## HEART & SOUL

To create a car that is powerful, responsive, communicative, a car to drive for the joy of driving. And somehow to combine it with comfort, suppleness, space and refinement. This was Bentley's mission. The result? The 552 hp all-wheel drive Continental GT. A car that can seat four in comfort and yet accelerate from standstill to 60 mph in 4.7 seconds, on its way to a top speed of 198 mph, where conditions allow. Its design is both homage to the great Bentleys of the past and yet a clear-eyed vision of the future. Make no mistake; this is a grand tourer from the heart, and the soul, of one of the world's great marques.
