your location almost anywhere in North America or access its search directory to help you find directions to those hard-to-find places. The system is equipped with bilingual voice recognition software, and features real-time directions by voice or guiding map display. Simply ask the system to show you the most direct route to your destination, offer an alternative route or, with the Zagat Survey Ratings®, help you find a restaurant based on your choice of cuisine.

VARIABLE FLOW TURBO (VFT)

Exclusive to the RDX and a first in Acura's history, the breakthrough i-VTEC® turbo engine utilizes Variable Flow Turbo technology to deliver plenty of torque at low engine speeds and eliminate turbo lag. Through forced induction and a constant variable exhaust valve, VFT keeps the exhaust velocity high, enabling instantaneous acceleration while still maintaining excellent fuel efficiency. Turbo reliability is achieved by circulating cool water throughout the engine so critical areas are kept cool even when the engine is stopped.

RL

Instincts are its most
advanced amenity

The 2007 Acura RL. Now advanced collision mitigation technology, high performance engineering and satellite-linked integration will answer to an exceptionally powerful new leader – you.

3.

STRONG BRAKING

If all warnings have been ignored and the system determines an impact is unavoidable, strong braking is automatically applied to reduce the collision speed and mitigate the force of the accident.

2.

**SEAT BELTS TIGHTEN AND
LIGHT BRAKING BEGINS**

If no braking or speed reduction is detected, the system will gently pull the driver's seat belt and automatically begin light braking.

1.

**RECOGNITION OF
POSSIBLE COLLISION**

If the closing speed exceeds a programmed threshold, the system warns the driver with audio and visual alerts.

Thinking beyond the grille.
As innovative as it is instinctive,
the available Collision Mitigation
Braking System™ (CMBS™) is
powered by a radar transmitter
behind the RL's front grille that
determines the distance and
closing speed of the vehicle
directly ahead of you.

ADAPTIVE CRUISE CONTROL (ACC)

The RL's available Adaptive Cruise Control (ACC) system allows you to set a time interval based on the distance of the car in front of you. During highway cruising simply engage the ACC and the system will prompt you to choose a short, medium or long interval between you and the vehicle ahead. The system will then maintain the exact throttle speed, and if required automatically apply moderate braking, to ensure your selected distance is maintained.

CARBON FIBRE-REINFORCED PROPELLER SHAFT

Originally developed for use in aerospace and competitive auto racing, advanced carbon-fibre technology now finds a home in the RL. Extremely lightweight and strong, the carbon-fibre propeller shaft produces fewer vibrations and less noise than a traditional metal shaft. Plus, the propeller shaft is reinforced to easily handle the amazing 256 lb-ft of torque the RL engine produces – resulting in an exceedingly smooth, quiet ride.

ELECTROMAGNETIC CLUTCH AND 2-SPEED PLANETARY GEAR SET

Operating in unison with the SH-AWD™ system are variable electromagnetic clutches that feature a compact, 2-speed planetary gear set. The multi-plate clutch electronically regulates rear wheel torque based on your driving demands and instantly compensates by adjusting the acceleration of the outside rear turning wheel to inspire a further measure of cornering confidence.

1. DURING STRAIGHT-LINE ACCELERATION

The groundbreaking SH-AWD system offers dramatically enhanced traction, control and acceleration in all weather or loose road conditions. Accelerate and the system directs up to 40% of the engine's torque to the rear wheels to, in turn, deliver full power to the ground.

2. DURING A MODERATE CORNER

SH-AWD delivers a remarkably neutral steering feel as the rear wheels help generate cornering power. Electronic sensors monitor the speed and tightness of the turn, and automatically varies torque to the outside cornering rear wheel, resulting in enhanced stability and driver control.

3. DURING ACCELERATION THROUGH A CORNER

Here, the advanced SH-AWD technology stands alone. Like no other system, the outside cornering wheel gets up to 100% of the rear wheel torque and is accelerated to rotate 5% faster than the inside cornering wheel, providing greater turning force and an incredibly stable corner line.

4. DURING STRAIGHT-LINE CRUISING

SH-AWD's sophisticated electronic controls automatically monitor road conditions and alternate torque from front to rear, as well as splitting rear wheel torque from left to right. The end result is a continuously smooth, stable ride in poor weather or road conditions.

Exhilaration is articulated
in many ways

The new 2007 Acura TL. An invigorating fusion of incredible horsepower, Formula One™-inspired handling and advanced integrated driver technology is yours to control in one powerfully thrilling ride.

Introducing the Acura TL Type-S. Featuring a 286-horsepower, 3.5-litre VTEC V-6 engine, sport-tuned suspension and the excitement of a close ratio 6-speed manual transmission – the Type-S is pure exhilaration with a scintillating twist.

TYPE-S EXTERIOR

The sleek, chiselled exterior is detailed with an aerodynamic rear decklid spoiler, dark chrome taillight extensions, front and rear side sill bumper mesh, Type-S badging and exclusive 17-inch aluminum-alloy wheels.

TYPE-S INTERIOR

All interior instruments and controls are intuitively located and highlighted by distinctive red ambient lighting. What's more, drilled metal pedals and a leather-wrapped sport shift knob add an extra touch of excitement to any drive.

ACTIVE NOISE CANCELLATION (ANC)

An already quiet ride is made even quieter with the advanced technology of the Active Noise Cancellation (ANC) system. This highly innovative system reduces engine noise by countering the sound frequencies and cancelling the disturbance with an equivalent waveform emitted from the vehicle's audio system. Further cabin silencing comes from noise-insulation components and materials found in the dash, floor, roof, and engine areas.

PADDLE SHIFTERS

Seize the invigorating thrill of Formula One® manual upshift and downshift performance and control at your fingertips. Mounted just behind the leather-wrapped steering wheel, you'll find available paddle shifting transmission controls designed to add an instant boost of race-inspired excitement to an already exhilarating quick-shifting, 5-speed automatic.

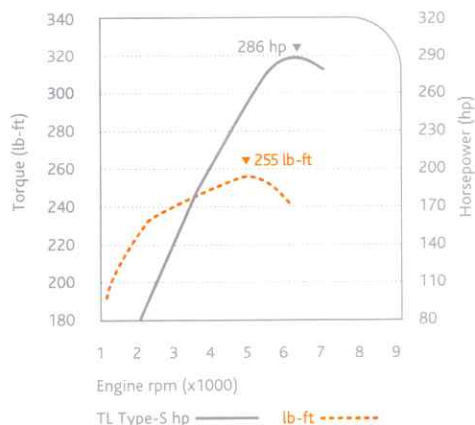

SPORT SUSPENSION

The TL Type-S stabilizer bars have been sport-tuned for superior control and maximum high-performance road handling. Tighter spring coils and suspension dampers, together with larger front and rear stabilizer bars, create a stiff, firm driving experience at any rate of speed.

BREMBO® BRAKE CALIPERS

The TL Type-S features a set of lightweight high-performance front Brembo brakes with 4-piston front brake calipers. Front discs are ventilated, offering exceptional fade resistance and enhanced stopping confidence, thanks to an aggressive friction buildup and feather-touch braking response.

6-SPEED MANUAL TRANSMISSION

For high-performance driving purists who prefer the feeling of power and control found in smooth, quick gear shifting, the TL Type-S features a close ratio 6-speed manual transmission. Perfectly spaced gear ratios offer a race-inspired link to a world defined by 286 horsepower, 255 lb-ft of peak torque.

HELICAL LIMITED-SLIP DIFFERENTIAL

Operating in synergy with the close ratio 6-speed manual transmission of the Type-S model, a helical-type limited-slip differential helps control inner drive-wheel slip in corners by optimizing the torque between one wheel and the other, allowing you to tackle any bend in the road with confidence, maximum traction and control.

TSX

Purebred performance
breeds confidence

The 2007 Acura TSX. Performance-inspired i-VTEC power, ultra-quick handling and a natural disposition to outperform are a few of its exhilarating character traits.

A to B perfected

Kelley Blue Book 2007 Kelley Blue Book, Best Resale Value: Sedan

2007 Kelley Blue Book, Best Resale Value: Top 10.

DRIVE-BY-WIRE THROTTLE SYSTEM™

Always ahead of the curve, the TSX's advanced Drive-by-Wire Throttle System utilizes a highly sophisticated, highly efficient electronic system. Based on your driving demands, the system measures acceleration, engine rpm, and road speed to ensure the optimal throttle opening. The result is noticeably smoother, more powerful engine response. What's more, the Drive-by-Wire Throttle System works seamlessly with the available Sequential SportShift® transmission to offer faster, more spirited gear shifting.

VEHICLE STABILITY ASSIST® WITH TRACTION CONTROL

Working in synergy with the performance of the Drive-by-Wire Throttle System, the TSX's Vehicle Stability Assist® (VSA) provides you with enhanced stability and confident control during acceleration, braking and cornering. VSA detects understeer or oversteer situations, and corrects them, even before you are aware of a problem. In an instant, the VSA system measures the severity of the driving conditions and reduces throttle, or applies braking to individual wheels to compensate. Plus, if a loss of grip is detected when accelerating off the line on slippery surfaces, traction control takes over and automatically reduces the throttle or applies soft braking to compensate for a loss of traction.

6-SPEED CLOSE RATIO MANUAL TRANSMISSION

Sporting drivers will marvel at the short-throwing control of the close ratio 6-speed manual transmission. A masterful accomplishment, this race-inspired, track-tested transmission was designed with precisely spaced gear ratios allowing you to perform ultra-quick, exhilarating shifting.

A-Spec model shown.

CSX

Adrenaline is the new black

The 2007 Acura CSX. An incredibly stylish expression of advanced driver technology and heart-racing performance in its most athletic form.

Type-S model shown

Introducing the Acura CSX Type-S. Where the CSX shouts performance and advanced technology, the Type-S screams it. From its 197-horsepower engine, 350-watt Premium Audio System and Satellite-Linked Navigation System to its quick-shifting 6-speed manual transmission and sport-tuned suspension, the Type-S is pure attitude with an exhilarating twist.

SPORT SUSPENSION

The Type-S sport-tuned control-link MacPherson strut front and reactive-link double-wishbone rear suspension provide superb control and precision handling. But perhaps what you'll notice most is how the tighter spring coils and dampers, together with larger front and rear stabilizer bars, create an exceptional feeling of harmony with the road.

STYLING

The sleek, streamlined exterior is detailed with an aerodynamic rear wing spoiler with an integrated LED brakelight, recessed fog lights, Type-S badging and aggressive 17-inch aluminum-alloy wheels.

TYPE-S PERFORMANCE

In the CSX Type-S lives the power of a compact 2.0-litre i-VTEC 4-cylinder engine. With many advanced components and drive-enhancing systems, the i-VTEC engine's all-aluminum block and head with DOHC 16-valve design provides an intelligent answer to the question of power – and in a Type-S that adds up to 197 horsepower. Plus, the smoother acceleration delivered by the Drive-by-Wire Throttle System™ with Variable Timing Control (VTC) proves that awe-inspiring power and fuel efficiency are never mutually exclusive.

VEHICLE STABILITY ASSIST® AND TRACTION CONTROL

With so much power at your command, it's no wonder the Type-S features an assortment of advanced engineering systems to assist and enhance driver handling and control. In corners, Vehicle Stability Assist® (VSA) automatically corrects oversteer and understeer scenarios, while Traction Control helps you get off the mark confidently on loose or slippery surfaces.

INTERIOR STYLE

Standout leather-trimmed seats with high-contrast tailored stitching and Type-S embossing complete the cabin's interior. Plus, for that extra finishing touch, the leather-wrapped steering wheel and shift knob confirm that this is a car enriched with performance character.

HELICAL LIMITED-SLIP DIFFERENTIAL

Once found only in high-performance race cars, the helical limited-slip differential is yours to discover on the CSX Type-S. Experience greater steering control and faster response as the limited-slip differential optimizes the distribution of torque from one wheel to the other, giving you the confidence to accelerate through turns to carve the perfect corner.

PERFORMANCE WHEELS

Reinforce your feel for the open road with the 17-inch aluminum-alloy wheels. Augmented by a small wheel gap and short overhang, the wheels enhance the CSX's wide stance and uncompromising aesthetic and performance.

6-SPEED MANUAL TRANSMISSION

For driving enthusiasts who demand the control of smooth, quick gear shifting, the Type-S features a close ratio 6-speed manual transmission. Perfectly spaced gear ratios offer a race-inspired link to the high-performance world of 197 horsepower at 7800 rpm.

HIGHLIGHTS

MDX

PERFORMANCE

Super Handling All-Wheel Drive™ (SH-AWD™)
3.7L, 24-valve, SOHC, VTEC® V-6 engine

The Acura Experience. At Acura, we believe owning a luxury vehicle goes well beyond the engineering and amenities. That's why we are equally committed to making your ownership experience a luxurious one. So, every new Acura comes with: 24-hour Roadside Assistance for the first four years of ownership, which includes our Dispatch Emergency Roadside Service, Emergency Lockout Service, Traffic Accident Services and more. Complimentary tank of gas at time of delivery. See your Acura retailer for details.

WARRANTY

Your new Acura vehicle comes with the following warranties:

• Major Component – 5-year/100,000-km limited warranty • Vehicle – 4-year/80,000-km Distributor's limited warranty • Rust Perforation – 5-year unlimited-distance warranty • Surface Corrosion – 4 year/80,000-km • Accessories – 4-year/80,000-km limited warranty (when installed by an authorized Acura retailer at time of new vehicle delivery). Regular maintenance items and parts are subject to normal wear and replacement, and are not covered by warranty. Certain other items are excluded, and certain conditions apply. See your Acura retailer for complete details.

ACURA PLUS

As a new Acura owner, you can help to prolong your worry-free ownership experience by purchasing additional coverage. Just choose from our flexible selection of Mechanical Coverage that extends up to 7 years or 160,000 km, whichever comes first. You can also extend your Roadside Assistance. Ask your Acura retailer for full details.

LEASING AND FINANCING

We offer an array of options to make owning an Acura easy. Ask your Acura retailer for complete details on: Acura Leadership Leasing*, Acura Future Value Financing* and Conventional Financing*.

*A genuine service of Honda Canada Finance Inc. Conditions, restrictions and pre-payment requirements might apply O.A.C. "Acura Future Value Financing" does not apply in the province of Quebec.
