## SAFETY

**SAFETY STARTS WITH YOU.** Safety features are no substitute for the driver's responsibility to operate the vehicle in a safe manner. The driver should remain attentive to traffic, surroundings and road conditions at all times. Read the vehicle Owner's Manual for important feature limitations and information.

- FORWARD COLLISION ALERT.** This feature continually monitors how close your vehicle is to the vehicle in front of you. If the system determines that a front-end collision with a detected vehicle is imminent, it alerts the driver to a potential crash. It also warns the driver if their Spark is following a detected vehicle too closely. (Standard and only available on 2LT.)
- LANE DEPARTURE WARNING.** If you unintentionally change lanes without signalling, this camera-based system sends an alert. The camera, mounted near the interior rear-view mirror, reads traffic lane markings when identifiable and provides audible and visual alerts. (Standard and only available on 2LT.)
- REAR VISION CAMERA.** Standard on Spark, the rear vision camera displays a view of the area immediately behind the vehicle on the touch-screen – making it easier to see what's behind you while backing up.
- 10 STANDARD AIRBAGS.** Every Spark includes dual-stage frontal and knee airbags<sup>1</sup> for driver and front passenger, head-curtain side-impact airbags for front and rear outboard passengers, and front and rear seat-mounted side airbags.

**1 A NOTE ON CHILD SAFETY:** Always use safety belts and the correct child restraint for your child's age and size, even with airbags. Even in vehicles equipped with the Passenger Sensing System, children are safer when properly secured in a rear seat in the appropriate infant, child or booster seat. Never place a rear-facing infant restraint in the front seat of any vehicle equipped with an active frontal airbag. See the Owner's Manual and the child safety seat instructions for more safety information.
