**REAR VISION CAMERA** When travelling in reverse at low speeds, the rear vision camera provides a real-time picture of the area immediately behind your Traverse on the 165 mm (6.5 in.) diagonal colour touch-screen display.

**FRONT CENTRE SIDE-IMPACT AIRBAG** The available industry-first Front Centre Airbag<sup>3</sup> deploys from the right side of the driver seat and positions itself between the front seats for added cushioning and restraint to help protect the driver and passenger from colliding with one another in the event of a side-impact collision.

**AVAILABLE AUTOMATIC CRASH RESPONSE<sup>4</sup>** In a crash, built-in sensors can alert a specially trained OnStar Advisor who is connected into your Traverse to see if you need help – even if you can't ask for it. Advisors can use GPS technology to pinpoint your location and request emergency help. OnStar<sup>5</sup> Guidance Plan is standard for six months.

**STABILITRAK<sup>®</sup> ELECTRONIC STABILITY CONTROL SYSTEM** This innovative safety technology is designed to improve vehicle stability on most road surfaces, especially during emergency manoeuvres and difficult driving conditions.

Traverse LTZ in Silver Ice Metallic with available features.

Travel with confidence in the 2016 Traverse LTZ. Ingenious patented safety technology provides peace of mind as it makes every drive more enjoyable.

**LANE DEPARTURE WARNING.** If you unintentionally drift out of your lane (without activating the turn signal), this camera-based technology sends an alert. The camera, mounted near the interior rear-view mirror, reads traffic lane markings when identifiable and provides audible and visual alerts (standard on LTZ).

**SIDE BLIND ZONE ALERT.** With radar sensors on both sides of the vehicle, Side Blind Zone Alert<sup>2</sup> helps to “look” for other vehicles in your exterior side mirror blind zones and indicates their presence with LED-lit symbols in the exterior mirrors (standard on LTZ and available on 2LT).

**FORWARD COLLISION ALERT.** This safety feature identifies vehicles ahead and alerts the driver to any potential front-end crash risks, helping provide time to stop and/or change course (standard on LTZ).

**REAR CROSS TRAFFIC ALERT.** Using the same radar sensors as the Side Blind Zone Alert<sup>2</sup> system, this available feature alerts you to crossing traffic behind your Traverse when backing up. Audible warnings, as well as visual alerts on the rear vision camera screen, are triggered if approaching vehicles are detected (standard on LTZ and available on 2LT).

**SAFETY STARTS WITH YOU.** Safety features are no substitute for the driver’s responsibility to operate the vehicle in a safe manner. The driver should remain attentive to traffic, surroundings and road conditions at all times. Read the vehicle Owner’s Manual for more important safety information.

<sup>1</sup> U.S. Government 5-Star Safety Ratings are part of the National Highway Traffic Safety Administration’s (NHTSA’s) New Car Assessment Program ([www.SaferCar.gov](http://www.SaferCar.gov)). <sup>2</sup> Before making a lane change, always check the Side Blind Zone Alert display, check the exterior and interior rear-view mirrors, look over your shoulder for vehicles and hazards and start the turn signal. <sup>3</sup> A NOTE ON CHILD SAFETY: Always use safety belts and the correct child restraint for your child’s age and size, even with airbags. Even in vehicles equipped with the Passenger Sensing System, children are safer when properly secured in a rear seat in the appropriate infant, child or booster seat. Never place a rear-facing infant restraint in the front seat of any vehicle equipped with an active frontal airbag. See your vehicle Owner’s Manual and child safety seat instructions for more safety information. <sup>4</sup> Visit [onstar.ca](http://onstar.ca) for vehicle availability, details and system limitations. OnStar acts as a link to existing emergency service providers. Not all vehicles may transmit all crash data. <sup>5</sup> Visit [onstar.ca](http://onstar.ca) for coverage maps, details and system limitations. Services vary by model, conditions and geographical and technical restrictions. OnStar with 4G LTE connectivity is available on select vehicle models and in select markets. Customers will be able to access OnStar services only if they accept the OnStar User Terms and Privacy Statement and Software Terms. OnStar acts as a link to existing emergency service providers. Not all vehicles may transmit all crash data. After the trial period (if applicable), an active OnStar service plan is required.
