FIND **NEW** ROADS™

CHEVROLET

WHY JUST GO FROM A TO B

WHEN IMAGINATION CAN TAKE YOU EVERYWHERE

The road. A simple path, really. And yet it's come to mean so much more. Perhaps the real reason roads are special is that every road leads us to someplace we're not — but could be. At Chevrolet, roads are our springboards. They challenge us, test us and guide us to create better, more exciting, more ingenious ways to move through life. Roads drive us to places we've never been before. And we'll never stop seeking out new ones.

EQUINOX /

And it's more than the only way to stay connected to your calls, music and more without taking your hands off the wheel. The 2014 Equinox is more than all this, because it offers all this. PROACTIVE PROTECTION

Equinox LTZ in Champagne Silver Metallic with available features.

Let's face it, life isn't always predictable. Especially on the road. That's why Equinox offers an array of advanced safety features to help protect against the unexpected.

STABILITRAK® ELECTRONIC STABILITY CONTROL SYSTEM This system helps to provide vehicle stability on most road surfaces, especially during emergency manoeuvres and difficult driving conditions.

STANDARD 4-WHEEL ANTI-LOCK BRAKES (ABS) This braking system helps maintain steering control by reducing wheel lockup during hard braking on most slippery surfaces. Equinox also includes an advanced Electronic Brake Force Distribution system that helps balance brake force between the front and rear brakes under heavy braking.

SIX STANDARD AIRBAGS¹ Should a moderate to severe collision occur, sensors determine which of the six airbags (including head curtain side-impact airbags) to deploy,

helping to minimize impact. Front safety belt pre-tensioners also respond while the LATCH (Lower Anchors and Top tethers for Children) system helps keep child safety seats secure.

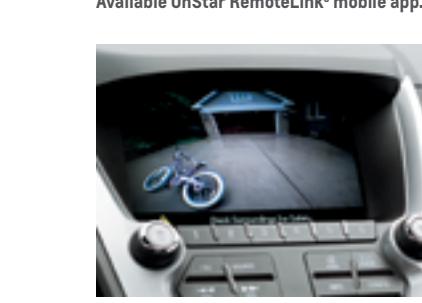

AVAILABLE REAR VISION CAMERA It projects an image of what's behind your Equinox onto the 178 mm (7-in.) diagonal colour touch-screen display, when in Reverse. Available rear park assist also helps you back up safely by sounding an audible alert when it detects certain stationary objects up to 2.4 m (8 ft.) behind your Equinox.

ONSTAR AUTOMATIC CRASH RESPONSE² In many crashes, built-in sensors in your Equinox can automatically alert an OnStar® Advisor who is immediately connected to your vehicle and can use GPS technology to pinpoint your exact location and request immediate assistance, even if you can't respond.

ONSTAR REMOTELINK® MOBILE APP³ With this app, you can remotely lock and unlock your Equinox and even start your engine⁴ from your smartphone. You can also view real-time vehicle diagnostics including fuel, remaining oil life and tire pressure.

A. AVAILABLE FORWARD COLLISION ALERT This feature monitors your proximity to the vehicle in front of you and alerts you to any potential front-end crash risk, so you have time to stop and/or change course.

B. AVAILABLE LANE DEPARTURE WARNING If you unintentionally drift out of your lane without signalling, this feature provides a visual and audible alert.

¹ Always use a safety belt and the correct restraint for your child's age and size. Even in vehicles equipped with the Passenger Sensing System, children are safer when properly secured in rear seats in the appropriate infant, child or booster seat. Never place a rear-facing infant restraint in the front seat of any vehicle equipped with a passenger airbag. See the Owner's Manual and child safety seat instructions for more safety information. ² Visit onstar.ca for coverage map, details and system limitations. Services vary by model and conditions.
