

COLORADO X-CAB

CHEVROLET

INTERIOR DESIGN

The road ahead may test and challenge you. You would want a tough truck that is capable of performing in any situation. Colorado X-Cab is designed to work hard and respond to your driving needs.

Arrive at all destinations quickly with the powerful yet fuel-efficient 2.5L Duramax turbo

diesel engine. Advanced suspension and a durable body make light work of heavy loading and demanding duties.

At the same time, Colorado X-Cab provides a smooth driving experience and grips firmly both on straights and curves. Above all, you will feel peace of mind with a host of safety features

that offer more protection than the average truck. Experience a new level of comfort and convenience in a completely redesigned interior finely crafted with premium equipment. There is also Chevrolet MyLink, an innovative infotainment system that helps you stay entertained and in touch.

Connect your iPhone with Apple CarPlay™, an innovation that uses phone integration for added safety and convenience while driving. With all these features and more, Colorado X-Cab is perfect for both performance and functionality. It's a pickup truck that's tough like you.

TECHNOLOGY

Chevrolet MyLink features a variety of intelligent functions. Listen to the news on your favorite radio channels or watch popular TV series via AUX or USB inputs. You can also view your photos from a slide show album and should you receive a call, the system will automatically switch to calling mode. The system gives you control with a touch-screen and a convenient voice recognition feature that lets you keep your hands on the steering wheel for a safer journey.

Moreover, Colorado is the first truck in its segment to offer phone integration through Apple CarPlay™.

1. Apple CarPlay™ The smart and safer way to use your iPhone when driving. Key functions of your iPhone will be displayed on the touch screen, allowing you to make calls, read, write and send text message, listen to music from your library and use other applications on your iPhone.

2. Siri® A virtual personal assistant that travels with you everywhere. You can command Siri on your iPhone to perform your desired function by using your voice in a variety of languages, including Thai.

3. Messages By using your Siri® voice command, you can receive and send messages as well as ask Siri® to help you read and type your message without looking at the screen when driving.

4. Phone Stay in touch and in control when answering or declining a call. Return a missed call or listen to voicemail without taking your hands off the steering wheel.

5. Music Stream and select your favorite songs from the music library on your iPhone or ask Siri® to search for a new song on Apple Music.

*The trademark of Apple and iPhone is the copyright of Apple Inc. of the United States of America and supporting countries. Apple CarPlay™ system is copyrighted by Apple Inc. Apple CarPlay™ is compatible with iPhone as noted in <http://www.apple.com/ios/carplay/>

PERFORMANCE

The engine is developed with advanced automotive technology and features a balance of power, fuel-efficiency and environmental friendliness. It delivers superior driving performance while offering functional usability and comfort.

1. 2.5L Duramax Turbo Diesel Engine Break new ground with a 2.5L Duramax diesel direct injection engine featuring 4 cylinders, 16 valves, DOHC with Variable Geometry Turbocharger (VGT) and intercooler delivering 180 horsepower @3,600 rpm and 440 Nm of torque @2,000 rpm.

2. Electric Power Steering The Electric Power Steering is highly precise and accurate. Steering weight varies according to the truck's speed.

- At low speed (driving in traffic jam or when parking)
The steering wheel feels lighter in order to help you steer easier.
- At high speed (driving on highway)
Steering wheel gradually feels heavier as you increase speed. This enables you to steer firmly with more stability. In addition, control and handling is improved to help you avoid accidents.

3. 6-Speed Automatic Transmission with Manual Mode Function This automatic transmission offers a combination of convenience and driving excitement. The driver can choose to have more control over gear changes for driving dynamics similar to a conventional manual transmission.

4. Remote Start The impressive remote start feature allows you to start the engine from outside the truck automatically powering up the air conditioning to 25° C, cooling your cabin before departure. The remote control also functions on all 4 electrically adjustable windows.

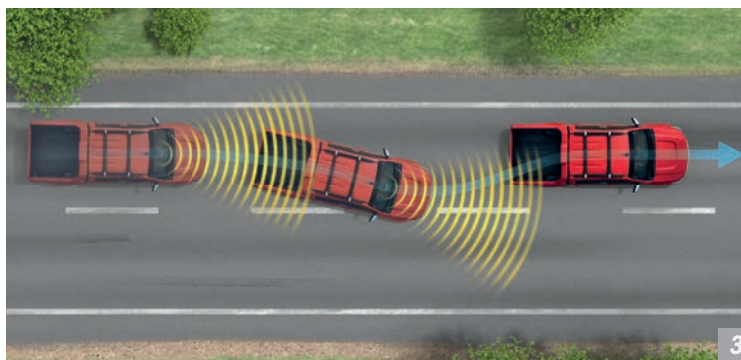

Remark: Standard equipment is different according to models. Please refer to the back cover of this brochure for more information.

SAFETY

Safety in the Colorado X-Cab is a combination of active and passive safety to maximize safety and protection for all occupants in the event of an accident.

1. Forward Collision Alert At speeds of 40 km/h upwards, a camera mounted on the rear view mirror analyzes and evaluates the distance between your truck and the vehicle in front. If you come in too close to the vehicle in front, the system sends out an image and audio alert to the driver.

2. Front & Rear Park Assist Parking is easier with sensors that are installed in eight points from the front to rear bumper. The system sends out an image and audio alert to keep the driver aware of the distance between the truck and any obstacle.

3. Lane Departure Warning If you drift out of your lane without using the indicator turn signals at speeds of 60 km/h upwards, the system sends out an image and audio alert immediately.

4. Rear Vision Camera When the gear is in the R position, a wide angle view of the area behind the truck appears on the 8" touch-screen. Dynamic guide line technology operates in real time to help you back into tight spaces with ease.

5. Driver Knee Airbag This feature in the Colorado X-Cab offers more protection than other standard trucks do. The driver knee airbag helps prevent knee and lower leg injuries, complementing the protection offered by standard front airbags and seatbelts.

6. Tire Pressure Monitoring System (TPMS) Check real-time tire pressure at all times. If pressure in any tire is too low or high, the system alerts the driver immediately through the digital information center on the instrument panel.

Remark: Standard equipment is different according to models. Please refer to the back cover of this brochure for more information.
