PERFORMANCE

LET'S TAKE THIS SHOW ON THE ROAD.

Delivering 310 horsepower, the **3.6L V6 engine** is paired with a 9-speed automatic transmission for effortless performance. There's also stop/start technology which, in certain conditions, allows the engine to automatically shut off when the brake is applied and the vehicle comes to a stop. When the brake is released, the engine automatically turns back on. With available¹ factory-installed trailering equipment, you can **tow up to 2268 kg (5000 lb.)²**

Traction Mode Select offers up to four modes and lets you adjust performance based on road and surface conditions with the simple turn of a dial. FWD is your setting for everyday driving and the best fuel efficiency; Off-Road (AWD models only) sends more torque to the rear wheels; 4x4 (AWD)/Snow (FWD) helps offer better control when snow and ice make road conditions slippery; and Tow/Haul (if properly

equipped) helps keep Traverse in a lower gear, offering more torque when you're pulling a trailer.

Available **switchable all-wheel drive** helps enhance traction and control on slippery or snow-covered roads. You can leave it on year-round, since the rear wheels only engage when the system senses reduced traction.

In FWD mode, AWD components completely disengage for greater fuel efficiency.

High Country offers an **advanced twin-clutch all-wheel-drive** system that helps improve driver control by independently directing torque to the rear wheel with the best traction in poor road conditions.

¹ Standard on LT and above, not available on LS. ² Before you buy a vehicle or use it for trailering, carefully review the Trailering section of the Owner's Manual. The weight of passengers, cargo and options or accessories may reduce the amount you can tow.
