

Corvette Z06

CORVETTE
Z06

Together
let's drive™

Introduction

For 70 years and eight generations, Chevrolet Corvette has defined what's possible for car enthusiasts around the world and helped mainstream many new automotive technologies we take for granted today.

But perhaps its biggest contribution has been to our collective psyches. Because when it comes to ultimate freedom, it's difficult to surpass the exhilaration of a Corvette, racing along the dotted white lines toward whatever's on the other side of the horizon.

Introduction

The 70-year history of Corvette has brought us to an exceptional moment in time. The eighth-generation Z06 is the most ambitious Corvette to date, featuring a 5.5L mid-engine V8 with a flat-plane crankshaft, delivering an impressive 670hp and 8600rpm. With the Z07 available Performance Package, it powers from 0 to 100 km/h in 2.6 seconds¹ (0 to 60 mph) and is capable of 1.22 g on the skid pad. Z06 embodies the full realization of original Corvette Chief Engineer Zora Arkus-Duntov's dreams In every respect: an edgy visceral mid-engine masterpiece bred alongside a championship race car.

It emphatically reinforces the historic Corvette mission: To be the best sports car in the world.

1. Based on initial vehicle movement. Requires available Z07 Performance Package.

Performance

The powerful Corvette Z06 comes with a naturally aspirated V8 engine.

Performance

The Corvette Z06 is designed and engineered to be a street-legal race car. Its exhilarating LT6 engine was co-developed with the race team and shares many of the same foundations as the LT6.R engine, from the cylinder block and heads to the valvetrain and fuel system.

The outcome – championship level performance, every day.
