THE NEW X7

DISCOVER THE BMW X7

The BMW X7 was the first vehicle unveiled to showcase the new BMW Luxury Class design which is characterised by progressive front end design cues. Split headlight units, redesigned BMW kidney and newly contoured front apron air intakes with contrasting inlay trims all add up to an expressive and more luxurious aesthetic. In combining these precise styling changes, the BMW X7 delivers a clear differentiation from its predecessor, from its competitors and from all other BMW X models.

X7 HIGHLIGHTS

POWER BOOST

The xDrive40d model is powered by a twin-turbocharged 3.0-liter inline-six that provides 340 horsepower and 720Nm of torque. The M60i model unlocks a 530-hp twin-turbocharged 4.4-litre V8 that now has 48-volt hybrid assistance.

ILLUSTRIOUS ILLUMINATION

The new face of the X7 features horizontal LED light elements set higher in the front-end house the position light, daytime driving lights and the turn signal indicators, the latter now featuring an emotive 'heartbeat' effect. The "Iconic Glow" BMW kidney grille with discreet cascade waterfall lighting is a statement feature.

LUXURIOUS TECHNOLOGY

Ultra-modern technology in an elegant, digital aesthetic is on show in the cockpit. The BMW Curved Display creates a particularly slim appearance for the instrument panel. And with its crystal look and prism structure, the innovative Light Bar beneath the decorative trim sets an optical and functional highlight.

THE SKY IS THE LIMIT

The optional Panorama glass roof Sky Lounge creates an atmospheric ambience, especially in the dark, with a light graphic composed of over 15,000 lighting elements. The light design can be switched between the six colours of the Ambient light.

ROOM TO BREATHE

In the rear compartment, too, passengers enjoy a generous amount of space and sit in supreme comfort, such as that offered by the new BMW Individual 'Merino' upholstery in Bicolour Ivory White and Atlas Grey. Any smart devices on board are easy to use thanks to the fastenings integrated into the seats.

[Start BMW Individual Visualiser](#)

BMW INDIVIDUAL

The expression of personality.

Accentuate your own character with genuine exclusivity: this is precisely what BMW Individual aspires to. Whether you are seeking a special colour or exclusive materials, you can provide a perfect figure for your inspirations. With an automobile that matches your preferences precisely, down to the finest detail. BMW Individual – an expression of personality.

LIMITLESS.

From Dakar Yellow to Nardo Grey: BMW Individual offers you a wide range of exclusive paint finishes to choose from. More than 120 different colours are available, allowing every character to find its own personal expression. Matt paint finishes by BMW Individual boldly emphasise the powerful design language of every BMW.

UNMISTAKABLE.

In designing the details of the interior with immaculate fine-grain Merino leather, BMW Individual leaves you a completely free hand. From the choice of colours to the composition of impressive leather coverings in Bicolour and contrasting stitching, everything is possible. Personalised signets and monograms form highlights of individualisation.

EXPRESSIVE.

All trims have one thing in common: they are made of the highest quality materials. Whether they are made of aluminium mesh, carbon or precious wood - create exciting contrasts in the interior of your BMW M or achieve corresponding effects between the interior and accent trims and the leather upholstery.

THE BMW CONNECTED DRIVE

DIGITAL KEY

The Digital Key allows you to lock and unlock your BMW and even start the engine without needing a physical key. It can be downloaded to your smartphone using the My BMW app and shared with family and friend.

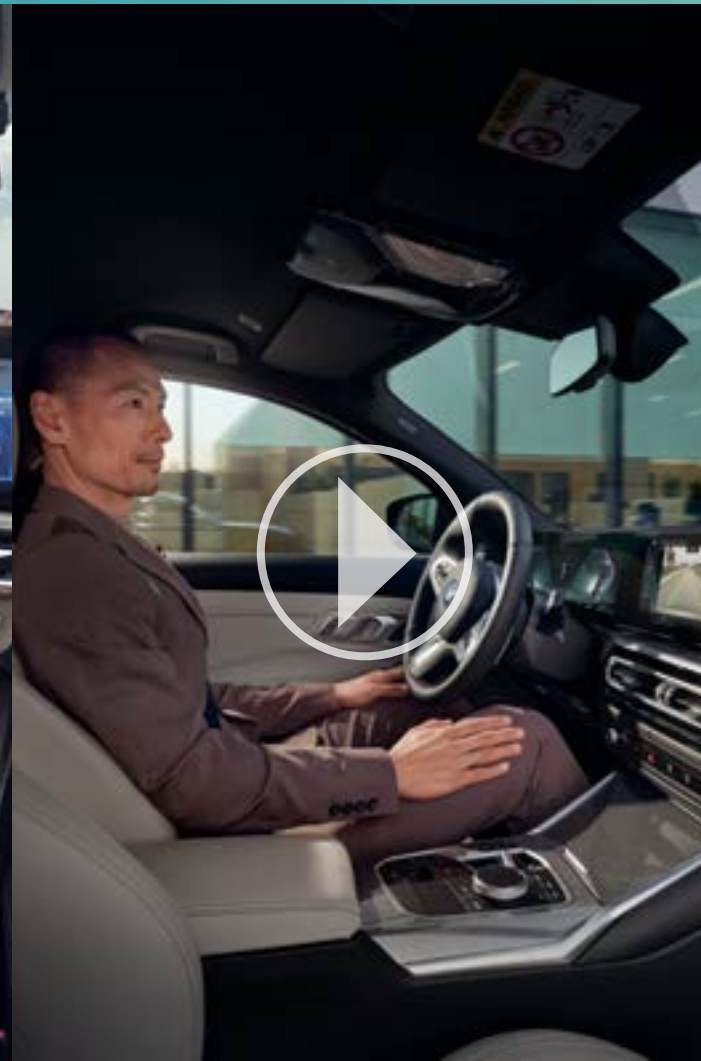

CONNECTED NAVIGATION

Real Time Traffic Information keeps you updated on the current traffic situation. Our service informs you of traffic congestion, traffic delays and incidents and can suggest alternate routes.

CONNECTED PACKAGE PROFESSIONAL

Remote Services, Real Time Traffic Information, Apple CarPlay® preparation or perhaps In-Car Experiences. With the Connected Package Professional, you can enjoy these services from BMW ConnectedDrive.

DRIVING ASSISTANT

Driving Assistant Professional offers optimum comfort and maximum safety during lots of critical or monotonous driving situation with Steering and lane control assistant incl. support in narrow places, Emergency Stop Assistant, local hazard warning, Lane Keeping Assistant with active side collision protection and other safety functions.

THE BMW LIVE COCKPIT

The brand new infotainment, navigation and multimedia system (BMW Operating 8.5) provides cutting edge innovations as standard. Incorporating new generations of professional multimedia, BMW Live Cockpit Professional features high resolution control display, fully digital instrument panel and includes the ConnectedDrive digital services

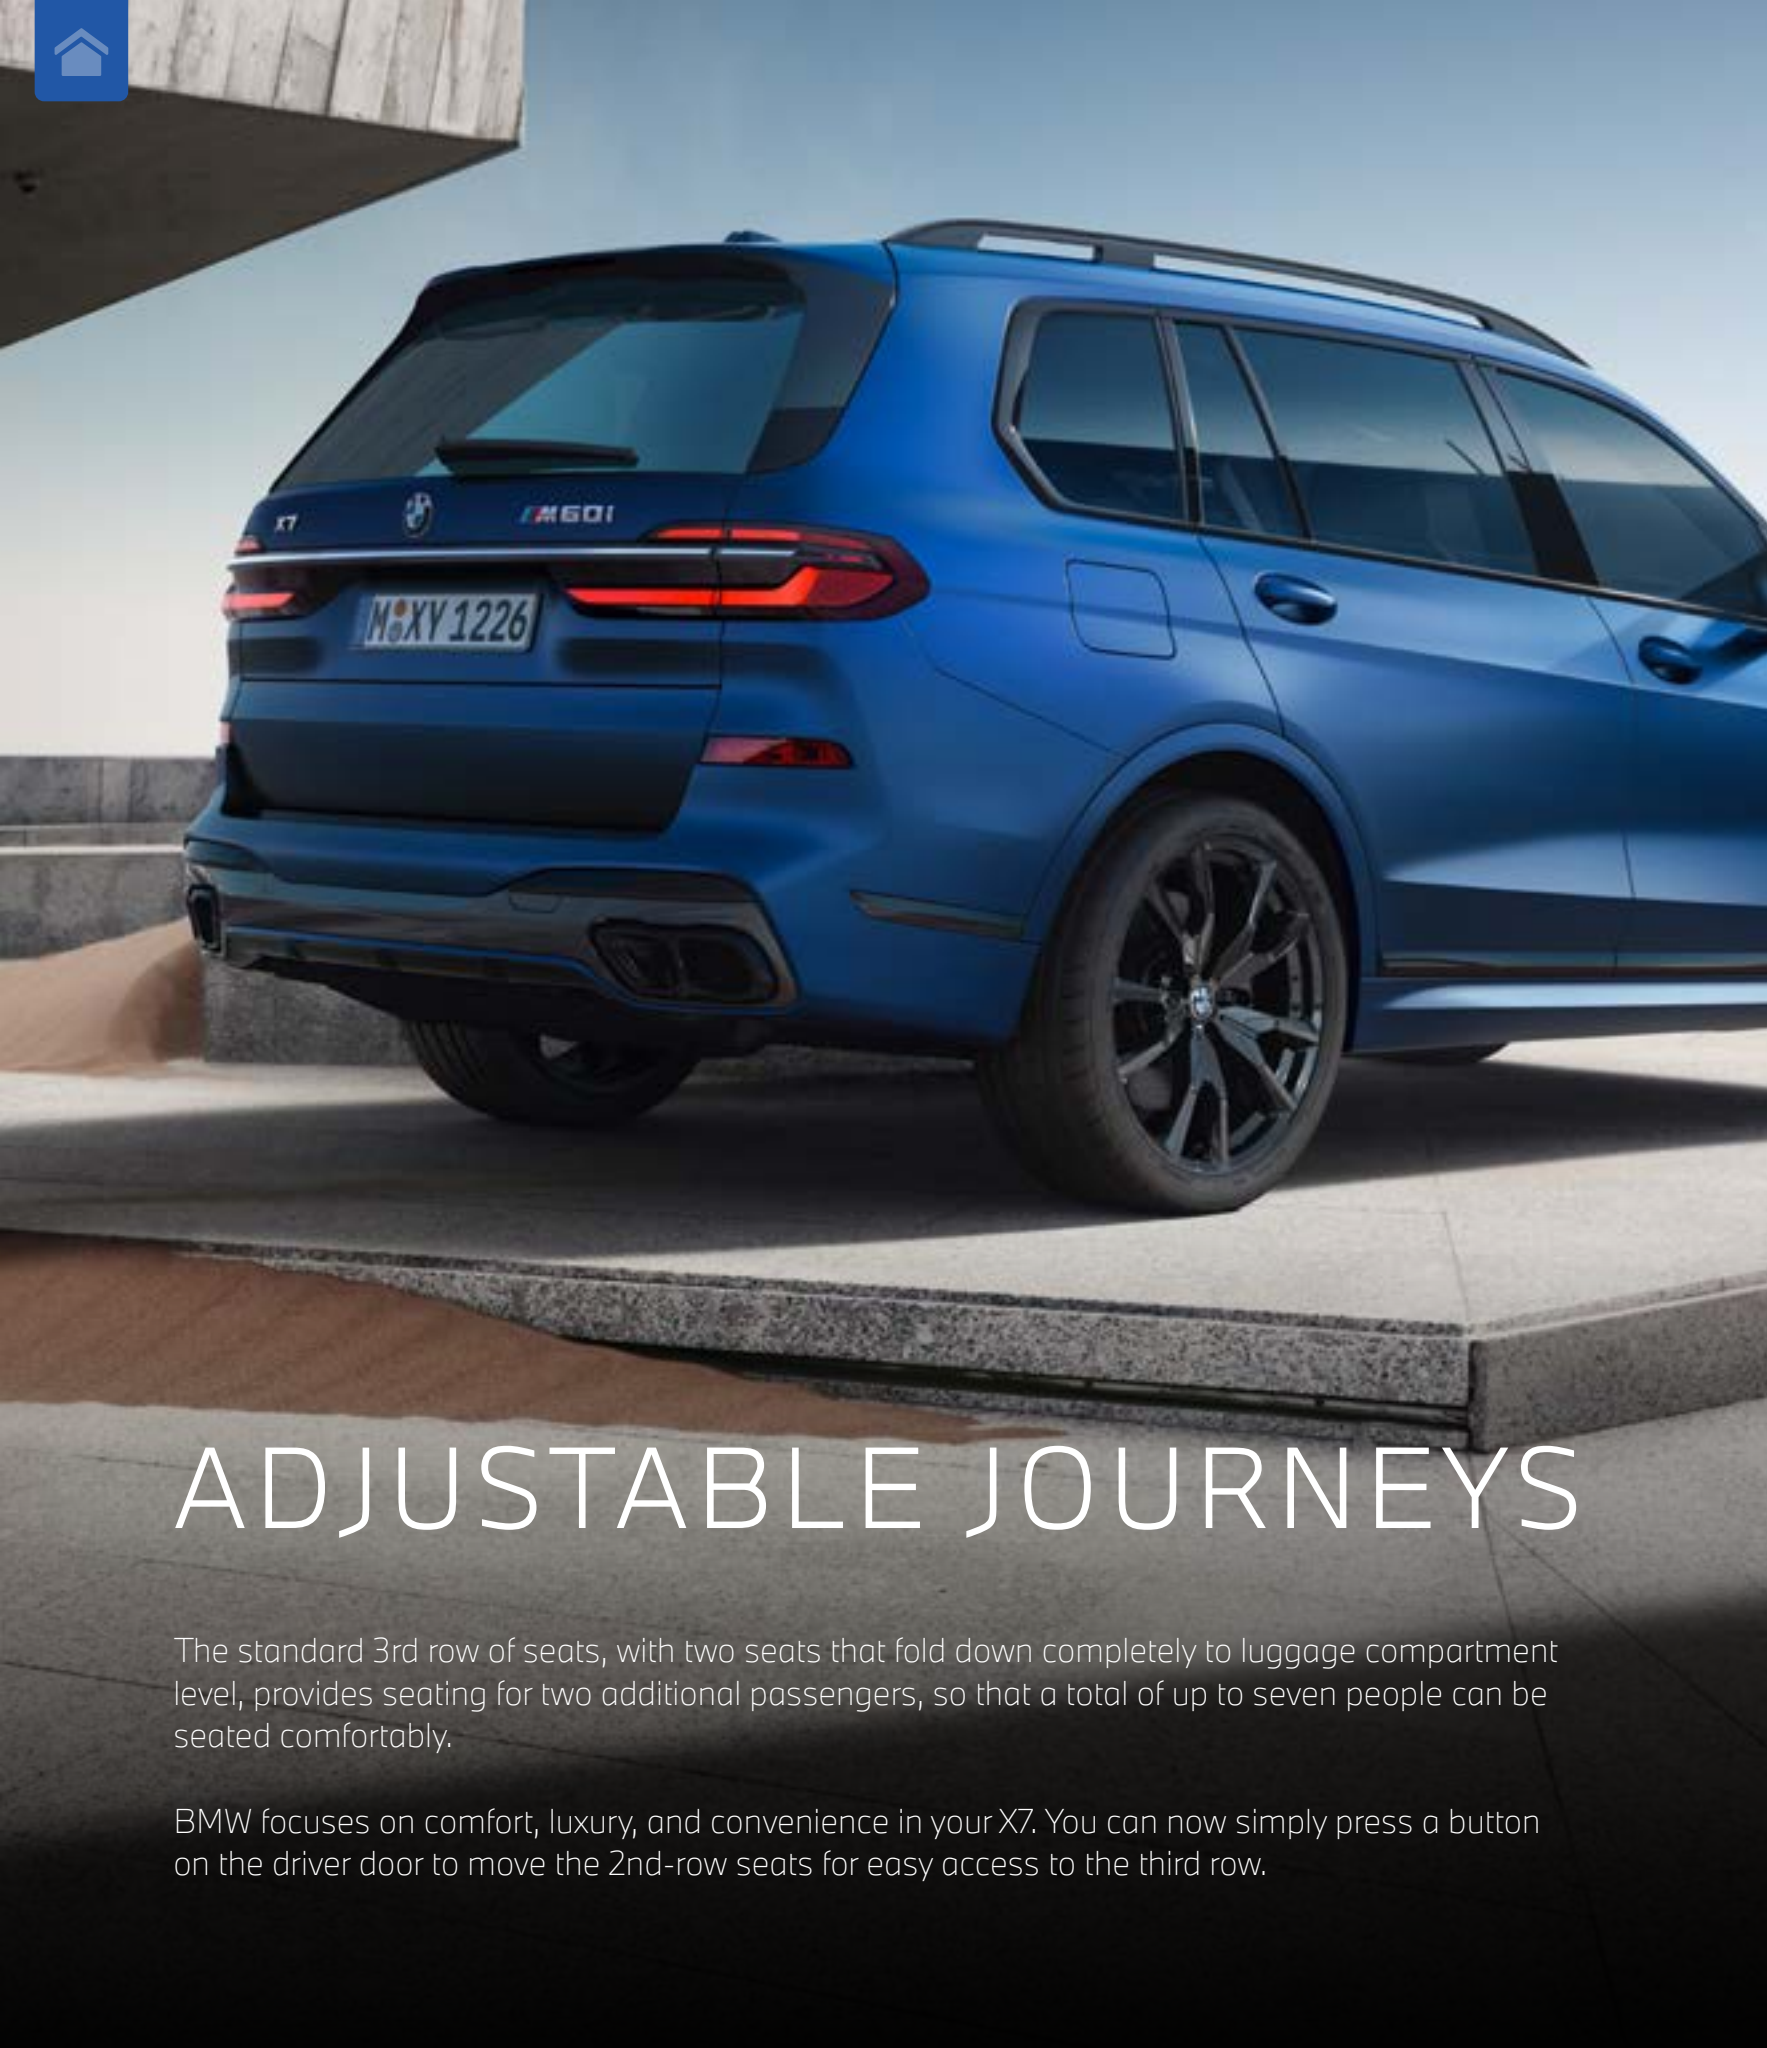

BMW xDRIVE

Weather changes and road situations can change in a flash, whatever the season. But with xDrive, BMW's intelligent all-wheel drive system, your car will respond quickly to allow you to enjoy maximum driving pleasure, even on the most difficult road surfaces. 4WD, all-wheel drive and 4x4 are all terms that are used interchangeably, but all equate to the same thing. BMW xDrive is powered by an extra layer of intelligence, making it one of the most technically advanced all-wheel drive systems in the segment.

THE INTELLIGENT ALL-WHEEL DRIVE SYSTEM FROM BMW

The xDrive system is automatically enabled each time the engine is started, so it is permanently engaged to ensure you have maximum grip in all conditions. Therefore, it is not necessary or possible to activate or deactivate the system.

ADJUSTABLE JOURNEYS

The standard 3rd row of seats, with two seats that fold down completely to luggage compartment level, provides seating for two additional passengers, so that a total of up to seven people can be seated comfortably.

BMW focuses on comfort, luxury, and convenience in your X7. You can now simply press a button on the driver door to move the 2nd-row seats for easy access to the third row.

SPACES FOR ALL OCCASIONS

BEST SEAT IN THE HOUSE

Lean back on the comfort cushion in the headrest, place your arm on the armrest in the middle and let the landscape pass by. An additional plus: The two individual seats make access to the third row of seats even quicker and more comfortable – for maximum flexibility in every situation. If you want to take even more people with you, the 7-seater is just the thing: On the full-length bench in the second row of seats, three passengers have comfortable space. No matter which variant you choose, in the BMW X7 you will always be sitting in the best seats.

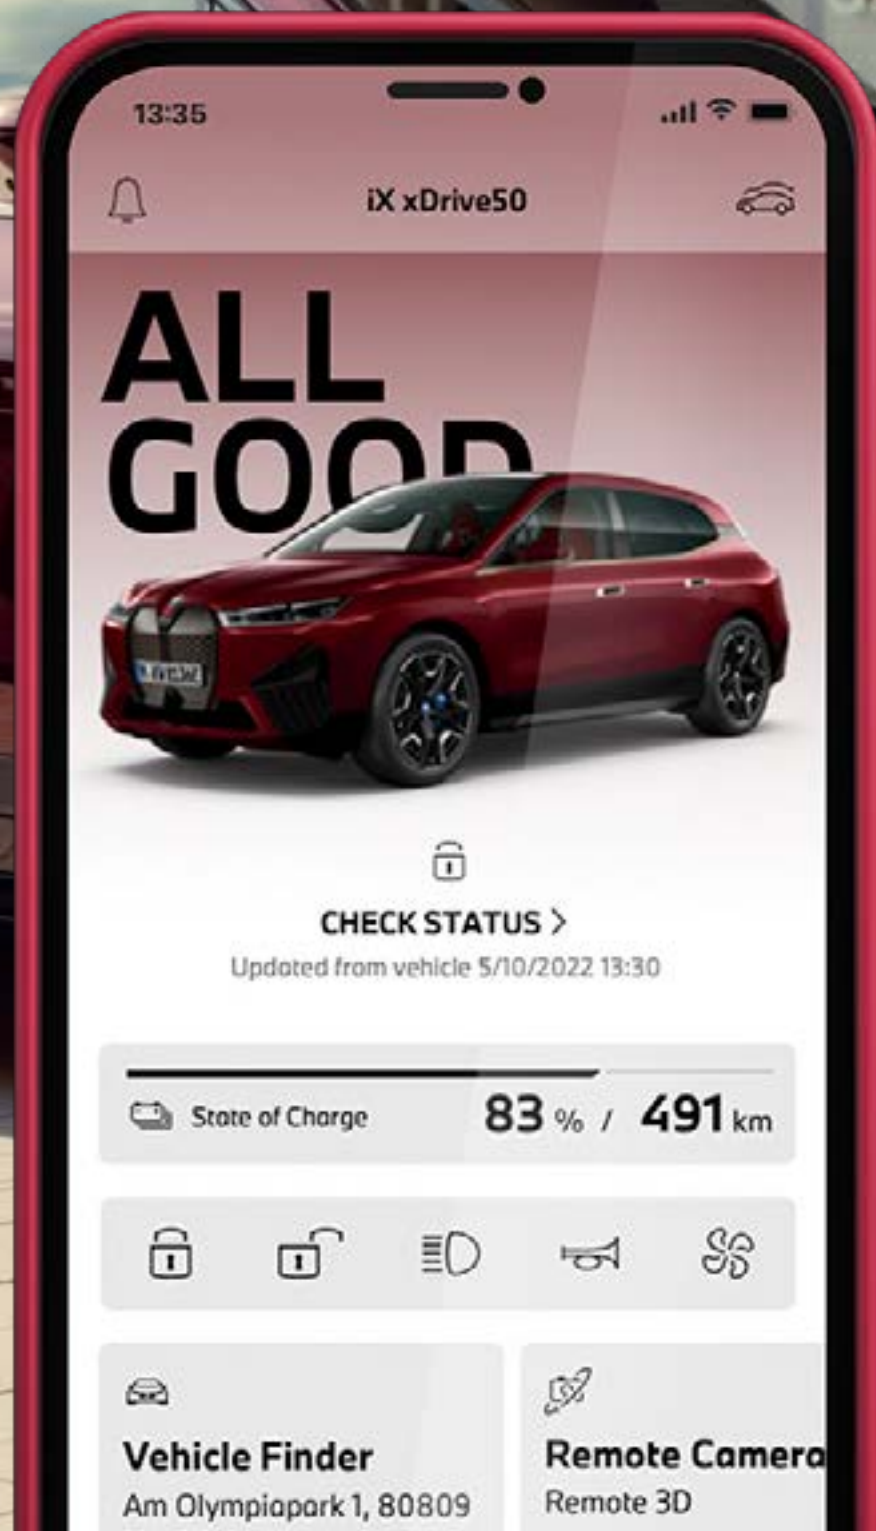

MY BMW APP

STAY IN THE DRIVER'S SEAT,
WHEREVER YOU ARE.

Connect your vehicle to your life. The My BMW App keeps you at the wheel with total control of your BMW, whether you're in your vehicle or not.

- **Remote control**
Lock and unlock your BMW from wherever you are.
- **Location location location**
Access your car's location remotely and send locations to your car's GPS, so you're always ready for the journey.
- **Driving conditions**
Set the temperature of your car remotely for the perfect climate the moment you open the door.
- **Great service**
Let your BMW tell you when it's time for a service, then schedule it with just a touch.
- **It's personal**
It's MyBMW, after all. Enter your BMW's colour palette, and the app design follows suit.

SUSTAINABILITY AT BMW

**WE ASPIRE TO BE THE MOST SUCCESSFUL AND SUSTAINABLE
PREMIUM PRODUCER FOR INDIVIDUAL MOBILITY.**

Sustainability is not just a trend for us. We take responsibility – here and today – and we will be taking sustainability to a whole new level.

- Since 2020, the BMW Group only uses renewable energy sources – worldwide!
- The BMW Group lowered the energy consumption per produced vehicle by 55% since 2006.
- 99% of the annual production waste is recycled and used.
- The BMW Group aims to reduce supply chain CO2 emissions per vehicle by 20% from 2019 levels by 2030.
- In South Africa the electricity from a biogas plant covers 31% of the needs of the BMW Group plant in Rosslyn.
- In 2019, several million customers in Europe used the BMW Group's car sharing offer.
- As part of the "Health Initiative", so far 28,500 employees have taken part in health checks.
- Our plant in Regensburg has tested HGVs running on liquefied natural gas as an ideal alternative to diesel, especially over long distances.
- Since the beginning, the BMW Group has been participating in the Responsible Cobalt Initiative (RCI) in order to increase transparency and governance, and implement collective measures to overcome social and environmental risks in the cobalt supply chain.

MEET THE ELECTRIFIED BMW FAMILY

For an electric vehicle it is not only important to consider how fast and safely it travels, but also how far it will take you. In this consideration, the range of an electric vehicle also depends on factors such as the speed, driving style and outside temperature as well as the use of the air conditioning or seat heating. These are factors that we cannot calculate. But all the others we can. Here you can find out all about the ranges of our electric cars and plug-in hybrid vehicles.

FURTHER INFORMATION ON CO₂ DATA

The values of fuel consumptions, CO₂ emissions and energy consumptions shown were determined according to the European Regulation (EC) 715/2007 in the version applicable at the time of type approval. The figures refer to a vehicle with basic configuration in Germany and the range shown considers optional equipment and the different size of wheels and tires available on the selected model.

The CO₂ efficiency specifications are determined according to Directive 1999/94/EC and the European Regulation in its current version applicable. The values shown are based on the fuel consumption, CO₂ values and energy consumptions according to the NEDC cycle for the classification.

When charging times are shown they can be affected by a number of factors such as type of charger, voltage supplied to the charger/car and type of current (AC or DC) supplied to the charger/car. The car also plays a role in charging times as it can be set by the driver to accept various different amperage and should preconditioning be used to heat or cool the vehicle while charging this will also affect the charging time.

The basis for the calculation of the charging times for 100 km range is the electric consumption of the vehicle based on the use of a high-Powered Charging station (HPC) or charging type and current as indicted in the literature above. The testing procedure measures are based on a 23 degrees Celsius battery start and ambient temperature with certification values excluding additional auxiliary consuming devices and systems within the vehicle such as seat heating, displays, air conditioning.

Individual consumption (fuel economy) may differ due to driving profile, vehicle load profile, auxiliary consumer usage, temperature, and ambient conditions. Consumption is based on WLTP or NEDC (whichever is indicated) best case conditions and is independently tested for BMW Group. If you are comparing this range with other models or brands make sure they are stating the same WLTP or NEDC testing regime. These results can be used to compare vehicles on a close to "like for like" basis but are unlikely to be achieved in real world conditions for reasons including temperature variation, driving conditions and the use of the auxiliary systems referred to above.

Information provided and images displayed in this brochure include overseas models and may show some features not available in New Zealand. Please contact an authorised BMW dealer for specific information on vehicles and features available in New Zealand. Product changes may have been made since production of this content.

Note: To obtain NZ CO₂ figures for vehicles imported by BMW Group NZ in relation to the NZ Clean Car discount or "FeeBate" you will need to contact your preferred dealer. The Clean Car discount figures sourced from your dealer will differ from those listed in the BMW owner's handbook and reported figures as they have been converted by the NZ government to WLTP3 from figures derived through one of the following testing procedures: WLTP4 or NEDC.

For more information on the New Zealand Clean Car Programme, please visit www.nzta.govt.nz/vehicles/clean-car-programme
