“★★★★★”  
**OVERALL VEHICLE  
SCORE FOR SAFETY.**

— U.S. NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION<sup>1</sup>

<sup>1</sup> U.S. Government 5-Star Safety Ratings are part of the National Highway Traffic Safety Administration's (NHTSA's) New Car Assessment Program ([www.SaferCar.gov](http://www.SaferCar.gov)). <sup>2</sup> Before making a lane change, always check the Side Blind Zone Alert display, check the exterior and interior rear-view mirrors, look over your shoulder for vehicles and hazards and start the turn signal. <sup>3</sup> Airbag inflation can cause severe injury or death to anyone too close to the airbag when it deploys. Be sure every occupant is properly restrained. Always use safety belts and the correct restraint for your child's age and size. Even in vehicles equipped with the Passenger Sensing System, children are safer when properly secured in a rear seat in the appropriate infant, child or booster seat. Never place a rear-facing infant restraint in the front seat of any vehicle equipped with a passenger airbag. See the Owner's Manual and the child safety seat instructions for more safety information. <sup>4</sup> Visit [onstar.ca](http://onstar.ca) for coverage maps, details and system limitations. Services vary by model and conditions. OnStar acts as a link to existing emergency service providers. After the trial period (if applicable), an active OnStar service plan is required. <sup>5</sup> OnStar acts as a link to existing emergency service providers. Not all vehicles can transmit all crash data.

**REAR CROSS TRAFFIC ALERT.** Using the same radar sensors as the Side Blind Zone Alert<sup>2</sup> system, this available feature alerts you to crossing traffic behind your Traverse when backing up. Audible alerts, as well as visual alerts on the rear vision camera screen, are triggered if approaching vehicles are detected.

**REAR VISION CAMERA.** When travelling in reverse at low speeds, the rear vision camera provides a real-time picture of the area immediately behind your Traverse on the 165 mm (6.5-in.) diagonal colour touch-screen display.

**LANE DEPARTURE WARNING.** This available camera-based system sends an alert if you unintentionally drift out of your lane (without starting the turn signal). The camera, mounted near the interior rear-view mirror, reads traffic lane markings when identifiable and provides audible and visual alerts.

**SIDE BLIND ZONE ALERT.**<sup>2</sup> This available feature uses radar sensors on both sides of the vehicle to help “look” for other vehicles in your side mirror blind zones and indicates their presence with LED-lit symbols in the exterior mirrors.

**STABILITRAK® ELECTRONIC STABILITY CONTROL SYSTEM.** This innovative safety technology is designed to improve vehicle stability on most road surfaces, especially during emergency manoeuvres and difficult driving conditions.

**FRONT CENTRE SIDE-IMPACT AIRBAG.** The available industry-first front centre airbag<sup>3</sup> deploys from the right side of the driver seat and positions itself between the front seats for added cushioning and restraint to help protect the driver and passenger from colliding with one another in the event of a side-impact collision.

**ONSTAR<sup>4</sup> AUTOMATIC CRASH RESPONSE.**<sup>5</sup> In a crash, built-in sensors can alert a specially trained OnStar Advisor who connects to your vehicle to see if you need help sent to your exact location — even if you can't ask for it. You're backed by a powerful network that will help get you the assistance you need.

**FORWARD COLLISION ALERT.** This available safety feature identifies vehicles ahead and alerts the driver to any potential front-end crash risks, helping provide time to stop and/or change course.
