LEADING WITH STYLE. THE 5

The BMW 5 Series Sedan is the epitome of a sporty business saloon. At very first sight it conveys an impression of stylish athleticism that particularly expresses itself in the dynamic silhouette and reduced design language. Clear surfaces and precise contours lend the elegant exterior a modern, technical atmosphere. The elegant and functional interior completes the innovative ambition of the vehicle with future-oriented technologies and sporty features. In combination with impressive driving dynamics and innovative technologies, the BMW 5 Series Sedan provides comfort, self-assuredness and, above all, a supreme level of sheer driving pleasures on journeys both short and long.

THE 5 HIGHLIGHTS

ALWAYS ICONIC

The new BMW 5 Series Sedan has embellished its already iconic look through striking elements, such as the new one-piece kidney grille and redesigned body styling, and enhanced proportions to create a much sportier impression.

REFINED STYLE

Step inside the new BMW 5 Series Sedan and discover majestic design language elevated by enhanced functionality. From the new 12.3" Central Information Display to the M Sport steering wheel, there are lovely details to discover throughout.

THE ULTIMATE STAGE

New digital services like Real Time Traffic Information and Connected music, which gives you access to 50 million songs, and enhanced driver assistance systems.

DRIVER ASSISTANCE

The Driver Assistant Professional system guarantees maximum safety and first-class ride comfort, while the BMW Live Cockpit Professional ensures optimal clarity and ease of operation.

THE BMW CONNECTED DRIVE

DIGITAL KEY

Why put your key in the ignition if you have your Android smartphone with you? The Digital Key3, 4, 5 allows you to lock and unlock your BMW and even start the engine without needing a physical key. It can be downloaded to your Android smartphone using the My BMW app and shared with family and friends. The term is one year.

CONNECTED NAVIGATION

Trying to find a parking space close to your destination? This is an easy task with Parking Space Assistant. It suggests vacant spaces in large parking facilities or on the street and based on your selection, finds the best route for you with the highest likelihood of an available space. You can also pay for parking cash-free using PARK NOW.

The term is three years.

CONNECTED PACKAGE PROFESSIONAL

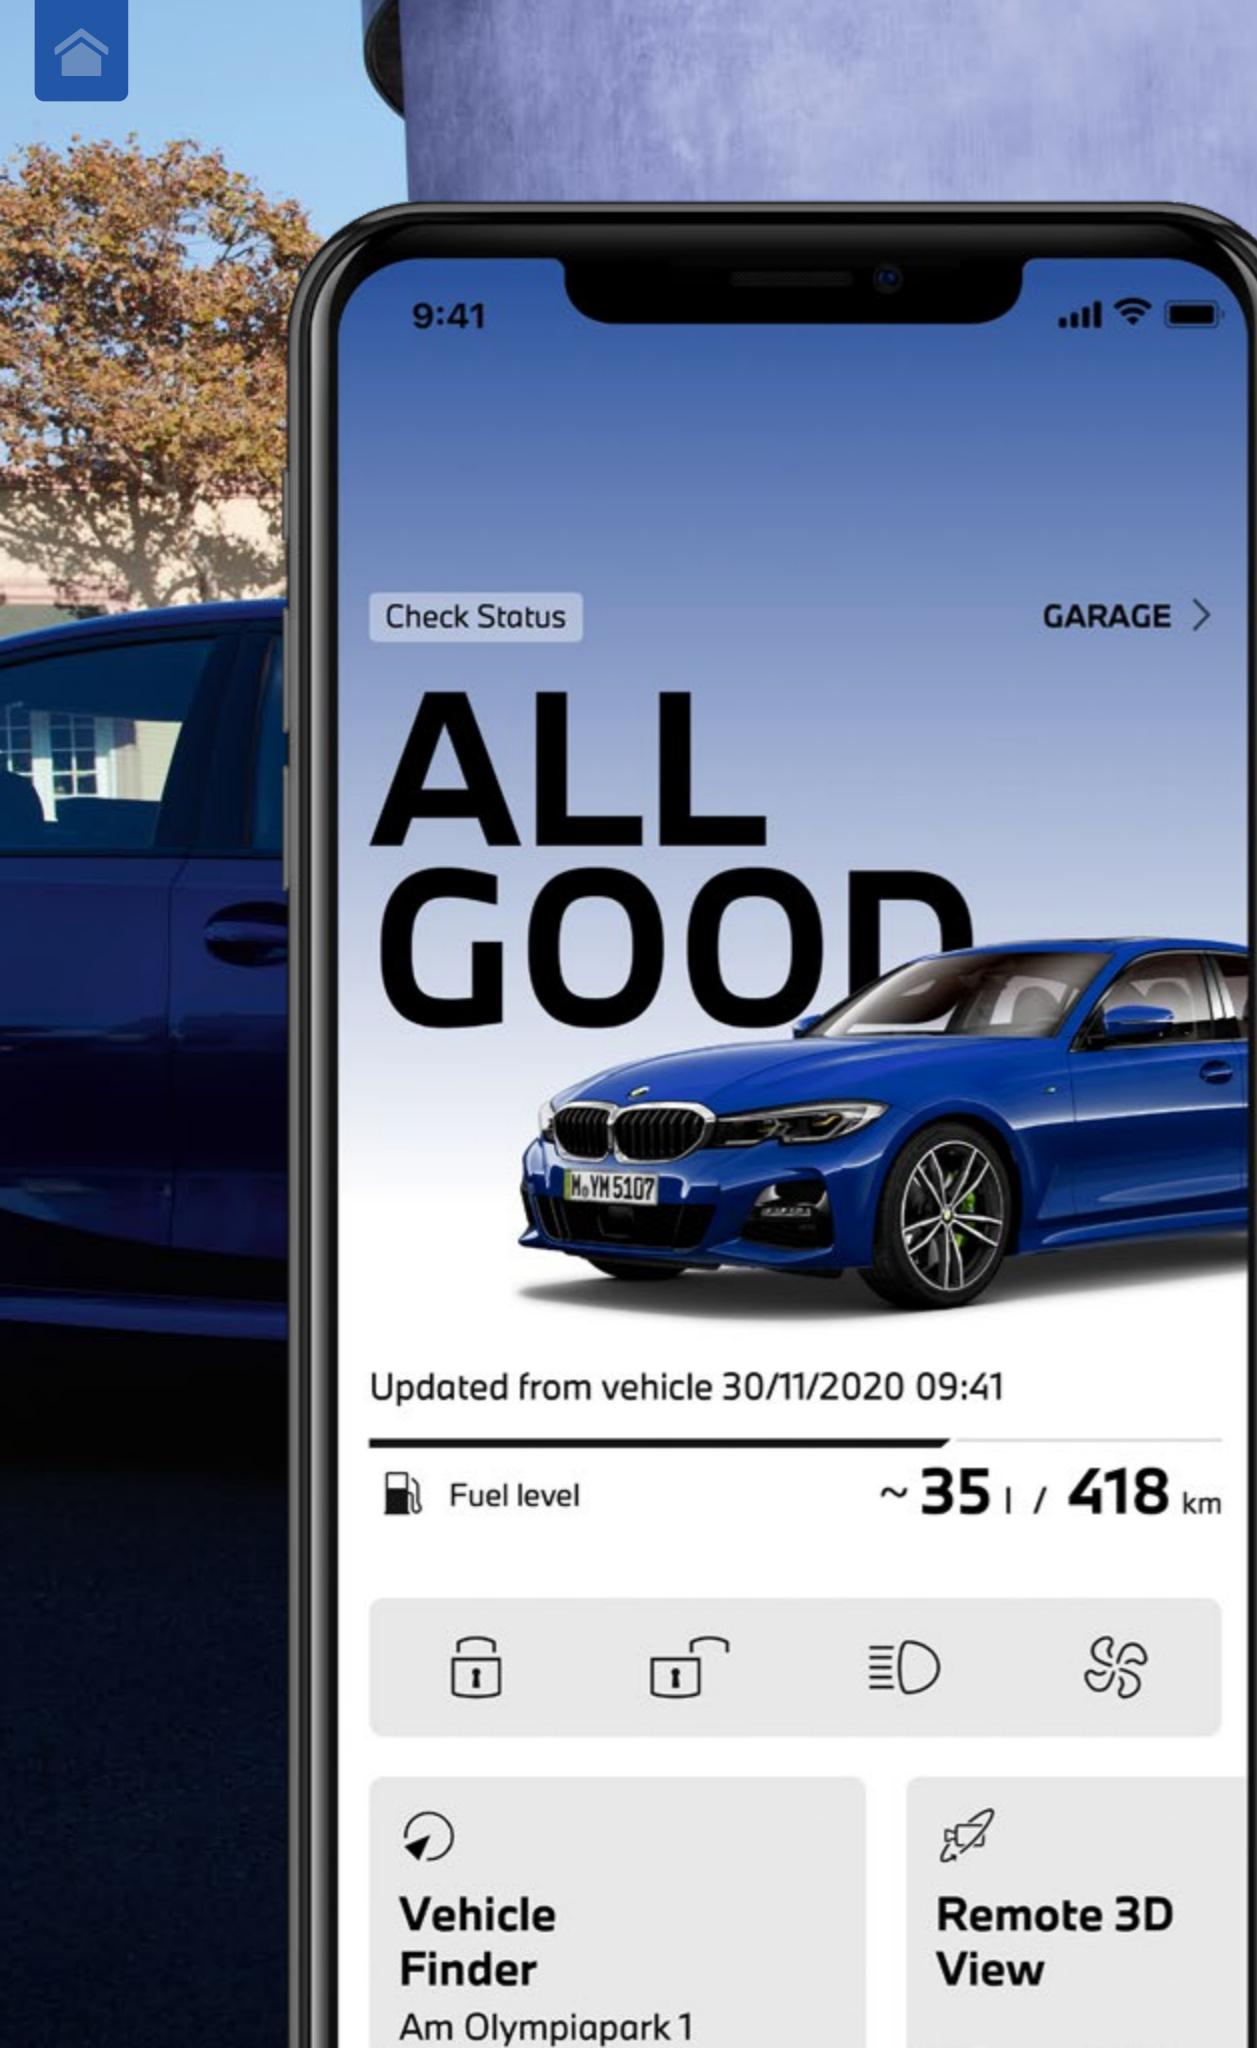

Remote Services, Real Time Traffic Information, Apple CarPlay® preparation or perhaps In-Car Experiences? Why order individual options when you can have everything together? With the Connected Package Professional, you can enjoy these services from BMW ConnectedDrive.

DRIVING ASSISTANT

Driving Assistant Professional offers optimum comfort and maximum safety during lots of critical or monotonous driving situations with Steering and lane control assistant incl. support in narrow places, Emergency Stop Assistant, local hazard warning, Lane Keeping Assistant with active side collision protection and other safety functions.

THE BMW LIVE COCKPIT

The brand new infotainment, navigation and multimedia system (BMW Operating 7.0) provides cutting edge innovations as standard. Incorporating new generations of professional multimedia, BMW Live Cockpit Professional features high resolution control display, fully digital instrument panel and includes the ConnectedDrive digital services.

MY BMW APP

STAY IN THE DRIVER'S SEAT,
WHEREVER YOU ARE.

Connect your vehicle to your life. The My BMW App keeps you at the wheel with total control of your BMW, whether you're in your vehicle or not.

- **Remote control**
Lock and unlock your BMW from wherever you are.
- **Location location location**
Access your car's location remotely and send locations to your car's GPS, so you're always ready for the journey.
- **Driving conditions**
Set the temperature of your car remotely for the perfect climate the moment you open the door.
- **Great service**
Let your BMW tell you when it's time for a service, then schedule it with just a touch.
- **It's personal**
It's MyBMW, after all. Enter your BMW's colour palette, and the app design follows suit.

SUSTAINABILITY AT BMW

WE ASPIRE TO BE THE MOST SUCCESSFUL AND SUSTAINABLE PREMIUM PRODUCER FOR INDIVIDUAL MOBILITY.

Sustainability is not just a trend for us. We take responsibility – here and today – and we will be taking sustainability to a whole new level.

- Since 2020, the BMW Group only uses renewable energy sources – worldwide!
- The BMW Group lowered the energy consumption per produced vehicle by 55% since 2006.
- 99% of the annual production waste is recycled and used.
- The BMW Group aims to reduce supply chain CO2 emissions per vehicle by 20% from 2019 levels by 2030.
- In South Africa the electricity from a biogas plant covers 31% of the needs of the BMW Group plant in Rosslyn.
- In 2019, several million customers in Europe used the BMW Group's car sharing offer.
- As part of the "Health Initiative", so far 28,500 employees have taken part in health checks.
- Our plant in Regensburg has tested HGVs running on liquefied natural gas as an ideal alternative to diesel, especially over long distances.
- Since the beginning, the BMW Group has been participating in the Responsible Cobalt Initiative (RCI) in order to increase transparency and governance, and implement collective measures to overcome social and environmental risks in the cobalt supply chain.

MEET THE ELECTRIFIED BMW FAMILY

For an electric vehicle it is not only important to consider how fast and safely it travels, but also how far it will take you. In this consideration, the range of an electric vehicle also depends on factors such as the speed, driving style and outside temperature as well as the use of the air conditioning or seat heating. These are factors that we cannot calculate. But all the others we can. Here you can find out all about the ranges of our electric cars and plug-in hybrid vehicles.

THE 5 PACKAGES

INNOVATIONS PACKAGE

FURTHER INFORMATION ON CO₂ DATA

The values of fuel consumptions, CO2 emissions and energy consumptions shown were determined according to the European Regulation (EC) 715/2007 in the version applicable at the time of type approval. The figures refer to a vehicle with basic configuration in Germany and the range shown considers optional equipment and the different size of wheels and tires available on the selected model.

The CO2 efficiency specifications are determined according to Directive 1999/94/EC and the European Regulation in its current version applicable. The values shown are based on the fuel consumption, CO2 values and energy consumptions according to the NEDC cycle for the classification.

When charging times are shown they can be affected by a number of factors such as type of charger, voltage supplied to the charger/car and type of current (AC or DC) supplied to the charger/car. The car also plays a role in charging times as it can be set by the driver to accept various different amperage and should preconditioning be used to heat or cool the vehicle while charging this will also affect the charging time.

The basis for the calculation of the charging times for 100 km range is the electric consumption of the vehicle based on the use of a high-Powered Charging station (HPC) or charging type and current as indicated in the literature above. The testing procedure measures are based on a 23 degrees Celsius battery start and ambient temperature with certification values excluding additional auxiliary consuming devices and systems within the vehicle such as seat heating, displays, air conditioning.

Individual consumption (fuel economy) may differ due to driving profile, vehicle load profile, auxiliary consumer usage, temperature, and ambient conditions. Consumption is based on WLTP or NEDC (whichever is indicated) best case conditions and is independently tested for BMW Group. If you are comparing this range with other models or brands make sure they are stating the same WLTP or NEDC testing regime. These results can be used to compare vehicles on a close to "like for like" basis but are unlikely to be achieved in real world conditions for reasons including temperature variation, driving conditions and the use of the auxiliary systems referred to above.

Information provided and images displayed in this brochure include overseas models and may show some features not available in New Zealand. Please contact an authorised BMW dealer for specific information on vehicles and features available in New Zealand. Product changes may have been made since production of this content.

Note: To obtain NZ CO2 figures for vehicles imported by BMW Group NZ in relation to the NZ Clean Car discount or "FeeBate" you will need to contact your preferred dealer. The Clean Car discount figures sourced from your dealer will differ from those listed in the BMW owner's handbook and reported figures as they have been converted by the NZ government to WLTP3 from figures derived through one of the following testing procedures: WLTP4 or NEDC.

For more information on the New Zealand Clean Car Programme, please visit www.nzta.govt.nz/vehicles/clean-car-programme
