Also remember that your actual highway mileage will probably be less than the EPA estimated highway fuel economy.

DATSUN CARS AND TRUCKS. THE GREATEST ECONOMY OF ALL: QUALITY.

Year in and year out, our demand for improvement, our drive for quality increases.

Because we are dedicated to perfection—driven to excellence.

Every Datsun is designed to live a long, challenging life. There are no short cuts, no easy outs.

The tools are as modern as computer modeling and as ageless as human ingenuity.

The designers and engineers discover what you want—and what the world needs. Then they calculate and compute, draw and mold, plan and execute—until they have a prototype that meets their most demanding demands.

They test and reject. Refine and rebuild. Until they're certain the car's purpose is flawlessly realized.

Then they build. Nothing is spared. Every process that can be automated and computerized, is automated and computerized. There is simply no room for compromise.

And even though Datsuns are built on the world's most automated assembly line, they are not rushed like cookies through a cutter. It takes three times longer to build the average

Datsun as it takes to build the average domestic car.

In competition, Datsuns were born to perform. In America, Datsun has virtually dominated its class in every race and rally in which it was active for ten straight years. Last year alone, Datsun won first place 414 times.

We maintain one of the largest import car parts warehouses in the United States, plus additional warehouses strategically located throughout the country.

A highly sophisticated computer network makes sure your dealer has the part you need should you need it.

That goes for expert service, too. Your dealer's highly trained service staff is constantly being updated with new advancements in automotive technology.

You can buy or lease a Datsun secure in the knowledge that Datsun's dedication to quality runs deep.

All the way from the people who build Datsun cars and trucks, to the Datsun dealer near you who services them.

After all, that's what "We Are Driven!" means.

DATSUN WE ARE DRIVEN
