

Corvette E-Ray

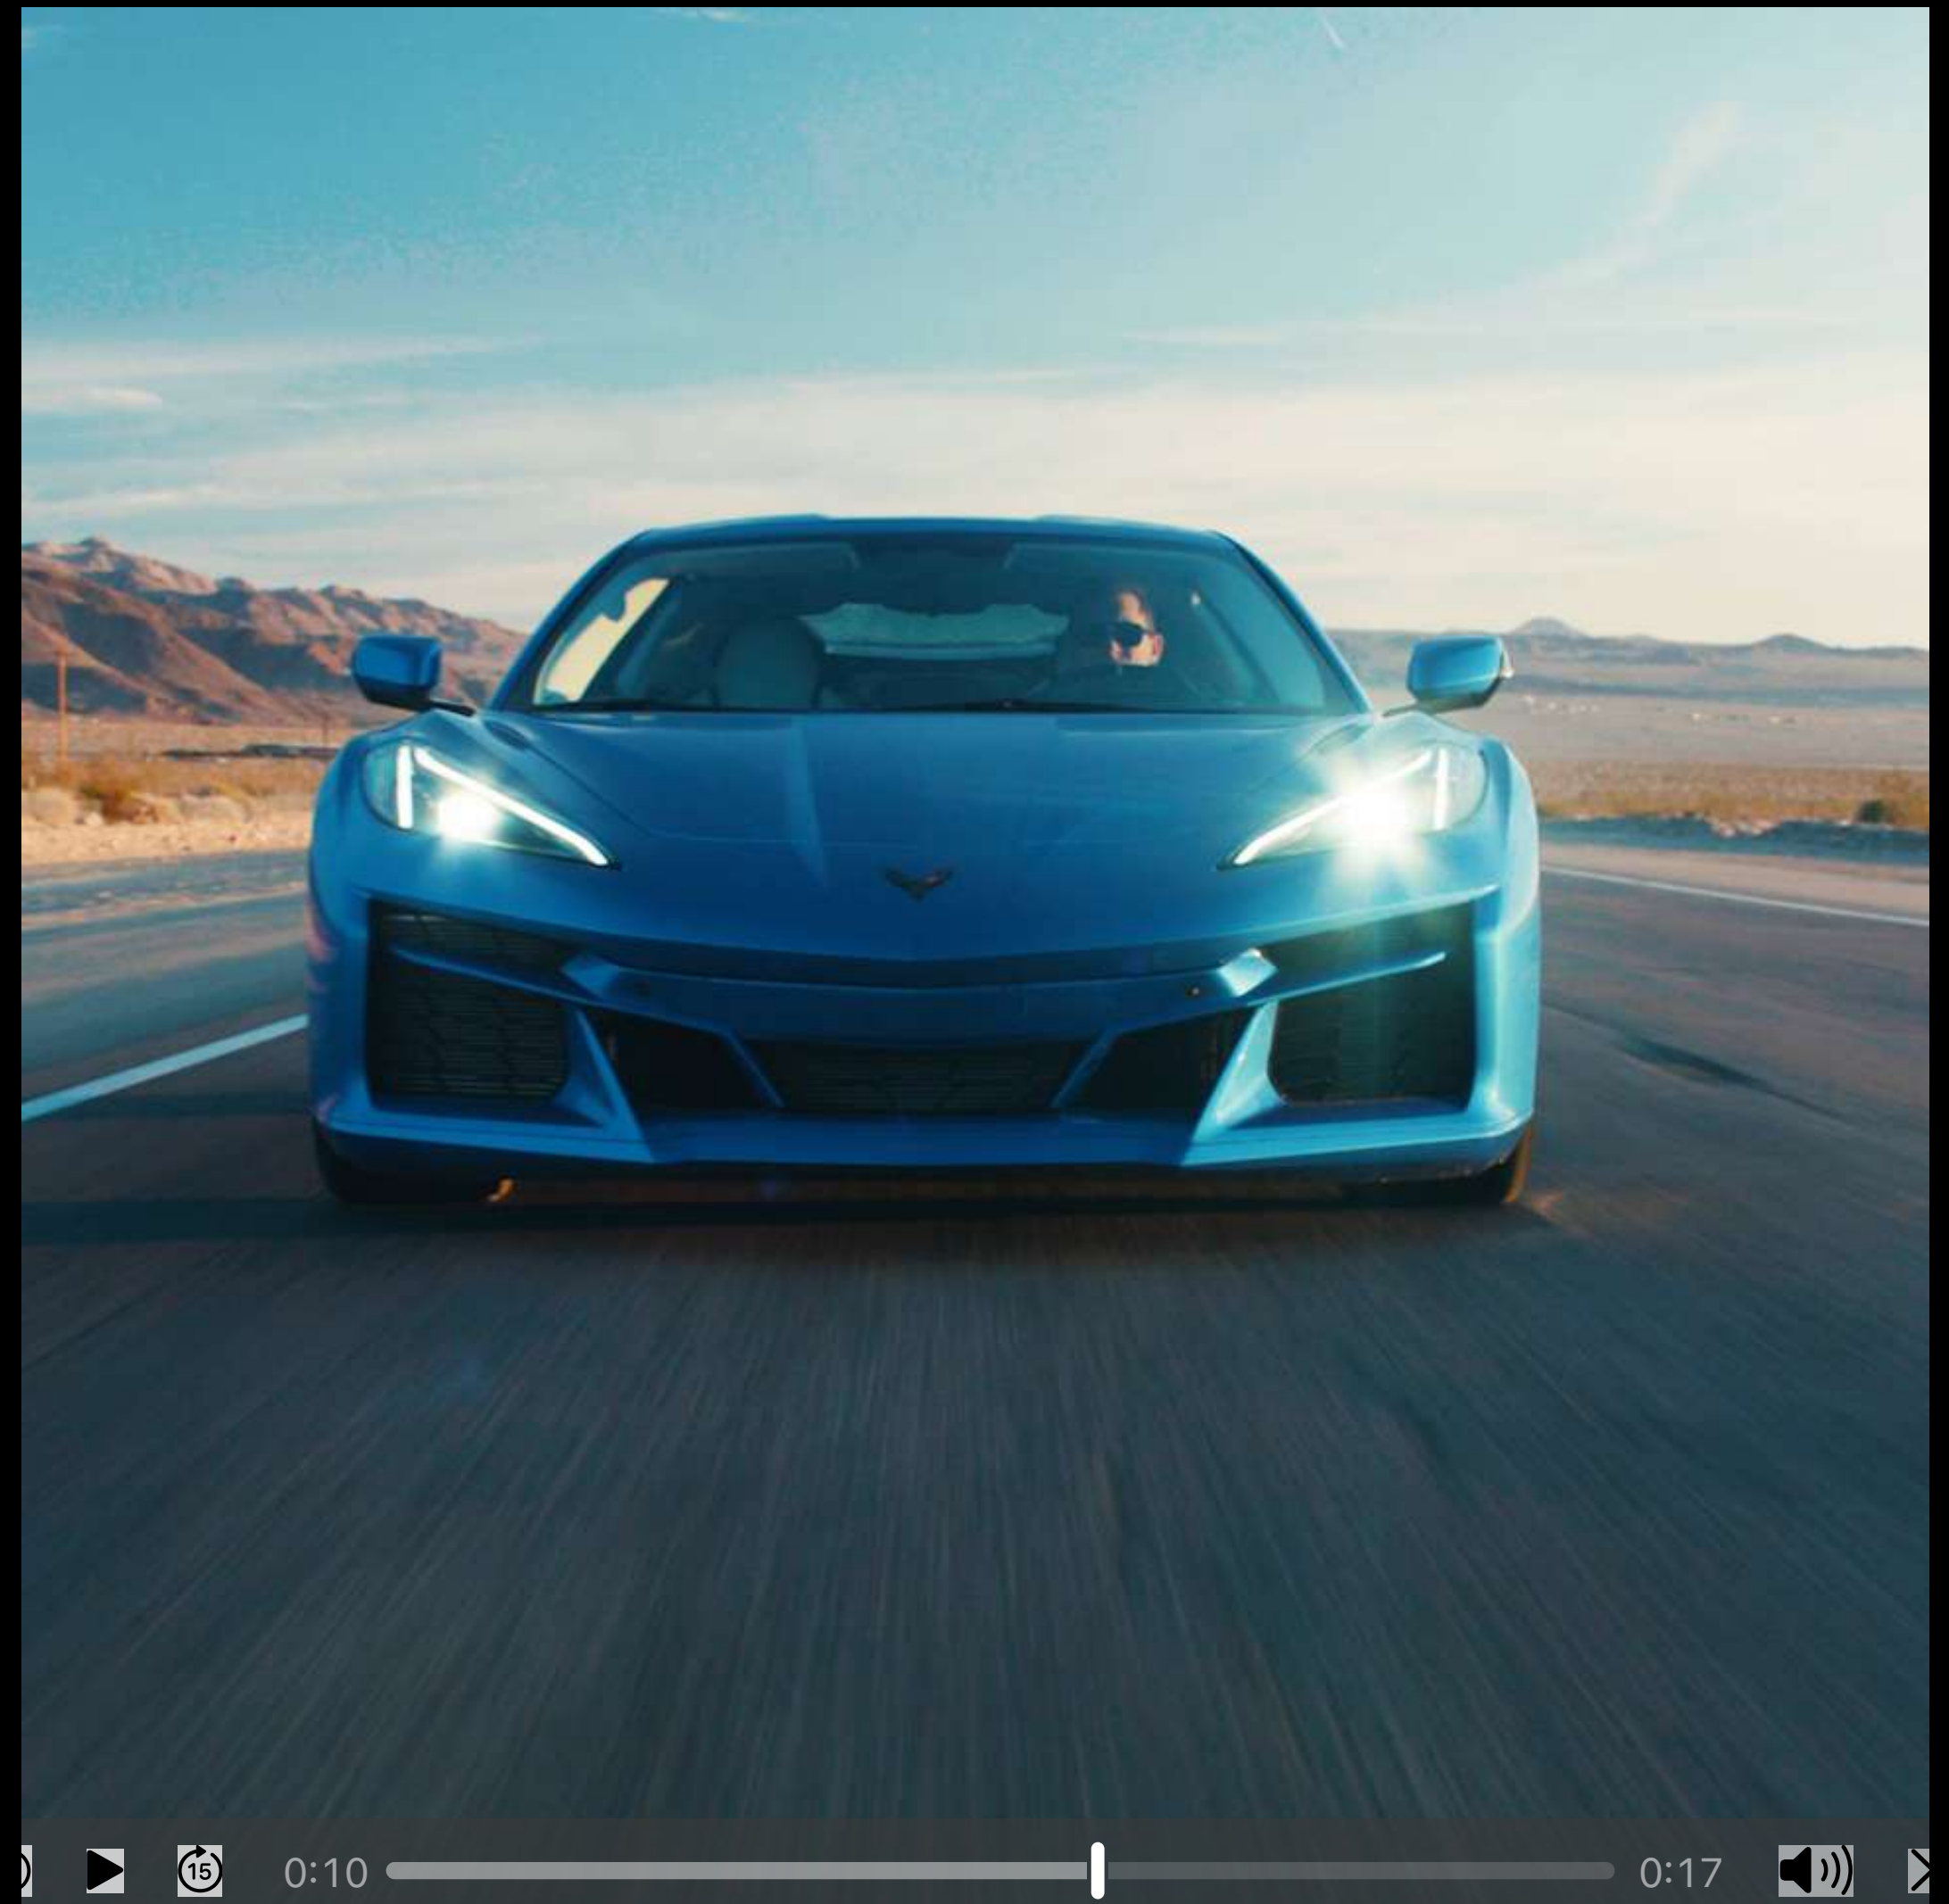

Together
let's drive™

Introduction

One Like None.

For over 70 years and spanning across 8 generations, Corvette continues to innovate time and time again. And now, it's been electrified with an original e-AWD system that works in tandem with its LT2 V8 engine to give it the quickest 0-100 km/h (0-60 miles) in 2.6 seconds.

This is the fastest time ever for this legendary nameplate. But this latest Corvette isn't simply made for performance. It's made for touring too with Magnetic Selective Ride Control™, for a supremely comfortable drive on all roads.

Performance

Take on the conditions.

Designed for year-round performance, E-Ray and its electrified AWD capability is always up for a challenge. But this luxury GT wasn't simply created to hug the curves of Mother Nature alone. With technology inspired by the C8.R race car, F1, and Le Mans prototypes, the Corvette E-Ray is a powerful force to be reckoned with on the road.

FEATURE HIGHLIGHTS:

- Standard e-AWD
- 0-100 km/h (0-60 Miles) 2.6 seconds¹
- 655 combined HP²
- Quarter-Mile 10.5 seconds¹

1. Based on initial vehicle movement. 2. 495 horsepower from LT2 6.2L V8 engine plus the 160 horsepower from the e-AWD (electric drive unit).

CORVETTE E-RAY

LT2 V8 ENGINE

With 495 horsepower and 637 NM (470 lb-ft) of torque, this 6.2L small block powerhouse is designed to thrill on every drive, on both road and track, and contributes to an overall 655 horsepower.¹ It features eight equal length intake runners of 210 mm to maximize torque and airflow. A dry sump oil scavenge system uses three pumps to ensure oil quality and flow to critical areas during high g-force cornering and acceleration.

¹ 495 horsepower from 6.2L LT2 V8 engine plus the 160 horsepower from the e-AWD (electric drive unit).

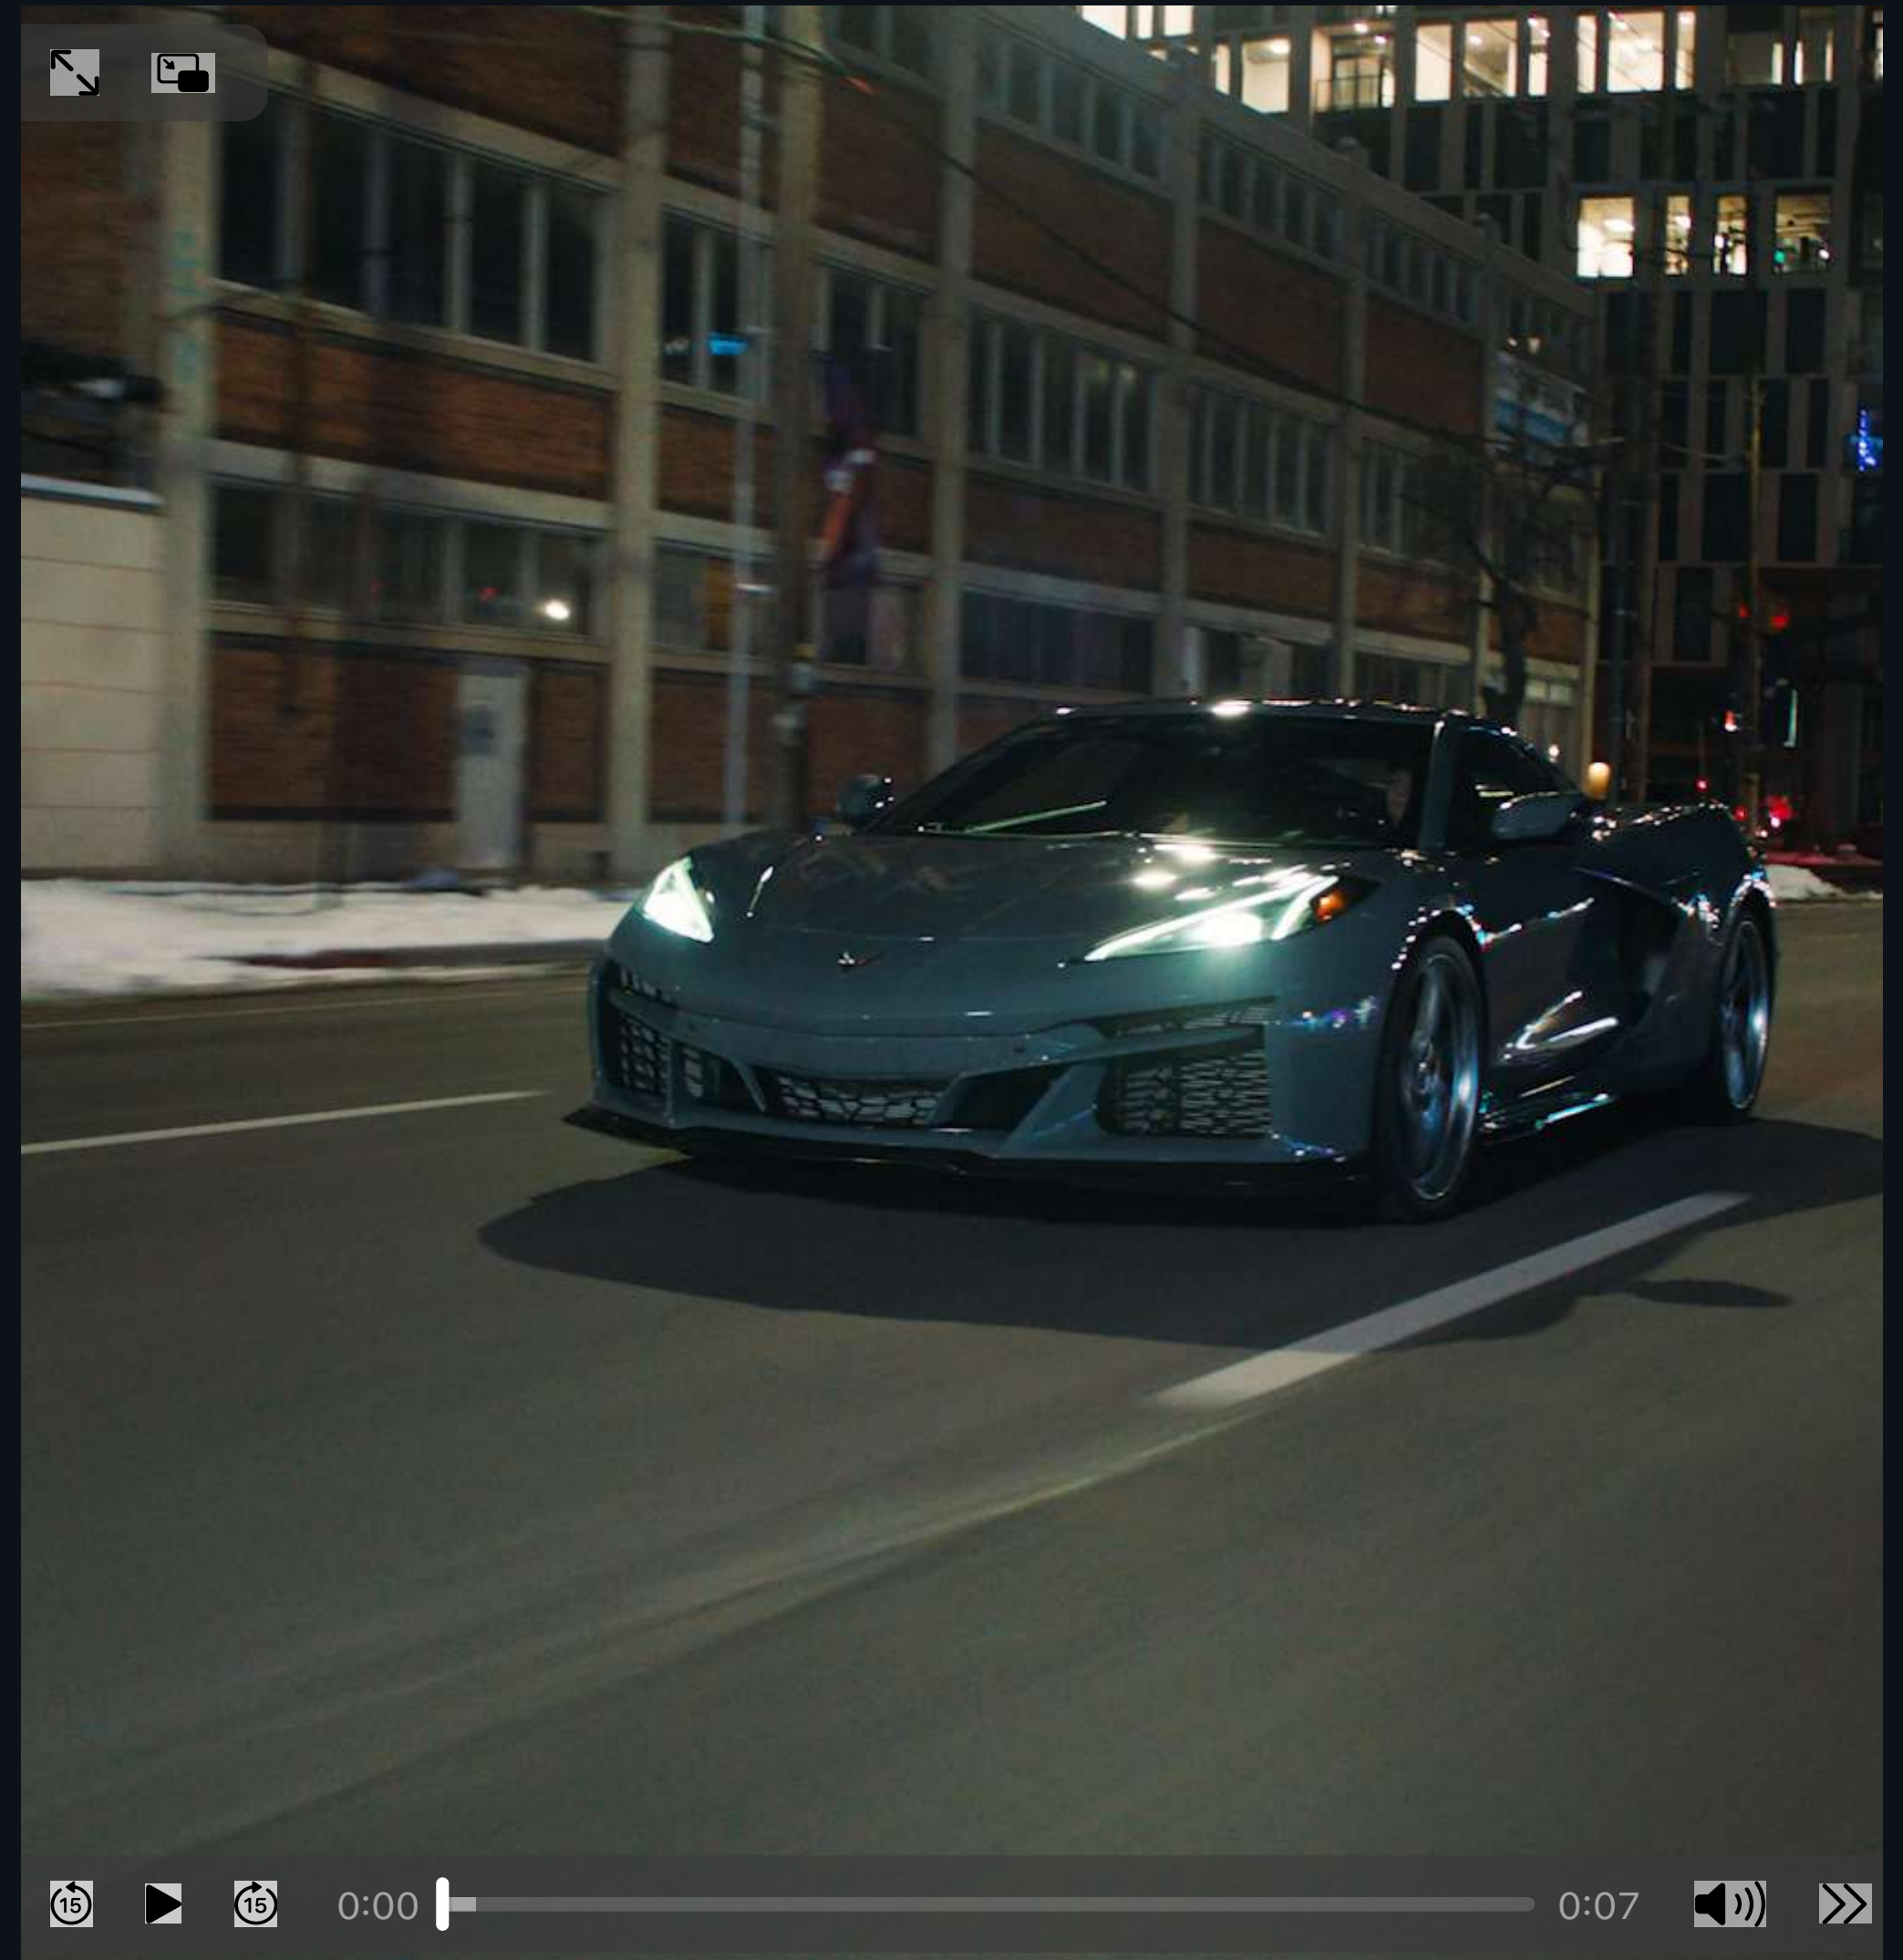

LT2 V8 ENGINE

Performance

Stealth Mode: an electric drive for street rides.

Leave the neighborhood quietly with Stealth Mode, which utilizes the electric drive unit to let you drive 5–6.4 km at up to 72 KM/H using only electric power directed to the front axes.

Performance

The power within.

Unlock the ZER package.

When you're ready for even better performance, you'll need the available ZER Performance Package. It comes standard with the high-performance Michelin® Pilot® Sport 4 S ZP summer-only tires¹ as well as chassis tuning and other performance enhancements.

1. Do not use summer-only tires in winter conditions, as it would adversely affect vehicle safety, performance and durability. Use only GM-approved tire and wheel combinations. Unapproved combinations may change the vehicle's performance characteristics.

Design

The face of change.

E-Ray features a host of functional design elements, adding wider fenders, quarter panels and fascias. The result is a sleek, sculpted presence with a number of aerodynamic and performance benefits. Standard ground effects and the spoiler contribute further to its aerodynamic prowess, while the matching body-color accents provide a refined look.

Technology

Your Corvette command center. Driver Information Screen.

Keeps you in the know about the vehicle's battery power in addition to a host of performance parameters.

Technology

Performance data recorder.

Become one with the car with this digital driving coach. Capture acceleration speed, braking, gear choice, sound and more in crisp 1080hp, helping you improve lap times.

Connected to the road ahead with OnStar^{®1}

Experience the amazing in-vehicle connected technology of OnStar^{®1} in the Corvette, now with 3 years of OnStar^{®1} Connect Plan².

OnStar^{®1} connected services will keep you seamlessly connected to your Corvette – feel the power of remote commands at your fingertips. Stay entertained with all your favorite content for the road ahead.

With over 25 years experience in delivering in-vehicle services, OnStar^{®1} gives you added peace of mind knowing that a trained advisor³ is ready to help 24/7.

Take the same connectivity and entertainment that you love and enjoy at home with you on your travels, thanks to a robust built-in 4G LTE Wi-Fi⁴ that delivers a fast and dependable experience, making it utterly seamless.

The electrification of Corvette, with leather throughout, 3LZ is the ultimate expression of luxury and performance:

- Removable roof panel
- Standard Carbon Ceramic brakes
- Magnetic Selective Ride Control™
- Head-Up Display
- Performance Data Recorder
- GT2 seats with Napa leather and carbon-fiber trim
- Custom leather-wrapped interior
- Leather-wrapped door panels
- Sueded microfiber-wrapped upper interior trim
- Carbon-fiber steering wheel trim and paddles
- Bose® Performance Series system with 14 Speakers
- Side Blind Zone Alert, Rear Cross Traffic Alert and HD Front and Rear Vision Cameras¹

It is important to check with your local Chevrolet Dealer for the latest information on models available for order in your market. 1. Safety features are no substitute for the driver's responsibility to operate the vehicle in a safe manner. *The driver should remain attentive to traffic, surroundings and road conditions at all times. Read the Owner's Manual for more important safety information.

Due to global Semi-Conductor supply shortages and software issues, GM vehicles may not have some standard features and options. Please check with your local Chevrolet dealer to confirm the vehicle's specifications prior to purchase. Vehicles not equipped with Automatic Stop/Start will be less fuel efficient.

Accessorize your Corvette.

Designed, engineered, tested, and backed for your vehicle. Enhancing the performance and intensifying the design of the Corvette.
