A black and white photograph of a 2008 Acura SUV, likely an MDX, parked on a reflective surface. The car is positioned at a three-quarter front view, facing right. The background features a dramatic, cloudy sky and a range of snow-capped mountains. The foreground is partially obscured by a low-lying, spiky plant in a planter.

2008 Acura

By advancing technology, design and performance,  
we advance life.

ADVANCED SPORTS-  
CAR CONCEPT

THOUGH THIS VEHICLE  
IS NOT INTENDED  
FOR THE SHOWROOM,  
ITS COMBINATION OF  
PRECISION AND PASSION  
SIGNALS THE FUTURE  
OF Acura DESIGN.

It is all about being out front. About the desire to see and experience what is just over the horizon. It is not about reacting, it is about anticipating. At Acura, this spirit is infused in everything we do. It is found in technology like Super Handling All-Wheel Drive™ and the first navigation system with real-time traffic.

It is evident in the creation of our Advanced Sports-Car Concept, destined not for the showroom but to be a styling influence on Acuras to come. In the building of a new design studio in California to lengthen our reach into the future. It is what inspires, fuels and drives us to keep furthering the state of automotive luxury. All for the purpose of creating new experiences, new opportunities.

Acura is always advancing, and helps you do the same.

The spirit of innovation is apparent in the smallest details and in our **grandest endeavors.**

The results of competition can be seen on the track, and in our showrooms.

IN OUR VERY FIRST RACE, THE 2007 TWELVE HOURS OF SEBRING, THREE Acura AMERICAN LE MANS® CARS TOOK THREE OF THE TOP FOUR SPOTS IN THE LMP2 CLASS, INCLUDING A HISTORIC FIRST WIN BY THE ANDRETTI GREEN RACING TEAM. THIS IMPRESSIVE DEBUT MARKS THE CONTINUATION OF A COMMITMENT, IN WHICH ADVANCED Acura TECHNOLOGY IS DEVELOPED AND TESTED AT THE HIGHEST LEVEL, SO THAT WE CAN ONE DAY BRING IT TO YOU.

World Class

A silver Acura RL is shown from a rear three-quarter perspective, driving towards the right. The background is a blurred cityscape with streaks of yellow and white light, suggesting motion and night. The car's taillights are illuminated.

Where we're headed cannot be found on any map.

It is our never-ceasing goal to turn notions into breakthroughs.  
Revelations into reality.

FOR MORE SAFETY FEATURES, VISIT [acura.com](http://acura.com).

AT Acura, WE CONSIDER YOUR SAFETY OUR GREATEST PRIORITY AND INCORPORATE IT INTO EVERY ASPECT OF VEHICLE DESIGN. PROTECTIVE SYSTEMS ARE BUILT INTO THE FRAME, STEERING, ENGINE AND BRAKES. EMPLOYING CUTTING-EDGE RESEARCH AND DESIGN, OUR GOAL IS TO HELP YOU AVOID ACCIDENTS IN THE FIRST PLACE AND MITIGATE THEIR EFFECTS WHEN THEY'RE UNAVOIDABLE.

EVERY Acura features an array of standard active and passive safety features. These include side curtain airbags, dual-stage, dual-threshold front airbags and front side airbags with an occupant position detection system (OPDS). This is designed to prevent the front side airbag from deploying if a small-statured passenger is out of position and leaning into the deployment path.\* **VEHICLE STABILITY ASSIST™ (VSA®)** helps prevent understeer or oversteer by braking individual wheels and/or reducing engine power to help return the vehicle to its intended path. The tire pressure monitoring system (TPMS)<sup>4</sup> continually checks the tires and will alert you if a specific tire's air pressure is significantly low.

In addition, the RL, MDX and RDX feature **ADVANCED COMPATIBILITY ENGINEERING™ (ACE™)**, which helps minimize misalignment with the other vehicle in a crash, helping prevent override. The RL, TL, MDX and RDX employ **ELECTRONIC BRAKE DISTRIBUTION (EBD)**, which apportions braking power based on dynamic loading for potentially shorter stopping distances. The **COLLISION MITIGATION BRAKING SYSTEM™ (CMBS™)** available on the RL can warn the driver of a possible impending collision, and actually apply the brakes if an impact is unavoidable.

\*ALWAYS USE SEAT BELTS AND APPROPRIATE CHILD SEATS. CHILDREN 12 AND UNDER ARE SAFEST WHEN PROPERLY RESTRAINED IN THE REAR SEAT. FRONT AIRBAGS INFLATE AND DEFLATE IN A FRACTION OF A SECOND.

# Specifications

**ENVIRONMENTAL COMMITMENT**  
PART OF PUSHING THE LIMITS OF PERFORMANCE IS DEVELOPING ENGINES THAT ARE NOT ONLY POWERFUL, BUT EFFICIENT AND EARTH-FRIENDLIER, TOO. IN FACT, EACH AND EVERY Acura VEHICLE QUALIFIES AS A LOW-EMISSION VEHICLE (LEV)<sup>5</sup> OR BETTER. THIS COMMITMENT TO PLANET EARTH IS EXTENDED TO THE WAY WE BUILD OUR VEHICLES. MANY OF OUR VEHICLES USE A WATER-BASED PAINT PROCESS, HOUSED IN FACILITIES DESIGNED TO REDUCE EMISSIONS. WE ARE ALWAYS LOOKING FOR INNOVATIVE WAYS TO CONSERVE, RECYCLE AND REUSE RESOURCES.
