

Corvette Stingray

Together
let's drive™

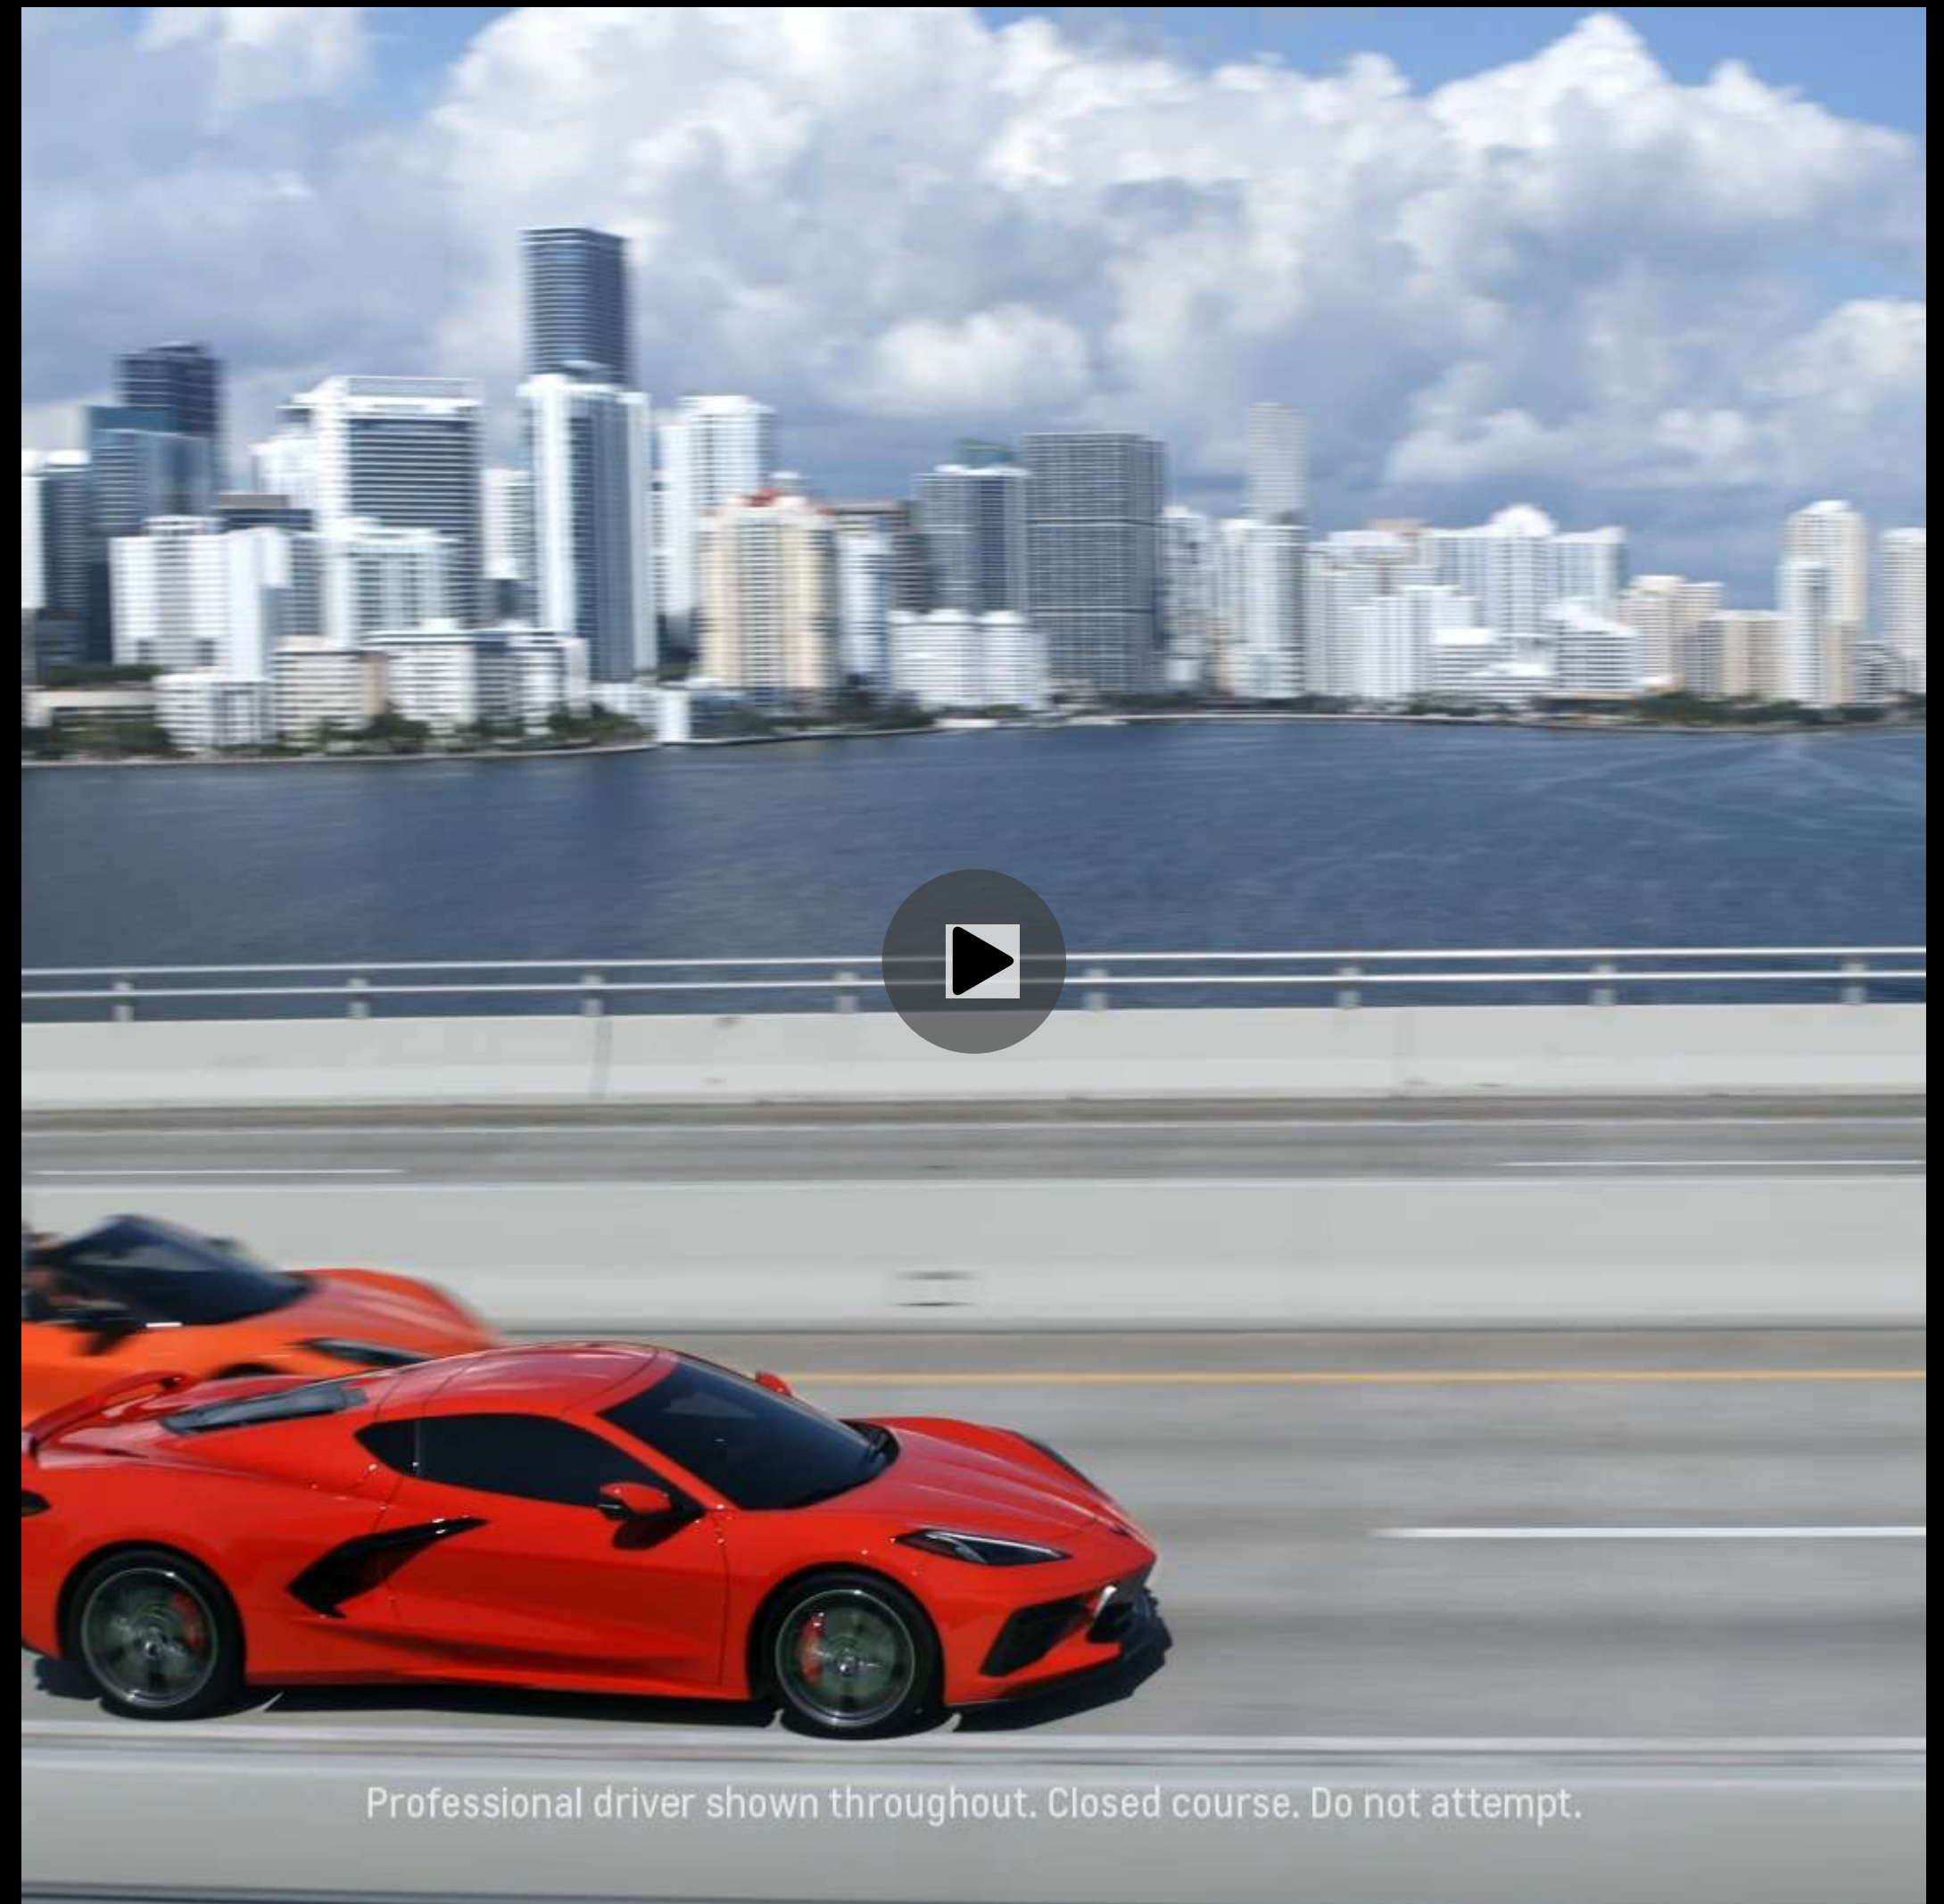

Introduction

The best just got better.

When reinventing this iconic automobile to bring you the first-ever mid-engine Corvette Stingray, the creators broke barriers with a Corvette so advanced that the world of sports cars may never be the same.

Now, with the Corvette Stingray, this mid-engine masterpiece is the most powerful Stingray ever produced.

Highly intelligent and beautifully sculpted with potent aerodynamics, it slices through the air with exceptional power, poise and precision.

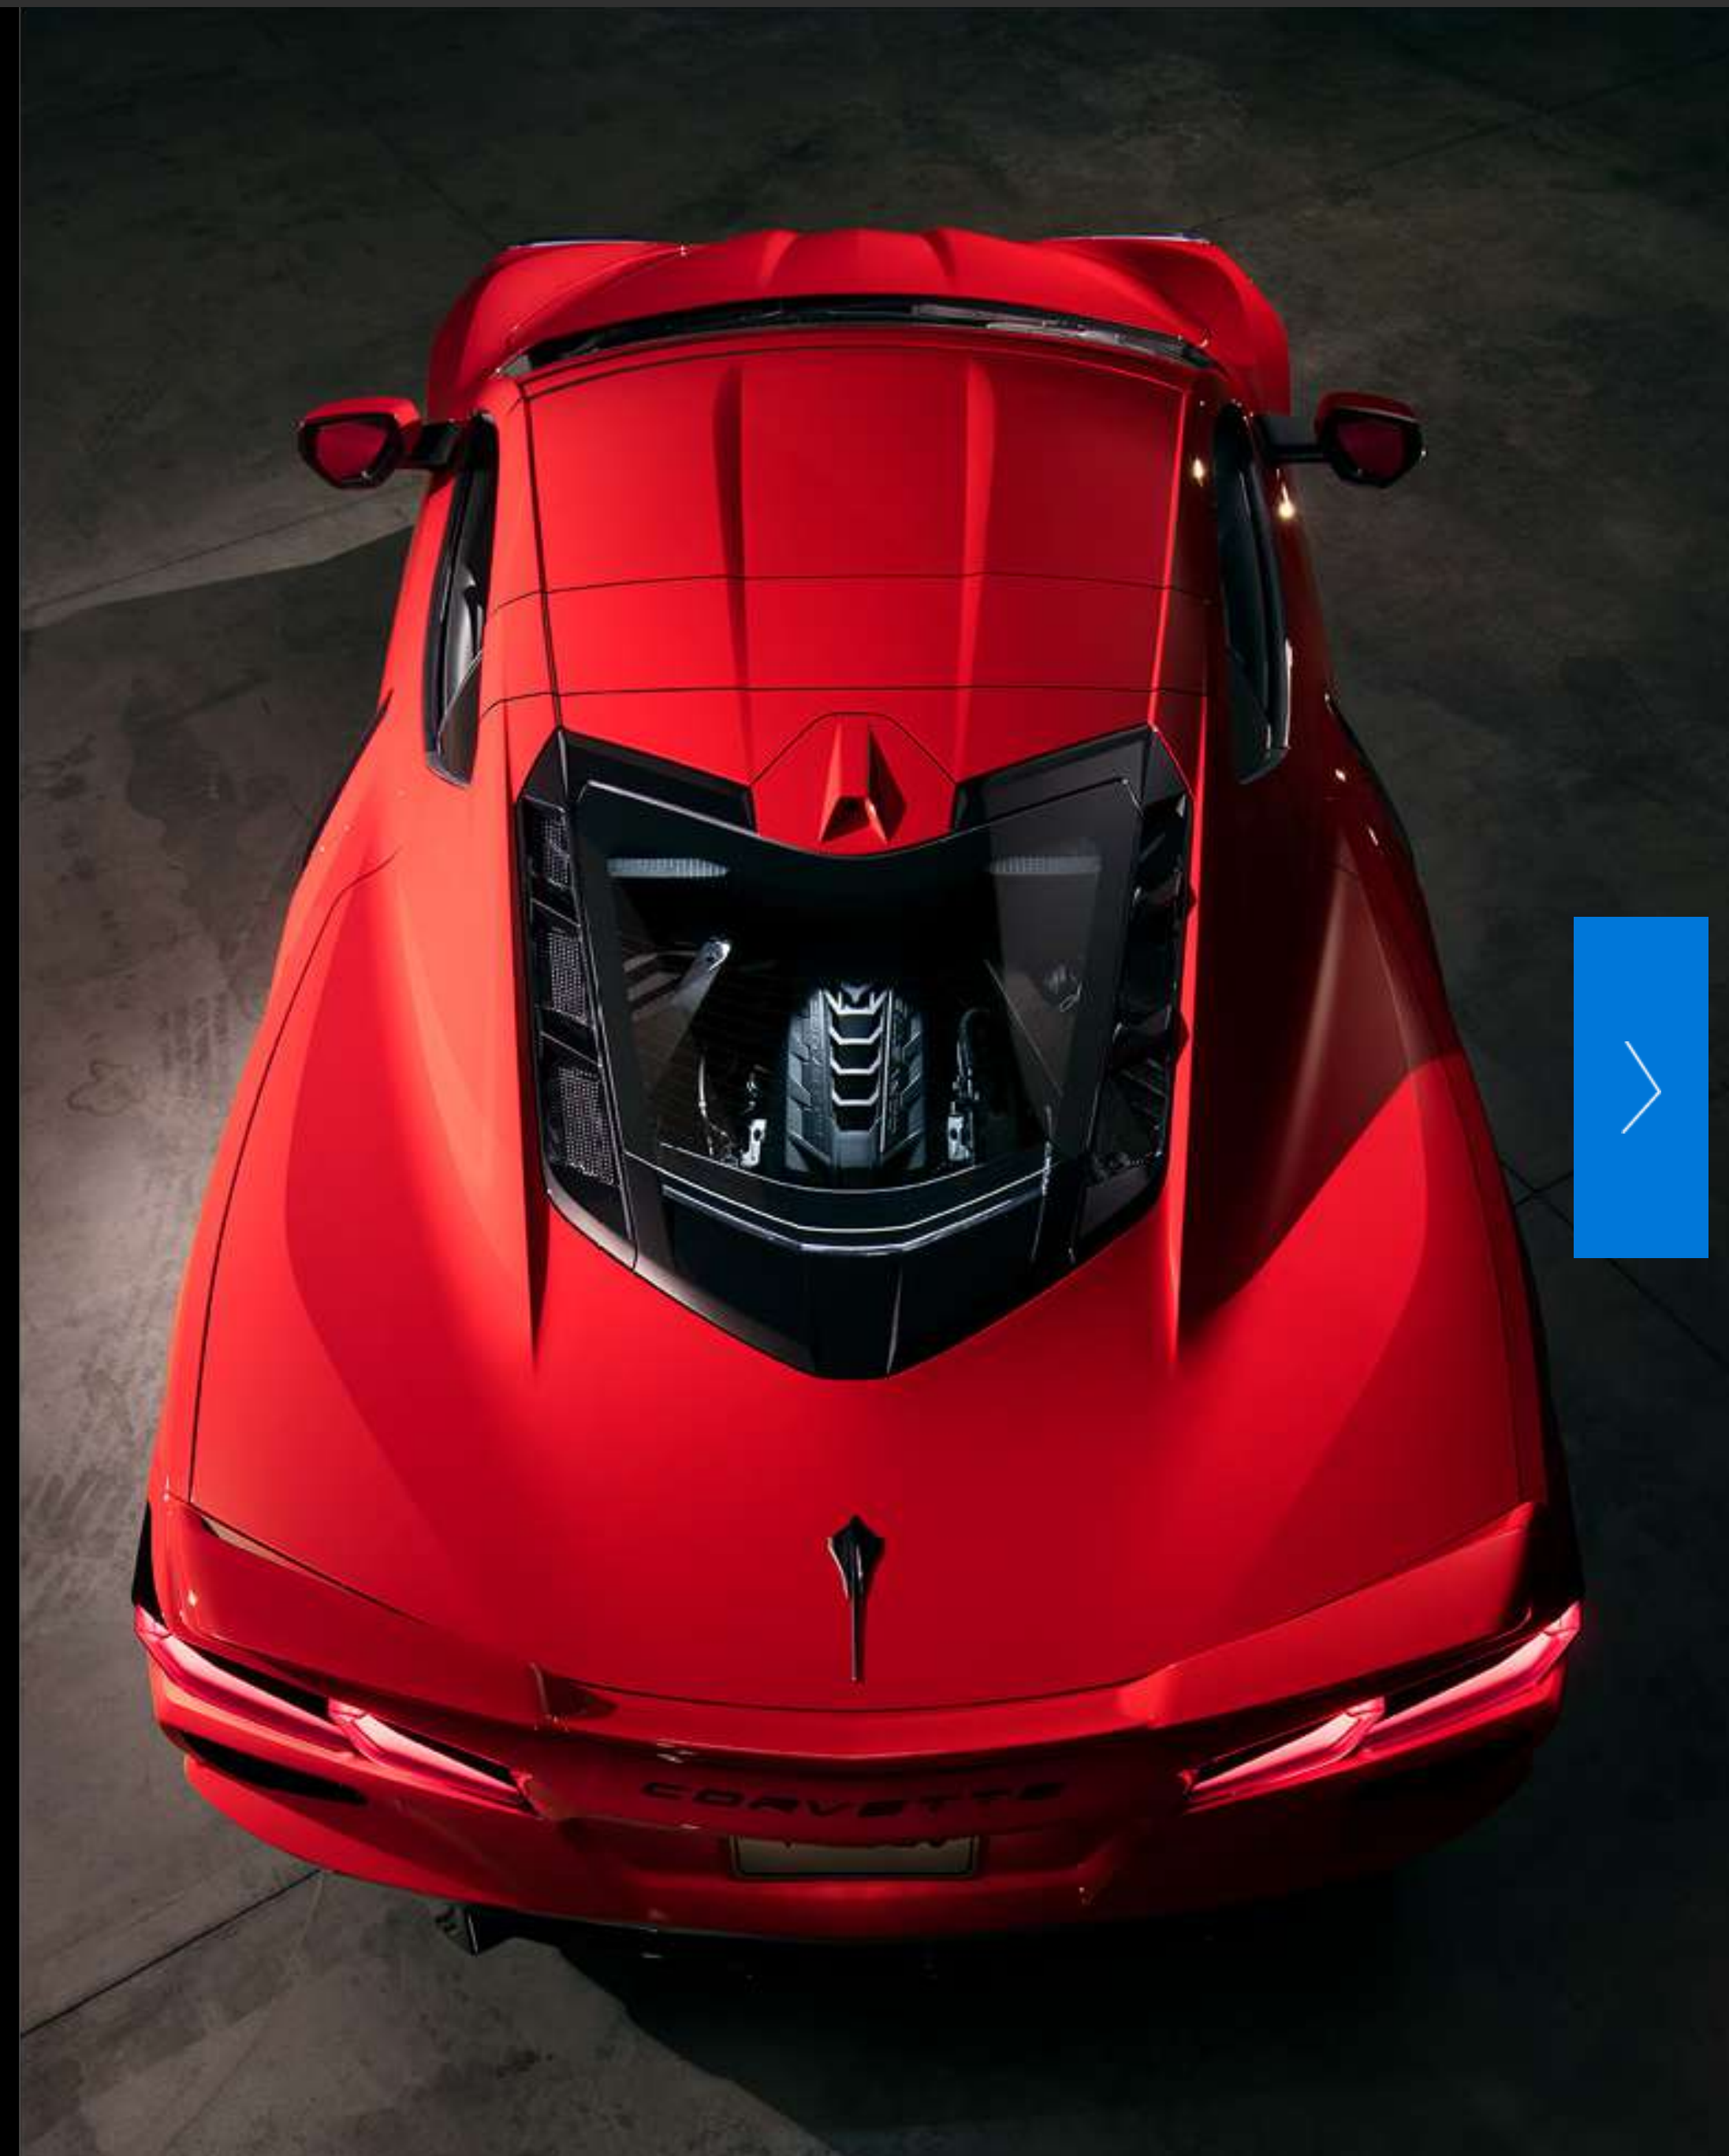

Benefits of mid-engine

The move to the middle.

With the engine behind the cockpit and its weight over the rear driving wheels, there's more forward visibility and enhanced traction.

The driver and passenger are now at the car's center of gravity, and the result is instant response. Creating a feeling that the car is rotating around you, the Stingray is born to make your confidence soar.

3LT COUPE WITH Z51 PERFORMANCE PACKAGE AND OPTIONS | TORCH
RED

Performance

Most powerful Stingray ever.

- 8-speed dual-clutch transmission
- 495 HP¹ and 637 Nm of torque
- Available Magnetic Selective Ride Control™ 4.0

¹. Included with Z51 performance package.

Engine

The soul of Stingray.

- 6.2L LT2 aluminum small block V8 engine
- Z51 Performance Package as standard
- 495 standard horsepower
- 637 Nm of torque
- 0-100 kph in under 3 seconds¹

Much of the LT2's additional power can be attributed to excellent breathing. The intake system is a low-restriction design and incorporates identical 210mm runners and an 87mm throttle body. The performance header exhaust manifolds are also low restriction and feature a stylized four-in-one design.

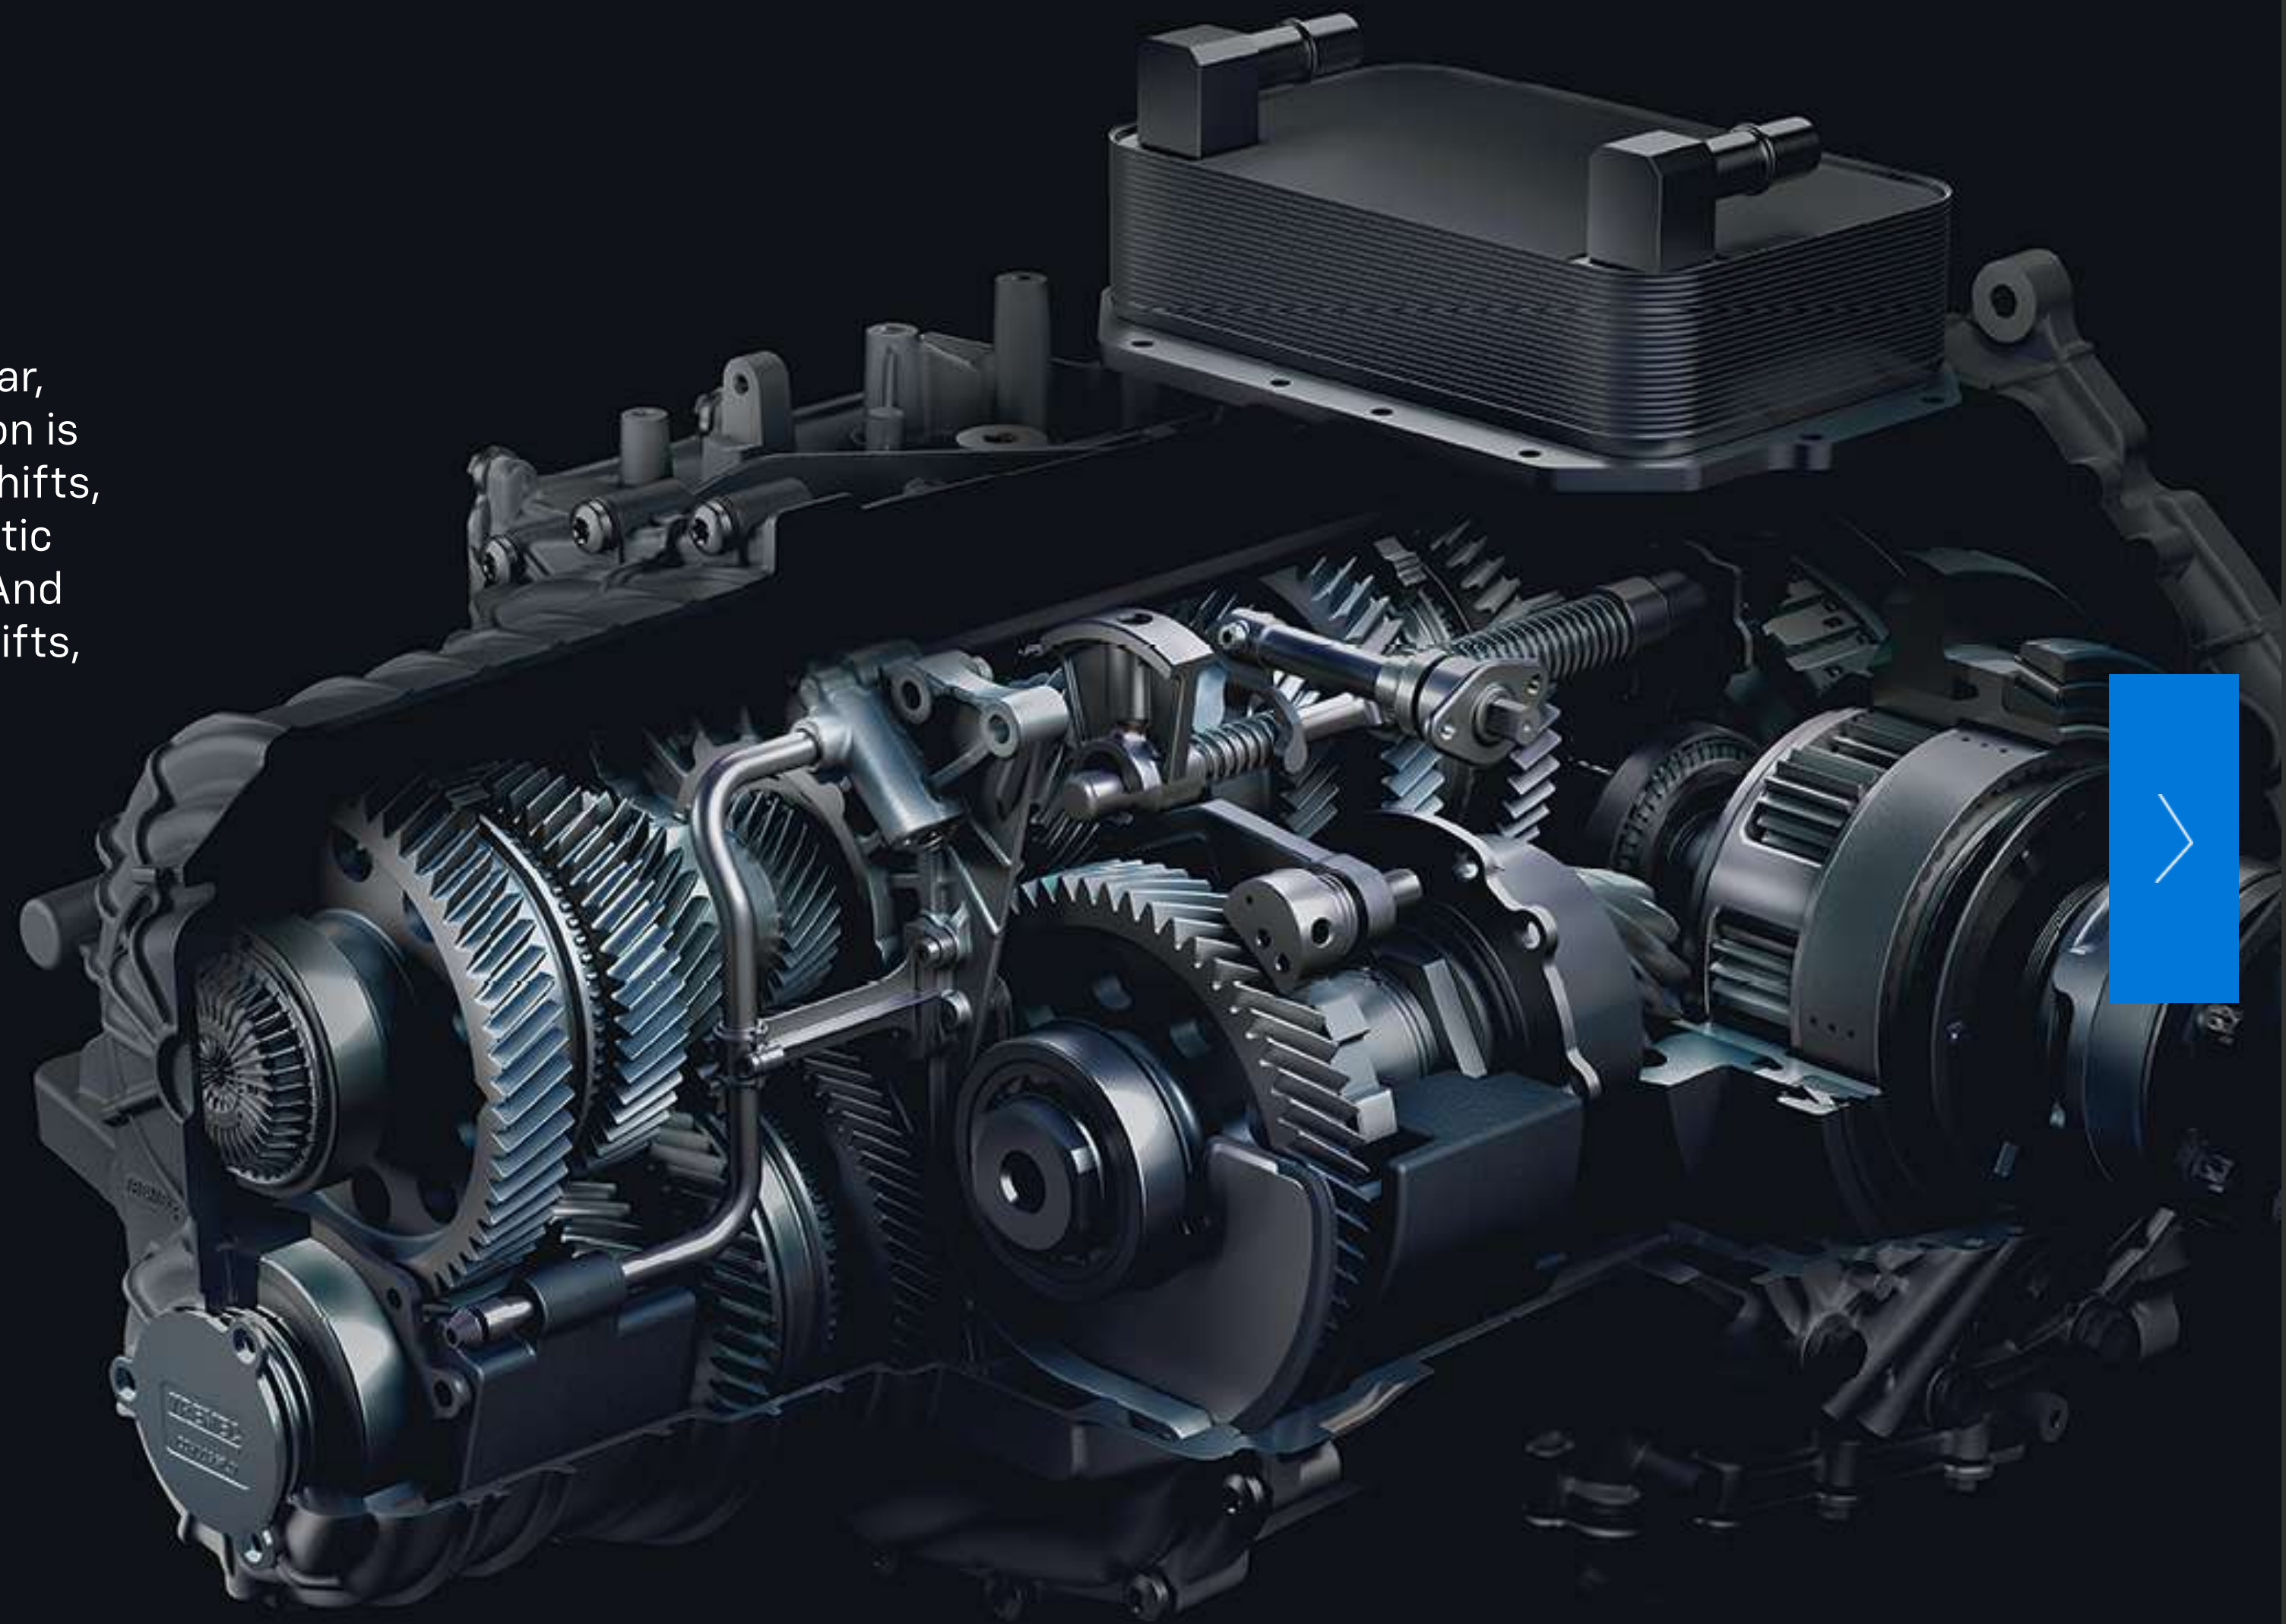

A standard dry-sump oil system allows the engine to be positioned for a lower center of gravity. Three scavenging pumps capture circulating oil to ensure pressurized distribution even in high-g situations.

¹ Based on initial vehicle movement with Z51 Performance Package.

Lightning fast and efficient shifts.

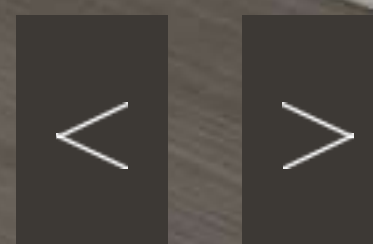

Every part had to earn its way onto this car, and the standard dual-clutch transmission is no different. It features lightning-quick shifts, combining the smoothness of an automatic with the action and control of a manual. And since there's no deceleration between shifts, your lap times will benefit too.

Design

Designed to be the most powerful corvette stingray ever.

The mid-engine architecture dictated a shape for Stingray with a polite nod to its proud heritage. Sweeping proportions and a wide stance dominate your view. Function plays a huge role, with large front intakes and sculpted side intakes that help the engine breathe and stay cool. With the cockpit moved significantly forward, the side profile reveals a shorter hood with a long, graceful rear deck. The rear fascia features two functional air exits flanked by twin taillamps and twin exhaust outlets on each side, leaving no doubt about what you're driving.

Design

Design

Taking the art of driving to a new level.

There's never been a Corvette cockpit this well-suited to enthusiast driving.

Your driving position is 18 inches forward compared to previous generations, putting you firmly in control. The low hood makes it even easier to see, while a racing-style steering wheel keeps the view pure. Your rear sight lines are equally as impressive, thanks to a standard Rear Camera Mirror.

Design

The Stingray was shaped and sculpted to consume massive amounts of air. A large air inlet dominates the side profile, providing vital breathing and cooling to the engine. The door releases are neatly hidden inside the inlet. The front sports large outside air inlets that feed twin outboard radiators inside the front wheels.

D e s i g n

The coupe. The convertible.

The coupe features a lightweight, easily removable roof panel that stows conveniently in the rear trunk. Choose from standard body-color or available transparent or carbon-fiber versions.

Corvette convertible features a retractable hardtop that automatically folds over the engine compartment in 16 seconds and can be operated at up to 48 kph.

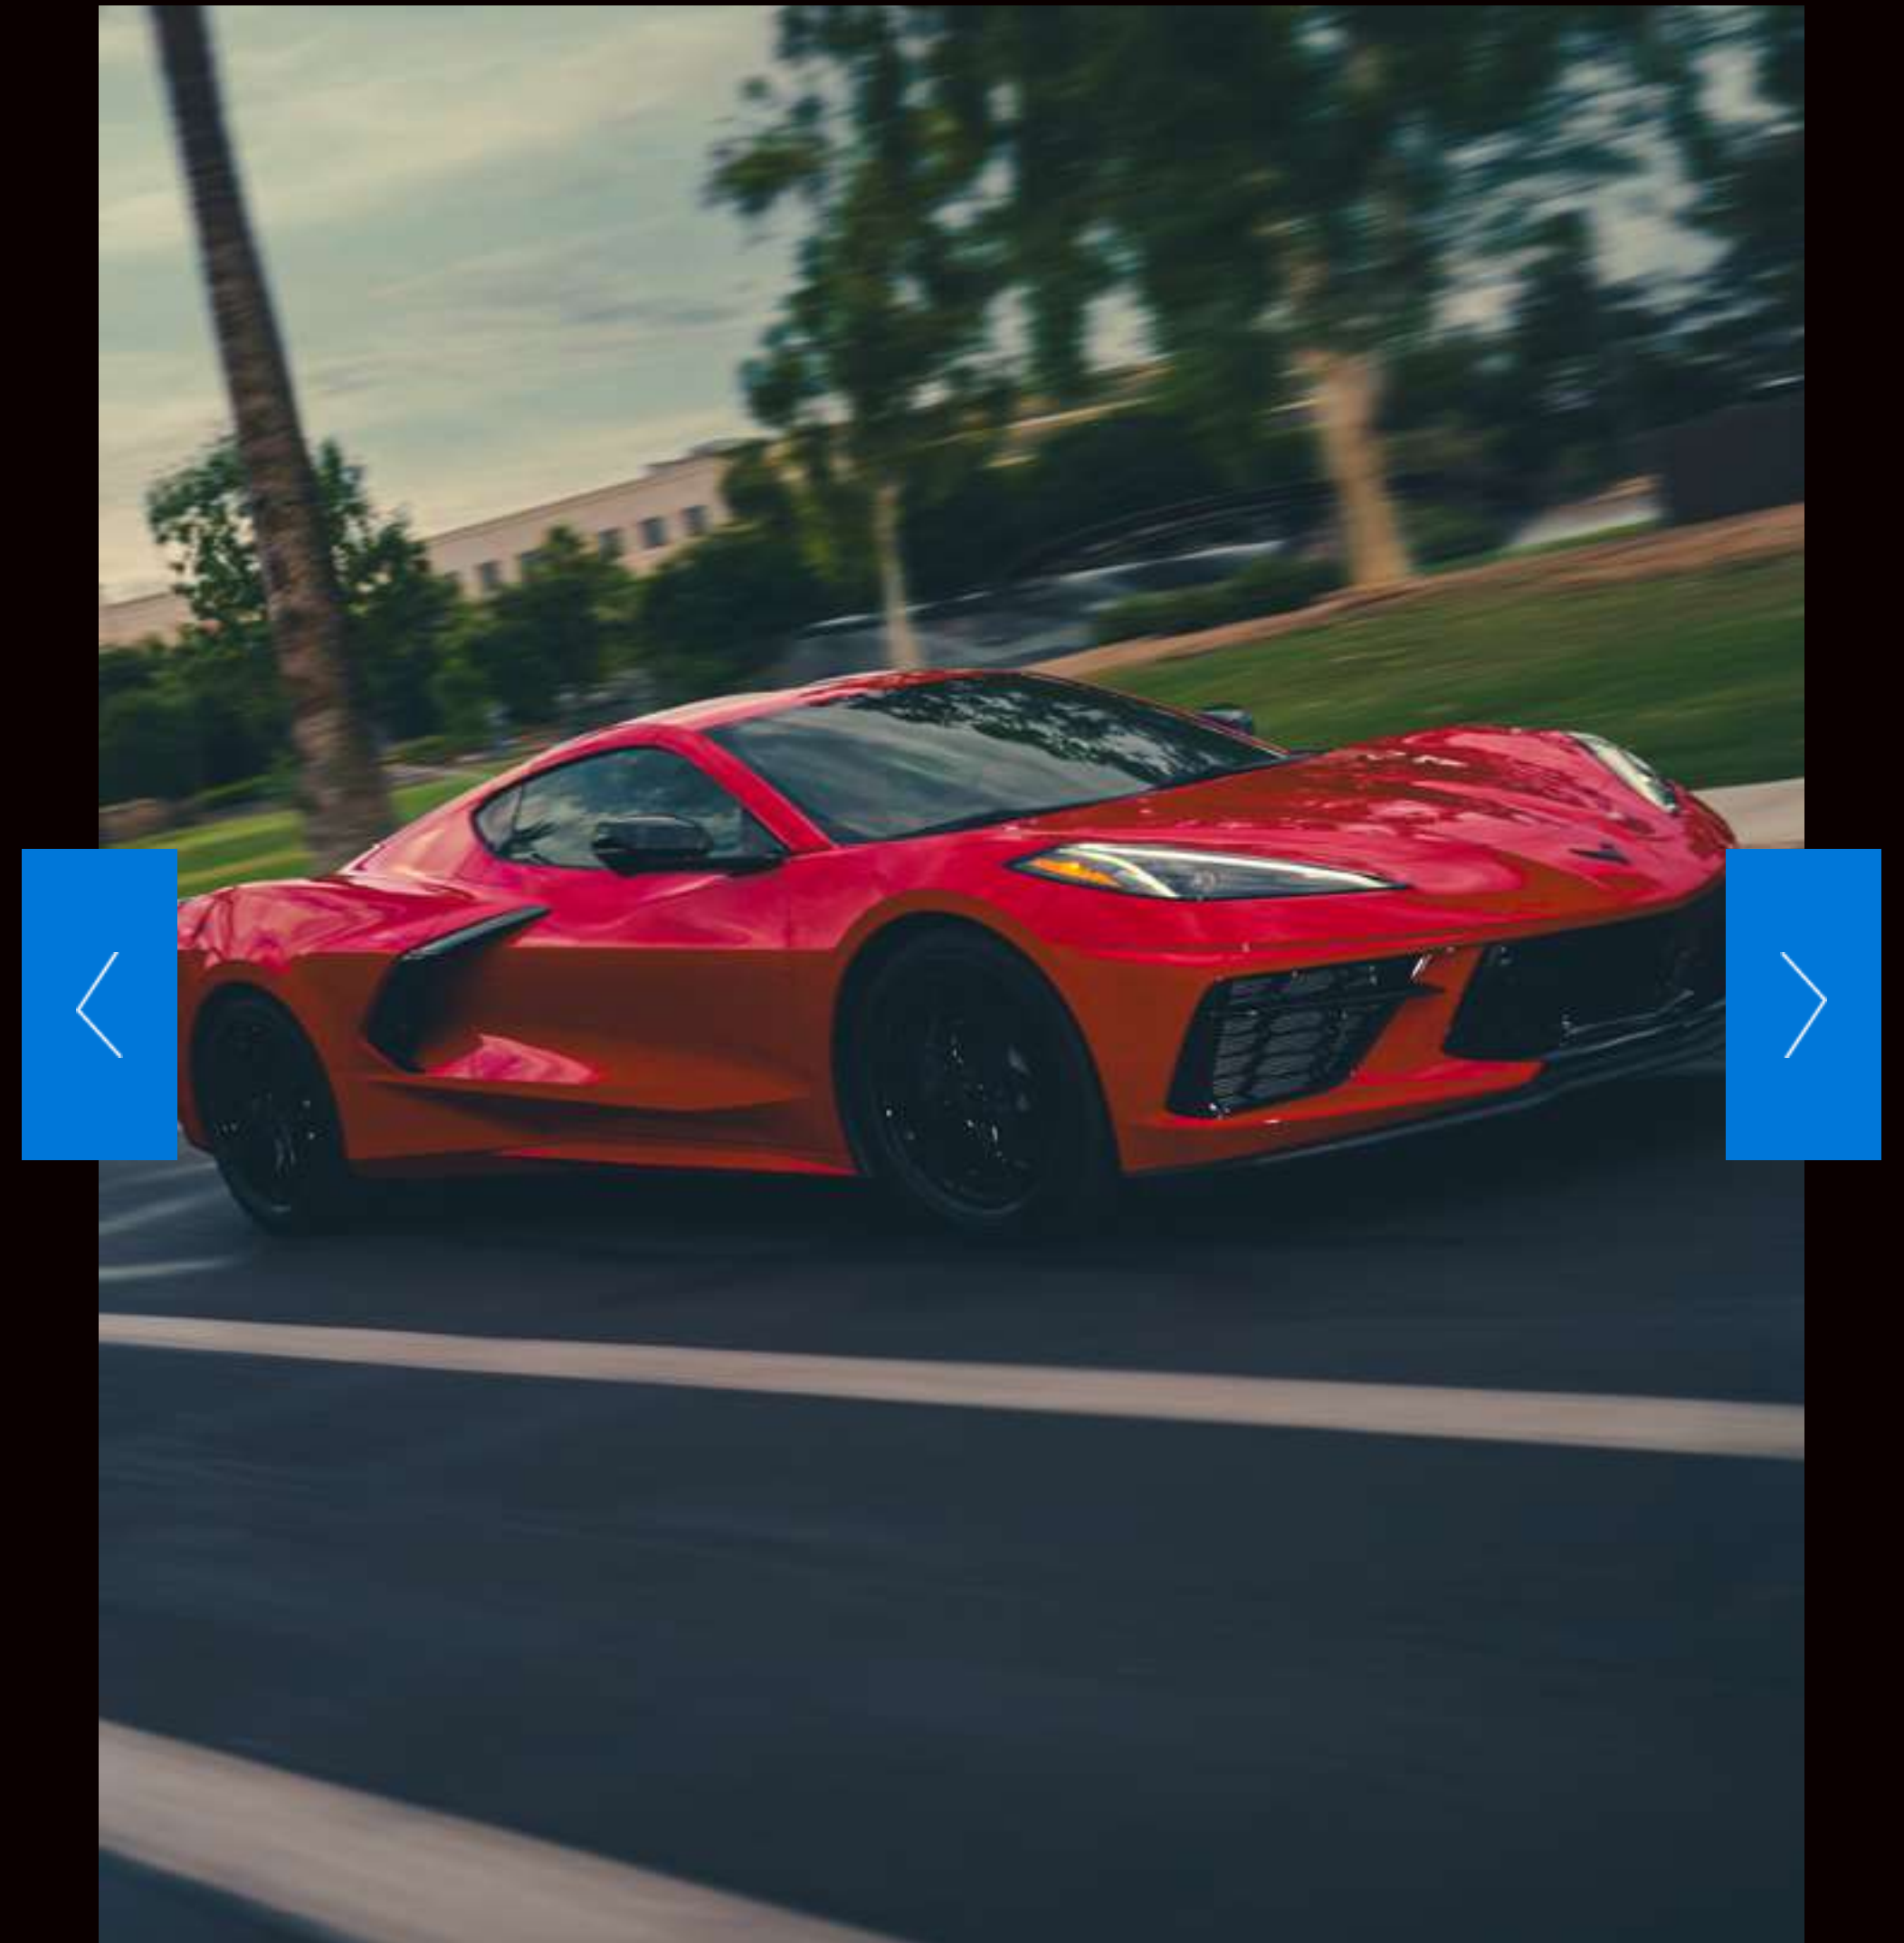

With the top down, trunk space is unaffected. With the top up, track enthusiasts will be pleased to know that the convertible meets the same standards as the coupe, retaining its aerodynamic form and producing a similar drag coefficient.

The above comes with stealth interior, trim package and custom leather wrapped instrument and panel doors.

Available Engine Appearance Package for Convertibles, including Tonneau Window and Engine Cover.

Technology

Delivers what you want when you want it.

- 12-inch Diagonal Reconfigurable Digital Instrument Display
- Wide cluster display with two information panels
- 8" diagonal color touchscreen with Enhanced infotainment system with Google built-in¹ powered by OnStar⁴
- Driver selector mode with My Mode and Z mode
- Wireless charging²
- Bose[®] performance series 14- speaker³
- 3 Years OnStar^{®4} connect plan⁵ upon activation
- WiFi⁶ trial for 3GB/90 days (whichever comes first)
- Advanced Safety with Automatic Crash response and Roadside Assistance powered by OnStar^{®4}
- Performance data recorder⁷

3LT gauges with options | sky cool gray

Due to global Semi-Conductor supply shortages and software issues, GM vehicles may not have some standard features and options. Please check with your local Chevrolet dealer to confirm the vehicle's specifications prior to purchase. Vehicles not equipped with Automatic Stop/Start will be less fuel efficient.¹ Google built-in services are subject to limitations, and availability may vary by vehicle, infotainment system and location. Certain Google actions and functionalities may require account linking. User terms and privacy statement apply. Google, Google Play and Google Maps are trademarks of Google LLC. ² The system wirelessly charges one compatible mobile device. Some phones have built-in wireless charging technology and others require a special adaptor/back cover. To check for phone or other device compatibility, see chevroletarabia.com or consult your carrier. ³ Bose 14 speakers is standard on 3LT and 2LT Convertible. 1LT comes with standard 10 speakers. ⁴ Requires equipped vehicle, active OnStar plan, and Wi-Fi data plan with carrier. OnStar plans and Wi-Fi data plans not available in all countries. See onstararabia.com for equipped vehicles, service availability and system limitations. ⁵ Requires paid OnStar subscription. Services are subject to user terms and limitations. Remote start requires GM factory-installed and enabled remote start system. Lock/unlock feature requires automatic locks. The Connect Plan does not include emergency or security services. See Plans and Pricing for details. ⁶ Requires equipped vehicle, active OnStar plan, and Wi-Fi data plan with carrier. OnStar plans and Wi-Fi data plans not available in all countries. See onstararabia.com for equipped vehicles, service availability and system limitations. Wi-Fi services available in UAE and Kuwait only. ⁷ The Performance Data Recorder feature in car is to capture your performance data for your analysis. Any display or social posting of these recordings are subject to your local rules and regulations, including but not limited to Privacy Laws.

Technology

Performance data recorder

The Performance Date Recorder has three different modes that allow you to capture video, audio, driving stats and more onto an SD memory card. A fourth Valet Mode can even record activity when you’re not around. You can also download software on corvette.com developed by the engineering firm that supplies Corvette Racing, which acts as a virtual driving coach with vital metrics and comparisons.

An available Head-Up Display (HUD) system offers three distinct views for Tour, Sport and Track modes. Tour mode includes speed limit and turn-by-turn navigation prompts. Sport mode includes digital speed, tachometer and a g-force indicator. Track mode includes digital speed, tachometer, shift lights, best lap time, current lap time and gain/loss.

PERFORMANCE DATA RECORDER

The Performance Data Recorder feature in your car is to capture your performance data for your analysis. Any display or social posting of these recordings are subject to local rules and regulations, including but not limited to Privacy Laws.

Performance

Z51 performance package

Go all in.

The architecture, structure, suspension, calibrations and software of Stingray are all ready to deliver a driving experience beyond your imagination. But to reach the pinnacle, check the box for the standard Z51 Performance Package. It provides a group of performance enhancements, including:

- Performance brakes with 4-piston monobloc calipers
- Performance suspension
- Performance exhaust
- Performance rear axle ratios
- Electronic Limited-Slip Differential
- Rear Spoiler
- Michelin Pilot Sport 4S summer-only tires¹
- Heavy-duty cooling system

Z51 Performance Package cars can also be ordered with an engineered real-time Magnetic Ride Control system that includes Performance Traction Management.

¹ Do not use summer-only tires in winter conditions, as it would adversely affect vehicle safety, performance and durability. Use only GM-approved tire and wheel combinations. Unapproved combinations may change the vehicle's performance characteristics. Please check with your local dealer for specifications and availability.

Seating

Corvette offers three different seats for different driver preferences, all in a multitude of color combinations with contrasting seat belts and stitching.

Three ways to become one with your Corvette.

GT1 | OPTIMIZED FOR COMFORT AND SUPPORT

The GT1 seat in Mulan leather provides excellent support for enthusiastic driving and easy entry/egress.

GT2 | NAPA LEATHER FOR ULTIMATE COMFORT

The available GT2 seat in Napa leather blends the comfort of the GT1 with the stylish carbon-fiber trim of the Competition Sport seat. Suede or two-tone leather inserts are available.

COMPETITION SPORT | EXTRA SUPPORT FOR TRACK DRIVING

The available Competition Sport seat provides aggressive bolsters for track driving, with performance textile in high-wear areas.
