SAFETY

THE MOST ADVANCED
TAHOE EVER.

CENTURY
AUTO.CA

YOU'RE SURROUNDED IN SAFETY. A host of available innovative driver assist technologies use strategically located cameras and radar sensors to warn you of potential risks on the road – or even in a parking lot. Safety features are no substitute for the driver's responsibility to operate the vehicle in a safe manner. The driver should remain attentive to traffic, surroundings and road conditions at all times. Read the vehicle Owner's Manual for more important safety information.

LANE CHANGE ALERT. Working with available Side Blind Zone Alert, available Lane Change Alert employs radar sensors in the rear quarter panels to help detect and warn the driver of fast-approaching vehicles in the adjacent lane from up to 70 m (230 ft.) away, not just in the exterior mirror blind zones.

FRONT AND CENTRE. Helping to protect you with a class-exclusive seat-mounted front centre airbag¹ (standard with front bucket seats). In addition, the six standard airbags provide impressive protection in moderate to severe frontal, side and rollover crashes.

ADDED SECURITY. Protect your investment with the class-exclusive² available Theft Protection Package. It includes glass breakage sensors, interior motion detectors and a revolutionary inclination sensor that measures any tilt of the vehicle.

¹Always use safety belts and the correct restraint for your child's age and size. Even in vehicles equipped with the Passenger Sensing System, children are safer when properly secured in a rear seat in the appropriate infant, child or booster seat. Never place a rear-facing infant restraint in the front seat of any vehicle equipped with a passenger airbag. See the Owner's Manual and the child safety seat instructions for more safety information. ²Based on WardsAuto.com 2014 Large Sport/Utility vehicle segment and the latest competitive information available at the time of printing. Excludes other GM models.

**WE'VE GOT YOUR BACK.

PERFORMANCE

**355 HP / 383 LB.-FT.
TORQUE**

THE ALL-NEW 5.3L ECOTEC3 V8 ENGINE.

Direct Injection boosts power and fuel efficiency while reducing emissions.
Active Fuel Management® deactivates four cylinders when extra power is not needed.
Variable Valve Timing helps ensure Tahoe performs at optimum power and efficiency.
Bottom line? Tahoe offers better highway fuel efficiency than any competitor¹ – with a highway fuel consumption rating of 10.1L/100 km.²

1 Based on WardsAuto.com 2014 Large Sport/Utility vehicle segment and the latest competitive information available at the time of printing. Excludes other GM models. 2 2015 Tahoe 2WD fuel consumption estimates based on GM preliminary testing in accordance with new 2015 Model Year Government of Canada approved test methods. Refer to vehicles.nrcan.gc.ca for details. Your actual fuel consumption may vary.

**CENTURY

MAGNETIC RIDE CONTROL. LTZ models feature Corvette-inspired Magnetic Ride Control[®], a real-time damping system that delivers a smooth, precise ride by “reading” the road every millisecond and changing damping in just 10-15 milliseconds.

ALL-NEW FRONT SUSPENSION. A tuned coil-over-shock front suspension features lighter, stiffer aluminum control arms and front springs that are 25% stiffer than before. The result is an exceptional ride and confident handling.

TOWS UP TO 3856 KG (8500 LB.)³ Tahoe offers a maximum towing capability of up to 3856 kg (8500 lb.)³ – plenty of power to tow boats, ATVs and whatever else you want to bring along.

3 For Tahoe 2WD models. Maximum trailer weight ratings are calculated assuming a base vehicle, except for any option(s) necessary to achieve the rating, plus driver. The weight of other optional equipment, passengers and cargo will reduce the maximum trailer weight your vehicle can tow. See your Chevrolet dealer or refer to the vehicle Owner's Manual for additional details. For more information on trailer towing, go to chevrolet.ca.
