X5 4.8is

The Ultimate
Driving Experience™

**To find a new world,
you must constantly redefine yourself.**

Beautiful, British Columbia
325 CAE

The ongoing process of becoming better.

**The best link between town and country
is a good engine.**

What you see here
you don't really need to see.

Equipment

■ **Xenon headlights for low and high beam with luminous rings**, including dynamic headlight range control for much better illumination of the road ahead in bad weather or poor visibility. These headlights also feature auto-levelling, to adjust for varying passenger and cargo loads.

■ **Rain sensor** uses an infrared light to measure the amount of rain. When the wipers are in the "intermittent" mode, the rain sensor automatically adjusts the windshield wiping interval as required. Includes automatic headlight function.

□ **Park Distance Control (PDC)** uses ultrasonic sensors in the bumpers to help you judge the distance to other cars and unseen objects when parking. The beeping becomes faster as your bumper approaches the object, turning into a constant tone when the distance is less than 30 centimetres. (Standard on X5 4.8is.)

□ **Running boards** made of brushed aluminum give the X5 a sporty touch and also make entry to the vehicle more comfortable.

□ **Privacy glass** on the rear side windows (behind the B-pillar) and rear window; reduces the sun's dazzle and ensures a pleasant temperature inside the car. (Standard on X5 4.8is.)

□ **BMW light-alloy wheels:** Y-Spoke alloy wheels (with all-season tires) - Style 131, 18 x 8.5, 255/55R-18. (Available only on X5 3.0i.)

□ **BMW light-alloy wheels:** Star Spoke alloy wheels (with performance tires) - Style 132, 19 x 9.0 front, 255/50R-19; 19 x 10 rear, 285/45R-19. Tires not recommended for winter use. (Available only on X5 4.4i.)

□ **Multi-function leather sport steering wheel with heating function** offers highly convenient operation, increased safety and an ergonomic design that makes it fit especially well in the driver's hands. (Standard on X5 4.8is.)

□ **On-board Navigation System** guides you conveniently and directly to your destination. In addition to providing driving instructions via voice, directional arrows or map display, the system will provide destination-specific information. (Standard on X5 4.8is.)

Equipment

■ **BMW Business CD** offers AM/FM radio with easy-to-use preset buttons. Listen to your favourite radio stations or insert a CD into the single CD player, which includes MP3 capability.

■ **Automatic Climate Control system** includes Automatic Air Recirculation (AAR), which is activated when a sensor detects certain pollutants in the outside air. Inside, cabin air continuously passes through a microfilter that removes pollen, dust and spores.

□ **Six-speed manual transmission** makes for extremely dynamic driving. Smooth and optimally synchronized, it boasts precise, short shift throws. The more tightly graded transmission and additional sixth gear make the engine even more responsive to your personal style of driving. (Available on the X5 3.0i.)

■ **Six-speed automatic transmission with STEPTRONIC.** Gears are shifted quickly and smoothly for optimum performance on the road. STEPTRONIC allows you to use the automatic transmission like a manual gearbox without having to press a clutch pedal. (On the X5 3.0i a 5-speed automatic transmission is available.)

□ **Sport seats** for the driver and front passenger, including electrical adjustment for the driver and front passenger seats, memory function for the driver's seat; optimum side support is provided by side bolsters, individual adjustment of seat height, backrest, seat angle, and thigh support. (Standard on X5 4.8is.)

□ **Comfort seats** for the driver and front passenger, electrical adjustment of the headrest and seat position; memory function on the driver's seat including exterior mirrors and steering column settings. (Standard on X5 4.8is.)

□ **Heated rear seats** are a welcome feature in cooler weather. With the touch of a button, you can select from two heat settings. (Standard on X5 4.8is.)

■ **Split-folding seats** allow you to accommodate many different types of luggage.

□ **Panorama sunroof** allows natural light to enter the cabin. For comfort and convenience, it comes with a speed-dependent wind deflector, electric slide and lift control via tip keys, and electric sunshade, as well as trap release and comfort open/close functionality. (Standard on X5 4.4i and 4.8is.)

Equipment | Safety

■ **Automatic Differential Brake (ADB-X)** provides the same function as differential locks by intervening on demand on individual wheels. A wheel about to spin is automatically slowed down by ADB-X until it regains its grip and conveys drive forces. With DSC activated, ADB-X is supplemented by engine output control; with DSC switched off, the function is set to maximum drive and traction.

■ **Dynamic Stability Control (DSC)**, comprising ADB-X, CBC, DBC and HDC. DSC detects the risk of swerving right from the start, stabilizing the car within fractions of a second. The DSC suspension control system ensures greater driving stability above all in bends.

■ **Dynamic Brake Control (DBC)** provides brake assistance, building up maximum brake pressure in an emergency even if the driver fails to properly press down the brake pedal, significantly shortening your BMW's stopping distance in the process.

The **airbags** and all other safety components are perfectly coordinated in a BMW, so that in a collision only the airbag actually required is activated. Such activation varies according to the severity of an impact. Up to ten airbags offer superior safety on demand: driver and front passenger airbags, head and side airbags in the front, and head airbags in the rear, with rear side airbags as a special order option.

■ **BMW restraint system** for the driver and front passenger, combining the three-point seat belt (with manual belt height adjustment on the B-pillar), belt latch tensioner, belt force governor and anti-submarining ramp in the seat, for optimum restraint in a collision.

■ **Bumpers with regenerating aluminum impact absorbers** take up impacts, without damage, at speeds up to 4 km/h. Special deformation zones at the front and rear absorb forces at up to 15 km/h without any damage to the body.

■ **Hill Descent Control (HDC)** enables your BMW to take even the steepest downhill gradients safely and reliably, automatically reducing the velocity of the car to walking speed without the driver's having to brake. As an option, HDC can also be controlled via buttons in the multi-function steering wheel.

■ **Tire Pressure Warning** minimizes the possible repercussions of a tire defect. Comparing wheel rotation speed, the system determines changes in air pressure in one or several tires and warns the driver by a telltale in the Check/Control.

■ The sport driver knows that when you apply the brakes, the loads acting on the rear wheels are reduced, possibly making the vehicle swerve round in a bend. (1) **Cornering Brake Control (CBC)** counteracts this effect by asymmetrically adjusting brake pressure (2) in order to generate a stabilizing counterforce (3) even before the Anti-lock Braking System (ABS) cuts in.
