INTERNET IN YOUR IMPALA. Chevrolet is the first and only car company to offer OnStar 4G LTE with built-in Wi-Fi® hotspot⁶ to cars, trucks and crossovers, providing the ability to seamlessly connect your smart devices and vehicles to the Internet.

THE ULTIMATE BUILT-IN Wi-Fi HOTSPOT⁶ After initial setup, whenever your Impala is on, available Wi-Fi is automatically on too. It offers great signal quality and bandwidth for up to seven devices.

FAST, EASY, RELIABLE. OnStar 4G LTE provides a great in-vehicle experience with a strong signal and reliable connection.

WE’VE GOT YOUR BACK. YOUR SIDES. YOUR FRONT.

TECH THAT PROTECTS. Some of the most impressive Impala features are the ones you can’t see, including available Forward Collision Alert, Lane Departure Warning, Side Blind Zone Alert with Lane Change Alert and Rear Cross Traffic Alert.

FORWARD COLLISION ALERT. This available feature continually monitors how close your vehicle is to the vehicle in front of you. If the system determines that a front-end collision with a detected vehicle is imminent, it alerts the driver to a potential crash. It also warns the driver if their Impala is following a detected vehicle too closely.

LANE DEPARTURE WARNING. If you unintentionally change lanes without signalling, this available camera-based system sends an alert. The camera, mounted near the interior rear-view mirror, reads traffic lane markings when identifiable and provides audible and visual alerts.

SIDE BLIND ZONE ALERT. With radar sensors on both sides of the vehicle, available Side Blind Zone Alert helps to warn you when vehicles are in your side mirror blind zones and indicates their presence with LED-lit symbols in the exterior mirrors.

LANE CHANGE ALERT. Working with Side Blind Zone Alert, available Lane Change Alert employs radar sensors in the rear corners of the vehicle to help detect and warn the driver of fast-approaching vehicles in the adjacent lanes from up to 25 m (82 ft.) away, not just in the side-view mirror blind zones.

REAR CROSS TRAFFIC ALERT. Using the same radar sensors as the Side Blind Zone Alert system, this available feature alerts you to crossing traffic behind your Impala when backing up. Audible warnings, as well as visual alerts on the rear vision camera screen, are triggered if approaching vehicles are detected.

REAR VISION CAMERA. When travelling in reverse at low speeds, the available rear vision camera provides a real-time picture of the area immediately behind your Impala on the touch-screen display.

ADAPTIVE CRUISE CONTROL. Using grille-mounted radar, this available feature maintains your selected cruise speed and following-gap distance, automatically braking when necessary in stop-and-go traffic.

FORWARD AUTOMATIC BRAKING. Using the same radar sensors as Adaptive Cruise Control, available Forward Automatic Braking helps prevent or mitigate collisions at low speeds. The system alerts the driver if the lead vehicle slows unexpectedly.

SAFETY STARTS WITH YOU. Safety features are no substitute for the driver’s responsibility to operate the vehicle in a safe manner. The driver should remain attentive to traffic, surroundings and road conditions at all times. Read the vehicle Owner’s Manual for important feature limitations and information.

OVERALL VEHICLE SCORE FOR SAFETY.¹

¹ U.S. Government 5-Star Safety Ratings are part of the U.S. Department of Transportation’s New Car Assessment Program (www.SaferCar.gov). ² A NOTE ON CHILD SAFETY: Always use safety belts and the correct child restraint for your child’s age and size, even with airbags. Even in vehicles equipped with the Passenger Sensing System, children are safer when properly secured in a rear seat in the appropriate infant, child or booster seat. Never place a rear-facing infant restraint in the front seat of any vehicle equipped with an active frontal airbag. See the Owner’s Manual and the child safety seat instructions for more safety information. ³ Visit onstar.ca for vehicle availability, details and system limitations. CORE STRENGTH. With high-strength steel forming a rigid structure around the passenger compartment and 10 standard airbags², Impala establishes a solid foundation for safety.

ONSTAR AUTOMATIC CRASH RESPONSE³
In a crash, built-in sensors can alert a specially trained OnStar advisor, who is connected into your Impala to see if you need help – even if you can’t ask for it.

Advisors can use GPS technology to pinpoint your location and request emergency help. Standard for six months with the OnStar Guidance Plan⁴

STABILITRAK® ELECTRONIC STABILITY CONTROL. This standard system automatically adapts to the environment to help you stay on course in challenging weather and road conditions.
