

#### CRUISE CONTROL:

The cruise control allows you to maintain a desired speed without using the accelerator. However, the speed can be increased or decreased and cancelled or reinstated at any time by using either the pedals or the indicator stalk.

(Speed limiter shown above not available in the UK)

#### ESP SYSTEM:

ESP monitors the car's progress through a bend and, if oversteer or understeer is detected, automatically modifies the engine's torque and applies one or more of the brakes to maintain stability and control.

(Standard on 1.6 HDi 16V 110hp and 2.0 i 16V auto models)

#### EBA - ABS - EBD:

Emergency Braking Assistance, combined with ESP maximises the application of the brakes when strong braking is initially detected. Any risk of wheel locking is avoided thanks to the ABS and the Electronic Brakeforce Distribution. (EBA is only available with ESP)

#### AUTOMATIC ILLUMINATION OF HEADLIGHTS:

A light sensor automatically activates the headlights when low light conditions are detected (such as tunnels, underground car parks, at sunset or night etc).

(Standard on Exclusive models)

#### 1.6 HDi 16V 110 HP: A DYNAMIC ENGINE

This "all aluminium" engine provides an astonishing power to weight ratio and gives the Xsara Picasso smooth acceleration and simply outstanding performance (90% maximum torque available at 1500 rpm).

#### 1.6 HDi 16V 110 HP: AN ECONOMICAL ENGINE

From the new generation Common Rail injection system, the variable geometry turbo provides remarkable fuel economy together with enhanced performance.

#### 1.6 HDi 16V 110 HP:

##### AN ENVIRONMENTALLY FRIENDLY ENGINE

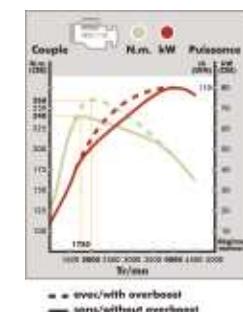

Environmentally friendly thanks to its low consumption and to its high pressure injection technology, the engine provides the optimum mixture of air and fuel and therefore optimum combustion. The better the fuel burns, the cleaner the emissions. In addition, it is equipped with a diesel particulate filter system (DPFS) that "traps" carbon particulates responsible for "black smoke" and eliminates them periodically with high temperature combustion.

#### 1.6 HDi 16V 110 HP: AN OVERBOOSTED ENGINE

This 16V engine which gives a high degree of flexibility and good acceleration at low revs, provides a maximum torque of 177lb.ft at 1750 rpm and an "overboost" function for optimum acceleration when needed (for example when overtaking). This "overboost" function gives an additional 8% engine torque.

#### THE COMPLETE RANGE OF ENGINES

Petrol: 1.6i, 2.0i 16V combined with the auto-adaptive sequential automatic gearbox -  
Diesel : 1.6 HDi 16V 90 hp and the 1.6 HDi 16V 110 hp with a diesel particulate filter system (DPFS).

#### AN IDEAL DRIVING POSITION:

An ergonomic driving position and cleverly designed dashboard with all controls and instruments to hand.

#### SPACIOUS STORAGE:

A very roomy glove box – nearly 15 litres – air conditioned on Exclusive models – and a storage compartment positioned at the base of the centre console.

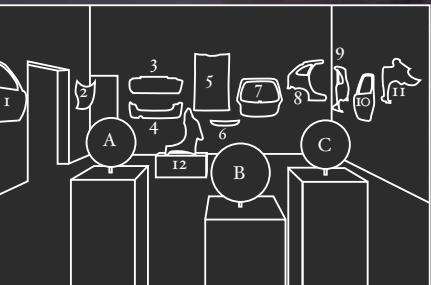

#### PLenty OF STORAGE:

There's a huge storage drawer tucked under the driver's seat – 2 lidded storage areas on the dashboard – wide storage compartments are present in all 4 doors, each with space for 1.5 litre bottle.

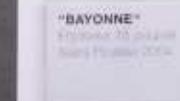

#### CLEVER STORAGE:

Aircraft-style tables with cup holders are fitted on the backs of the front seats – storage compartments with lids are built into the floor for rear passenger use.
