The BMW 3 Series Sedan depicted on the front cover and up to page 25, as well as pages 28-33, is a 330i with a six-cylinder in-line engine delivering 255hp. The exterior colour is Sparkling Graphite, metallic, and the vehicle features light-alloy wheels with ellipsoid, style 162. The interior colour is Beige, with Beige Dakota Leather upholstery and Burl Walnut interior trim. The interior shown on pages 26-27 features the standard instrument panel, in combination with Grey Dakota Leather and Brushed Aluminum trim. The BMW 3 Series shown throughout this brochure is a European model. In Canada, front orange reflectors are standard.

A Winning Team

**The new BMW 3 Series Sedan.  
A sedan that sets standards.  
A success story that goes on and on.  
An assembly of perfectly matched  
components. Powerful engines,  
dynamic design and advanced  
technology: these are the ingredients  
that make a winning team.**

6

4

7

1

**The most exciting performer of all  
is coming to a road near you.**

It's an athlete. A sprinter. A distance runner. The new BMW 3 Series Sedan has quite simply been built for the road. Whether you're driving down country lanes, tackling inner city traffic or navigating twisting mountain roads, you'll always be aware of this car's exuberant dynamics. The perfect interplay between all the components. All you need to do is open your garage door.

**Gears: 6. Boredom: 0.**

2

If you have a sporty engine, you also need a sporty transmission, so the engine's power is translated into optimum performance on the road. That's why the BMW 3 Series Sedan comes with a six-speed manual gearbox as standard or, optionally, with a six-speed automatic transmission. In either case, the car's plentiful torque – up to 220 lb-ft of torque at 2,750 rpm for the 330i/xi – is converted with the utmost precision: to achieve truly remarkable acceleration, to ensure excellent fuel economy and to shift driving pleasure into a new gear.

3

**The marathon sprinter.**

Long journeys require stamina and efficiency. Short distances, on the other hand, call for power and acceleration. Now you can enjoy both, thanks to one of the most lightweight straight-six engines in the world. The unit's reduced weight is due to the use of magnesium, while Valvetronic® maximizes both power and fuel efficiency. So when you check your fuel gauge, those long journeys will appear to have been a lot shorter.

**A sporting arrangement:  
Each axle carries an equal share of the load.**

4

The whole is greater than the sum of its parts. Especially when each part is superb in its own right. That's how the aluminum front suspension (on rear-wheel drive models), five-link rear axle and near 50:50 front-rear weight distribution combine to make a perfect chassis. For sporty handling, incomparable agility and a comfortable ride. If you wish, you can even include another component that's unique in this class: Active Steering (available on the 325i and the 330i). With xDrive® on the 325xi and the 330xi, the BMW 3 Series is able to combine the benefits of all-wheel drive and typical BMW dynamics. Thanks to variable distribution of drive power to the front and rear wheels, vehicles equipped with xDrive offer maximum traction and directional stability, no matter what the road surface.

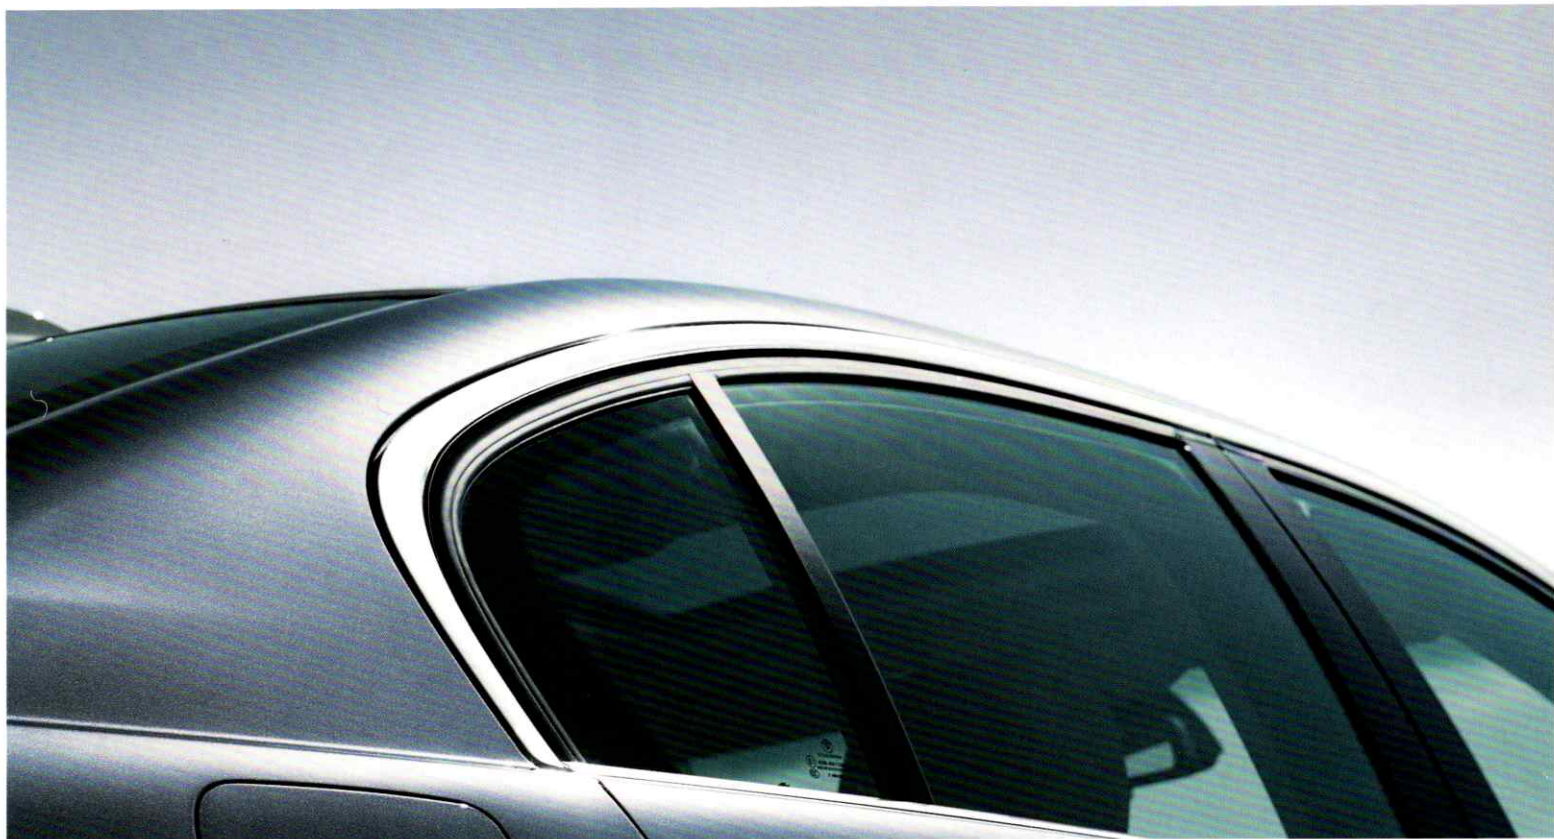

012  
017

**Everyday designer goods can be found  
in the shops. The really breathtaking ones  
can only be seen on the road.**

**5**

You see striking surfaces that convey effortless presence. A sleek, elegant shoulder line. Dynamic proportions. Hallmark BMW design features such as the Hofmeister kink, double kidney grille and twin headlights. You are looking at the new BMW 3 Series in its ideal environment: on the road.

6

**Aggressive power coupled  
with defensive strength.**

You need to look twice to notice the high degree of safety the new BMW 3 Series Sedan offers. The paint, for example, hides a particularly stiff body that provides superb protection to the occupants. To ensure that critical situations don't develop in the first place, you get Dynamic Stability Control (DSC) as standard, with additional DSC functions.

**Please get in.  
You're what's missing in this winning team.**

We have designed the new BMW 3 Series Sedan to meet the requirements of the toughest environment there is: everyday life. With lots of headroom and legroom. With a large selection of colours and materials. With cockpit controls tailored to meet the needs of the driver. After all, our cars' most important component is you.

## Only a test drive could be better than this test drive.

Every detail of the new BMW 3 Series Sedan tells you something about our passion for automobiles. You can feel this passion in the perfect interplay of all the car's components, the way everything fits together. See for yourself. Are you ready for a first test drive?

**1** You only need to look at the strong shapes of the new BMW 3 Series Sedan to understand that you're in for a very special experience: pure dynamism. So get in, press the Start button, and you'll hear an exciting engine sound that confirms your first impression. Now gently tap the accelerator pedal. What you hear is sheer power. In short: the heart and soul of the new BMW 3 Series Sedan.

**2** Your new BMW 3 Series comes with a precise manual transmission as standard. Available as an option is the automatic transmission with STEPTRONIC®, for supreme comfort and efficiency. Each of these gearboxes come with six gears, because more closely spaced gear ratios enable optimized conversion of the engine's power. The result: more dynamic performance and superb acceleration.

**3** There are three straight-six engines to choose from. Which one's the right one for you? Find out: the 330i boasts 255hp and a top speed of 210 km/h. The 215hp 325i goes from 0 to 100 km/h in 7.1 seconds, while the 174hp 323i covers this distance in 8.0 seconds.

- 4** The only thing that's missing now is a road with lots of nice corners.
- 5** Now take a little more time to enjoy the exterior of the new BMW 3 Series Sedan.

That's where the new BMW 3 Series Sedan will demonstrate its sporty handling and precise steering. It's all thanks to the hallmark BMW rear-wheel drive, the near 50:50 front-rear weight distribution and the new suspension design. DSC (Dynamic Stability Control) is included as standard and enhances vehicle safety. This control system prevents wheel spin, if any wheel is on a surface that provides less grip, and stabilizes the vehicle when accelerating out of a corner. DSC now includes additional functions, such as a Start-Off Assistant for worry-free hill starts. xDrive (on the 325xi and 330xi) is the All-wheel drive system that boasts variable drive power distribution to the front and rear wheels for maximum traction on whatever surface you are travelling.

You'll notice the sharp crease on the side of the vehicle, which gives it its dynamic edge. This impression is reinforced by the hood, with its muscular power dome and the short overhangs, with the taut shoulder stretching the car visually, to lend it its sleek and elegant appearance. This elegance continues down to the last detail, for example, the way the L-shaped tail lights blend into the exterior contours of the vehicle.

- 6** If sitting in the new BMW 3 Series Sedan makes you feel great, then that's also due to the level of safety you enjoy. The very stiff body and the airbag system provide maximum occupant protection. Adaptive Headlights are standard on the 330i/xi and optional on the 325i/xi. When cornering, these headlights turn into the bend, providing optimum illumination of the road ahead. So it comes as no surprise that in the European NCAP crash tests, the new BMW 3 Series Sedan received top marks for occupant protection—5 stars.

- 7** Lots of leg, head and shoulder room tell you. The new BMW 3 Series Sedan is a very comfortable car, especially on long journeys. There is a wide range of colours and materials to help you create your dream car. A powerful automatic air conditioning system is standard on the 325i/xi and the 330i/xi. As are electrically adjustable front seats with memory function for the driver's seat (standard on the 330i/xi and optional on the 325i/xi). Also available as an option on the 325i/xi and the 330i/xi is the Navigation System, including iDrive Controller and Control Display. You will be able to gain a first impression of the interior on the following pages.

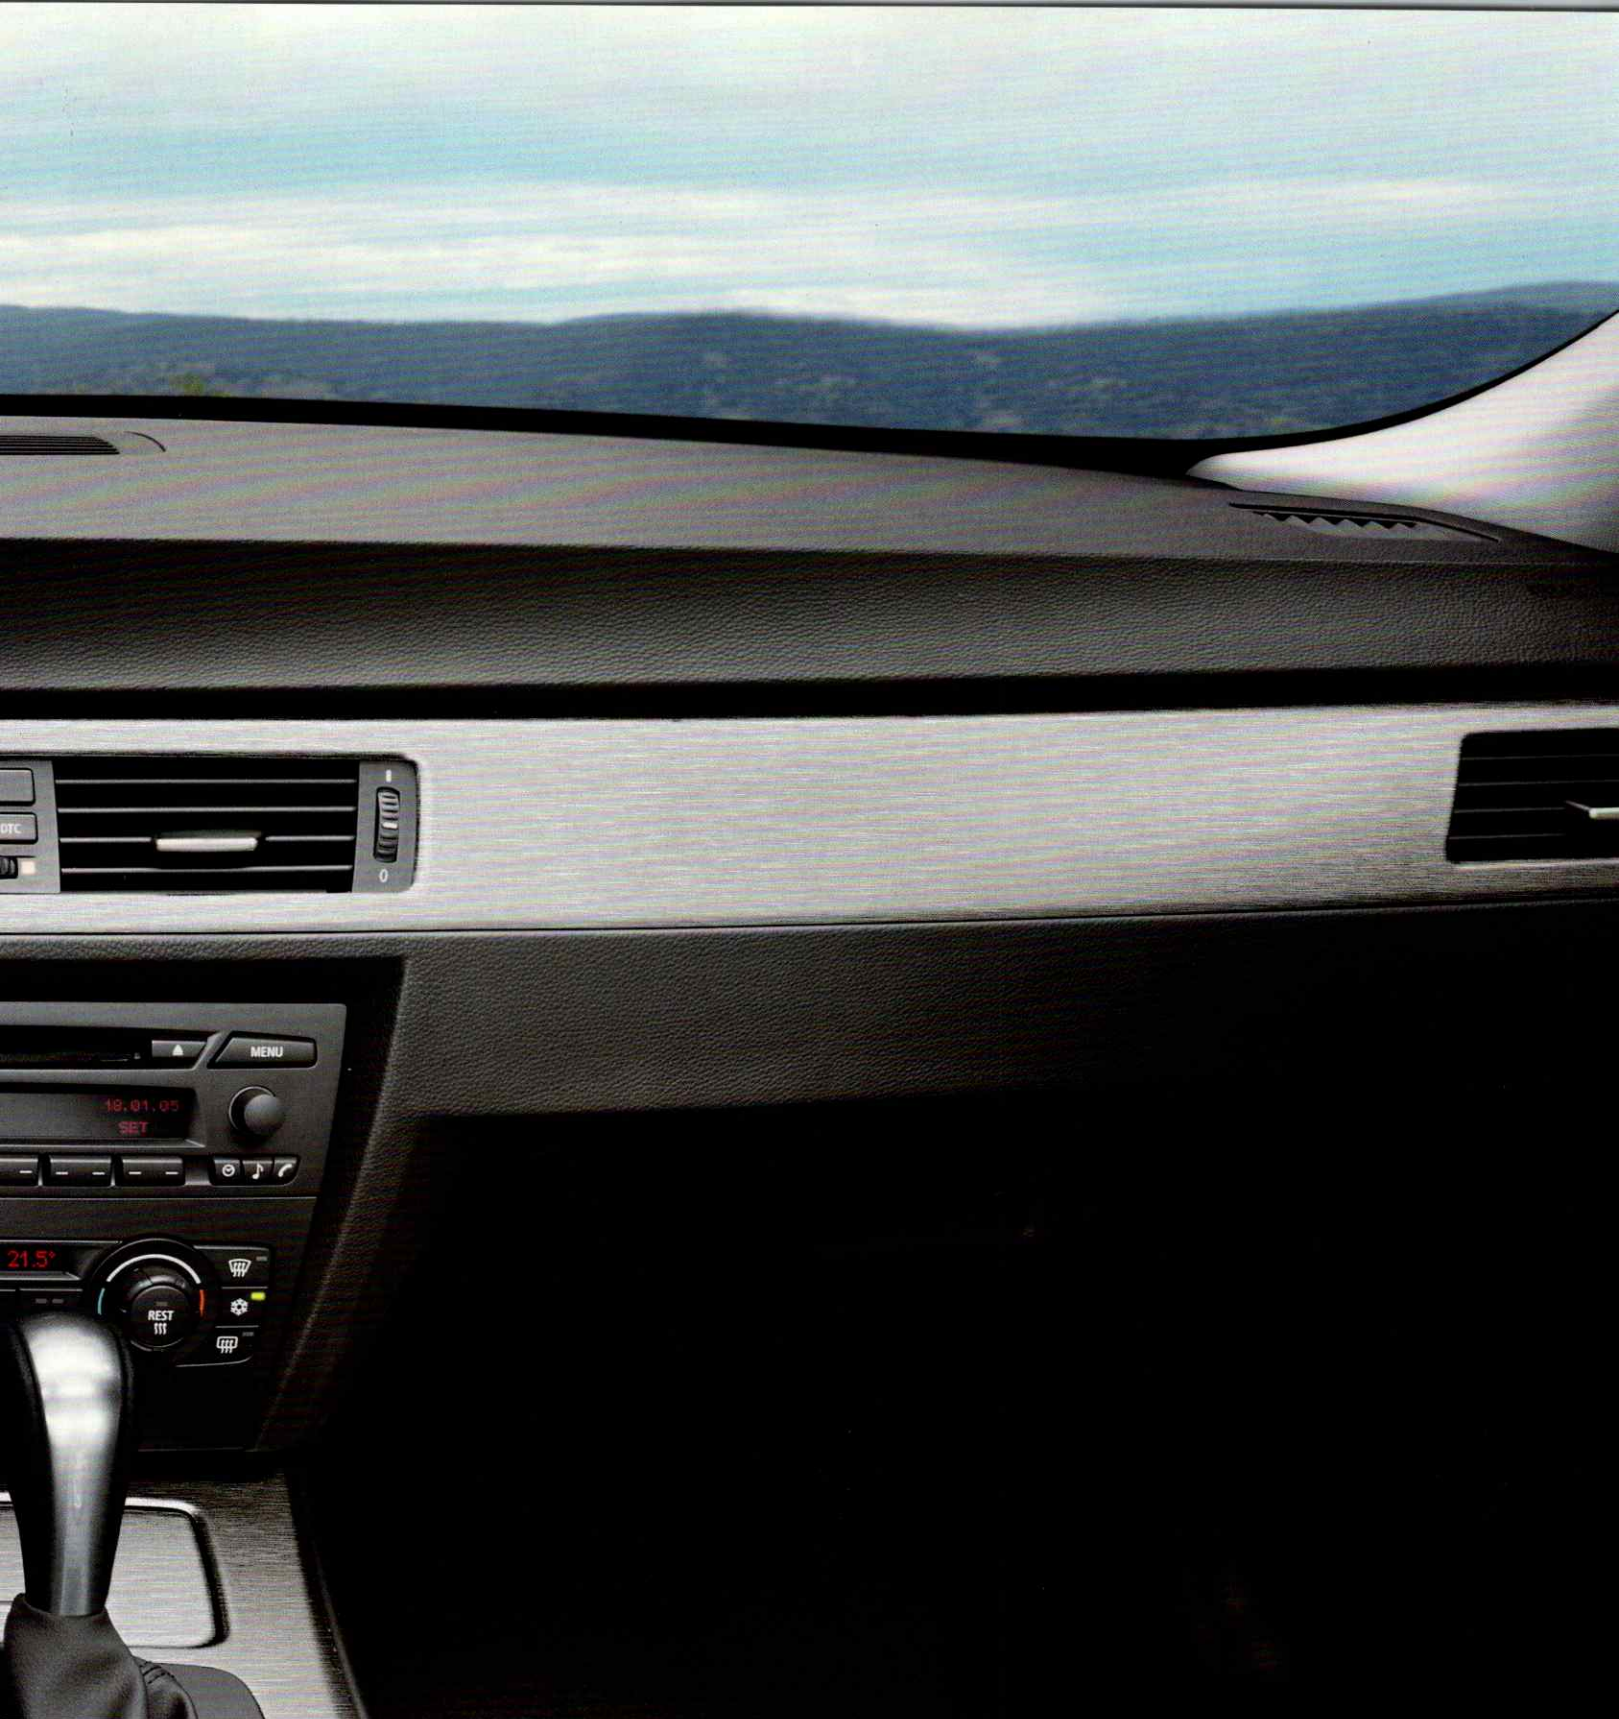

So, how did you like your first test drive in the new BMW 3 Series Sedan? Would you like to listen to the engine for real? Feel the acceleration? We understand. There are some things to which second-hand account can do no justice. You simply have to experience them for yourself.

**Enjoy the view. You won't see it much when you drive.**

The new BMW 3 Series Sedan is focused on the needs of the driver. That's why the instrument panel is angled slightly towards the driver, with all buttons and levers quick and easy to operate. But ergonomics is just one of the strengths of the interior. The other one is comfort. For example, to start the engine, you use the Start/Stop button. Just in case you wondered, you also use the same button to turn the engine off again.

### **This co-driver can do everything.**

If you wish, your new BMW 3 Series Sedan comes with one of the most helpful and pleasant co-drivers you could wish for – a navigation system, complete with iDrive® (available on the 325i/xi and the 330i/xi). iDrive is our innovative control concept. It features a Controller located on the centre console, enabling intuitive control of a multitude of secondary functions. Frequently used functions still have dedicated buttons and switches on the multi-function steering wheel. The iDrive information is displayed on a glare-free Control Display in the instrument panel, which is quick and easy to read.

REST

**Every team has its colours. This one wears yours.**

Sporty? Modern? Elegant? In the new BMW 3 Series Sedan, you can have the exact interior you want. Choose from a particularly wide selection of colours and high-class materials. So your car looks just the way you want it to. After all, you are going to be spending rather a lot of time in it.

**Now those with long legs can even enjoy the rear seats.**

We have done much to ensure that everybody enjoys being in the new BMW 3 Series Sedan. Lots of leg, head and shoulder room means that there is plenty of space for everyone. We have not forgotten about your luggage: a fold-down rear backrest with asymmetric splits is standard on the 325i/xi and the 330i/xi. So expect a car that matches all your requirements. From head to toe.

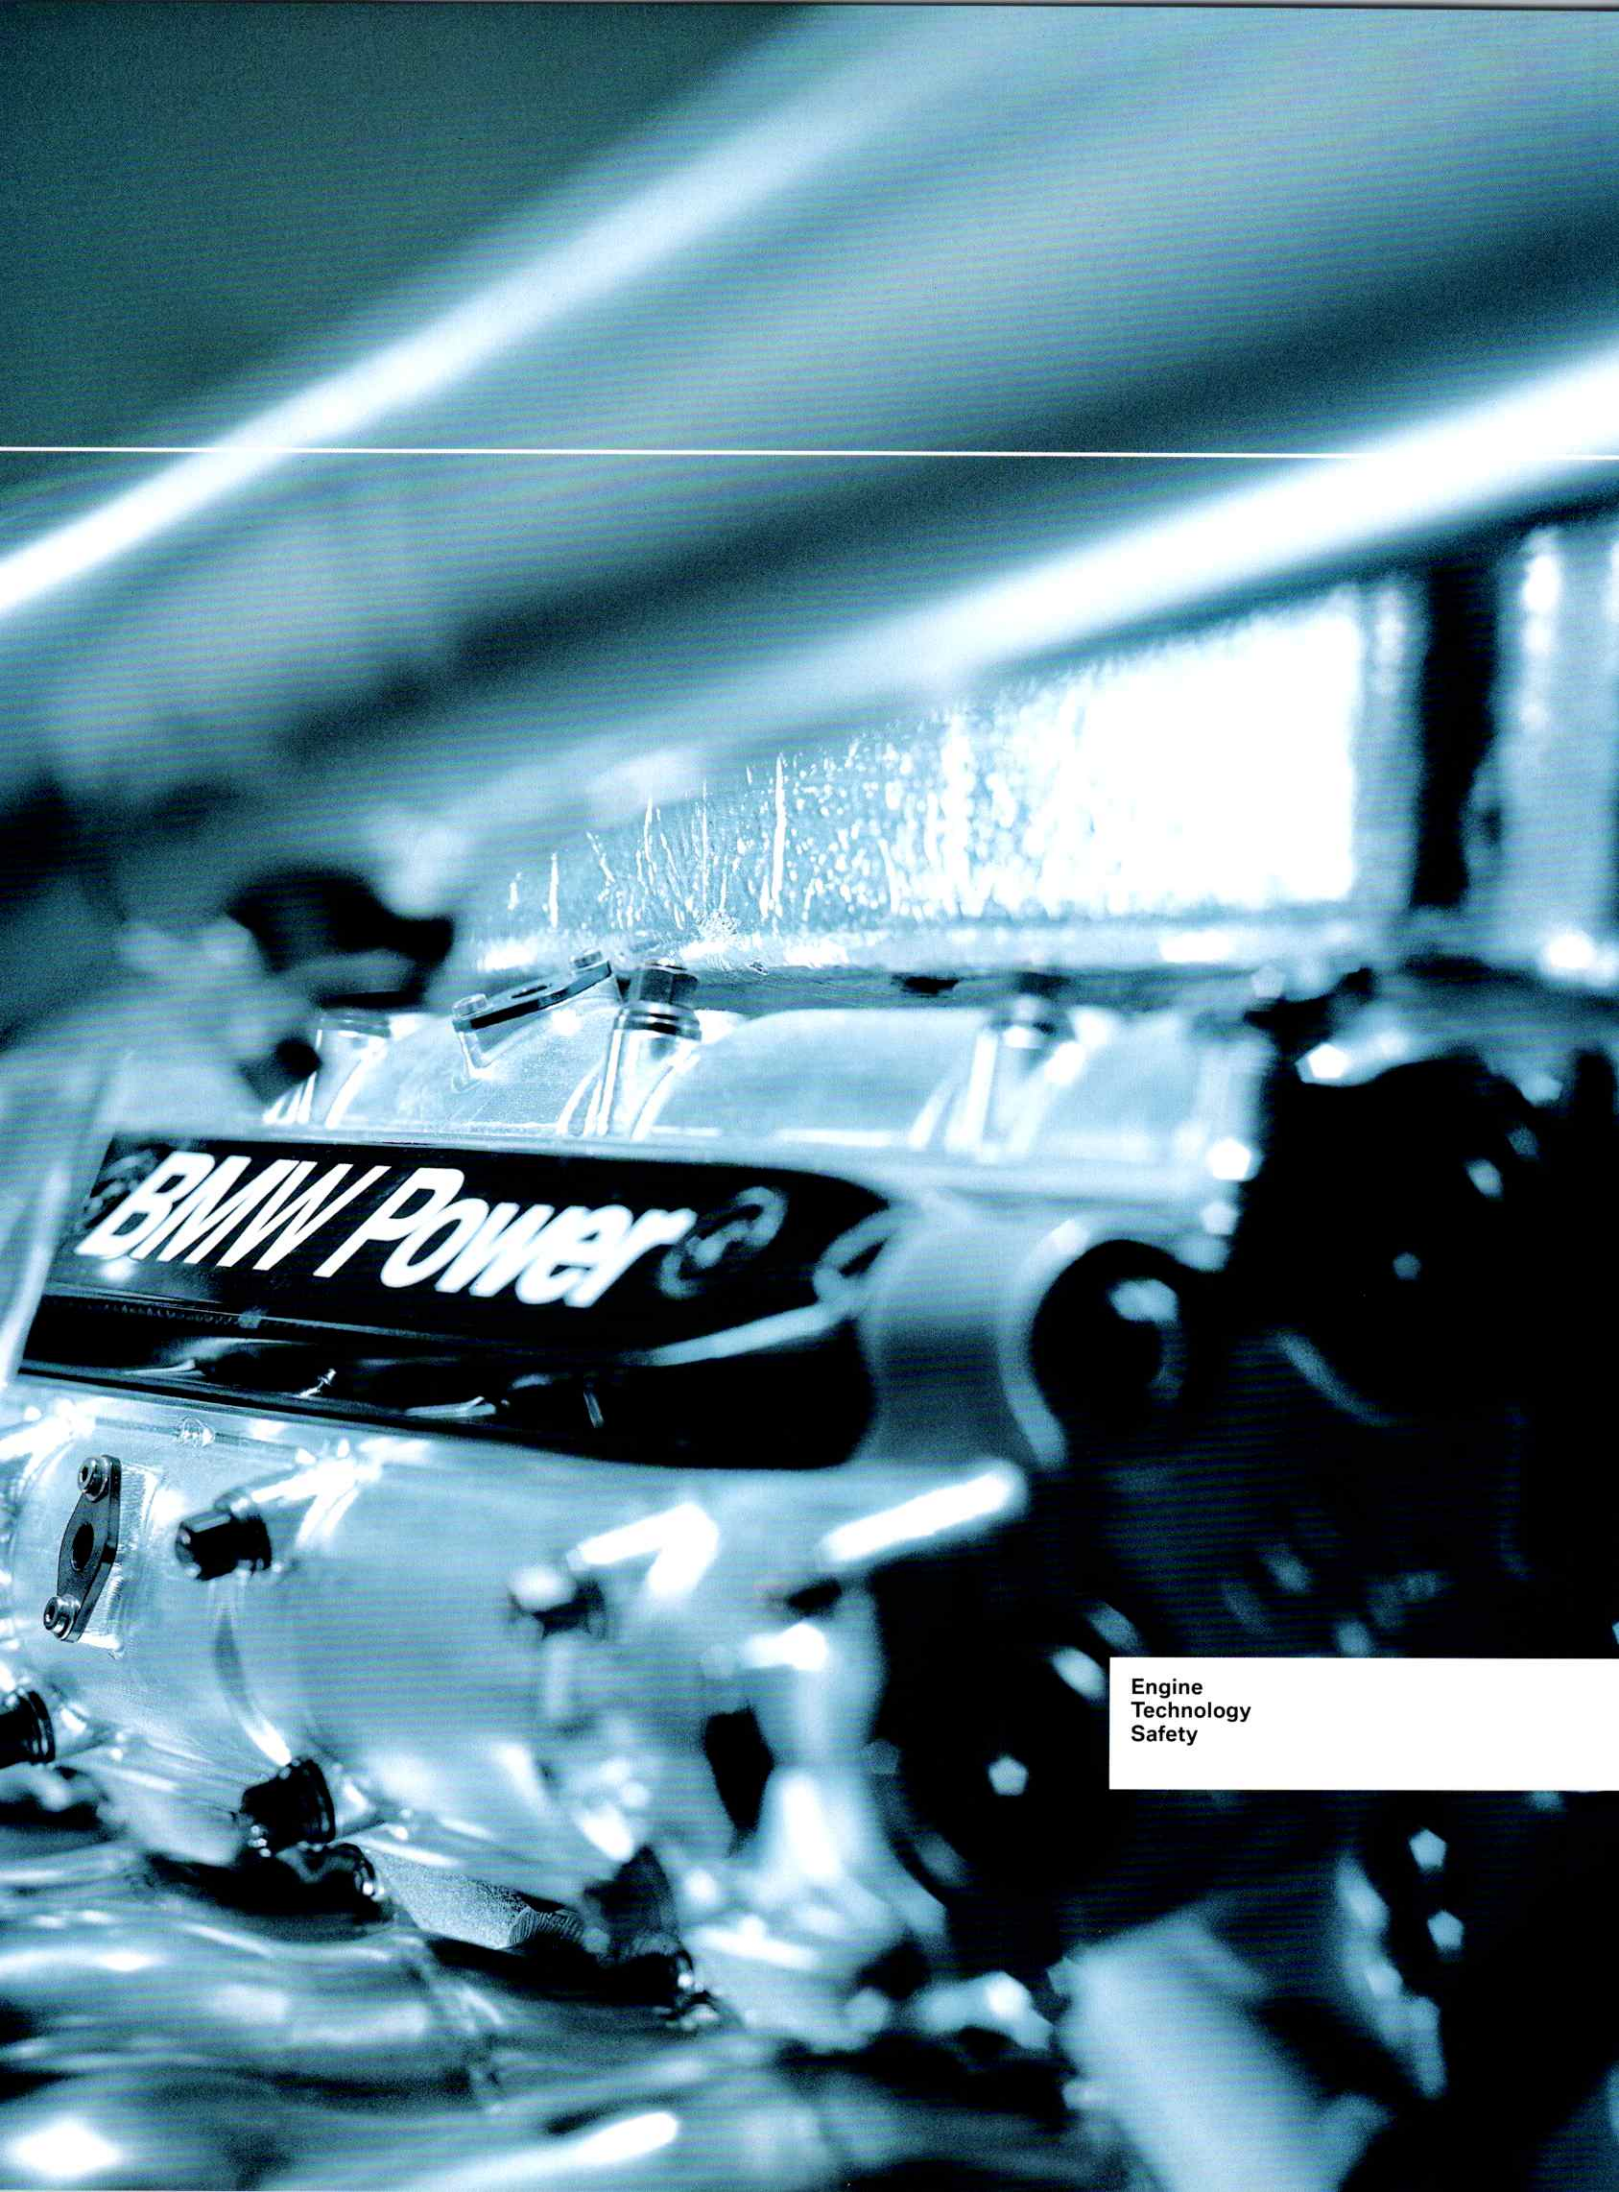

It is not just the free-revving engine. Nor its breathtaking performance. Nor the blink of an eye it takes to change gears. It's in the sum of these factors, and yet others, that the secret of Formula 1 magic can be found. It's what a team works hard to achieve – the perfect interplay of all the components. For extraordinary dynamics, to be passed on from one generation to the next. Because the knowledge gained on the racetrack forms the basis for new ideas. You can see the results in the technology and the materials used in BMW cars. These cars will never fail to remind you of their Formula 1 family connection. Similar to a race car, they prove that engine, transmission, suspension, electronic control systems and other innovations can work together to leave a lasting impression – The Ultimate Driving Experience.

**BMW! To make an impression,  
we press our advantage.**

**BMW Power**

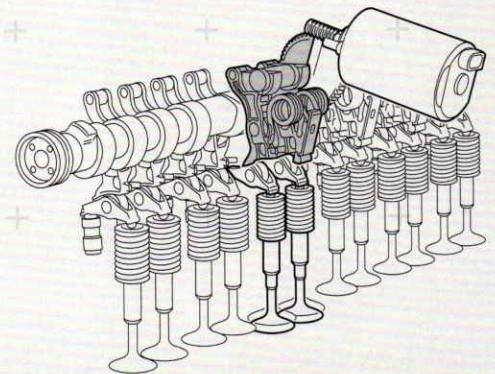

Engine  
Technology  
Safety

## A team with six centre forwards.

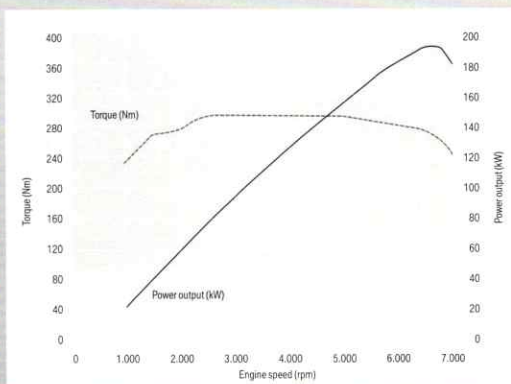

Engines are our passion. That's why a BMW in-line six-cylinder engine does not just deliver power, dynamism and performance – it also does so very smoothly and efficiently. So it comes as no surprise that we are not the only ones to call our engines refined. It's this refinement that makes them unique.

The engine, in the BMW 3 Series Sedans, feature the innovative Valvetronic system. By enabling infinitely variable valve lift control, Valvetronic eliminates the power losses traditionally associated with the throttle valve. This makes the engine more economical to run, especially in city traffic and on country roads. The consistent application of lightweight design principles in engine production is equally groundbreaking, with the use of aluminum and magnesium, enabling a unique power-to-weight ratio. What's particularly impressive about the 330i/xi engine is its spontaneous power development and revving ability, up to a very sporty maximum of 7,000 rpm. Based on its three-litre capacity, it develops a powerful 255hp, accelerating the 330i from 0 to 100 km/h in a mere 6.5 seconds. Maximum torque is reached as early as 2,750 rpm. The powerful BMW 325i and 325xi also use a straight-six engine with Valvetronic, with a power output of 215hp and acceleration from 0 to 100 km/h in 7.1 seconds for the 325i. A straight-six engine with Valvetronic also powers the 323i, with 174hp and 170 lb-ft of torque at 3,500 rpm. Whichever engine you choose, it will take you less than a kilometre to realize why the central component of our company name is "Motor."

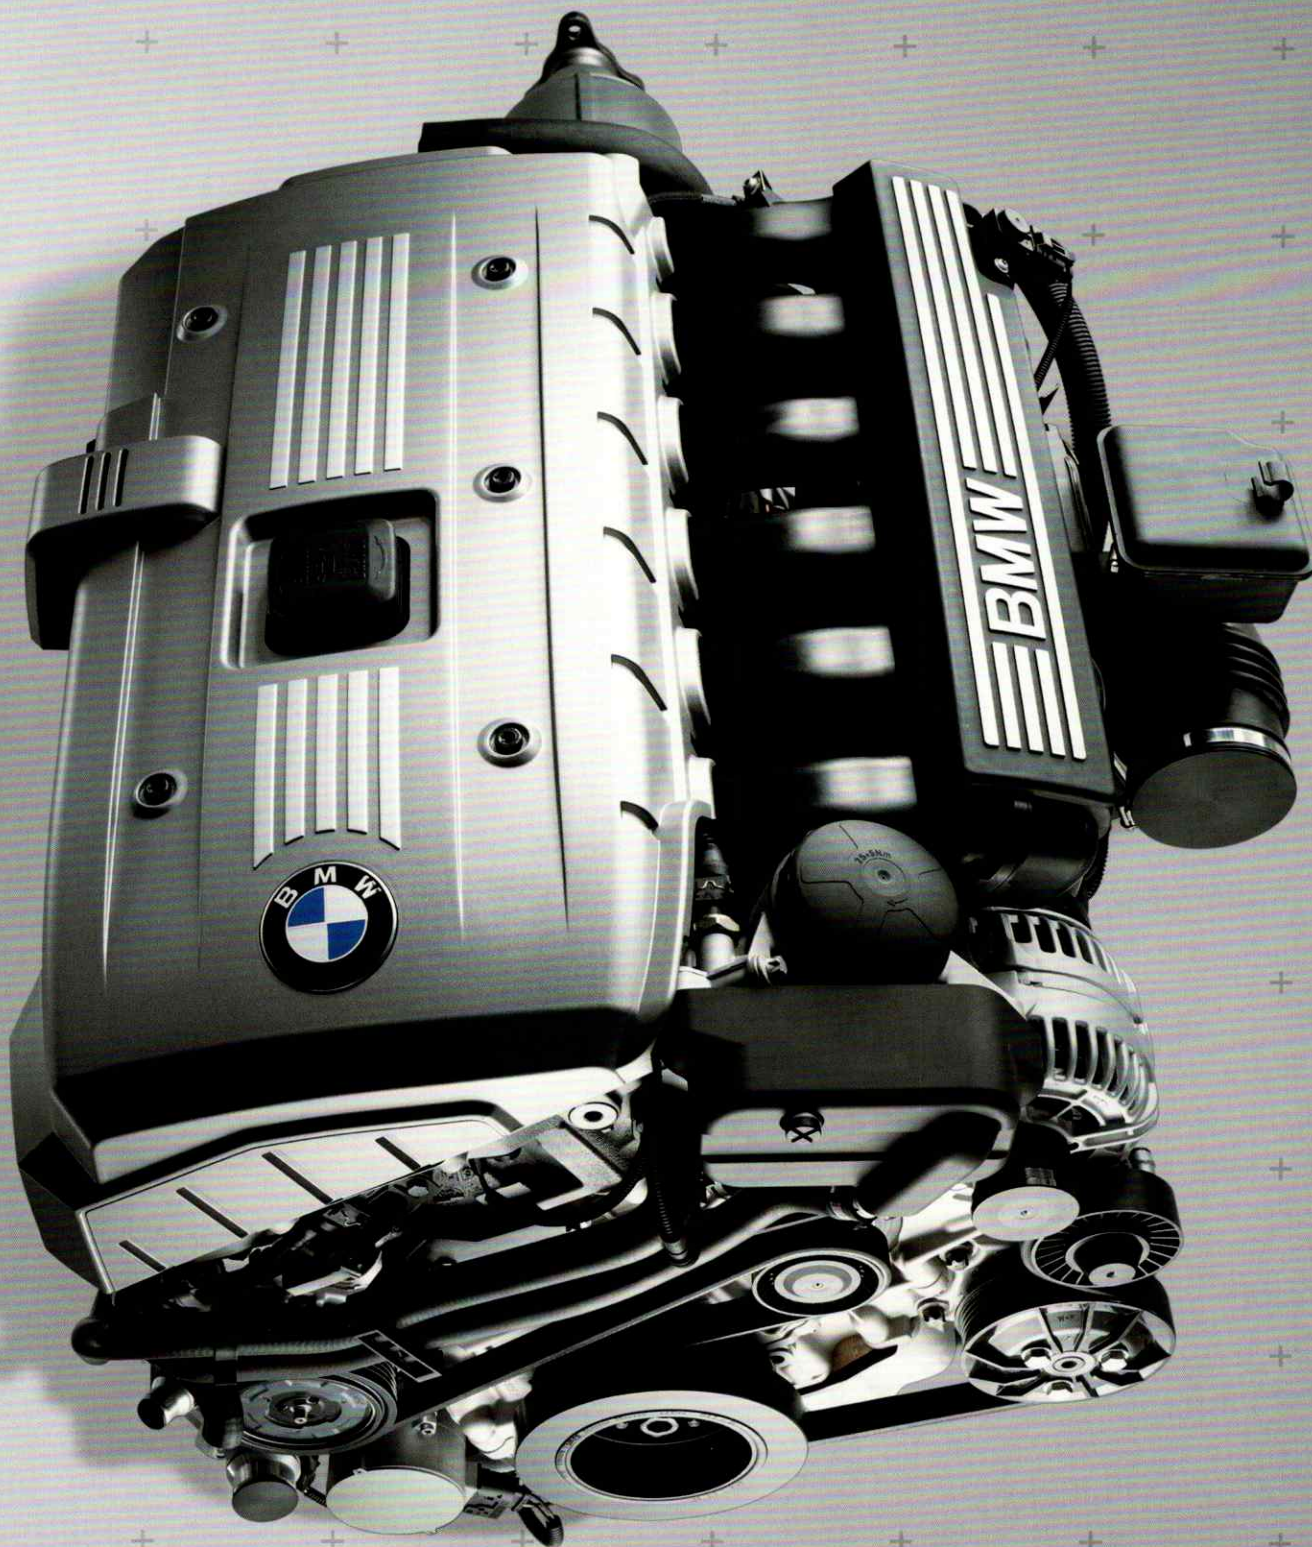

**Valvetronic: continuously variable inlet valve lift ensures improved air supply to the engine, especially under part-load conditions, to deliver more power and reduced fuel consumption.**

**Performance characteristics of the 330i.**

**Torque, free-revving, refined. The Valvetronic straight-six engine supports engine speeds up to 7,000 rpm and has huge power reserves. Its maximum torque of 300 Nm is available over the entire range from 2,500 to 4,000 rpm.**

036  
037

## **Six gears as standard. Because even the best team can do with some extra power.**

The new BMW 3 Series Sedan comes with a six-speed manual transmission as standard. A gearbox that has the right transmission ratio for every situation, enabling a sportier drive.

Optionally, the new BMW 3 Series Sedan is also available with a comfortable, efficient and fast six-speed automatic transmission with STEPTRONIC. ATM (Adaptive Transmission Management) evaluates your personal driving style in order to select the optimum gear for the current driving situation. If you like, however, you can also change gears yourself. Simply select STEPTRONIC mode for a more sporting and active driving experience, and then tap the selector lever to shift up or down. This results in lightning-fast gear changes, with no clutch pedal involved.

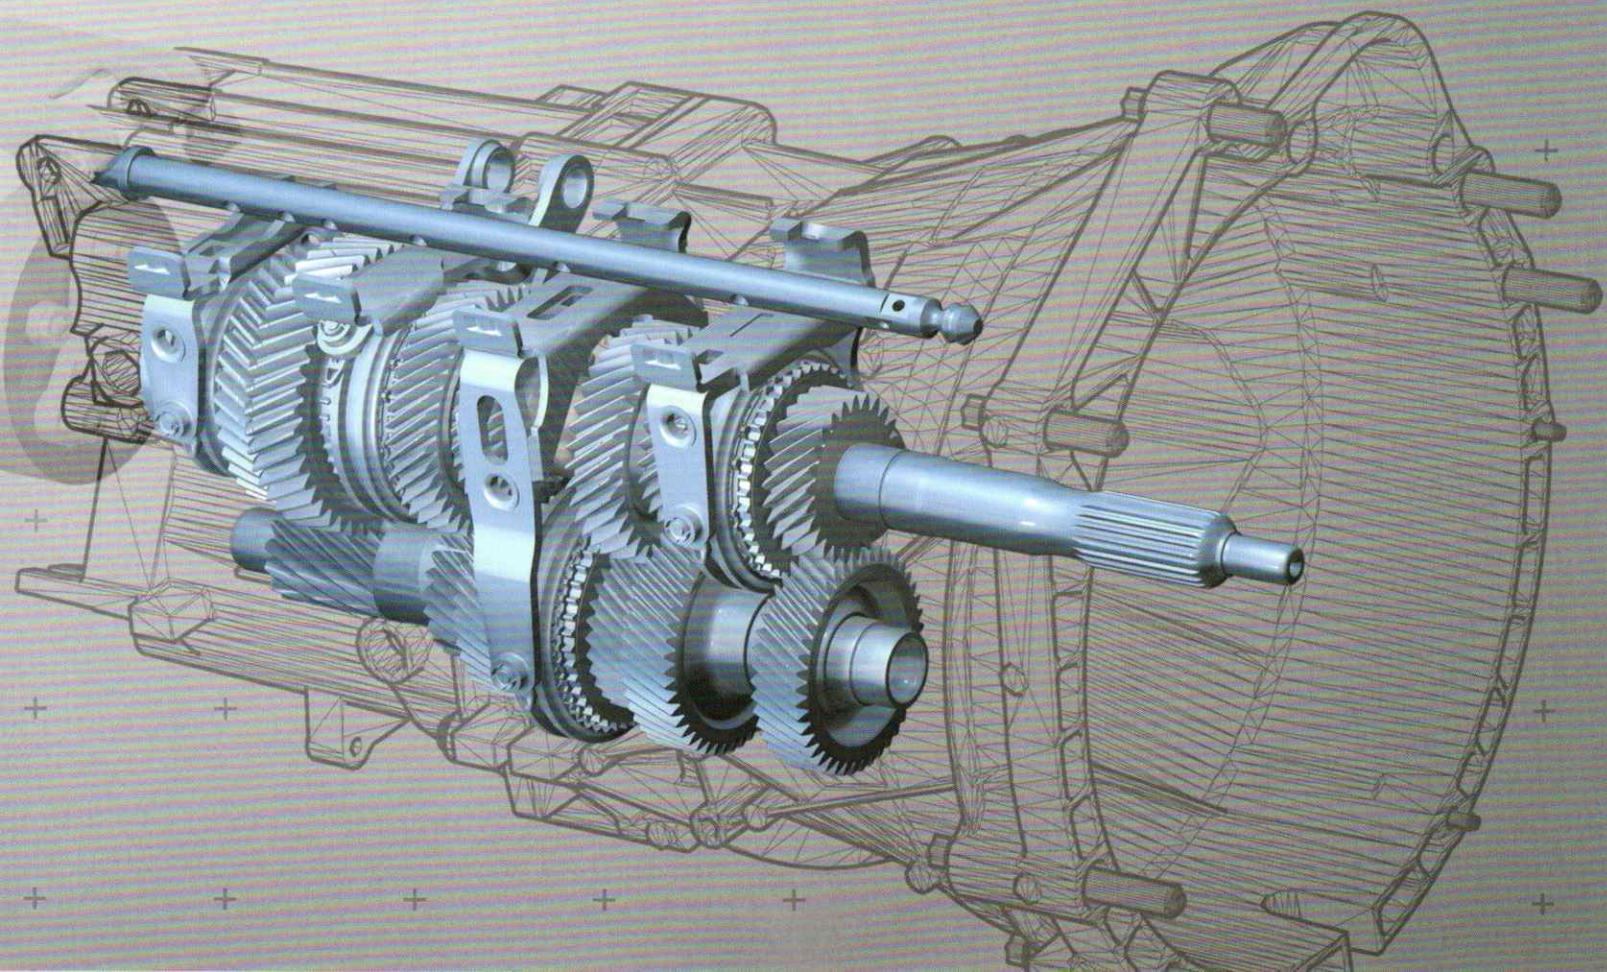

Feel the powerful acceleration. Enjoy superior gearshift precision, from first gear to sixth. Make optimum use of the engine's power.

038  
039

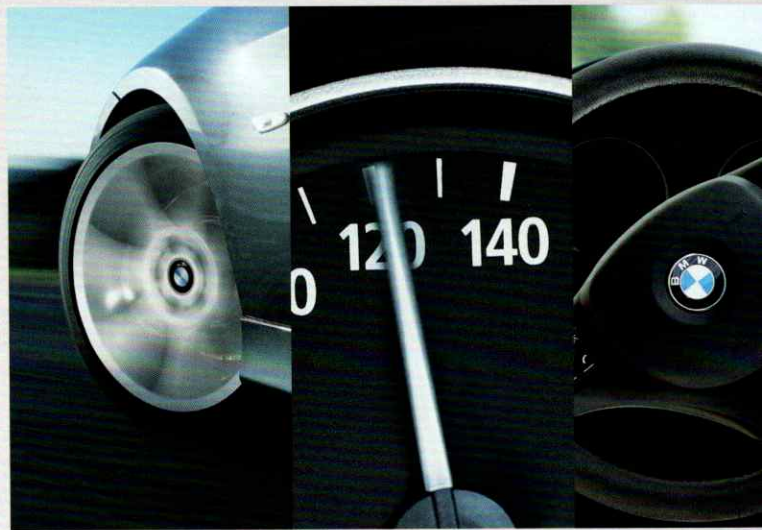

The standard six-speed manual gearbox covers a greater spread of gear ratios, for more dynamic and efficient driving. A six-speed automatic transmission is available as an option.

When driving at low to medium speeds, Active Steering uses a more direct steering transmission ratio. Steering is precise and exact, so the car feels very nimble and agile.

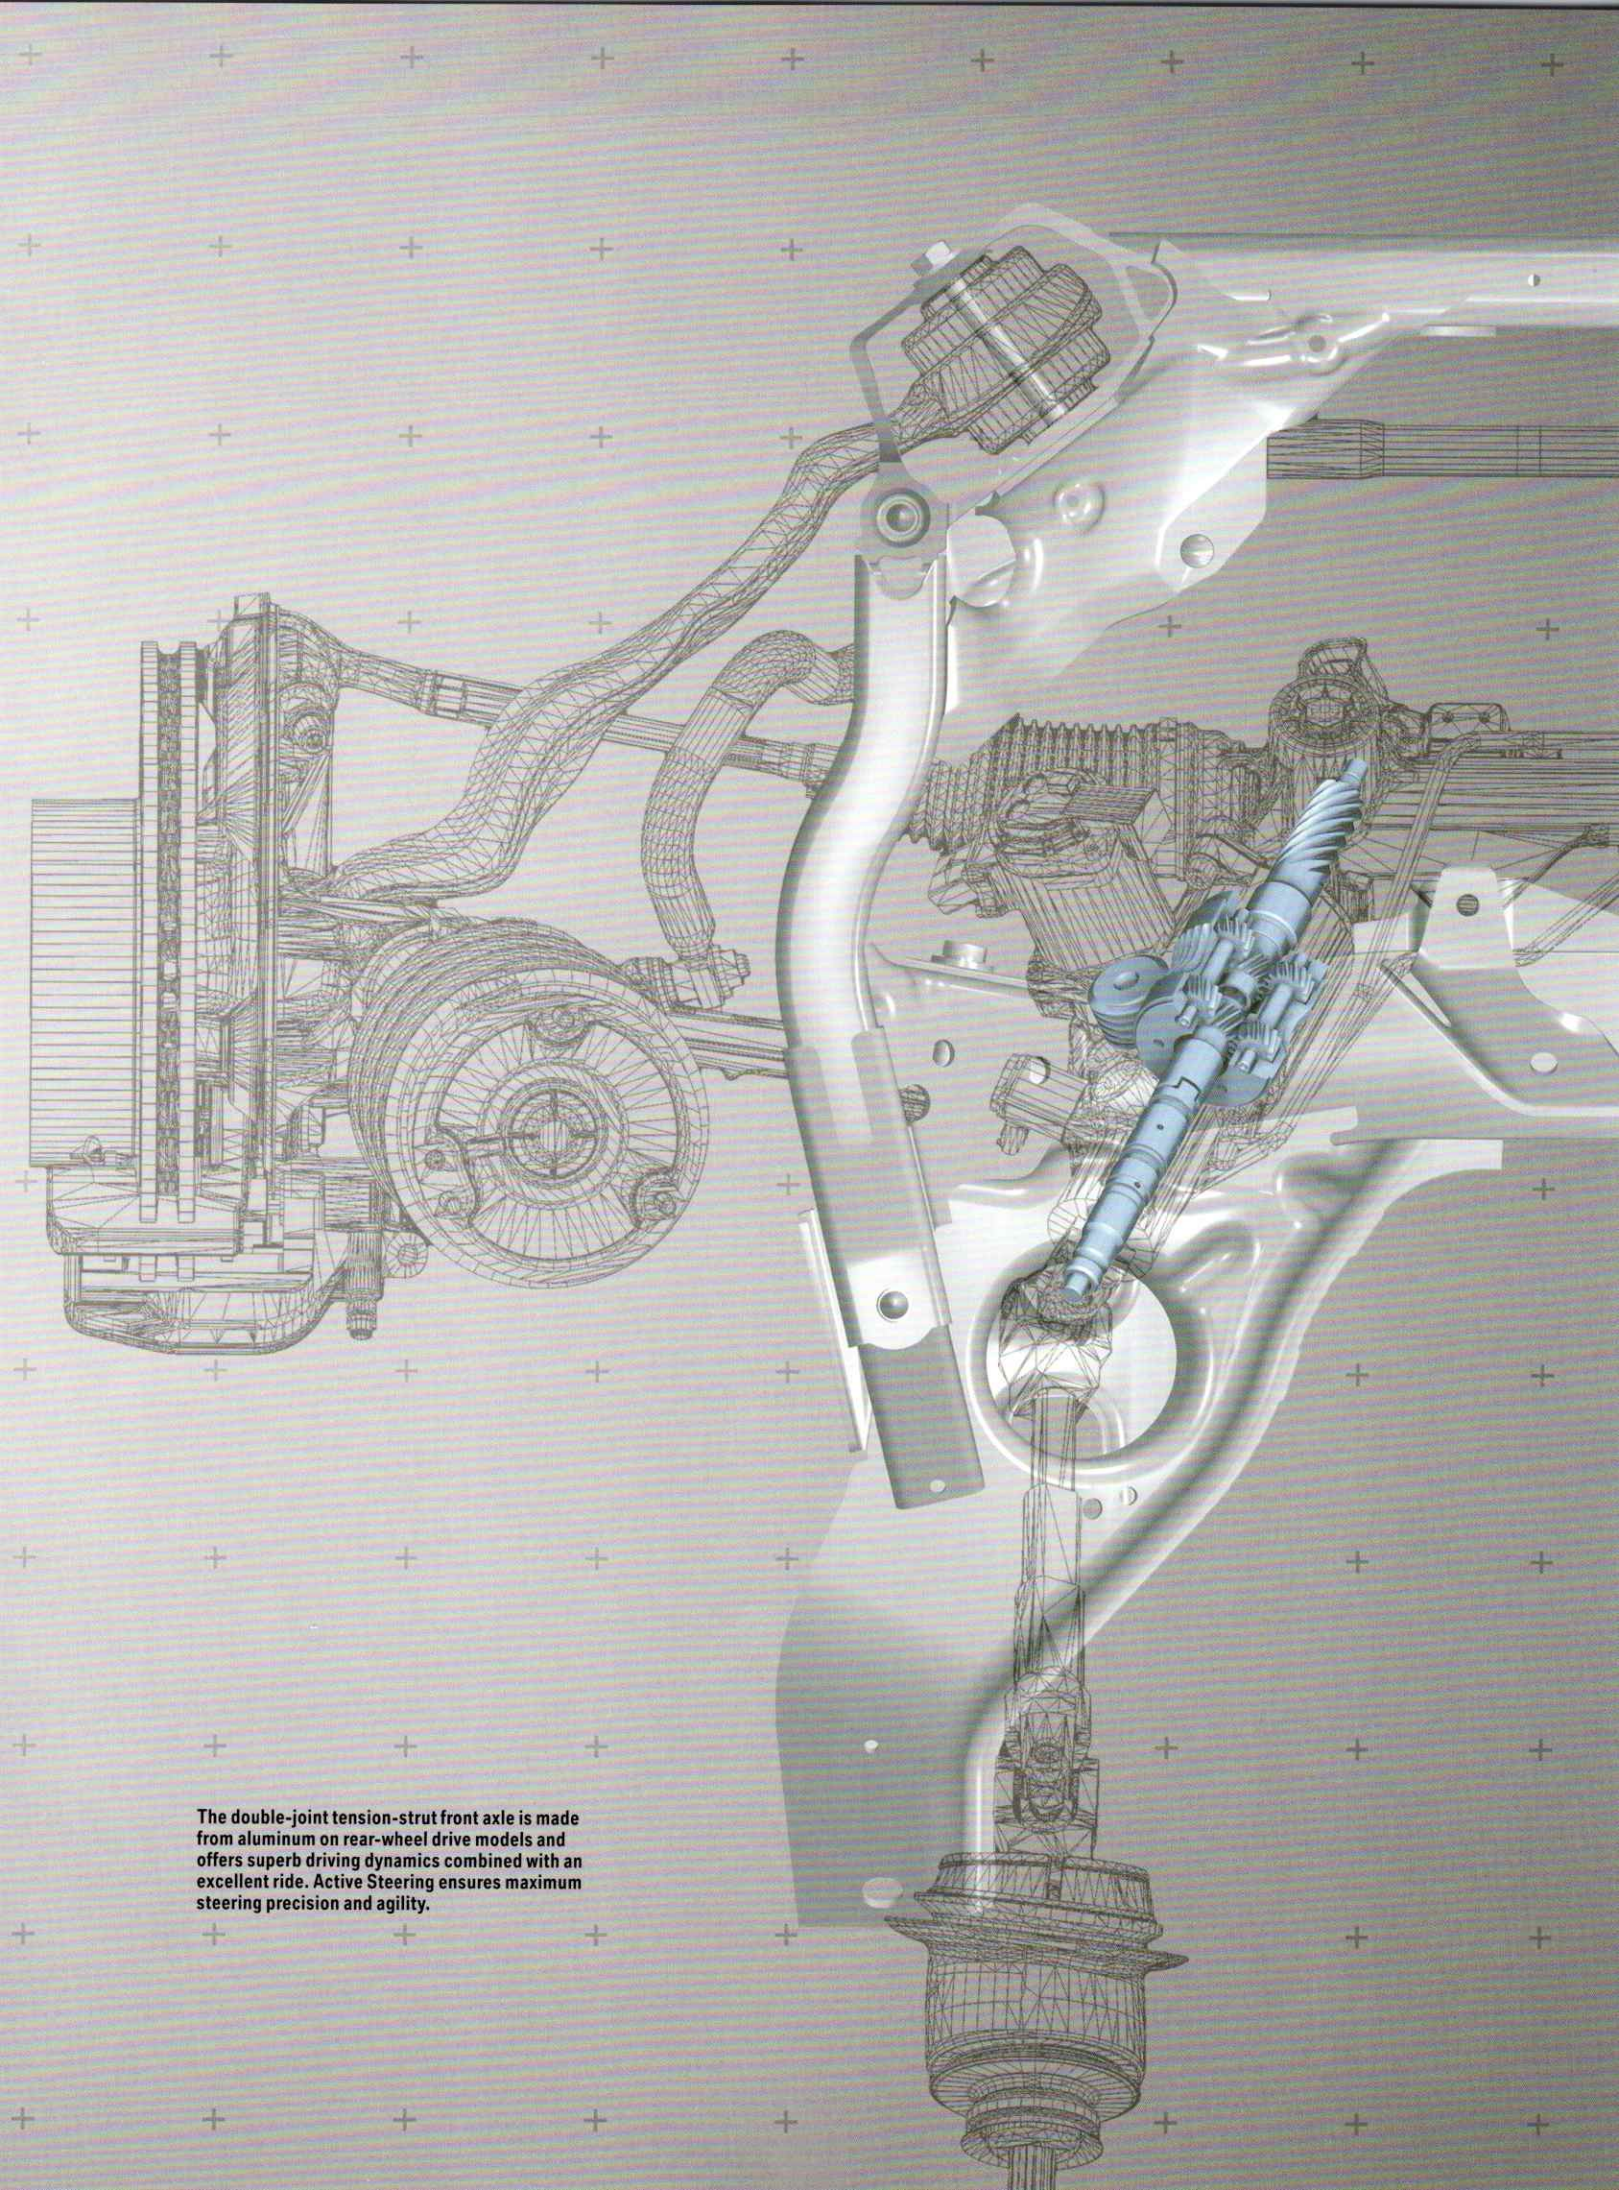

As the car speeds up, the steering transmission ratio becomes more indirect. This enhances directional stability and thus safety – for example, when travelling on a highway.

## All good things come in threes.

You can tell immediately when steering, suspension and wheels are perfectly matched. From the precise steering, feel the sporty handling, the level of ride comfort and the degree of road feedback you get. The chassis of the new BMW 3 Series Sedan is made up of components designed to work in perfect harmony with each other. Take the Active Steering system, available as an option on the 325i and 330i. It adjusts both steering ratio and steering force as a function of road speed. At low speeds, two turns of the steering wheel are enough to go from lock to lock. At higher speeds, the steering wheel must be turned further to achieve the same effect. This brings a number of benefits: on one hand, easier parking and enhanced agility on twisty roads; on the other, enhanced safety on highways, due to improved directional stability. For example, when you brake on surfaces with varying levels of grip under each wheel, the Active Steering system automatically compensates any tendency of the vehicle to swerve to either side, using active counter-steering. The brakes can thus be applied harder, and the vehicle remains safely on course. The vehicle's almost perfect 50:50 front-rear weight distribution also contributes. The overall benefits are neutral steering, high directional stability and superb traction. So, looking at the steering system, suspension and wheels in the new BMW 3 Series Sedan, it seems that all good things really do come in threes.

The double-joint tension-strut front axle is made from aluminum on rear-wheel drive models and offers superb driving dynamics combined with an excellent ride. Active Steering ensures maximum steering precision and agility.

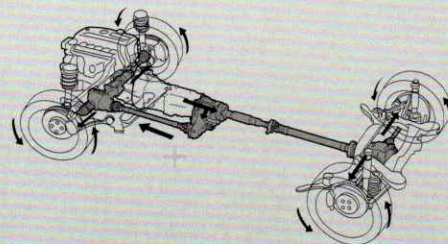

## **xDrive, the All-wheel drive that changes as quickly as the road surface.**

Road surfaces can change abruptly. A sudden downpour or heavy snowfall can present a unique challenge. Confidence in a car's flawless handling is vital in these situations. Which is why the BMW 3 Series comes with excellent safety systems as standard. In addition, the 325xi and 330xi come with the intelligent xDrive All-wheel drive system.

It's precisely in situations such as the ones described above that xDrive offers superior traction, directional stability and driving safety, combining the advantages of all-wheel drive with the level of dynamics and agility for which BMW 3 Series is renowned. Under normal driving conditions, xDrive distributes 40% of drive power to the front axle and 60% to the rear axle. While driving, the system monitors parameters such as steering angle and wheel speeds on an ongoing basis, evaluating this data to determine whether there is a risk of oversteer or understeer. When xDrive registers that the front wheels are being pushed towards the outside of the bend, the electronically controlled multi-plate clutch responds within milliseconds to decrease the power delivered to the front axle. In this way, xDrive counteracts understeer, while maximizing driving enjoyment, traction and safety.

**Traction, directional stability, safe cornering – this is what the xDrive All-wheel drive helps to ensure, even when road conditions are less than perfect. To maximize grip, the system channels drive power flexibly to both axles via a multi-plate clutch, performing split-second adjustments as needed. This provides additional traction and enhances dynamic performance on any surface. In addition, DSC engine and brake management interventions are reduced.**

Road surfaces with variable levels of grip – changing weather conditions – a surprise twist in the road. xDrive and DSC (Dynamic Stability Control) ensure that your BMW remains stable and controllable at all times. Without loss of dynamics or agility. This is what we call active safety.

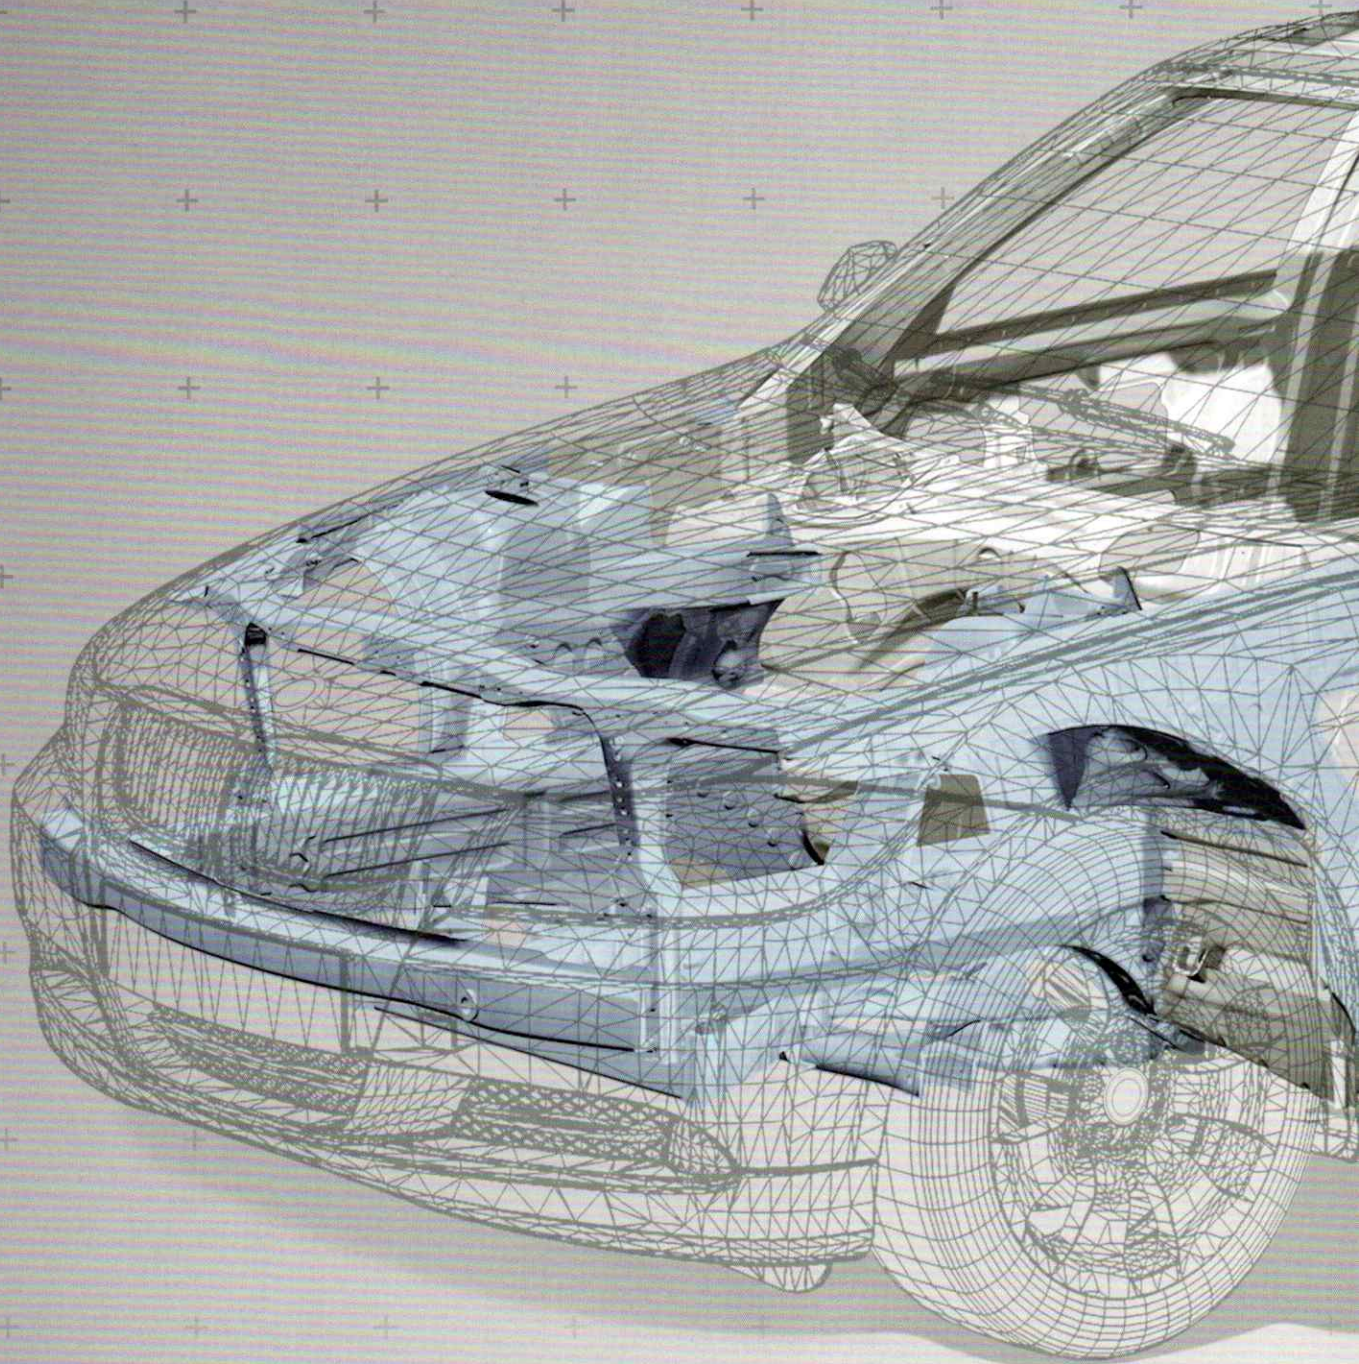

## **The time it takes to go from 100 km/h to 0 is almost more important than the time it takes the other way round.**

Dynamic Stability Control (DSC), provided as standard, recognizes any tendency of the car to skid and immediately performs appropriate engine or brake management interventions. You'll come to appreciate this when setting off or when you accelerate out of a bend: DSC ensures optimum traction in every situation. BMW 3 Series Sedans come with additional DSC functions: "Brake Standby," which reduces the stopping distance in an emergency stop; "Brake Drying," for improved brake response in wet conditions; "Start-off Assistant," for comfortable hill starts without having to apply the handbrake; "Fading Compensation," for undiminished brake performance even when the brakes have become extremely hot; and "Soft Stop,\*" for perfectly smooth low-speed stops.

\*Soft Stop is available only on the BMW 323i, 325i and 330i.

**In sport, you can rely on your game plan. It's different on the road.**

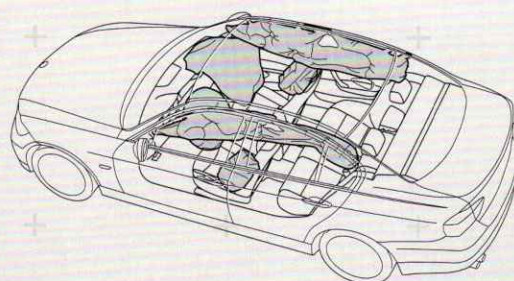

When you are in traffic, you can't predict what other people will do. At best, you can predict the effect that safety systems will have. That's why we designed a particularly stiff occupant cell made from multi-phase steels. This ensures maximum safety for all occupants. The airbag system has also been made safer than ever. Its front-to-rear curtain head airbags cover the entire side window area and provide splinter protection as well.

044  
045

This means that all occupants are well protected in a side impact. These are just some of the reasons why the new BMW 3 Series was awarded top marks for occupant protection – 5 stars – in the European NCAP crash tests. After all, if a car offers that much excitement, it should also have something that helps you relax again.

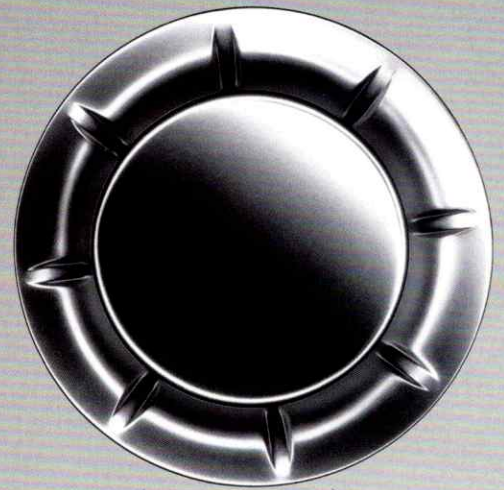

**Six airbags protect the car's occupants in the event of a crash. The innovative curtain head airbag covers the entire side window area and provides optimum protection from side impacts.**

## Intuition. It's the logical choice.

It's always been really hard to make something really simple. But the optional Navigation System with iDrive has done it (available on the 325i/xi and the 330i/xi). This innovative control concept enables you to configure and control a multitude of ancillary functions, such as the air conditioning or navigation and sound systems. To do this, you use a single intuitive Controller ergonomically positioned on the centre console, within easy reach of both driver and front passenger. Many frequently used functions, however, such as sound volume, ventilation or direction indicators, remain accessible via the dedicated buttons, switches and levers that you are used to. The iDrive menu structure is very logical, following the four compass directions. In addition, the main menus feature different colour schemes. The information appears on the Control Display – a glare-free monitor located on the dashboard that's quick and easy to read. It's ideal for when you use the Navigation System. The Navigation System offers you a map display, with scale and orientation, adjustable as needed. For some basic functions, you can even use voice commands. After all, it's easiest if you simply say what you want.

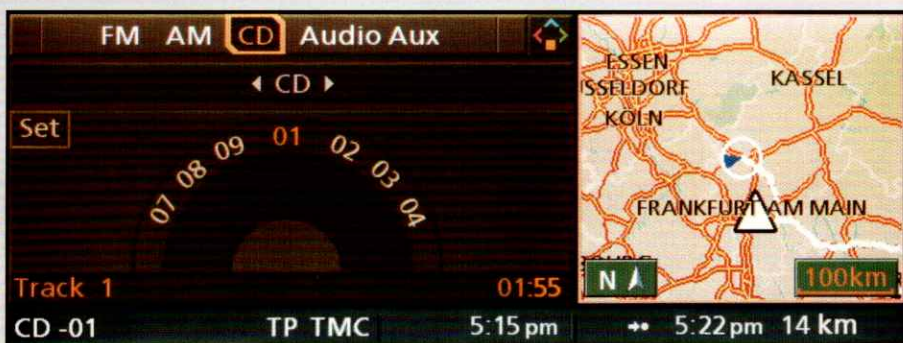

Communication. The new BMW 3 Series Sedan allows you to use the iDrive Controller to operate your mobile phone. For example, to pick a phone number. The optional preparation for a mobile phone with Bluetooth interface does away with the need for a cable connection between your phone and the hands-free equipment.

Navigation: Map data saved on a DVD leads you safely to your destination. The Navigation System Professional includes a map display.

046  
047

Entertainment: Depending on the equipment installed, this enables you to operate the radio, CD player or CD changer.

Climate: The iDrive Controller enables individual adjustment of air volume and distribution. All other functions, such as temperature selection or Automatic Air Recirculation (AAR), can be controlled directly, using rotary dials or push buttons.

Focus. Tee off. Then keep your eyes on the flight of the golf ball, all the way to the green. Again and again. For it is only through devotion to detail that knowledge can become culture. This is true in sport as much as in vehicle engineering. It becomes apparent in every golf swing, every colour nuance of a car's paintwork, every upholstery seam that has been executed in the spirit of perfect craftsmanship. Since beauty can be found in the fulfillment of any function, the world of BMW does not centre on superb automobiles to the exclusion of everything else, but is perfectly happy to accommodate a small white ball.

**BMW – for beauty that makes sense.**

054  
055

The people who carry on the tradition of Columbus are a unique tribe. Even if they no longer discover new continents, they are always on the lookout for a challenge. Such as the America's Cup, the top event in the world of sailing. BMW's commitment, with its own team, reflects this constant quest for new horizons. This is also the spirit that moves the developers, engineers and designers at BMW. It explains why at the bottom of each navigation system, light-alloy component or transmission, there is an idea that originally, to most people, just didn't seem feasible. Then it found its way into volume production.

**BMW? Every discovery begins  
with a question.**

Equipment

ORACLE®

## Equipment

■ **Xenon headlights** for low and high beam, with luminous rings, including automatic headlight range control for much better illumination of the road ahead in bad weather or poor visibility. These headlights also feature auto-levelling to adjust for varying passenger and cargo loads.  
(Available on the 325i/xi and the 330i/xi.)

■ **Ornamental front grille** with special surround and chrome kidney grille slats.  
(Available only on the 330i.)

■ **Brakeforce Display** helps vehicles travelling behind you to evaluate your braking more accurately: in the event of an emergency stop, the intensity of the brake lights is increased. So traffic travelling behind can tell in an instant the difference between a light tap on the brake pedal and a hard stop – for increased driving safety.

□ **Star Spoke light-alloy wheels** - Style 155, 16 x 7.0 225/50R-16.  
(Available only on the 323i.)

□ **Double Spoke alloy wheels** – Style 161, 17 x 8.0 front, 225/45R-17, 17 x 8.5 rear, 255/40R-17.  
(Available only on the 325i.)

□ **Elipsoid alloy wheels** – Style 162, 18 x 8.0 front, 225/40R-18, 18 x 8.5 rear, 255/35R-18.  
(Available only on the 330i.)

□ **Leather sport steering wheel:** three spokes, incl. handbrake lever handle finished in leather. Multi-function buttons, for frequently used controls, are standard.

■ **Automatic air conditioning** (incl. Automatic Air Recirculation, micro-filter, fogging and solar sensors and residual heat button), rapidly provides the desired climatic conditions in the vehicle interior and maintains the selected temperature. With individual temperature control at the front (left/right) and climatized storage compartment in the centre console, including rear air vent.  
(Available only on the 325i/xi and the 330i/xi.)

■ **Radio BMW Professional**, with additional two-tuner reception, MP3 capability and AUX/IN connection. Sound is projected through a six-speaker sound system on the 323i and the ten-speaker HiFi Sound System on the 325i/xi and the 330i/xi.

□ **Six-speed automatic transmission** with STEPTRONIC. The gearshift mechanism enables very fast, immaculate gear changes for truly dynamic performance.

□ **Sport seats** for driver and front passenger (shown here in optional Beige Dakota Leather). Optimum lateral support is ensured by continuously variable electric backrest width adjustment. Seat height, backrest and seat angle, as well as thigh support, are manually adjustable.

□ **Seat adjustment**, electric, for driver and front passenger, with electric adjustment of seat height, backrest, fore/aft position and seat angle, plus memory function for driver's seat and exterior mirrors. Two personalized settings can be stored for the driver's seat and the exterior mirrors. (Standard on the 330i/xi, optional on the 325i/xi.)

■ **Seat heating** for driver and front passenger (three settings): seat surface, sides and backrest are heated and quickly radiate comfortable warmth. (Optional on the 323i.)

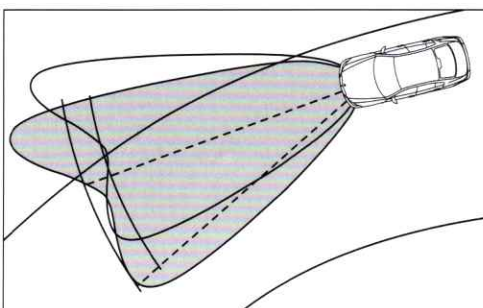

□ **Glass sunroof**, electric, with wind deflector and comfort opening function via the car's remote control unit, includes reading lights at the front and illuminated vanity mirrors. (Standard on the 330i.)

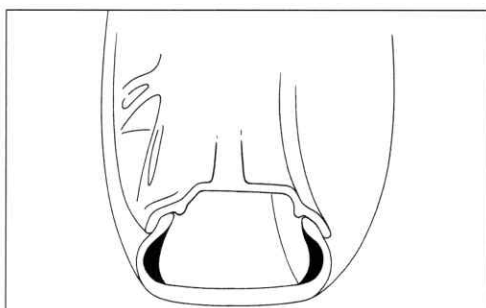

■ **Through-loading system** with asymmetric 60/40-split folding backrest, including rear centre armrest, two rear cup holders and ski bag. (Optional on the 323i.)

□ **Comfort Access** system for opening and locking the vehicle without having to operate the radio remote control. It's enough to have the ignition key in your pocket, briefcase or handbag. In addition, the engine can be started without the need for a key, using the Start/Stop button. (Available only on the 330i/xi.)

□ The **Adaptive Headlights** system features electromechanically controlled headlights to ensure optimized road illumination as soon as the vehicle enters a bend. This enhances safety when driving at night or in bad visibility. Sensors register the steering angle, yaw rate and vehicle speed; the direction of the headlight beams is then automatically adjusted to match the calculated layout of the bend. (Standard on the 330i/xi, optional on the 325i/xi.)

■ **Run-flat tires** are fitted as standard. These tires feature reinforced side walls that allow them to maintain their shape and rim position even after suffering a complete loss of pressure. The **run-flat indicator** also comes as standard, and minimizes the risks associated with tire failures. The driver is warned of a slight decline in tire pressure by a lamp in the instrument panel. If the pressure loss is more serious, an additional acoustic warning is triggered.

All dimensions in millimetres. Luggage compartment capacity (as per VDA standard): 460 litres.

<sup>1</sup> The figure quoted includes a 90 percent tank filling, 68 kg for the driver and 7 kg for luggage. Unladen weight applies to vehicles with standard equipment. Optional equipment may increase this figure.

<sup>2</sup> Electronically limited.

## Service

When you buy a BMW, you can look forward to superb service and comprehensive customer care. 2006 model year BMW vehicles purchased from an authorized BMW Retailer in Canada are covered by No-Charge Scheduled Maintenance for four years or 80,000 kilometres, whichever occurs first. Depending on the model you choose, your car informs you of its service requirement via the Service Interval Indicator or CBS (Condition Based Service). Then simply get in touch with your BMW Service Retailer, who will provide expert care for you and your car. Staffed by highly trained personnel, your BMW Service Retailer is also equipped with the latest computer-aided information and diagnostics tools. Important data such as V.I.N. number, mileage and current service requirements are all stored on your car key, ensuring quick assessment of your vehicle's status. This means that staff have more time to help you. All in all, quality and safety are the watchwords of BMW Service.

## BMW Roadside Assistance

One of the most extensive roadside assistance programs in Canada.

As a holder of the BMW Service Card, you and any additional drivers of your registered BMW will be entitled to an extensive range of services and benefits, including

- Emergency Service Calls
- Towing, in case of Mechanical Breakdown
- Winching
- Trip Interruption Benefits
- Traffic Accident Services
- Emergency Message Service
- Emergency Cash
- Travel Planning Services

For complete details and conditions, please refer to your BMW Warranty and Service Guide.

## BMW.ca

Offering the ultimate online experience, our website is designed to offer you access to a wealth of information on BMW Service and BMW Financial Services, in an easy-to-explore format.

When you visit our website, you will discover in-depth information on BMW Service, including details on the BMW Service Card, scheduled maintenance, warranty coverage, value service packages and BMW Spa® services. Always up to date, our easy-to-navigate website allows you to quickly and easily find the information you require on your vehicle's servicing needs.

Our comprehensive BMW Financial Services website allows you to learn about the vast financing and leasing opportunities available through BMW Financial Services. Interactive tools, including an advanced model selector/payment calculator, downloadable guides and an online credit application make it easy for you to interact with BMW Financial Services.

Please visit us online today at [www.BMW.ca](http://www.BMW.ca).

## BMW Financial Services

BMW Financial Services offers a comprehensive portfolio of leasing and financing solutions, designed to make your transition from showroom to highway hassle-free.

For information on how you can benefit from the flexibility, convenience and expertise that only BMW Financial Services can offer, visit [www.BMWfinance.ca](http://www.BMWfinance.ca) or contact your local BMW Retailer.

## Magazine

How do the designers at BMW come up with the next generation of industry-leading vehicles?

What is new in the world of Motorsport? Who are the people behind the brand and the product?

Read about this and much more in BMW Magazine, the official publication from BMW.

Not available on newsstands, BMW Magazine is just another exclusive benefit of owning a BMW.

**BMW Assist**

- Automatic Collision Notification - The feature that automatically contacts the BMW Assist Response Centre when your airbag deploys. The operator will dispatch assistance to your location even if you don't know where you are.
- Emergency Services - At the touch of a button, instant location-based assistance when you are in trouble.
- Location-Based Roadside Assistance - If you experience a flat tire or run out of gas, you can access your roadside assistance provider through BMW Assist.
- Bluetooth phone integration for hands-free calling.

**BMW Service: as innovative as our cars.**

### Equipped with the best ideas. Original BMW Accessories.

Driving a BMW is always a special experience. Which can be enhanced even further with Original BMW Accessories. Benefit from innovative solutions combining unique ideas, stunning design and supreme functionality. Discover the wide range of Original BMW Accessories available to you, covering such vehicle aspects as exterior, interior, mobile communication, transportation and safety. Take the BMW Portable DVD system, which can play both DVD videos and audio CDs. Fully portable, it can simply be detached from its docking station in the headliner, to enable use outside the vehicle. In addition, the system also supports connection of a video camera or games console. To find out more about the complete BMW Accessories range, visit [www.bmwaccessories.ca](http://www.bmwaccessories.ca) or contact your BMW Retailer, who will be happy to advise and provide you with a comprehensive brochure.
