

CHRYSLER 05 CROSSFIRE

CHRYSLER

Crossfire SRT6 Coupe in Sapphire Silver Blue Metallic and SRT6 Roadster in Graphite Metallic

Chrysler inspiration.
Standard on every model of Crossfire we build.

SRT6 ROADSTER AND SRT6 COUPE

Crossfire, with more fire

ROADSTER LIMITED AND ROADSTER

Wide-open inspiration

COUPE LIMITED AND COUPE

The new shape of exhilaration

Can inspiration blur the line between technology and exhilaration? Can an automobile be more than the sum of its parts? Can inspiration defy conventional thinking? Shouldn't a car do more than merely satisfy the ego? Can a coupe look as good as a roadster,

and vice versa? Can inspiration be stylish at any speed? Is there a car company out there that has dreams, then turns them into reality? Yes, to all of the above. Chrysler Crossfire Coupe and Roadster.

CROSSFIRE SRT6

Crossfire, with a significant increase in fire. Feel the power from the 330-hp supercharged engine. Combustion: six pistons erupt, pumping 3.2 liters of high-octane heat through 18 valves. Boom—at an Autobahn-tested 158 mph, the notion of mundane is swept away in its slipstream. Can inspiration go from zero to 60 in about five seconds? Crossfire SRT6 launches with a fervent **yes**.

The AutoStick® fluidly surfing through all five gears, causes a wake in the palm of your hand. Aggressively programmed Electronic Stability Program (ESP) coupled with performance-tuned suspension, leaves potholes feeling ignored and pitched, wet curves feeling flat.

Electronic Stability Program (ESP): No system, no matter how sophisticated, can repeal the laws of physics or overcome careless driving actions. Performance is limited by available traction, which snow, ice and other conditions can affect. When the ESP warning lamp in the speedometer flashes, the driver needs to use less throttle and adopt speed and driving behavior to prevailing road conditions. Always drive carefully, consistent with conditions. Please always wear your seat belt.

Crossfire SRT6 Coupe in Sapphire Silver Blue Metallic

Crossfire SRT6 Roadster in Aero Blue

The fixed rear spoiler, exclusive to SRT6, helps provide optimal aerodynamics, balancing front and rear lift. The four-channel all-wheel ABS engages at a rate of 30 times per second to prevent wheel lockup and to better maintain directional stability. The performance tuning of both the front double-wishbone and independent five-link rear suspension systems makes for quick reflexes and wheel guidance.

Supercharging Crossfire's standard 90-degree, all-aluminum SOHC V6 engine means a significant increase in horsepower without a corresponding increase in engine displacement. Which translates to a blistering 0-60 mph in about five seconds. Three-valve technology and dual ignition work in unison to keep torque high; 98 percent of maximum torque is available between 3,000 and 5,500 rpm.

CROSSFIRE ROADSTER

It's like hearing the sun begin to shine, and being able to touch the breeze.

Touch the switch and let the world in. The power top vanishes under a hard tonneau.

Roadster's sculpted body remains unfettered, and you're ready to give the open road another 215-hp massage. Can inspiration summon heaven and earth at the touch of a button? Crossfire Roadster gives a wide-open **yes**.

Crossfire Roadster is a source of passion and ingenuity. Every detail is subject to exacting scrutiny. By pairing Roadster's world-class structural rigidity with such advanced systems as the electric-over-hydraulic power top, two-stage seal and weather-strip management, and the strong composition of soft-top material, the noise and vibration factor has been virtually eliminated, delivering a smooth, quiet and solid convertible.

Crossfire Roadster Limited in Sapphire Silver Blue Metallic

Crossfire Roadster Limited in Classic Yellow

A lock/unlock D-handle is centrally located at the front bow; one simple turn releases the top from the frame and lowers the windows. Touch a button and the top automatically lowers. And by continuing to depress the button, you bring the windows back up. With its race-car-inspired wheels and sports bars, Crossfire Roadster proves that black is anything but basic.

Crossfire Roadster shown in Black

CROSSFIRE COUPE

Can inspiration turn the competition green with envy? Crossfire Coupe answers with an unswerving yes. Proof comes from its world-class 50.4 Hz body torsional stiffness. And the Electronic Stability Program linked to all-speed traction control helps to keep slippery slopes docile and corners humble.

Crossfire Coupe. The expression of inspired engineering.

The vivid boat-tail design, dual exhaust tips, the active rear spoiler and the aggressive stance is its architecture. Available leather-trimmed interior with a multitude of power amenities is its décor. And the 215-hp 3.2-liter V6 engine is what drives this new American dream machine.

Electronic Stability Program (ESP): No system, no matter how sophisticated, can repeal the laws of physics or overcome careless driving actions. Performance is limited by available traction, which snow, ice and other conditions can affect. When the ESP warning lamp in the speedometer flashes, the driver needs to use less throttle and adapt speed and driving behavior to prevailing road conditions. Always drive carefully, consistent with conditions. Please always wear your seat belt.

Crossfire Coupe Limited shown in Sapphire Silver Blue Metallic

Crossfire Coupe Limited in Sapphire Silver Blue Metallic

Crossfire Limited exudes the confidence that comes with being the leader of the coupes. Complete with the best of what Crossfire stands for, leather-trimmed seats, semi-automatic temperature control and a whole host of power amenities. Finished in Satin Silver, Crossfire's signature longitudinal spine tops the shift lever of the available 5-speed automatic with AutoStick.®

Crossfire Coupe in Black Clearcoat

Crossfire Coupe comes dressed with a sleek Black Clearcoat, cloth seats, 18-inch front wheels and muscular, 19-inch wheels in the back. And true of the entire Crossfire suite of cars, its structural rigidity is race-car-like, providing a solid platform for the suspension, and allowing it to be tuned for both a comfortable ride and world-class handling and performance.

Crossfire Roadster Limited interior in Dark Slate Gray Leather Trim

INTERIOR DETAILS

Limited's cockpit is shrouded in premium leather-trim and Satin Silver accents. But it is well equipped with more than just atmosphere. Such as the 240-watt Infinity™ Modulus™ sound system, eight-way, power heated driver's seat, a telescoping steering column and Dual Zone Temperature Control.

The center console is easy to read and reach; and the centrally mounted switches control power mirrors and windows, the heated seats and central locking in your Limited or SRT6. The gauge cluster's bezel, elegantly trimmed in Satin Silver, is wrapped around SRT6's 200-mph speedometer.

PERFORMANCE AND HANDLING

Can rear-wheel drive put inspiration into all four wheels? Yes, yes, yes, and yes.

Staggered wheel sizes: 18-inch front for precision steering, 19-inch rear to deliver power to the pavement. And an independent double-wishbone front and independent five-link rear suspension for stability at high speeds.

The nimble Crossfire, with lateral acceleration approaching 1g, corners with exceptional ease and grace. The standard performance tires are as gripping as a great suspense novel, while all-speed traction control issues a restraining order to inclement driving conditions. Take the same control over your rpm with the rod-actuated six-speed manual,* or the available five-speed* automatic with AutoStick® for clutchless manual shifting.

*Six-speed manual, standard on Crossfire and Limited. Five-speed automatic with AutoStick, standard on SRT6 and available on Limited.

Tuning the shapes of the front fascia, rear spoiler and rear underbody diffuser means that both Coupe and Roadster provide optimal aerodynamic balance. And a rear spoiler helps balance front and rear downforce at high speeds. But through all our technology calculated to save fuel and maintain control, Crossfire is also well prepared for "what if." Energy-absorbing structures and fuel tank designs were engineered not just for government-regulated crash tests, but a more stringent requirement: our own.

DESIGN AND ENGINEERING

While impeccably assembled by one of Europe's master coach builders, our thinking goes far beyond aesthetics. The cast-aluminum V6 is placed for optimal weight balance, and weighs 65 pounds less than a competitor's engine with the same displacement. Can metal be sculpted to please both form and function? Crossfire says yes, by design.

CROSSFIRE TOURING GEAR

Available high-performance travel gear, designed specifically to fit in the cargo area, maximizes available space. (See your dealer for details.)

What is inspiration? It's innovations, technology, and soul-stirring designs, completely and wonderfully intertwined. It's putting new ideas in your driveway, while other carmakers are still sculpting theirs in clay. It's knowing that building vehicles in financial reach is every bit as essential as reaching for the stars. Can this kind of inspiration be the driving force behind an entire company? It is, right now. Chrysler. Inspiration comes standard.
